BY COMMAND

SESSIONAL PAPER No. 24

ONTARIO

TORONTO
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty, 1944

April 3rd, 1944.

TO THE HONOURABLE ALBERT MATTHEWS,
Lieutenant-Governor of the Province of Ontario in Council

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to transmit herewith the Thirty-eighth Report of the Ontario Municipal Board for the year ending December 31st, 1943.

Respectfully submitted,

G. H. DUNBAR,
Minister of Municipal Affairs.

Parliament Buildings,
Toronto.

April 3rd, 1944.

Re Thirty-eighth Annual Report.

Dear Sir:

I have the honour to send you herewith the Thirty-eighth Annual Report of the Ontario Municipal Board to December 31st, 1943.

Your obedient servant,

M. B. SANDERSON,
Acting Secretary.

The Honourable G. H. Dunbar,
Minister of Municipal Affairs,
Parliament Buildings,
Toronto.

M. B. SANDERSON	ACTING SECRETARY
J. A. McDONALD	INSPECTOR OF TELEPHONE SERVICE

THIRTY-EIGHTH ANNUAL REPORT

OF THE

Ontario Municipal Board

To December 31st, 1943

PRESENTED TO THE LEGISLATIVE ASSEMBLY

BY COMMAND

THIRTY-EIGHTH ANNUAL REPORT

OF THE

Ontario Municipal Board

To December 31st, 1943

In pursuance of Section 108 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60), the Ontario Municipal Board beg leave respectfully to submit their Thirty-eighth Annual Report.

"THE ONTARIO MUNICIPAL BOARD ACT"

Since the revision of the Statues of Ontario in 1937, "The Ontario Municipal Board Act" was amended by Statutes of Ontario, 1938, Chapter 37, Section 18; 1939, Chapter 47, Section 26; 1940, Chapter 20 and 1941 Chapter 40. See also Ontario Statutes 1942, Chapter 34, Section 41 and Section 42 (6), and Ontario Statutes 1943, Chapter 15, Sections 1 and 2 and Section 11.

APPLICATIONS TO THE BOARD

There were 1027 applications to the Board during 1943 (exclusive of Public Vehicle and Public Commercial Vehicle License applications), and in regard to these and applications not disposed of in 1942, 155 public hearings were held. The applications included a great variety of matters falling within the jurisdiction of the Board and those granted are set out in a list contained in the "Abstract and Summary" appended to this Report, indexed under "Orders Issued by the Board." Copies of formal Decisions issued are also contained in the Abstract and Summary, indexed under "Decisions of the Board" and also under the names of the Parties.

SITTINGS OF THE BOARD

The Board held meetings for the transaction of routine business and the disposal of applications every juridical day throughout the year. Many of these applications, though dealt with informally and disposed of without the necessity of Hearings, entailed in many instances a considerable amount of inquiry and consideration on the part of the Board, especially those coming under the provisions of Section 70 of the Board's Act, which section requires all capital undertakings and expenditures therefor by Municipalities to be approved by the Board.

REVENUE

By Ontario Statutes, 1939, Chapter 47, Section 26 (3), Section 107 of "The Ontario Municipal Board Act," being the section respecting the Board's fees, was repealed and re-enacted. The new section came into effect on the 27th day of April, 1939, and the fees are now payable in cash ON THE APPLICATION instead of Law Stamps on the Board's Order.

During 1943, the Board's fees on applications amounted to $16,559.35. In this amount is included the fees on applications for Public Vehicle and Public Commercial Vehicle Licenses —collected by the Department of Highways and credited to the Board.

APPROVAL OF UNDERTAKING OF CAPITAL EXPENDITURES BY MUNICIPALITIES

(Section 70 of "The Ontario Municipal Board Act" R.S.O. 1937, C. 60),

(Subsection (3) re-enacted O.S. 1940, C. 20, s. 4),

(Subsection (1) amended O.S. 1941, C. 40, s. 3).

On the 18th April, 1935, legislation came into effect whereby a Municipality is prohibited from exercising any of its powers to proceed with, authorize or provide any moneys for any undertaking, work, project, scheme, act, matter or thing, the cost of, or any portion of the cost of which is intended or required to be provided or raised by the issue of debentures of the Municipality, until the approval of this Board is first obtained. This enactment overrides the provisions of any general or Special Act and necessitates a great many applications to the Board. A list of these applications granted will be found in the Summary, included in the list indexed under "Orders issued by the Board."

Five hundred and fifty-one applications in respect to proposed expenditures totalling $11,516,178.04, were considered by the Board. It should be noted, however, that since Municipal representatives are now aware of the fact that they must obtain the Board's approval of proposed capital undertakings, a large percentage avail themselves of the opportunity of discussing their proposed borrowings with the Board and in many instances are advised that the Board would not be willing to grant approval. Accordingly formal applications in these instances are not filed and do not show in the Board's records.

It should also be noted that the existence of this legislation gives the Board an opportunity to advise and control with regard to the type and term of the debentures to be issued. In this connection the Board has pursued the policy of approving only instalment debentures as opposed to sinking fund debentures and, believing that the saving of interest effected thereby accrues to the benefit of the municipal ratepayers, is generally requiring the term of repayment to be shorter than formerly.

The following list, (generally speaking), shows the maximum debenture term allowed by the Board under this restrictive policy:—

Sidewalks	10 years
Curbs and Gutters	10 years
Pavements	10 years
Watermains	15 years
Sanitary Sewers	15 years
Trunk Sewers	20 years
Buildings, including School	20 years

A recital in the debenture by-law of the Board's approval under said Section 70 is obligatory, pursuant to an amendment passed at the 1939 Session of the Legislature (Chapter 30, Section 17) adding paragraph (e) to subsection (1) of Section 305 of "The Municipal Act."

APPROVAL OF RATEPAYERS

By Section 59 (f) of "The Ontario Municipal Board Act" the Board is given power to direct that before any approval is given to the exercise of any powers by a Municipality or to any By-law passed by it, the assent of the electors thereof or of those qualified to vote on money by-laws shall first be obtained, notwithstanding such assent is not otherwise requisite. By virtue of this legislation the Board is continuing its policy, adopted in 1938, of insisting that major capital expenditures, the cost of which would be met out of general rates, be submitted to the ratepayers for their approval before being presented to the Board, and further the Board is of the opinion that a representative vote can be taken only at the same time as the municipal election. The result of this policy in many instances has been the rejection of the proposed expenditure by the ratepayers.

ANNEXATIONS

Pursuant to Section 20 of "The Municipal Act" (R.S.O. 1937, C. 266) the Board considered three applications for annexation, and one application pursuant to Section 23 of the same Act as re-enacted by Ontario Statutes 1939, Chapter 30, Section 2. The last mentioned legislation also provides for amalgamation of Municipalities and requires a Special Act of the Legislature to validate the Board's Order.

ARBITRATIONS

In 1943 the Board acted as Arbitrators in connection with five applications, two of which were made pursuant to Section 79 of "The Highway Improvement Act" for the fixing of compensation to be paid to the Claimants for property expropriated in connection with construction of the King's Highways, where the amount could not be arranged between the Parties, and two pursuant to Section 79 (a) of the same Act (as enacted by Section 7, Chapter 19, O.S. 1939) which provides for the closing by the said Department, with the Board's approval, of any road which intersects or runs into a divided highway. The other application was made pursuant to "The Power Commission Act."

SUPERVISED MUNICIPALITIES

Pursuant to the provisions of Section 32 of "The Department of Municipal Affairs Act" (R.S.O. 1937, C. 59), the Board during 1943 issued an Order placing all the financial affairs of the Corporation of the Township of Teck under the control and supervision of the Department of Municipal Affairs, and considered and approved plans for funding and refunding the bonded indebtedness of the Town of Penetang and the Roman Catholic Separate School Board of the City of Windsor; also an amendment to Interim Plans of the Essex Borders Utilities Commission, the Town of LaSalle, and the Townships of Sandwich East and Sandwich West.

EXTENSION OF PUBLIC UTILITIES

(Section 407 (2) of "The Municipal Act")

During 1943, the Board approved of extensions to Public Utilities in an amount totalling $165,894.00, covering eleven applications. These are shown in the Summary in the list of "Orders issued by the Board."

FLOATING INDEBTEDNESS

(Section 59 (d) of Part IV, R.S.O. 1937, C. 60,) (as re-enacted by O. S. 1939, C. 47, s. 26 (1).)

Under this legislation the Board issued Orders in 1943 in respect to one Municipality, authorizing a debenture issue of $130,000.00. It should be noted that this meant a considerable saving of expense to the Municipality concerned, as a Special Act of the Legislature would otherwise have been necessary.

RETIREMENT OF UNMATURED DEBENTURES

(Section 59 (dd) of Part IV, R.S.O. 1937, C. 60, as enacted by O. S. 1939, C. 37, s. 26 (1).)

Ten Municipalities took advantage of this legislation, which came into effect on April 27th, 1939, and applied to the Board for authority, without assent of the electors, to retire certain of their debentures redeemable before maturity. The total amount authorized by the Board was $6,237,338.32.

ASSESSMENT APPEALS

There were six Assessment Appeals to the Board during 1943, pursuant to Section 84 of "The Assessment Act" (R.S.O. 1937, C. 272), involving property assessed at $1,179,131.00. Of this number one appeal was withdrawn, formal hearings were held in regard to five (one of which was for argument only, a statement of facts, on consent, having been submitted). All of these appeals were dismissed.

Copies of the Board's written decisions will be found in the Summary, indexed under "Assessment Appeals," "Decisions of the Board" and also under the names of the Parties.

VALIDATION OF MUNICIPAL BY-LAWS AND DEBENTURES

(Section 64 of Part IV, R.S.O. 1937, C. 60)

Sixty-two applications were made to the Board in 1943 for validation of Municipal By-laws and certification of the debentures authorized thereunder. The total of such debenture issues was $9,300,203.86.

While purchasers of debentures are frequently satisfied with Orders of the Board under Section 70 of the Board's Act, it has been found, particularly in regard to the larger issues, that a further Order of the Board validating the By-law and providing for certification of the debentures, facilitates the marketing of the issue.

PLANS OF LAND SUBDIVISIONS

Under "The Planning and Development Act" (R.S.O.1937, C. 270), (amended O.S. 1941, C. 55, s. 24), "The Land Titles Act" (R.S.O. 1937, C. 174, Section 112) and "The Registry Act" (R.S.O.1937, C. 170, Section 83 (15)), seventy-one plans were presented to the Board for approval and certification.

PROVINCIAL RAILWAYS

Extensions to and improvements of Railways operating under Provincial Charter during 1943 as reported to the Board will be found in the Summary, arranged alphabetically under the names of the several systems reporting.

Annual Reports, to December 31st, 1943, by Railway Companies under the Board's jurisdiction were received, of which a summarized tabulation has been prepared for publication herein. The Board has no means of auditing these reports as received and cannot therefore guarantee that the figures taken therefrom are correct or accurate.

Under "The Railway Act" there were eighteen applications to the Board in 1943.

A tabulation of Accident Reports received by the Board from Provincial Railways during the year 1943 is included in the Summary and shows that thirty-four persons were killed and one thousand, six hundred and thirty-two injured during the year.

PUBLIC VEHICLE AND COMMERCIAL LICENSES

Pursuant to "The Public Vehicles Act" (R.S.O. 1937, C. 289), and "The Commercial Vehicle Act" (R.S.O. 1937, C. 290), no Public Vehicle or Commercial Vehicle License respectively, may be issued by the Department of Highways without the approval of the Board being first obtained as evidenced by a Certificate of Public Necessity and Convenience of the said Board furnished to that Department, and then only in accordance with such Certificate. Upon the granting of a Certificate by the Board the Department may then, in its discretion, issue or refuse a license.

The Board set aside twenty-two days during the year for hearing the applications for Certificates of Public Necessity and Convenience. In addition the Board has set aside each Friday morning to deal with the matter of transfers and other details brought before it by the Public Vehicle Division.

During the year thirty-three applications were made for Public Vehicle Licenses and Three hundred and thirty-three for Commercial Vehicle Licenses. These include applications for extensions to and clarification of existing licenses, and the following is a classification of these and the disposition made of same:—

	P.V.	A.	B.	C.	D.	E.	F.	G.	H.	School Vehicle	Total
Applications Received....	33	11	2	56	37	90	120	......	6	132	355
Applications Granted....	29	2	2	32	32	76	101	....	4	131	278
Applications Dismissed.	1	8	...	18	3	4	14	..	1	....	49
Applications Cancelled...	....	1	...	2	1	9	2	..	1	1	17
Applications Withdrawn	...	....	....	2	1	....	1	.	.	......	4
Applications Reserved....	3	....	....	2	....	1	2	...	...	......	8

In supporting an application before the Board the applicant may appear in person or be represented by his Solicitor, or, under exceptional circumstances, if unable to attend, may submit evidence in the form of letters, petition or affidavits. The Board hears and considers the evidence for and against and also takes into consideration the facilities extended by existing licensed operators and its decision is based on whether public necessity and convenience requires the service for which the application is made. The Board has required that sufficient evidence be filed with each application for a license or extension to a license to justify the application being listed for hearing. This has tended to shorten the list as well as to insure that applications are supported when listed for hearing.

All transfers of Public Vehicle and Public Commercial Vehicle Licenses are subject to the approval of the Board and care is taken to prevent anything that might appear to be trafficking in licenses. Transfers of important licenses are usually made the subject of a Hearing and evidence is heard for and against.

Through the co-operative efforts of the Department of Education and the Public Vehicle Division of the Department of Highways, an effort was made to have all motor vehicles carrying school children licensed under a school bus permit. These applications were dealt with by the Board and permits issued for which no fees were charged and the result has been that one hundred and thirty-two School Bus applications were received during the year. Of these one hundred and thirty-one were granted and one cancelled. The chief objective of this effort has been to require all such vehicles to carry insurance as provided by "The Public Vehicle Act."

During the year the Federal Government has exercised certain controls due to the exigencies of War:—

1. Administrator of Services—exercises a control over the licensing and operations of trucks in the interests of conservation of gasoline and rubber. The Board has conferred and collaborated with the Administrator and a representative of the Administrator attends the hearings of the Board on the applications for Public Commercial Vehicle Licenses. The Administrator of Services also exercises a control over any increase in rates of public utilities.
2. Transit Controller—exercises a control over Public Vehicle operations such as buses and street railways. The Controller is interested in conserving equipment, reducing non-essential travel, reduction in fares that might react in increased riding, and elimination of duplicating transportation agencies.

RESTRICTED AREAS

Under Section 406 of "The Municipal Act" (R.S.O. 1937, C. 266), (as re-enacted by O. S. 1941, C. 35, s. 13), the Board considered thirty-one applications for approval of Municipal By-laws placing restrictions on certain areas as to use of land, the erection and use of buildings thereon; also sixty-four applications for variation of restricted areas already established. The applications granted are shown in the Summary in the list of "Orders issued by the Board."

FORMS

The Board has (for distribution to parties interested) the following forms and specifications, namely:—

1. The Board's Rules of Practice and Procedure and Practice Forms.
2. Regulations, Specifications and forms respecting Railways.
3. Standard Specifications for Bridges, Viaducts, Trestles or other structures.
4. Memorandum of material required in support of application for approval of undertaking capital expenditure involving debenture issue, under Section 70 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60).
5. Forms of By-laws and Notices which may be used when carrying out the provisions of Sections 280 and 305 of "The Municipal Act" (R.S.O. 1937, C. 266) in respect to voting on Money By-laws.
6. Forms for Annual Reports by Railway Systems.
7. Forms for Reports as to Examination of Motormen.
8. Forms for Reports of Accidents by Railway Systems.
9. Directions for guidance of applicants under subsection (2) of Section 407 of "The Municipal Act."
10. Tariff of the Board's Fees.
11. Forms under "The Planning and Development Act" with directions for guidance of applicants thereunder.
12. "The Telephone Act."
13. Form of Annual Report to be furnished to the subscribers to a Telephone System established under Part II of "The Telephone Act."
14. Instructions for preparation of Annual Report as mentioned in No. 13.
15. Pamphlet containing information regarding Municipal Telephone Systems and including:—
    (a) Form of By-law providing for the establishment of a telephone system under Part II of "The Telephone Act."
    (b) Form of By-law providing for the issue of debentures to pay for the cost of establishing a telephone system under Part II of "The Telephone Act."
    (c) Form of Account for use by Telephone Companies using the "Discount System" of Collections.
    (d) Form of Municipal Debentures—Instalment Plan.

16. Form of By-law to regulate the management and operation of a telephone system established under Part II of "The Telephone Act" (draft form).
17. Draft Form of By-law to regulate the management and business of a telephone company.
18. Form of Petition praying for the establishment or extension of a telephone company under Part II of "The Telephone Act."
19. Form of By-laws granting to a telephone company the right to use the highways of a Township.
20. Form for Return by Municipality, operating a telephone system.
21. Form for Return by Company, etc., operating a telephone system.
22. Form for Tariff of Tolls for telephone system.
23. Form for Return by Telephone Companies required by Order of the Board to set up a reserve for depreciation.

MISCELLANEOUS MATTERS UNDER THE BOARD'S JURISDICTION

Copies of the Board's written Decisions and a list of Orders issued in 1943 appear in the Summary. These relate to:—

Annexations and amalgamations—Sections 16, 20 and 23 of "The Municipal Act."

Arbitrations—Section 79 of "The Highway Improvement Act," "The Grand River Conservation Act," and "The Power Commission Act."

Assessment Appeals—Section 84 of "The Assessment Act."

Assessments, Fixed—Section 405 (1), paragraph (b) of "The Municipal Act" (as re-enacted by O. S. 1941, C. 35, s. 12, s.s., (1).)

Bridges, Repairs to—Section 483 of "The Municipal Act."

By-laws approved—Section 59 (c) of "The Ontario Municipal Board Act"

Detachment of farm lands from urban Municipalities—Section 21 of "The Municipal Act."

Extension of Debenture Issue Period—Section 305 (11) and (12) of "The Municipal Act."

Extension of Municipal Utilities—Section 407 (2) of "The Municipal Act."

Floating Indebtedness—Authority to Municipalities to issue debentures for—Section 59 (d) of "The Ontario Municipal Board Act."

Fire Halls and fire fighting equipment—Section 407 (16) of "The Municipal Act."

Fuel, approval of By-laws for purchase, storage and sale of—Section 405 (38) of "The Municipal Act."

Grand River Conservation Scheme—Appeals re compensation to property owners—Section 15 of "The Grand River Conservation Act, 1938."

Highways—Closing of, by Department of Highways—Section 79 (a) of "The Highway Improvement Act."

Highways, Narrow—Section 502 (2) of "The Municipal Act."

Increased Borrowings by Municipalities—Section 339 (2) of "The Municipal Act."

Interest rate, decrease of on debenture—Section 310 of "The Municipal Act."

Legislation, Special—Approval of By-laws under.

License Fee, approval of fixing of, to residents of a Municipality owning and using a bicycle on any highway thereof—Section 420 (11) of "The Municipal Act."

Local Improvements, approval of undertaking of and passing of a By-law therefor—Section 8 of "The Local Improvement Act."

Local Improvements—Abandonment of Part of Work—Section 18 of "The Local Improvement Act."

Local Improvements—Approval of By-law providing for paving of Lane—Section 29 (3) of "The Local Improvement Act."

Ontario Municipalities Fund—Section 330 of "The Municipal Act" (as re-enacted by O. S. 1941, C. 35, s. 9).

Parks, Setting aside part of for Athletic purposes—Section 12 (6) of "The Public Parks Act."

Plans (Land Subdivision) Approval of—"The Planning and Development Act," "The Land Titles Act" and "The Registry Act."

Railways (Provincial)—orders respecting:

Restricted Areas, approval of By-laws for establishment of—Section 406 of "The Municipal Act" (as re-enacted by O. S. 1941, C. 35, s. 13).

Restricted Areas, repeal of, or amendments to—Section 406 of "The Municipal Act" (as re-enacted by O.S. 1941, C. 35, s. 13).

Retirement of unmatured debentures—Section 59 (dd) of "The Ontario Municipal Board Act" (as enacted by O.S. 1939, C. 47, s. 26 (1)).

School Sections, Amalgamation of, Appointment of Referee—Section 16 of "The Public Schools Act."

Sinking Funds, Investment of—

Sinking Funds, use of Surplus and authority to dispense with further levy for, where amount in Sinking Fund sufficient—Section 321 (a) and (b) of "The Municipal Act" (as enacted by Section 18, O.S. 1939, C. 30).

Supervised Municipalities, Issue of Refunding Debentures—"The Ontario Municipal Board Act".

Supervised Municipalities, Refunding Plans—"The Department of Municipal Affairs Act."

Supervised Municipalities, Supervision—Part III of "The Department of Municipal Affairs Act."

Tax rate, approval of further debt and levy therefor—Section 315 (2) of "The Municipal Act."

Telephone Companies and Systems—

Validation of Municipal Debentures—Section 64 (Part IV) of "The Ontario Municipal Board Act."

Vote of Electors, Applications to dispense with—Section 69 of "The Ontario Municipal Board Act."

Wards, Division of City, etc., into—Section 44 of "The Municipal Act."

Weigh Scales and weighing of coal and coke—Section 408 (11) (c) of "The Municipal Act."

M. B. SANDERSON,

Acting Secretary.

THE ONTARIO MUNICIPAL BOARD

REPORT OF THE INSPECTOR OF TELEPHONE SERVICE FOR THE YEAR 1943

The following applications under the provisions of "The Telephone Act" (R.S.O. 1937, Chapter 261) were dealt with by the Board in 1943:

Under Section 19: For the approval of municipal by-laws providing for the establishment of telephone systems	1
Under Section 31: For the approval of the purchase of an existing telephone system or any portion thereof, by a municipality	1
Under Section 56: For the approval of by-laws of a municipal telephone system	34
Under Section 58: For an order prescribing the date for holding the annual meeting of subscribers	7
Under Section 79: For the approval of municipal by-laws granting the right to erect poles and wires upon the highways	3
Under Section 87: For the approval of by-laws of a telephone company	16
Under Section 96: For the approval of agreements providing for interchange of service	5
Under Section 97: For an order fixing the terms and conditions for interchange of service	1
Under Section 103: For the approval of charges for telephone service	29
Under Section 109: For authority to expend a portion of the moneys set aside for depreciation, upon new construction or extensions or in the purchase of securities	60
Total Number of Applications	157

The continued policy of the Board in endeavouring to secure an amicable settlement in matters in dispute between the applicant and respondent has proved successful in the majority of cases.

In addition to the applications and complaints referred to, a vast amount of correspondence relating to telephone matters has been dealt with by the Board's Telephone Department, through the medium of which much information and assistance has been given to municipalities, companies and other persons interested, and many difficulties which might otherwise have necessitated a formal application and public hearing have been satisfactorily adjusted.

The number of telephone systems within the jurisdiction of Ontario of which the Board has record is 568, operating 129,139 telephones, 31,854½ miles of pole lead, carrying 209,952 miles of wire and representing an investment of about $12,000,000.

There are ten systems owned and operated by municipalities under the provisions of Part 1 of "The Telephone Act" viz.: the Cities of Fort William and Port Arthur, the Towns of Cochrane, Dryden, Fort Frances, Kenora, Keewatin and Rainy River, and the Townships of Alberton and Caledon.

One hundred and eighteen systems are now established and operating under Part II of "The Telephone Act" and furnishing service in two hundred and seventy-seven towns, villages and townships.

There are seventy-one systems owned and operated by individuals or partnerships of less than five persons, three hundred and forty-nine by Incorporated Telephone Companies, eleven by Incorporated Companies other than Telephone Companies, and nine by Federal and Provincial Government Departments and Commissions.

In addition to the before mentioned systems, the Forestry Branch of the Department of Lands and Forests is operating an extensive system in connection with its work of fire prevention. This system comprises 760 telephone stations, 2,051 miles of pole lead, 1,119 miles of tree line, and 5,961 miles of wire, the total investment being $328,570.00.

Detailed statistics and other information relative to these systems will be found in the appendix to this report, entitled "Telephone Systems, 1944."

JAS. A. McDONALD,
Inspector of Telephone Service.

MEMORANDUM OF LEGISLATION

EXCLUSIVE OF SPECIAL ACTS, UNDER WHICH THE ONTARIO MUNICIPAL BOARD EXERCISES JURISDICTION

ANNEXATIONS: R.S.O. 1937, C. 266, Sections 16, 17, 20 and 23 (as re-enacted by O.S. 1939, C. 30, Section 2).

The Corporation of any municipality may, by By-law, ask the Municipal Board for amalgamation or annexation. After a hearing, the Board may make rules and regulations as to the Government, etc., of the municipality as formed.

Any Order of annexation or amalgamation (Subsection 2 of Section 14) shall take effect only after and when confirmed by Act of the Legislature.

ARBITRATIONS: R.S.O. 1937, C. 62, Section 22:

Reference may be made to the Board for the fixing of the amount of compensation to be paid to owners for lands and rights-of-way taken by expropriation under "The Power Commission Act" where parties are not in agreement.

R.S.O. 1937, C. 56, Section 79:

Reference may be made to the Board for the fixing of the amount to be paid by the Department of Highways for land expropriated under "The Highway Improvement Act" where parties not in agreement.

O.S. 1942, C. 34, Section 41. :

An expropriating body may elect that the amount of compensation for lands taken shall be heard and determined by The Ontario Municipal Board.

ASSESSMENT APPEALS: R.S.O. 1937, C. 273, Sections 83 and 84:

The Board may hear an appeal from the County Judge in assessment matters where the amount involved exceeds $10,000.00 in a municipality without county organization, and $40,000.00 in any other municipality.

"The Grand River Conservation Act"—O.S. 1938, C. 15, Section 15:

The Board is appointed to hear appeals from the findings of the Board of Engineers as to the compensation to be paid to owners for lands expropriated; also appeals from the Board of Engineers as to the amounts to be contributed by the separate municipalities toward the cost of the work.

FIXED ASSESSMENTS: O.S. 1942, C. 34, Section 42 (5 and 6):

The Ontario Municipal Board may, upon the application of certain municipalities approve of an agreement between the municipalities and Wartime Housing, Ltd., or may amend or vary the agreement for fixing the assessment and taxation of lands and houses erected by Wartime Housing, Ltd.

Section 405 of "The Municipal Act" sub-section 1 (b) (as re-enacted by O.S. 1941, C. 35, Section 12 (1)):

No fixed assessment shall be granted by any municipality and no By-law shall be passed therefor until approval has been given by the Ontario Municipal Board, and then only after a vote of the ratepayers of the municipality has been taken.

THE BEACHES AND RIVER BEDS ACT—R.S.O. 1937, C. 34:

Gravel may be taken from shores or streams, if approval therefor is given by the Ontario Municipal Board.

BRIDGES—R.S.O. 1937, C. 266, Section 480 (9):

The Ontario Municipal Board may grant relief from the rebuilding of a bridge.

R.S.O. 1937, C. 266, Section 483:

Provides for the issue of debentures for re-flooring of a bridge, with the approval of the Ontario Municipal Board, without a vote of the ratepayers.

R.S.O. 1937, C. 56, Section 30:

Where there is a disagreement between two or more municipalities in respect to a bridge or highway on a boundary line between Counties, the matter shall be decided by the Ontario Municipal Board.

BY-LAWS—R.S.O. 1937, C. 266, Section 560:

A municipality may apply to the Board for approval as to the form of a municipal by-law.

Capital Expenditures—R.S.O. 1937, C. 60, Section 70:

A municipality shall not proceed with or authorize any works or provide any moneys for any undertaking, the cost of which is to be provided for by the issue of debentures, until the approval of the Ontario Municipal Board has been obtained.

Cemeteries—R.S.O. 1937, C. 351, Sections 45 and 46:

A municipality may, with the approval of the Ontario Municipal Board, incorporate additional lands for cemeteries and close road allowances.

Closing of Roads—R.S.O.1937, C. 56, Section 79:

Subject to the approval of the Ontario Municipal Board, the Department of Highways may close any County, Township, or other road which intersects or runs into a Divided Highway.

Detachment of Farm Lands—R.S.O. 1937, C. 266, Section 21:

The Board may hear and determine any application for the detachment of Farm Lands from any municipality.

Dissolution of Corporations—O.S. 1943, C. 16, Section 2:

Upon the application of any municipality, the Board may dissolve the municipality after a public hearing.

Erection of Improvement Districts—O.S. 1943, C. 16, Sections 1 and 2.

Extension of Debenture Issue Period Under Money By-law—R.S.O. 1937, C. 266, Section 305 (11 and 12):

The Board may, upon the application of any municipality, extend a debenture issue period.

Extension of Time to Pass Money By-laws—R.S.O. 1937, C. 266, Section 297:

Where a By-law has been passed with the approval of the ratepayers, it must be passed by the Council within six weeks after the voting, but by sub-section (5), the Municipal Board may, upon the application of the Council extend the time for the passing of the By-law.

The Federal District Commission Act—R.S.O. 1937, C. 276, Section 1:

The Councils of Ottawa, Carlton, Russell, and any municipality in either of the said Counties, may, with the approval of the Municipal Board, convey to the Federal District Commission any Highway, etc., vested in the municipality upon such terms and subject to such conditions as may be agreed upon.

Fire Halls—Purchase of land for and erection thereof and purchase of Fire Engines by Urban Municipalities—R.S.O. 1937, C. 266, Section 407 (16) (b):

The Board's approval is required to an issue of debentures when debentures issued for the same purpose under a By-law previously passed are outstanding and unpaid.

Floating Indebtedness—R.S.O. 1937, C. 60, Section 59 (d), as re-enacted by O.S. 1939, C. 47, Sec. 26 (1) and amended by O.S. 1941, C. 40, Section 1:

The Board is given power to allow a municipality to issue debentures to cover a floating indebtedness.

Under the amendment of 1941, it is also provided that a municipality may issue debentures with the approval of the Board, but without the assent of the electors, for retiring debentures which are redeemable before maturity, and raising a sum sufficient to pay off the said debentures.

Franchise, Granting of—R.S.O. 1937, C. 277, Sections 4, 6 and 8:

A franchise for the construction of a railway, or gas, heat, or light, shall not be granted by a municipality without the approval of the Board, after a hearing.

Fuel and Food—R.S.O. 1937, C. 266, Section 405 (38):

By-laws of municipalities may be passed for buying, storing and selling of fuel and food, providing the money therefor, with the approval of the Board.

HIGHWAYS—

R.S.O. 1937, C. 266, Section 468:

A County may abandon a Highway with the approval of the Board.

R.S.O. 1937, C.266, Section 348 (12):

The Board may appoint one of three arbitrators for the fixing of compensation payable in respect to street widening.

R.S.O. 1937, C. 266, Section 502 (2):

A Municipality may with the approval of the Board, open or establish a highway of less width than 66′.

R.S.O. 1937, C. 270, Section 12:

In lieu of the approval of the interested municipalities, no highway shall be established, laid out, widened, altered, diverted, stopped up or closed in any urban zone or joint urban zone, without the approval of the Board.

INCREASED BORROWINGS BY MUNICIPAL COUNCILS—R.S.O. 1937, C. 266, Section 339 (2):

Provides with the approval of the Board for an increase in the amount to be borrowed by a Municipal Council in any one year to meet current expenses until taxes are collected.

INCORPORATION OF TOWNS IN UNORGANIZED TERRITORY—R.S.O. 1937, C. 266, Section 18:

Subject to subsection (2) of Section 13 of the same Act.

INTEREST DECREASE OR INCREASE ON MUNICIPAL DEBENTURES—R.S.O. 1937, C. 266, Section 310 (as re-enacted by O.S. 1938, C. 22, Section 6):

Provides for a decrease or increase in the rate of interest on any municipal debentures with the Board's approval.

LAND SUBDIVISION PLANS—R.S.O. 1937, C. 170, Section 85; C. 174, Section 112 and C. 270, as amended by O.S. 1941, C. 55, Section 24:

All Plans of Subdivisions, before registration, must be submitted to and approved by the Board.

LICENSE FEE FOR BICYCLES—R.S.O. 1937, C. 266, Section 420 (11), as amended by O. S. 1941, C. 35, Section 15 (2):

The fixing of an annual fee for the operation of bicycles in municipalities by residents thereof must be approved by the Board.

LOCAL IMPROVEMENTS—

R.S.O. 1937, C. 269, Section 8

Approval of the Board of Construction By-laws for local improvements.

R.S.O. 1937, C. 269, Section 27 (3):

Fixing of the apportionment of the cost by the Board

R.S.O. 1937, C. 269, Section 29 (3)

Approval by the Board of a By-law for the opening, etc., of lanes.

R.S.O. 1937, C. 269, Section 29 (3):

Provides for the hearing by the Board of Claims for exemption from assessment for the opening, etc., of lanes.

R.S.O. 1937, C. 269, Section 19:

Approval of the Board as to the deviation in the course or location of local improvements.

R.S.O. 1937, C. 269, Section 6:

Hearing by the Board of objections against widening or extension of a street, or construction of a bridge.

R.S.O. 1937, C. 269, Section 18:

A portion of the work may be abandoned with the approval of the Board.

R.S.O. 1937, C. 269, Section 10 (2):

Where petitions are filed against a local improvement work, such objections will be considered by the Board.

ONTARIO MUNICIPALITIES FUND—R.S.O. 1937, C. 330, as re-enacted by O.S. 1941, C. 35, Section 9:

Disposition of moneys held by a Council in the Ontario Municipalities Fund for educational purposes, with the approval of the Board.

PARKS—R.S.O. 1937, C. 285, Section 12:

Approval of By-laws setting aside a part of a Park for athletic purposes.

The Public Utilities Act—R.S.O. 1937, C. 286, Section 32:

Gives power to a municipality, with the approval of the Board, for disposing of properties purchased for the Public Utilities Commission and not required for public utilities.

Public Health Act—O.S. 1943, C. 24, Section 5 (12):

Provides for an application to the Municipal Board for an Order prescribing the manner in which a sewerage project shall be carried on. The Board has power to stop up and close highways, impose such terms and conditions as may seem just, and remove restrictions where necessary, and fix compensation to be paid.

Public School Areas—R.S.O. 1937, C. 357, Section 16:

The Board has power to appoint a Referee to fix School Areas, and to adopt his Report respecting adjustment of assets and liabilities of several School Sections involved.

Repeal of Money By-laws as to Residue not Required—R.S.O. 1937, C. 266, Section 311 (2):

Restricted Areas—R.S.O. 1937, C. 266, Section 406 (re-enacted O.S. 1941, C. 35, Section 13):

Approval of By-laws of municipalities prohibiting the use of land and the erection and use of buildings for certain purposes and regulating the cost and the type of construction thereof, which By-laws shall not come into force until approval is granted.

Retirement of Unmatured Debentures—O.S. 1939, C. 47, Section 26, as amended by O.S. 1941, C. 40, Section 1:

This amendment to the Ontario Municipal Board Act, gives the Board power to approve of the issue of debentures, without the assent of the electors, for the retirement of debentures which are redeemable before maturity, and of the issue of debentures to pay for the money required for such purposes.

By Sub-section 3 of C. 40, O.S. 1941, which is an amendment to Sub-Section 1 of Section 70 of the Board's Act, authority is given to the Board to approve of expenditures "not provided for in the estimates of the current year." This approval is given only where it can be shown that such expenditure will not create a deficit at the end of the year's operations.

Sewage and Sewage Disposal Works—R.S.O. 1937, C. 299, Section 101:

Sub-section 12 provides for the stopping up of a highway for the purpose of a sewage system, with the approval of the Board, upon an application made to it for such purpose, and imposing terms and conditions.

Sinking Funds—

R.S.O. 1937, C. 266, Section 326:

Approval of the Board is necessary to the purchase of debentures by a municipality from its Sinking Fund. The total investment of Sinking Funds of a Municipality in its own debentures is limited to 25% of the total fund.

O.S. 1939, C. 30, Section 18:

Authority to a municipality, with the approval of the Board, to dispense with a further levy where the amount in the Sinking Fund is sufficient to take care of the debentures.

O.S. 1939, C. 30, Section 18:

Use of surplus in the Sinking Funds, where there is sufficient to take care of all the debentures.

Issue of Debentures in Sterling—R.S.O. 1937, C. 266, Section 306 (3):

Issue of Debentures in Sterling, with the approval of the Board.

Surburban Area Development Act—R. S. O. 1937, C. 271, Section 6:

Approval of the Board of an agreement with reference to setting up of a Surburban area development.

Tax Rate—R.S.O. 1937, C. 266, Section 315, Sub-section (2):

A Municipality may levy a sum greater than 2½% on the dollar of the assessed value of properties, with the approval of the Board.

This section provides that a Council may not levy more than 2½% on the dollar for municipal purposes.

TOWNS ERECTED INTO CITIES—R.S.O. 1937, C. 266, Section 19:

Erection, by the Municipal Board, of a town having a population of not less than 15,000 into a city and village having a population of not less than 2,000 into a town, and to declare the name it is to bear. It also provides for the division into wards and Section 20 provides for the addition of territory to a city or town, by the Municipal Board.

TOWNSHIPS, UNORGANIZED—R.S.O. 1937, C. 266, Section 426:

Passing of By-laws by the Council of a Township in an unorganized territory, having a population of not less than 5,000 and which has been declared, by the Order of the Municipal Board, to be a Township, and the erection of such Township or part of it into a Town.

TOWNSHIPS—R.S.O. 1937, C. 266, Section 30:

Separation, by the Municipal Board, of a junior Township in unorganized territory, from a union of Townships.

TARIFF OF BOARD'S FEES—R.S.O. 1937, C. 60, Section 107; as re-enacted by Section 26 (3), C. 47, O.S. 1939:

The fixing by the Board, with the approval of the Lieutenant-Governor-in-Council, of a tariff of fees to be collected by the Board for the performance of its duties.

VILLAGES ERECTED INTO TOWNS—R.S.O. 1937, C. 266, Section 19:

POLICE VILLAGES—R.S.O. 1937, C. 266, Section 527 (4):

Approval by the Board of an extension of the boundaries of Police Villages.

R.S.O. 1937, C. 266, Section 526 (3)

Approval of the formation of Police Villages.

TELEPHONES—R.S.O. 1937, C. 261:

Provides for the Board's jurisdiction over municipal and other telephones within the province.

VALIDATION OF DEBENTURE BY-LAWS—R.S.O. 1937, C. 60, Section 64:

Authority to validate debentures and to certify as to the validity of same; after certification by the Board, the By-law is binding upon the Corporation and its validity may not be contested or questioned for any cause whatsoever.

VOTE OF ELECTORS—R.S.O. 1937, C. 60, Section 69 (d):

The Board may, where the assent of the electors qualified to vote on Money By-laws is required, dispense with the vote of the ratepayers after due enquiry, providing that a Public Hearing is held and that all the members of the Board are unanimous in dispensing with such vote.

WARDS, DIVISION OF CITIES ETC., INTO—R.S.O. 1937, C. 266, Section 44:

The division of Cities and Towns into Wards, with the approval of the Municipal Board.

WATER RATES, FIXING OF—O.S. 1940, C. 20, Section 1:

The determination by the Board of the application by any municipality to confirm, vary, or fix rates charged or to be charged in connection with water supplied thereto by any other municipality.

WEIGH SCALES, AND WEIGHING OF COAL—R.S.O. 1937, C. 266, Section 408:

With the approval of the Municipal Board, and within the limitations, restrictions, and under the conditions prescribed by an Order of the Board, By-laws may be passed by municipalities as to the weighing of coal and coke.

WORKS ORDERED BY THE DOMINION RAILWAY BOARD, AND THE ONTARIO MUNICIPAL BOARD —R.S.O. 1937, C. 266, Section 307:

As to borrowing of money by a municipality for works ordered by these two Boards.

In addition there is much legislation which comes before the Private Bills Committee, referring particularly to the municipalities asking for such legislation, in which certain matters are referred to the Board for approval.

ABSTRACT AND SUMMARY

DECISIONS OF THE BOARD

ANNEXATIONS

P.F. B-2185

IN THE MATTER of Section 21 of the Revised Statutes of Ontario (1937), Chapter 266, and

IN THE MATTER of the application of Matthew Virtue Millar, George Andrew Storey and Bertha J. Storey, his wife, and John Cameron Nairn, all of the Township of Minto, in the County of Wellington, and Robert George Bridge, of the Township of Wallace, in the County of Perth, for an Order detaching from the Town of Palmerston, in the County of Wellington, certain farm lands and subdivision lots, and the annexation of same to the respective Townships in which they were formerly situated.

N. R. Robertson, Esq., B.A.Sc.......... For Applicants

R. M. Grant, Esq .... For Town of Palmerston

DECISION OF THE BOARD

THIS IS AN APPLICATION by Matthew Virtue Millar, George Andrew Storey and Bertha J. Storey and John Cameron Nairn, all of the Township of Minto, and Robert George Bridge, of the Township of Wallace, for the detachment from the Town of Palmerston, of certain lands and sub-division lots owned by above named applicants and the annexation of these lands to the respective Townships in which they were formerly situated.

Mr. Robertson called:

R. G. Bridge, who owns 11 acres (Schedule D) in the town of Palmerston, which adjoins the lands of his farm in the Township of Wallace, on which his house and buildings are located. The land in this field is partly low, is farm lands, was never used for anything else, has no entrance, except from one field to another. Witness says the outlet from the Town's sewage disposal plant runs through a ditch along the line fence. Lorne Street and Mill Lane, on the Town Plan are unopened. These lands are assessed for $385.00 and the taxes paid were $15.59. His farm and buildings in Wallace Township are assessed for $4,300.00, of which Land is $2,700.00 and Buildings, $1,600.00 Mr. Bridge says the tax rate works out at $1.42 per acre in the Town and 37½ cents per acre in the Township.

Cross-examined by Mr. Grant, Mr. Bridge said his farm buildings are served by Town water, under agreement with the Utilities Commission; that his children attended the Town School and that his Township educational taxes were transferred to the Town; that he had been Chairman of the School Board of the Town and still a member of this Board; that he owns other property in the Town of Palmerston.

Mr. Robertson called:

George A. Storey, who owns approximately 20 acres in the Town of Palmerston (Schedule B), and the remainder of his farm, on which the buildings are located are in Minto Township (Schedule G). Witness states the lands in question are used as farm lands; are not suitable for building purposes as a considerable part are subject to flooding; there are no buildings, and no town improvements serving his property. The 20 acres in the Town are assessed at $600.00 and the taxes amount to $1.215 per acre, whilst on his land in the Township, he pays taxes at the rate of 60 cents per acre.

Cross-examined by Mr. Grant, Mr. Storey states that the only entrance to his farm is by a lane from Mary Street in the Town; that he has one child attending High School as a non-resident pupil; that his taxes on the land in question are $24.30 per year, and that he acquired possession of this farm about two years ago.

Mr. Robertson called:

J. C. Nairn, who owns 48 acres (Schedule C) in the Town of Palmerston, and 50 acres adjoining these lands in the Township of Minto (Schedule H). His house and farm buildings are located on the land in the Town and his assessment, in Town, is $2,500.00, being $1,600.00

for land and $900.00 for buildings. Total taxes in the Town are $101.25. The Rate is 55 mills. Taxes, per acre, on the land are $1.35. In the Township, his 50 acres are assessed at $1,100.00, and the taxes are $23.03, or at the rate of 46 cents per acre. Mr. Nairn complained of fluctuating rates in the Town; that there was a raise in farm land rates of some 7½ mills about three years ago; that, the following year, 20 mills was taken off school rate and added to Town rate—this was corrected by the Mayor and Clerk; that he was promised consideration some 20 years ago when a secession took place, but that his taxes had remained about the same. He had secured water into his house a year ago; a town sidewalk extended to the corner of his farm. He had no complaint re Assessment, but that he was frequently confused about his taxes and was anxious to get into the Township where his taxes would be lower.

Cross-examined by Mr. Grant, Mr. Nairn said, that while fire hydrant was too far from his buildings to be of use, yet the Town had a Chemical Fire Extinguisher that could be of service. He said the difference in taxes on his land, if in the Township, would be about $28.00, and that his neighbour to the East had the same privileges that he had and pays less taxes in the Township.

Mr. Robertson called:

MATTHEW V. MILLER, who owns 43 acres in the Town of Palmerston (Schedule A) and 47 acres adjoining in the Township of Minto (Schedule F). He has lived here 28 years. Lands along the front of his farm and in the Town had been subdivided before he acquired the property. He had built a house for his son on Lot 9 and there is another house on Lot 11, owned by Meyer. Witness says that the 43 acres in Town are all farm lands, and during the 28 years of his occupancy he had never been asked to sell a lot in the subdivision.

Mr. Millar said that he proposed to apply, with others, for secession some 20 years ago, but was promised by the then Mayor and Clerk of the Town that they would do the right thing for him and he had no complaint to make until three years ago, when the Town made alterations in the mill rate.

In March, 1942, the Town had closed the streets in the subdivision and had deeded these streets to him.

His 1943 Town taxes on 43 acres are $48.60, on assessment of $1,200.00—no buildings. These taxes work out to $1.13 per acre.

His land in Minto Township, consisting of 47 acres, on which the assessment is $1,200.00, are taxed at 55 cents per acre.

Mr. Millar stated that he lost a sale for his property last year when the purchaser saw the Town taxes. He said that the Town Clerk had taken 20 mills off his rate one year, and that he and others had appealed to the Town Council re changes in mill rates over the past few years. He said that a water main was located on Main Street and passed the front of his property.

Cross-examined by Mr. Grant, Mr. Miller admitted that there was a sidewalk on the opposite side of the street, and that street lighting on Main Street extended in front of his property. He admitted his assessment in the Town had been reduced $200.00 last year, and says there is a 14½ mill reduction on account of farm lands.

Mr. Grant called:

W. M. CAMPBELL, of Fred Page Higgins, Auditors for the Town of Palmerston for 1941 and since. Witness stated that the debenture debt of Palmerston at December 31, 1942, was $69,433.07. He says that one mill rate was struck by the Town but that more than one mill rate had been used and that two separate reductions on farm properties had been made in a year. Auditor's Report for 1942 was filed and witness referred to item 3 on page 9, which reads as follows:

> "Allowances made to owners of farm properties within the Town limits were larger than they should have been and the basis of determining these allowances was not in accordance with the statutes. This matter is one where the adjustment is affected in assessing the property by exempting that portion which is deemed to derive no benefit from specified improvements. The mill rates set by the rate fixing by-law should not be altered."

Mr. Grant called:

P. A. Cox, Assessor for the Town. He stated that houses are scarce in Palmerston; that the lots in the Millar property, fronting on Main Street, are suitable for buinding purposes; that the lands in the Storey property within the Town are pretty low; that Palmerston is a railroad town and that very few houses have been built.

Mr. Grant called:

SETH MATHERS, Town Clerk for 20 years. He said there is a demand for houses in Palmerston; that the Council strikes a general tax rate and then a Committee considers the farm lands and calculates the mills they should be exempted from; that the Committee had accepted the 14½ mill reduction as suggested by the Department of Municipal Affairs: that Council had not noticed provision for annual adjustment until 3 or 4 years ago and, hence, the changes in recent years.

In summing up the evidence submitted, the Board finds that the total taxes for the year paid to the Town of Palmerston on the lands in question was $189.74, and, if these lands had been assessed in their respective Townships, the taxes would have been $98.28, or a combined saving in taxes to the four applicants of $91.46 in a year on the lands. There would probably be a small saving in taxes on the Nairn buildings, which would bring the combined tax saving to approximately $100.00 per year, if the application to secede were granted.

In addition to the tax-saving feature, there appears to have developed some confusion and misunderstanding or even bad feeling between some of the applicants and the Municipal Government of the Town of Palmerston. Peculiarly, this situation seems to have started in recent years when the Town Council had engaged the services of Chartered Accountants as Auditors—and the Auditors in the course of their duties had reported to the Council that their taxing procedure on farm lands should be brought in line with the Statutes. The correction of these procedures of long standing takes time and in this interval the Town authorities appear to have been willing to make fair adjustments for the farm lands, but, unfortunately the confusion of assessing and altering mill rates and making mill rate allowances has created some suspicions of unfair treatment on the part of some of the applicants.

In the case of Matthew V. Millar, the Board does not approve of the creation of an irregular Town Limit on the North side of Main Street, and the leaving of certain lots as islands within the Town Limits separated by farm lands that would be in the Township should the application be granted.

The Board has considered the evidence submitted and has viewed the properties in question and decides as follows:—

R. G. BRIDGE:—Application to detach lands belonging to him, said to be 11 acres, from the Town of Palmerston and to annex same to the Township of Wallace is granted.

GEORGE A. STOREY and BERTHA J. STOREY:—Application to detach lands belonging to them, said to be 20 acres from the Town of Palmerston, and to annex same to the Township of Minto, is granted.

J. C. NAIRN:—Application to detach his lands, said to be 48 acres, from the Town of Palmerston and to annex same to the Township of Minto, is granted.

MATTHEW V. MILLER:—Application to detach his lands, said to be 47 acres, less lots 2 to 8, inclusive, lot 12 and the street allowances known as Lorne Street and Ontario Street, to a depth of 132 feet northerly from Main Street, and to annex same to the Township of Minto, is granted. The limit between the Town of Palmerston and the Township of Minto through the lands in question shall be the rear lot line of the tier of lots on the North side of Main Street, being a distance of 132 feet northerly from the north limit of Main Street and extending parallel to Main Street from the easterly side of Lot 1 to the easterly side of Lane east of Lot 13.

The effective date for the above secession and annexation shall be January 1, 1944.

Unless the parties hereto agree as to the adjustment of assets and liabilities, any interested party may apply to the Board for such adjustment.

Judgment accordingly.

An Order will issue upon payment by the Applicant of the Board's fee of $25.00, and no further Order is made as to costs.

Dated at Toronto, this 31st day of December, A.D., 1943.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

APPROVAL OF CAPITAL EXPENDITURE AND DISPENSATION OF VOTE OF ELECTORS AND THOSE QUALIFIED TO VOTE ON MONEY BY-LAWS.

P.F. B-1689

IN THE MATTER of Sections 69 and 70 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60), and

IN THE MATTER of an application by the Corporation of the City of Toronto for an Order:

(1) Declaring and directing that the assent of the electors of the City of Toronto or those qualified to vote on money by-laws to the passing of a by-law "To authorize the issue of debentures to the amount of $1,484,000.00 for the payment of certain outstanding debts of the Corporation incurred in acquiring general and local improvement surplus lands and certain lands in advance of proposed general and local improvement works" or to the issue of debentures thereunder shall not be requisite to be obtained, notwithstanding the provisions of any general or special Act and

(2) Approving of the exercise by the Corporation of its powers to pass the said by-law and to do all things necessary or incidental thereto.

R. C. Baird, Esq..Counsel for the Corporation of the City of Toronto

Controller L. Duncan, K.C..On behalf of certain Ratepayers

J. E. McMillen, Esq..President, Property Owners' Association

DECISION OF THE BOARD

THIS IS AN APPLICATION by the Corporation of the City of Toronto:

(1) For an Order of the Ontario Municipal Board to dispense with a vote of the electors, and

(2) For approval of the undertaking of a capital expenditure of $1,484,000.00 incurred in acquiring general and local improvement surplus lands and certain lands in advance of proposed general and local improvement works.

The moneys in question were expended in the purchase of "surplus" lands under Powers conferred by:

(1) Section 343 of The Municipal Act;

(2) University Avenue Extension Act, 1928; and

(3) City of Toronto Act, 1931.

There is nothing in Section 343 of the Municipal Act which gives the Municipality Power to issue debentures without the assent of the electors.

Section 3 of the University Avenue Extension Act of 1928, provides:

"(3) The Council of the Corporation of the City of Toronto may from time to time, without the assent of the electors, pass by-laws to provide for the issue of debentures to the amount necessary to provide the cost of any work undertaken under the provisions of this Act bearing such rate of interest and payable in such manner and on such terms as may be approved by the Ontario Railway and Municipal Board."

This provision does not empower the City to issue debentures, without the assent of the electors, for any money, except that which is "necessary to provide the cost of any work undertaken under the provisions of the Act." Mr. Baird, for the City, contends that to provide money for the purchase of any lands not required for the work may require the assent of the electors.

Mr. Baird also contends that Sec. 10 of the City of Toronto Act, 1931, may not give the City Power to issue debentures, without the assent of the electors, for any moneys except those paid out for lands actually used in the "work undertaken."

Mr. Baird asks that the Board, under its powers, contained in Section 69 of the Ontario Municipal Board Act, dispense with the necessity of the vote of the ratepayers so that the legality of the issue of debentures, without the assent of the ratepayers, may not be questioned in the future.

Mr. Lascelles, Treasurer of the Corporation of the City of Toronto, filed an affidavit that there was carried on the Books of the Corporation statements showing that up to December 31, 1942, there was owing by the City for "general and local improvment surplus lands and certain lands purchased in advance of proposed general and local improvement works" the sum of $1,483,024.22, and that since that date lands to the value of $21,302.43 have been sold. Some of this expenditure had been carried since 1912. The interest has always been provided for in the budget and is paid up to December 31, 1942.

The Principal of the "debt" has been treated by the former Treasurers as a Capital expenditure, to be provided for by the issue of debentures, some time in the future, but because of the fact that the expense of carrying the debt was much less than if debentures were issued, the matter was allowed to stand.

When Mr. Lascelles was appointed Treasurer he very properly notified the Board of Control that this "debt" was outstanding and should be taken care of and as a result an application similar to the present one was made to the Board early in this year. Judgment was reserved. Before Judgment was given, a change was made in the membership of the Board and, because Section 69 of the Ontario Municipal Board Act provides that the assent of those qualified to vote on Money By-laws may be dispensed with only by the unanimous decision of all the Members of the Board, this new application has been made to the Board as at present constituted.

After the purchase of the properties the Vendors were paid for same and there is no debt due the Vandors. Mr. Baird says that the Vendors were paid from the money borrowed either from the Bank or from other sources. It is necessary for the City to borrow from the Bank only for four or five months during the year. When the taxes come in these loans would be paid off and there would be no indebtedness to the Bank, even for the purchase of the lands in question. In the years 1922 to 1928, there were no Bank loans outstanding at the end of the year.

Controller Duncan, on behalf of certain Ratepayers, contended that the Board should not approve, under Section 70 of the Ontario Municipal Board Act, of the issue of debentures for this money. He says that, if money was owing on this account at the end of any year the Financial Statements of the City were misleading, and even dishonest, as they did not show the proper financial standing of the City. He also contends that it is not now a debt due for the purchase of these lands, because there is nothing owing to the Vendors, and often since the lands were purchased, no debt was due to the Bank: that even if it is a debt, under Section 315 of the Municipal Act it is the duty of the City to provide for it in the Estimates as a debt faliing due within the year.

Mr. McMillen, on behalf of the Property Owners' Association, submitted that the vote of the Ratepayers should not be dispensed with and that even at the risk of an increased tax rate the debt should be paid out of the estimates. He is fearful that, if debentures are issued, the money obtained therefrom might be used for other purposes. He also suggested that at least a portion of this should be met out of this year's receipts and the balance be paid by the issue of debentures issued for not more than three years.

The Board disapproves of the manner in which this money has been financed by the City. Financially, the City may have saved money by their method of financing, as it can borrow on short-term Treasury Bills at a lower rate than on debentures and, for the greater part of the year, no interest was paid, but it is not proper financing and the Financial Statements which have been issued might easily mislead the ratepayers. It is to be hoped that, in the future, such accounts will be properly and promptly financed.

The legislation empowers the City to purchase these surplus lands, and the City can provide the money by debentures with the assent of the ratepayers and the approval of the Board. Some of the properties have already been sold. No one suggests that it was not good business to have purchased them.

The Board accepts the evidence of Mr. Lascelles to the effect that this debt has been carried in the Treasurer's Books under Surplus Lands Account, that it has been provided for by borrowing from one of the accounts mentioned by him, and that it is due and unpaid. After hearing all the evidence, all the Members of the Board are satisfied that the assent of those qualified to vote on Money By-laws may, under all the circumstances, properly be dispensed with.

Notwithstanding the fact that this account has stood for so many years, the Board finds, on the evidence, that there was on December 31, 1942, a debt in the sum of $1,483,024.22 for the purchase of lands for general and local improvement works and of lands in advance of proposed general and local improvement works; that between that date and the date of the hearing of this application $21,302.43 has been received by the Corporation from the sale of portions of these lands; and that it is not in the interest of the Ratepayers that they should be compelled to pay the whole of the balance due in any one year. As a greater part of this money has been expended since 1932, the Board is of the opinion that to allow the City to issue debentures for the term of five years for the amount unpaid is reasonable and just, but such debentures must be issued before the 31st day of December, 1943, so that the first payment of principal shall come due and be paid in the year 1944.

An Order, under the Powers conferred on this Board by Section 69 of the Ontario Municipal Board Act, will go dispensing with the assent of those qualified to vote on Money By-laws, and approving of the issue of debentures for five years in the sum of $1,484,000.00, less all moneys received for the sale of lands between December 31, 1942, and the date of the Order and less all money paid for lands which have since December 31, 1942, been removed from Surplus Lands Account by reason of the local improvement works having been proceeded with.

Dated at Toronto the 28th day of October, A.D., 1943.

APPROVAL OF LAND SUBDIVISION PLAN

P.F. B-2252

IN THE MATTER of Section 6 of "The Planning and Development Act" (R.S.O. 1937, C. 270), and

IN THE MATTER of an application for approval of a plan of Subdivision of part of Registered Plans Nos. 31, 297 and 515 in the Township of Brantford, in the County of Brant.

BETWEEN:

THE HONOURABLE MR. JUSTICE HENDERSON, et al,
Applicants

—and—

THE CORPORATION OF THE CITY OF BRANTFORD,
Respondent.

The Honourable Mr. Justice Henderson........................Counsel for the Applicants

Ross McDonald, Esq., K.C., and
J. E. Brown, Esq..Counsel for the City of Brantford

A. H. Boddy, Esq., K.C.......................................Counsel for the Township of Brantford

DECISION OF THE BOARD

THIS IS AN APPLICATION by the Honourable Mr. Justice Henderson and others for approval of a plan of Subdivision of part of Registered Plans 31, 297, and 515, in the Township of Brantford, in the County of Brant. The approval of the Township of Brantford was filed with the Board. The Corporation of the City of Brantford refused to approve, and application was made to the Board under "The Planning and Deveolpment Act" (R.S.O. 1937, Cap. 270, s. 6) for approval.

The application was heard at the City Hall, Brantford, on Tuesday, November, 16, 1943.

Approval of the plan was strenuously opposed by the City of Brantford, because most of the streets in the plan of subdivision were fifty feet wide, and it contended that this was not a proper development of this area.

The southerly limit of the proposed Subdivision adjoins the City of Brantford: the westerly limit is the Paris Road, King's Highway, No. 2; and the northerly limit is Victoria Avenue which the City suggests will at some time in the future be carried through to Provincial Highway, No. 24, known as St. George's Road. It is well located and is one of the few residential areas left for subdivision purposes in the immediate vicinity of Brantford.

The only objection to the plan is the width of the streets. All lots have frontages in excess of sixty feet with plenty of depth.

Mr. Boddy, on behalf of the Township, approved of the plan because it had been agreed between the Applicants and the Township that a By-law should be passed that not more than one house should be erected on a lot and that all buildings should be at least fifteen feet from the street line and this would meet any objections to the fifty-feet streets. It had also been agreed that the Township should have the right to construct pole lines, sewers and watermain at the rear of the lots.

Mr. McDonald, for the City, felt that even these matters would not be sufficient protection because the Municipality would have control of only the fifty feet and this was not sufficient to provide a pavement with curb, sidewalk, and sufficient area for poles, trees, etc.

Proper planning for development of new areas has been too long delayed, but it is not too late to have a proper development of this area. The evidence of Mr. Bunnell and Mr. Richards for the City was most interesting and convincing.

Subsections (2) and (3) of Section 5 of "The Planning and Development Act"; (R.S.O. 1937, Cap. 270) provides:

> "(2) No plan of survey and subdivision of land within an urban zone or joint urban zone shall be registered unless it has been approved by the Council of each municipality within which any part of such land is situate, and by the Council of any city, town or village, which such urban zone or joint urban zone adjoins, or by the Board.
>
> "(3) No plan of survey and subdivision of land abutting on a highway of a less width than sixty-six feet, or upon which there is laid out a street of a less width than sixty-six feet, shall be registered unless it has been approved by the proper municipal Council or Councils and by the Board. R.S.O. 1927, c. 236, s. 5 (1-3)."

No valid reason for limiting the width of these streets to fifty feet has been given. In the opinion of this Board, neither the width nor the depth of the lots, as laid out in the plan, nor the interests of those who may wish to purchase, demands it. On the other hand, the City of Brantford gave evidence through their City Engineer and Town Planning Adviser to the effect that a fifty-foot width did not provide adequate width of streets for the services that will be required; that the building line set back did not provide the same protection as the width of street; and that by-laws restricting the use of land could be altered from time to time, but that land once dedicated as a street was practically permanent.

The Board is of the opinion that the authority given it under Sub-sections (2) and (3) of Section 5, quoted above, and also in Section 6 (1) of the same Act should not be used to overrule the objections of a Municipal Council to a Plan of Subdivision unless such objection is shown to be unreasonable.

The Board also draws attention to the different wording used in Sub-sections (2) and (3) of Section 5:

Sub-section (2) uses at the end of Section "or by the Board";

Sub-section (3) uses the words: "and by the Board"; and this latter Sub-section refer only to approval of Highways of a lesser width than sixty-six feet.

The Board, therefore, refuses to approve of the Plan as submitted.

Dated at Toronto the 23rd day of November, A.D., 1943.

APPROVAL RESTRICTED AREA BY-LAWS

P.F. B-1986

IN THE MATTER of Section 406 of "The Municipal Act" (R.S.O. 1937, Chapter 266), (as re-enacted by Section 13, Chapter 35, O.S. 1941), and

IN THE MATTER of an application by the Corporation of the Township of North York for approval of its By-law No. 3425, intituled: "By-law No. 3425. To prohibit the use of land or the erection or use of buildings within a certain area of the Township of North York excepting for the purpose of private detached dwellings with the necessary outbuildings, schools, churches, golf clubs and country clubs."

C. Frank Moore, Esq., K.C.,............Counsel for Applicant

G. W. Mason, Esq., K.C.,............Counsel for Respondent

DECISION OF THE BOARD

This is an application by the Corporation of the Township of North York for approval of its By-law No. 3425, "To prohibit the use of land or the erection or use of buildings within a certain area of the Township of North York excepting for the purpose of private detached dwellings with the necessary outbuildings, schools, churches, golf clubs and country clubs." Within this area is a property, composed of about 165 acres, belonging to the Trustees of the Toronto General Burying Grounds, held by them for the purpose of a Cemetery, but now rented and used for farming purposes.

There was no objection to the By-law, except from Mr. Mason, on behalf of the Trustees of the Toronto General Burying Grounds.

This Company was incorporated by Act of Parliament, S.O. 1870-71, which Statute vested the lands owned by the Trustees in the Corporation, provided for the selection of Trustees and amongst other things empowered the Trustees to acquire additional lands in the then Township of York, which included the present Township of North York.

Statute of Ontario, 1910, Cap. 1043, empowered the Trustees to sell any portion or portions of their lands "which in their judgment now are or hereafter may become unsuitable for cemetery purposes, or which may not be required for such purpose."

The Trustees purchased the 165 acres in question in 1917 for Cemetery purposes. In 1925 the said lands were sold and were used by the purchaser for farming purposes until November, 1934, when they were re-acquired under foreclosures.

T. D. Clark, Engineer and Supervisor for the Trustees, said that, on April 20th, 1943, he applied to the Board of Health of the Township for approval of the site and filed the necessary plans. In his opinion, owing to the increase in population in Toronto and the surrounding municipalities, the lands will be needed for burial purposes in the near future, that the application for approval of the site was made on account of that need, and that the lands are suitable for that purpose.

Reeve Mitchell, called by Mr. Moore, said that, as soon as it became known that the Trustees were applying for the necessary approval, owners of lands immediately to the north voiced their opposition, and the By-law in question was prepared, given first and second reading on June 8th, 1943, and was finally passed on June 21st, 1943. He is of the opinion that the Cemetery would prejudicially affect the development of that part of the Township for residential purposes.

Mr. Mason contends that the legislation, which is a private Act, gives the trustees the right to establish a Cemetery anywhere within the County of York; that that right is not subject to Section 406 of the Municipal Act and that no Municipal Corporation within the County of York can prevent the trustees from establishing the Cemetery on the lands in question herein. He refers the Board to the following Statutes:

12 Victoria, Part 2 (1849), Cap. 104.
18 Victoria, (1854-5), Cap. 147.
34 Victoria (1870-1), Cap. 95.
10 Edward VII (1910), Cap. 160.
15 George V (1925), Cap. 132.

An Act of the Parliament of Upper Canada passed in the 7th year of the Reign of King George IV authorized certain named persons and their successors to hold certain lands for the purposes of a Cemetery, and limited the number of such persons to five.

12 Victoria, Part 2, 1849, Cap. 104, repealed that Act so far as it limited the number of Trustees and named certain persons and their successors to be the Trustees, and limited the number of Trustees to Seven.

18 Victoria (1854-5), Cap. 147, empowered the Trustees to close the burying ground then maintained by them and acquire other lands in the Township of York, within two miles of the City of Toronto, for cemetery purposes (subject to the Municipal Corporation passing a By-law consenting to and authorizing the establishment thereof. This Act was declared to be a public Act.)

34 Victoria (1870-1), Cap. 95, constituted the Trustees of the Toronto General Burying Ground a Body Corporate under the name of "The Trustees of the Toronto General Burying Ground": vested the lands owned or held by the Trustees in the new corporation and all the powers and privileges granted to the said trustees by any former Act or Acts of the Province of Upper Canada or of Canada are hereby granted to said corporation, subject nevertheless, to all the conditions and duties imposed on said trustees not inconsistent with the provisions of this Act; and the said corporation shall be liable for all the debts, obligations and liabilities of the said trustees of the Toronto General Burying Ground. Section 5 provided:

> "The said Corporation hereby constituted is hereby empowered to select and contract for an additional piece or additional pieces of lands well adapted for the purpose of a public cemetery or cemeteries in the Township of York, which said piece or pieces of land shall and may be conveyed to and vested in the said Corporation to hold the same for the purposes hereinafter declared."

10 Edward VII (1910), Cap. 160, defined the rights of the Trustees as to investment of funds and empowered them to sell land.

15 Geo. V, (1925) Cap. 132, was passed to authorize the Trustees to acquire and hold additional lands in the County of York. The Preamble of this Act states:

> "Whereas the Trustees of the Toronto General Burying Grounds were incorporated by an Act of the Legislative Assembly of the Province of Ontario passed in the Thirty-fourth year of the reign of Her Majesty Queen Victoria, Chaptered 95, and by said Act were authorized to purchase and hold lands in the Township of York for cemetery purposes; and whereas the Trustees of the Toronto General Burying Grounds have by their petition set forth that the Township of York is being very thickly settled and that there is very little, if any, land in the said Township available for cemetery purposes, and that it is advisable that the said the Trustees of the Toronto General Burying Grounds should be authorized and empowered to purchase, acquire and hold lands for cemetery purposes anywhere in the County of York, and to exercise all their corporate powers in reference thereto; and whereas it is expedient to grant the prayer of the said petition;"
> Section 2 provides:

> "The Trustees of the Toronto General Burying Grounds may acquire and hold lands within the County of York and may exercise all their corporate powers with reference thereto."

This Act does not provide that the maintenance of the lands purchased by them for a Burying Ground shall be subject to the Municipal Council passing a By-law authorizing the establishment of a Burying Ground as in the Statute of 18 Victoria.

At the hearing, the Trustees submitted a proposed plan for the development of their land, which shows an allowance for streets for the projection of Frontenac Avenue and Talbot

Road through their lands, a Boulevard from Yonge Street to Talbot Road; and that that part of their lands between the proposed projection of Talbot Road and Yonge Street shall not be used for burial purposes.

After considering the plan and all the evidence submitted, the Board finds that it would not be reasonable or equitable to restrict the lands of the Trustees of the Toronto General Burying Grounds as proposed in the By-law before us, and recommend that the proposed development of these lands be given favourable consideration by the Council.

The Trustees have, under the Powers conferred on them by Statute, authority to purchase lands within the County of York and to use and maintain them as a burial ground. This is a Private Statute but the Board finding as it does, that the By-law restricting the use of these lands for residential purposes, is not reasonable, it is not necessary to decide whether this Statute, being a Private Act, overrides the provisions of Section 406 of the Municipal Act.

The Board recommends that the By-law be remitted to the Council for reconsideration as to the lands belonging to the Trustees and, if amended by Council, the Board may deal with the matter without further notice or hearing.

Dated at Toronto the 4th day of November, A.D., 1943.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

ARBITRATIONS

P.F. B-1732

IN THE MATTER of "The Grand River Conservation Act, 1938" (2 Geo. VI, Chapter 15), Section 15.

BETWEEN:

WILLIAM H. NORRIS,

Claimant

—and—

THE GRAND RIVER CONSERVATION COMMISSION

Respondent

Thomas Delaney, Esq. .... Counsel for the Claimant

J. K. Sims, Esq.... .... Counsel for the Respondent

DECISION OF THE BOARD

THIS IS AN APPEAL to the Ontario Municipal Board as to the amount of compensation recommended by the Board of Engineers (Exhibit 3) as owing to William H. Norris, for the expropriation by the Grand River Conservation Commission of 3.4 acres of land through his farm which is composed of the north-east halves of Lots 9 and 10, Concession 7, in the Township of West Garafraxa. The said lands were expropriated by the Commission under powers given to it by the Grand River Conservation Act of 1938. Notice of expropriation (Exhibit 1), dated October 7th, 1942, was mailed by the Commission by registered mail.

The Board of Engineers as provided by the Act were instructed by the Commission to report on the compensation payable to the Claimant and, under date of January 19th, 1943, submitted its report to the Commission recommending that Mr. Norris be paid $1,100.00.

Notice of this report was submitted to Mr. Norris, under date of March 9th, 1943, (Exhibit 4), under date of October 29th, 1942, William H. Norris had filed a claim for compensation in the amount of $3,000.00 (Exhibit 2).

The Board granted an appointment for this Appeal and heard evidence on June 16, 17, and 18, 1943, at City Hall, Guelph, and after hearing argument on the 18th of June, reserved its decision.

The Norris farm is situated on a County Road, leading to the Village of Belwood, and the buildings on said farm are within the limits of the Village. The farm contains something less than 200 acres and was purchased by Norris from W. G. Gerrie, in the Spring of 1940, for the sum of $10,000.00 in payment for which Norris gave a house in Fergus, valued at $5,000.00, Cash $2,000.00 and a Mortgage of $3,000.00.

Norris was at that time the owner of and operating a farm of 150 acres, being lot 29 and part lot 30 in Concession 2 of the Township of Erin. He moved to the Gerrie farm in the summer of 1940, where he now resides and he still owns and operates the Erin Township farm about six miles distant.

The Claimant keeps a herd of dairy cattle, about 50 head of accredited and registered Holstein cattle, also about 100 hogs. There are 20 cows and a few calves on the home farm, the remainder of the cattle are on the Erin farm. Milk is separated. Cream is sold. Skim milk is fed to hogs and the main farm revenue comes from the sale of cream, hogs and cattle.

The house is described as a large stone house with hydro and telephone installed. The barns and buildings are agreed upon as good and sufficient for the requirements of the farm. A railway borders the farm towards the Grand River and the Belwood Station is located at the edge of the farm and adjoining the County Road.

There is a drilled well some 230 feet deep at the barn; water is pumped by windmill to a supply tank 40'x14'x8' deep which feeds drinking troughs in the shed and at the back of the barn.

The 3.4 acres of land expropriated provides a road allowance through the farm 66 feet in width and generally follows on the southerly side of the lot line between Lots 9 and 10, (Exhibit 6). This road allowance is continued through to the 6th line to provide access to Belwood for the farms on the 6th line in lieu of their previous route over the 6th line bridge and the Belwood road on the North side of the Grand River. The effect of this expropriation on the Norris farm is a severance creating two farms of something less than 100 acres each with the new road allowance between.

Mr. Norris had sold a piece of land to the Commission on the northerly side of the farm adjoining the railway right-of-way, 66 feet in width, and comprising about 1 acre of land for the sum of $150.00 in November, 1941. The Commission had entered into an agreement with the Township of West Garafraxa re the construction of a road along the southerly side of the Railway Right-of-Way and of which this one acre would form a part. This agreement (Exhibit 9) is dated December 17th, 1941. Mr. Norris and a group of farmers on the 6th line had petitioned the Township Council to compel the completion of this agreement, when it became apparent that the Commission were making other plans for the road allowance. Mr. Norris stated that he didn't feel inclined to consider favourably any offer for the 3.4 acres while there was any possibility of reverting to the road allowance along the Railway. He stated that he would willingly give a road allowance along the northerly or southerly ends of his farm free of charge rather than take $3,000.00 for compensation for the road in its present location severing his farm, as it does.

Mr. Norris in his evidence made the following statements:

1. He farms to feed his stock and does not sell grain, except possibly for seed. He feeds it all and also buys considerable feed.

2. He did not set aside any permanent pasture, except the wood lot and field 6. He rotated crops and pasturage for the remainder.

3. The severance leaves about 97 acres south of the road allowance, with no buildings, no permanent water supply, only temporary water supply from a runway.

4. He would not have purchased a farm divided in this way.

5. He valued his farm in October, 1942, at $14,000.00 and believes that he bought the farm cheap from Gerrie in 1940 at $10,000.00.

6. Assessment for 1943:

Land	$ 3,100.00 2,500.00
Buildings	1,500.00
	$ 7,100.00

Taxes were $141.97 in 1942.

7. The severance would make a well on the south half a necessity to avoid bringing the stock to the barn at least one extra trip a day with a crossing of the new road and the opening and closing of gates.

8. The free run of the bush would be cut off from the stock on the northerly half, and consequent loss of shade.

9. Crops would have to be hauled across the road with the opening and closing of gates.

10. Fences along roadside add to fence maintenance cost and weeds would grow along the road allowance. Would have extra fences across the farm along the new roadway to maintain.

11. An offer to purchase the Norris farm in September, 1942, for $14,000.00, Exhibit 11, was submitted. This offer was made through A. E. Smith, of Toronto, on behalf of one named Forester—who when informed of the road going through the farm did not desire to go through with the deal. The offer to purchase was nevertheless left in the possession of Mr. Norris, and was filed as an exhibit in the Townsend case as well as in the present arbitration.

S. B. STRUTHERS, Agricultural Representative at Arthur, said that the present location of the road was a perfect nuisance to the operation of the farm. He proposed one cr two cattle-passes under the road to connect the two farms and admitted that a water supply near the wood lot would be better than the cattle-passes.

A. C. BRILLINGER, Farms Inspector for Toronto General Trusts, values the Norris farm at the end of 1942 at $14,000.00:

190 acres at $40.00	$ 7,600.00
Buildings improve land	6,400.00
	$14,000.00

1. Says other things being equal, rate per acre for 100 acre lot is higher than for larger parcels.
2. Says location of roadway leaves southerly half of farm with no adequate supply of water and the northerly half top heavy with buildings.
3. Says the severance decreases the sale value of the farm by $3,000.00.

Values 3.4 acres at $100.00	$ 340.00
Severance, including time lost opening and closing gates, additional help	2,200.00
Loss of bush shelter to Lot 10	200.00
Extra roadside fence	250.00
Damage to farm from weeds from new roadway	100.00
Inconvenience during construction, removal of trees, fences	100.00
	$ 3,190.00

Charles E. McMillan, Erin, Real Estate, values Norris farm at end of 1942, $15,000.00. Depreciates value of farm $5,000.00 through location of the road. His experience teaches him that it is difficult to sell a divided farm, and is difficult to take stock back and forward across a road.

Walter T. Evans, Real Estate, Georgetown, places fair sale value of Norris farm at end of 1942, at $14,000.00 and location of road depreciates the value of the farm $3,000.00:

Inconvenience of crossing with stock and implements	$ 1,000.00
Lack of water on Lot 9	1,000.00
Lack of shade for Lot 10, spread over 20 years	600.00
Upkeep of extra fences	100.00
Value of land 3.4 acres at $100.00	340.00
	$ 3,040.00

Clarence Gerrie, whose uncle had owned and operated the Norris farm, says location of the road through the farm is a perfect nuisance to the operation of the whole farm. Witness stated his home farm of 150 acres is listed for sale at $12,000.00—the buildings are in one corner, has a larger bush lot than Norris—borders a river and has a good supply of water.

J. L. Gregson, Clerk of West Garafraxa, recently drilled a well in 1942:

232 feet deep at $2.50 per ft	$ 580.00
Board for men	50.00
Extra pipe	10.60
	$ 640.60

Used same equipment as for previous well.

George Gibson, well-driller, wouldn't like to gamble on less than $1,000.00 for a well complete on Lot 9. Witness owns 150 acres in two farms—one with 50 acres, on which buildings are located, on one side of a County road, and the other 100 acres, across the road. He pipes water across the road for the summer months.

Henry Wheeler and Thomas Gilchrist gave evidance re disadvantages of divided farms.

In reply, Mr. Delaney called Professor N. J. Thomas, of O. A. C., who stated that:

1. Permanent pasture was definitely out on a good dairy farm. It pays to plow up and have crop rotation.
2. Shade for dairy cattle is very important and may affect milk production to the extent of 10 to 15% in hot weather.
3. It is better dairy management to have water near the cattle.
4. There should be a night pasture near the dairy barn.

Mr. Sims, for the Grand River Conservation Commission, called:

Homer Gow, well driller, who submitted a tender (Exhibit 13), to drill a well on Lot 9, and erect windmill complete for $775.00.

Shantz, Real Estate, Kitchener, values the damages and estimates compensation therefore to Norris at $1,000.00. Says effect of a township road through a farm does not affect the value at all nor does it affect the annual income from the farm.

Would prefer the road through the farm and the well on the southerly half to neither, if the intention was to pasture.

Says the new road with two good fences and two iron gates would improve access to the wood lot at certain times of year, and is rather unimportant to the operation of the farm. Says for next 20 years, it would be less expensive to maintain the new fences than it would have been to have maintained the old fences.

Wm. Elliott, operated a divided farm for years, valued:

Actual land taken	$ 200.00
Damage to remainder	800.00
	$ 1,000.00

Witness would fence the bush and keep the cattle out, would drill a well on the southerly half and the whole farm would be worth more money with the road and with the well.

E. Brooks, Real Estate, Brantford, would allow $600 as compensation for water difficulty and $400.00 for other inconvenience such as opening and shutting gates. Total compensation, $1,000.00. Witness lived on a divided farm—never knew the road was there. Thinks farm with the road through and water on the southerly part would bring more money than without either.

R. H. Smith, Valuator for the Commission, asked Norris for an option at $1,500.00 to submit to Commission for approval. Later went back and asked for an option at $2,000.00, but did not put a price on the expropriation at any time. Says southerly part of farm was too far away from water at the barn for milking cows, but all right for young cattle. Believes he would prefer farm with road and well on Lot 9, to farm as it was.

Commission is paying for the fences alongside the new road and for gates required.

Witness, in cross examination, said he would recommend $1,500.00 to the Commission as compensation to Norris.

The Claimant makes claim for the sum of $3,000.00 as compensation for the land taken and the damages resulting from the severance. Witnesses for the Claimant estimated the compensation at $3,000.00 and one witness said $5,000.00.

Witnesses for the Respondent fixed the compensation at $1,000.00 and the valuator, R. H. Smith, was prepared to recommend $1,500.00 in settlement of the Claim. Witnesses for the Respondent also stated that the whole farm would be worth more money with the road allowance through the farm and a water supply on the southerly half than it was before expropriation proceedings. The tender of Gow was submitted to show that well and mill complete could be supplied for $775.00.

The Board was informed that an agreement between the Commission and the Township Council would insure that the road, through the farm, would be properly completed, fences erected, gates placed, and culverts supplied to meet the requirements of the users of the road and to provide necessary access to the abutting frontage on the new road.

The Board has weighed all the evidence submitted and comes to the conclusion that if a permanent water supply on the southerly half of the farm is provided the value of the farm has not suffered materially due to the expropriation. The Board feels, however, that Mr. Norris has suffered some inconvenience and loss through the change in location of the road by the Commission resulting in delay and uncertainty and also that he may be inconvenienced in the operation of his farm for an interval until a system of farming may be reorganized.

The Board, therefore, finds that the compensation to be awarded the Claimant is the sum of $1,800.00 in full payment for land taken and all damage and inconvenience caused by the expropriation. In addition thereto, he shall be allowed 10%, or $180.00, for forcible taking and interest at 5% per annum, on $1,980.00 from the date of expropriation, October 7th, 1942, (Exhibit 1), to the date of payment.

The Respondent shall pay the Board's fee, fixed at $75.00, and shall pay the Claimant $100.00 as costs.

There shall be no further costs allowed either party.

Dated at Toronto, the 25th day of August, A.D., 1943.

IN THE MATTER of "The Grand River Conservation Act, 1938" (2 Geo. VI, Chapter 15), Section 15.

BETWEEN:

THE GRAND RIVER CONSERVATION COMMISSION

Applicant

—and—

JOB RANSOM,

Respondent

H. J. Sims, Esq., K.C. .... Counsel for the Applicant

Thomas Delaney, Esq .... Counsel for the Respondent

DECISION

THIS IS AN APPEAL by the Respondent to this Board as to the amount of compensation found to be owing to him by the Board of Engineers for the expropriation by the Grand River Conservation Commission of 7.42 acres of his farm, being composed of the S. W. half of Lot 9, and the S. W. half of Lot 8, in the 6th Concession of the Township of West Garafraxa in the County of Wellington. The said lands were expropriated by the Commission under its Powers, and the Board of Engineers appointed by the Commission to determine the amount of compensation payable filed its Report, dated March, 7th, A.D., 1942, in which it found that the sum of $2,350.00 was payable to the Respondent.

The Board granted an appointment and heard evidence on the 15th and 16th days of October, 1942, and on the 13th day of January, 1943, and, after hearing argument on the last mentioned day, reserved its decision.

The Respondent's farm is situated on a Township Road between Concessions 5 and 6, running from the Orangeville Road North-Westerly to the Grand River. There is not now, nor has there been, a bridge across the river on this road and, to get to market the Respondent comes South-Easterly along this Township Road to the Orangeville Road. To complete its scheme, the Commission was compelled to divert the Canadian Pacific Railway line from its former location and, for such diversion, it expropriated a right of way one hundred feet wide through the Respondent's farm, as shown on plan filed. The Respondent's buildings were located on the higher ground near the centre of the farm. The right-of-way expropriated crossed the lane leading from the road to the buildings. It also crossed a valley about 16 feet below railway grade, with a creek in the bottom, and then through a bush at the rear of the farm. The valley was fenced at the top of the bank on both sides and had been used exclusively as pasture land. After construction of the right-of-way, the Easterly part of this pasture land was completely shut off from the Westerly portion. The Respondent says that the Creek dries up in the Summer and he has in the past been able to water his stock at a spring behind the barn. This spring has now been cut off from the Westerly part of his pasture land and he says it has been rendered almost useless for pasture and it has no value for cultivation purposes. The applicant pointed out that there are two springs on the North-west side of these lands; that there is a cement trough at one of these springs; that they are seldom dry; and that there is a lane from the pasture land, fenced off from other fields, leading to these springs and to a field, which is also used only for pasture.

The buildings on the farm consist of a large stone house in good condition and a barn aufficiently large to accommodate a 200 acre farm, a drive shed and a sheep pen, all of which are in good repair. There is a cistern and a well at the buildings. There is a bush of about 22 acres at the back of the farm. This bush is spoken of as a hardwood bush, and it is not assessed, as the Respondent does not use it for pasture. From the view the Board had of this bush, it did not appear to be, at the present time, very valuable and the fact that, from the strip 1,000 feet long and 100 feet wide through it, the Respondent got no lumber and only about 15 cords of wood, seems to bear out the Board's estimate. The stumps at the side of the right-of-way showed that the bulk of the larger trees were hollow. The bush was composed mostly of very young spindly trees which would become of value only after many years.

The Respondent filed the plan (Exhibit 3) (not drawn to scale), showing the location of the fields, buildings, farm lane and railway right-of-way. He said that there are about 75 acres of cultivated land East of the lane, divided into four fields: The front field, No. 1, is low, but is cultivated and, in a dry season, will yield a good crop; field No. 2 is low and wet, and that he does not break it up once in 15 years—he uses it for pasture. There is a ditch from these two fields, to the creek. Evidence was given to show that the bottom of the fields East of the lane was cold and wet and this is borne out by the fact that, at the buildings, it is necessary to go down only about 10 feet to get water. The front field and the fields between the lane and the Railway right-of-way and East of the line between Lots 8 and 9 have been badly cut up and, even after re-arranging those fields and re-fencing them, they will be very difficult to cultivate. If the lane is left in its present location there will be four gates between the buildings and the road. Two of these gates might be eliminated by constructing the lane East of the Railway and this would place his entrance closer to the Orangeville road. It will be difficult to drive his cattle from the barn to the pasture on Lot 9, as they will cross two cultivated fields and the Railway. The fire hazard to the buildings from the Railway is not great, owing to the distance, but the value of the farm has been depreciated very materially by this construction.

Counsel for the Commission cross-examined Respondent as to his financial progress. The farm was devised to him, subject to payment of annuities to sisters and to the maintenance of his mother, so that the consideration cannot be properly estimated. He sold another 75 acres to the Commission for $7,000.00 and out of this, after payment of mortgage, etc., he received only $42.00. He has since borrowed other money and the farm is encumbered. That he has not been able to pay off his indebtedness may be due to the fact that, although he is trying to operate a 200-acre farm (and the evidence does not show that he has had any assistance from his family), he also operates a threshing machine and uses his tractor and plow for plowing on neighboring farms. He has 12 cows, from 15 to 20 young cattle, 5 horses, 20 sheep and, in 1941, cultivated 70 acres.

The buildings have not been affected by the expropriation. The fields East of the farm lane, with the exception of the front field, have not been affected; nor have the fields West of the lane in the front of the farm on either side of the creek.

The farm is assessed as follows: Land, 180 acres (excluding bush) $4,500.00; Buildings, $1,450.00. Total $5,950.00.

The Respondent says his farm was worth $10,500.00 and it is now worth $6,000.00 and claims $4,250.00 damages made up as follows:

1. Bush	$ 1,100.00
2. Stopped cattle run	1,200.00
3. Railway Crossing behind barn to get to pasture land	500.00
4. Lane crossing	1,000.00
5. Re-fencing fields	200.00
6. Inconvenience from odd-shaped fields	1,000.00
7. Inconvenience while Railway being constructed	100.00
8. Constructing bridge	16.00
	$ 5,116.00
9. Five Maple trees at road	100.00
	$ 5,216.00

In explanation of Claim No. 1, he claimed the bush to be a valuable Maple Sugar bush and that the bush would be further damaged by wind.

Claim No. 2. He said he will have to use good land for pasture of his stock. He spoke of field No. 2 as being cultivated, that he had 75 acres of cultivated land North-East of the lane, and his plan (Exhibit 3) shows field No. 2 as being cultivated. In cross-examination, he admitted that field No. 2 is flat; that he didn't break it up once in 15 years, and that he used it for pasture; it contains 20 acres or more.

Claim No. 3. He claims $500.00 for this because he would have to cross the Railway with his cattle hundreds of times; another time he said he would use it four times a day, to bring his cattle up for milking and taking them back.

Claim No. 4. He claims $1,000.00 damages for lane crossing the right-of-way-opening and closing 4 gates, etc.

Claim No. 5. Re-fencing of fields, $200.00. This will be necessary to cultivate some of the fields.

Claim No. 6. $1,000.00 for inconvenience in cultivating fields. Even after re-casting and re-fencing the fields, they will be inconvenient for cultivation owing to their shape.

Claim No. 9. Five Maple trees were removed. There is no evidence as to size or location of these, but the applicant suggested that they were on the Road.

The Respondent said he was offered $2,000.00 for the damage, but he refused to take this. Afterward he offered "without prejudice" to take $2,500.00, but his offer was not accepted.

In re-examination he said that 2 poles carrying electric wires to his buildings are on the Railway right-of-way andthe Railway Company demands $2.00 per year rental for this.

Charles H. Aiken, a carpenter of Fergus, who operated a farm for 31 years, 5 miles from the Respondent's farm, values it at $10,500.00. He values Lot 8 at $7,000.00 and says the damage to it is $2,500.00, and Lot 9 at $3,500.00 and says the damage to it is $1,000.00.

W. B. Rettie, a farmer and a Councillor of the Township of Garafraxa, valued the farm at $10,000.00 and said that the farm was damaged $3,500.00 to $4,000.00, exclusive of the bush. He estimated the damage:

Farm disfigured, 12% of value	$ 1,200.00
Lane	500.00
Inconvenience in working—$50.00 per year for 20 years	1,000.00
Pasture, $50.00 per year for 20 years	1,000.00
Land taken at $50.00 per acre	375.00
	$ 4,075.00

He had no experience as to the bush. On cross-examination he said he wouldn't consider buying that farm now at any price; that the creek damaged the farm 6% or 7%; that a farm in the vicinity, 100 acres with good buildings, sold for $6,000.00, but that was a trade.

George Rennie valued the farm before expropriation at $11,000.00, and said it would be hard to sell now.

Arthur C. Brillinger, an inspector and valuator for Toronto General Trusts Corporation, valued the farm at $10,500.00 before and $5,500.00 to $6,000.00 after expropriation. His estimate of damage is $4,685.00, as follows:

Cutting off pasture	$ 1,000.00
Cutting through bush	780.00
He includes the trees at $200.00 and land at $40.00 per acre; also Damage to Sugar Bush and Damage by opening through.	
Right-of-way, 5.42 acres at $75.00 per acre	405.00
Changing fences	300.00
Inconvenience in farming	1,000.00
Interfering with drainage	100.00
Inconvenience, ingress and egress	1,000.00
5 Maple trees at road	100.00
	$ 4,685.00

J. B. Ketchum, a farmer near Fergus, has two railways crossing his farm of 250 acres. He sold one subway to the Railway Company for $1,100.00 and is sorry he did.

Joseph R. Rutherford, a farmer of Aramosa Township, valued this farm at $11,000.00. After the expropriation, if it could be sold, the depreciation would be $4,000.00.

Edgar A. Bayne, a farmer 2 miles from Ransom, said that, although field No. 1 was low, he had drawn a good crop from it.

For the defence, Herbert Johnston and C. C. Fairchild, two of the Engineers, said they had examined the Ransom farm and other farms and, in their opinion, the value put on the farm and the estimate of damage by Robert H. Smith and Moses B. Shantz, and Ed. Brooks were fair and reasonable.

Robert H. Smith, who operated a farm in West Garafraxa Township for 20 years, and was a Councillor for four years and Reeve for six years, was appointed by the applicant to purchase the right-of-way and value the damages. He estimated the land taken and damages at $2,000.00. He says the land is a clay loam, inclined to run to sandy loam; the bottom is wet, water is reached in the wells on the high ground at 10 feet. He estimated the value of the land taken at $40.00 per acre, and allowed the balance for depreciation. He valued the farm, before expropriation, at $7,500.00, based on sale prices of land in the neighborhood. He said the farm, from the North-East corner to the South-West corner, was low, the subsoil wet and cold, and that 40% of the two front fields were low and wet; about 10¼ acres of corners and angles were created by the expropriation.

J. G. Gregson, Township Clerk of West Garafraxa, submitted a list of 6 farms with the asessments and said that, in the last two years, there were about 15 sales of farms (excluding the lands purchased by the Commission). There are about 400 farms in the Township.

Lillian Magee, the Registrar for North Willington, produced 5 deeds, showing sales:

1942. The Douglas farm, 100 acres, was sold to Woods for $3,000.00. The assessment (Exhibit 8) was: land, $2,800.00; buildings, $100.00—$2,900.00.

1940. The Norris farm was purchased from Gerrie, 180 acres. Consideration, $10,000.00, (Cash, $2,000.00; Mortgage, $3,000.00; Exchange, $5,000.00.) Assessment: land, $5,600.00; buildings, $1,500.00.

1940. The Davidson farm, 225 acres, was purchased from the Agricultural Development Board for $5,000.00. Assessment: land, $5,200.00; buildings, $1,500.00—$6,700.00

1936. The Lindsay farm, 100 acres was purchased by Greeve for $5,300.00. Assessment: land, $2,500; buildings, $1,300.00.

1938. The Fisher farm, 125 acres, was purchased from the Guelph Trust Co. for $2,150.00. Assessment: land, $2.700.00; buildings, $200.00.

These are the sales which Smith used to form an opinion as to the value of the Ransom farm. He explained that the Norris farm, 180 acres, was on a County Road, on the outskirts of the Village of Bellwood, was in a splendid state of cultivation, stone house, splendid barn and driving shed. The owner kept a Shorthorn herd. A house in Fergus was part of the consideration and was put in at $5,000.00. In cross-examination he said he agreed with the Respondent's witnesses as to the present value of the Ransom farm, but disagreed as to the value prior to expropriation.

A. A. Outram, a property valuator for the Department of Highways, a man with very wide experience, valued the damages suffered by Ransom at $1,500.00; plus $320.00; the cost of a pipeline from the buildings across the right-of-way. He valued the land, 5¼ acres, at $30.00 per acre and the bush, 2 acres, at $100.00 per acre. The balance was for damage. He valued the farm at $7,500.00 before expropriation and has been with Smith to see the farms which he used as a comparison.

Moses B. Shantz, a Real Estate Broker of Kitchener, says he operated farms and dealt in them for 30 years. His valuation was also $7,500.00 before expropriation and says the value after expropriation is $5,500.00 to $6,000.00.

Ed. Brooks, a Real Estate Broker and Valuator of farm lands of Kitchener, says that $7,500.00 to $7,800.00 was a good price for the Ransom farm before expropriation and about $6,000.00 after. In his opinion, if you take $1,500.00 off a farm it is a great temptation to a purchaser. His valuation of damage is:

For bush and balance of the land	$ 400.00
For water difficulty	500.00
For severance	800.00
For small fields	200.00
For extra fencing	200.00
For inconvenience during building of road	100.00
	$ 2,200.00

In reply, William H. Norris said he paid $5,000.00 for the Fergus house, but in cross-examination he admitted he traded a Creamery, which he valued at $5,000.00 for it. He said that he was offered $14,000.00 for the farm by a man who heard that the Commission had to have it.

Charles L. Davidson, who purchased his farm of 225 acres from the Agricultural Development Board in 1940 for $5,000.00, called by the Respondent, said his stone house was good but needed repairs; his barn was good but the land was poor. The Commission paid him $1,000.00 for 5¾ acres of this land.

Job Ransom, re-called, compared the farms referred to by the applicant witness with his farm. His witnesses said that the Commission had paid:

$14,550.00 for the Patton farm, assessed at $4,900.00.

$14,000.00 for the Broadfoot farm, assessed at $6,600.00.

$11,080.00 for the Rodger farm, assessed at $2,700.00.

1,800.00 for 5.7 acres of the Black 90 acres' assessed at $1,500.00.

2,000.00 for 11.66 acres of the McLean 300 acres, assessed (land) at $6,000.00.

1,00.00 for 3.18 acres of the Christie 100 acres, assessed (land) at $2,700.00.

1,000.00 for 8.5 acres of the same farm.

When a Member of the Board suggested that there must be something wrong either with the assessment or the seemingly exorbitant prices paid by the Commission for these properties, no explanation was forthcoming from either party. Are other assessments so much out of line with the prices paid?

In the sales referred to by Smith:

1942, Woods farm, 100 acres, Sale price $3,000.00, Assessment $2.900.00.

1940, Norris farm 180 acres, Sale price $10,000.00, Assessment $7,100.00.

1940, Davidson farm 225 acres, Sale price $5,000.00, Assessment $6,700.00.

(This was an Agricultural Development Board Mortgage Sale in 1940. Owner says it was in poor condition and he is improving it.)

1936, Lindsay farm 100 acres, Sale price $5,300.00, Assessment $3,800.00.

1938. Fisher farm 125 acres, Sale price $2,150.00, Assessment $2,900.00.

(This was a Guelph Trust Co. sale. Sold in 1938 when, according to Ransom, 35 acres was grown up in willows and only 8 acres cultivated, and this farm has been brought under cultivation, except 5 or 6 acres of swamp.)

From a study of the evidence, the Board cannot find the assessments do not bear a fair and reasonable relation to the values and, considering the very meagre evidence given before the Board, unless there is some further explanation, the Board must find that the payments made by the Commission do not reflect the value of the properties purchased by it and should not be wholly relied upon as a basis for fixing the compensation to be allowed the Respondent in this case.

The Board must find the value to the Respondent of the whole property in its actual condition at the time of expropriation with all its existing advantages and with all its possibilities, and the value of the farm after the expropriation and the difference between the two is the amount of damage suffered by the Respondent.

The Respondent is a farmer. His farm consisted of 200 acres, about 20 acres of which was set aside as a bush lot. He has a fine stone house and good out buildings. The two front fields in Lot 8 were low and wet, one of which, containing about 22 acres, had not been cultivated for fifteen years, and had been used for pasture. Another field at the extreme South-West of the farm was also used for pasture and it had two springs. Through the centre of Lot 9, extending North-Easterly to the rear of the farm was a valley, in some places about 17 feet deep, and in the bottom of this was a creek, which usually became dry in the summer. This is spoken of as Pasture and is fenced at the top of the bank. There is a spring near the top of this bank behind the buildings. This pasture contains about 23 acres. Through this farm the applicant has expropriated a right-of-way for the Canadian Pacific Railway Company. This right-of-way cuts through the farm from near the South-East corner to near the North-East corner. At the present time there are two trains each day (one each way) but in the future this may be increased. The right-of-way crosses the lane to the Respondent's buildings, and four gates are erected on this lane. A fill has been constructed across the Valley (or Pasture). Six cultivated fields have been cut through on an angle, and it will be necessary to change the fences if these fields are to be cultivated satisfactorily. The pasture and fields west of the right-of-way have been cut off from the buildings. With the exception of the front field, the fields East of the lane have not been interfered with.

The witnesses for the Respondent place the value of this farm before expropriation at from $10,000.00 to $11,000.00, and estimated the damage at from $4,000.00 to $4,500.00. These valuations are not based on prices of farms sold in the vicinity, but are values generally placed by neighboring farmers. David Brillinger was the only expert brought in by the Respondent and he valued the farm at $10,500.00. He placed the present value at $6,000.00. He estimated the damage as follows:

Cutting off pasture	$ 1,000.00
(Farm had field No. 2, 22 acres; field No. 15, 10 acres; field No. 8, 10 acres of pasture; in addition to the pasture field claimed to be cut off for which this damage is estimated.)	
Cutting through bush, 2¼ acres	780.00
(He valued the bush, 22 acres, at $2,200.00.)	
Right-of-way, 5.42 acres, at $75.00 per acre	405.00
(He valued the land at $40.00 per acre.)	
Inconvenience in farming	1,000.00
Crossing the Railway, etc.)	
Rebuilding fences in changing fields	300.00
Interference with drainage	100.00
Inconvenience, ingress and egress	1,000.00
(Opening and closing gates, crossing Railway, etc.)	
5 Maple trees at road	100.00

The other witnesses for the Respondent followed these valuations very closely.

Witnesses for the applicant agreed fairly well with Respondent's witness as to present value of the farm, $5,500.00 to $6,200.00., but disagreed as to value before expropriation. They say the value before expropriation was from $7,200.00 to $7,800.00. They based these valued on sales in the neighborhood. Most of these sales were Estate sales or Sales by the Agricultural Development Board and these should not be relied upon too closely.

In the opinion of the Board the value of the farm before expropriation was $8,500.00, and the value after taking is $6,000.00. The compensation to be allowed the Respondent is $2,500.00 and, in addition thereto, he shall be allowed 10% or $250.00 for forcible taking and interest at 5% on $2,750.00 from the date of expropriation to date of payment. The date of expropriation has not been supplied to the Board and, unless the parties can agree as to this, the Board may be spoken to. The applicant shall pay the Board's fee fixed at $100.00. There shall be no further costs allowed either party.

Dated at Toronto the Third day of February, A.D., 1943.

IN THE MATTER of "The Grand River Conservation Act, 1938" (2 Geo. VI, Chapter 15), Section 15.

BETWEEN:

WILLIAM A. TOWNSEND,

Claimant

—and—

THE GRAND RIVER CONSERVATION COMMISSION

Respondent

Thomas Delaney, Esq.......... Counsel for Claimant

J. K. Sims, Esq.......... Counsel for Respondent

DECISION

THIS IS AN APPEAL to the Ontario Municipal Board as to the amount of compensation recommended by the Board of Engineers, (Exhibit 7) in payment for the expropriation by the Grand River Conservation Commission of the whole farm of William A. Townsend, being the South-West half of Lot 10, Concession 7 in West Garafraxa, and being comprised of approximately 95¼ acres, excepting the old Canadian Pacific Railway right-of-way. The said lands were expropriated by the Commission under powers given to it by the Grand River Conservation Act of 1938.

There were two expropriations in this case. The first expropriation, dated October 6th, 1941, took 30.32 acres (Exhibit 1) for which the Claimant filed a Claim for $6,000.00 (Exhibit 2) dated November 19th, 1941.

The Engineers' Report (Exhibit 3) recommended $3,250.00. The Claimant filed Notice of Dissatisfaction with this amount on April 25th, 1942 (Exhibit 4).

A second notice of expropriation taking the whole farm was filed December 10th, 1942. Under date of January 15th, 1943, Claimant filed Notice of Claim (Exhibit 6) claiming $12,500.00, being $10,000.00 for the farm and $2,500.00 for damages and expenses caused by the expropriations.

The Engineers' Report dated January 19th, 1943 (Exhibit 7) was filed with the Commission on March 5th, 1943, and reported a valuation of $7,500.00 in payment for the whole farm, and all claims against the Commission.

The Board granted an appointment for this appeal and heard evidence on May 25th, 26th, 27th and 28th at the Court House, Guelph, and after hearing argument reserved its decision.

The Townsend farm is situated on the northerly side of the 6th line of West Garafraxa, and on the easterly bank of the Grand River.

The Canadian Pacific Railway skirted the easterly River bank and caused a severance in the Townsend farm separating 10.3 acres between the right-of-way and an unopened road allowance near the Grand River. The Village of Belwood was reached by crossing the River on the 6th line Bridge to the Belwood Road, thence northerly one concession.

William A. Townsend has owned the farm in question since 1916, and his father was the previous owner. In 1923, he built a new concrete block house and a garage at a cost over $4,000.00 not including his own work. He estimated that the cost of improvements to the farm including the house, but exclusive of his labour had been $5,000.00.

Interference with his use of lane and operation of farm commenced in latter part of September, 1941, due to construction of railway, at which time a steam-shovel and bulldozer cut across the entrance to laneway. The laneway was blocked on October 2nd, 1941, and from that time until the 6th line bridge was removed, on February 5th, 1943, Claimant used a temporary lane across the railway tracks. Since February 5th he had to walk the tracks to Belwood or go out over the Norris farm there being no access to the 6th line.

The first entry on the property was in the fall of 1938, when a Bull-dozer was taken through a corner of farm by taking down fences—fences were repaired and witness said this was a small matter.

Surveys were made in October, 1939, and Wm. Johnston, Surveyor, mailed Townsend a blue-print dated November 8th, 1939 from Kitchener and informed Claimant that flooded area would be completed in the winter of 1939-40.

Claimant stated he then made his own plans to do without the areas proposed to be flooded—the cultivated area being mostly the 6½ acres in field 9 down by the River.

Claimant stated he lost the fall work on field 9 in 1939—worked the land in Spring of 1940 and claims the loss of ten bushels to the acre, or $30.00 per year, for 2 years or an amount of $60.00.

Claimant claimed 2 good tires cut on his car and other damage and wear and tear to car caused through the bad condition of the road on temporary laneway—values the damage at $100.00.

The car was a 1929 Durant, and tires cost about $10.00 a piece. Witness was driving a mail route with this car from August 7th, 1941, to end of March, 1942.

Claimant owned certain farm implements on shares and through its disposal, or change of ownership, and inconvenience in not getting the use of implements at the right time, claimed $45.00.

Claimant stated he couldn't get Threshing machine in during 1941, until the ground was frozen, and, as a result, had to borrow grain to feed stock—and claimed through trouble of getting grain and returning same and a loss of weight to stock through insufficient feeding, an amount of $20.00.

Claimant states he lost a crop on Field 4 in 1942—would have grown oats—estimates 250 bushels at 40c, less seed—and claims $90.00 for loss of this field.

Claimant had about 6 acres of bush which, at the suggestion of the Commission in the winter of 1939, he cut the lower area for wood, cedar posts, poles, logs. Had previously made Maple syrup and claims $40.00 for loss of 20 gallons, at $2.00.

Claimant stated fences were cut and had to be repaired—he was inconvenienced in the handling of stock and the use of fields for fall pasture in fields 5, 6, 7 and 8, and claims $30.00.

Claimant states that through lack of proper road out, since expropriation, he had suffered inconvenience and loss through delays in breeding stock and claimed $60.00.

Claimant states that in 1941 he had 1,000 bushels of saleable turnips, which he could not market because his access to the road was almost impassable—in March he could only sell 100 bushels and claimed a loss of $135.00.

Claims for manure placed:

In 1942 and in crop return	$300.00
14 acres manured and 1 crop	250.00
300 loads in yard at $1.50 a ton	450.00

Mr. Townsend, said that the farm was assessed at $4,000.00, Land $2,500.00, Buildings, $1,500.00.

The Buildings were insured, Barns $3,500.00; House, $2,250.00, the latter had been increased $250.00 in 1942. Claimant says that a fair valuation of the farm is $10,000.00, against which there is a mortgage for $2,000.00 and a note for $950.00.

He says he is deprived of the crop for 1943, and is placed in the position that he cannot work the farm and cannot move off, and he runs the chance of not being able to get any work. Estimates he may have lost $1,000.00 in 1943.

Reynor Construction Co., left 25 bags of cement about June 12th, 1942, apparently as compensation for inconvenience and accommodation.

First expropriation, October 6th, 1941, took 30.32 acres for which Mr. Smith, Valuator for the Grand River Conservation Commission, first offered $3,250.00 and later raised to $3,750.00. Claim filed November 19th, 1941, for $6,000.00 and thought when road was changed to its new location he should get more than $6,000.00. Letter of December 23rd, 1942, offered the Claimant the use of farm, rent free, to June 30th, 1943, and for a further year from that date for $150.00—this offer was withdrawn January 6th, 1943, and renewed on January 11th, 1943.

Arthur C. Brillinger, Farm Inspector for Toronto General Trusts—Says the Townsend farm is a first-class farm, better than average, well located and built upon; would make a gentleman's country estate; has never seen any better for the size in West Garafraxa. Land is loam, rolling, sufficient for good natural drainage. Values the farm in 1941, at $9,500.00 on ordinary selling market.

95 acres average $50.00 per acre	$4,750.00
Value buildings, add to land	4,750.00
Total	$9,500.00

Thinks other claims made are reasonable and says 95 acres should be worth at least $10.00 per acre to Townsend working the farm.

Witness admits manure usually goes with the farm—and is not worth enough to move it.

Walter T. Evans, Farm Agency, Georgetown—Says Townsend farm was outstanding farm. Values the farm as of 1942 and before flooding at $9,500.00 and if Hydro were in, $10,000.00. Would place $3,000.00 insurance on house on basis of 75% of value, and $3,700.00 on barn and pig-pen, and drive-shed on 75% of value.

Thinks railway severance in farm had depreciated its value $250.00 or $300.00.

R. E. Smith, Country Real Estate, 45 Richmond West, Toronto—Has known Townsend farm for 40 years. Values the farm, late in 1941 at $10,000.00, and at end of 1942 at $11,000. Says farm value increased 10% on the year.

Values land at $50.00 per acre;

House between $2,500.00 and $3,000.00;

Barns between $3,000.00 and $3,500.00.

Says this farm has always been well-farmed—good clay loam soil—excellent natural drainage—picturesque setting of buildings.

Charles E. McMillan, Real Estate Broker, Erin—Values the buildings as they stand today at $6,500.00, including water system, but did not value the land.

C. T. Gerrie, Farmer, ½ mile from Townsend on 6th line, at corner Belwood Road—was tax collector and auditor for the Township. Says 6th line road a good township road—had exchanged threshing with Townsend and had helped haul in crops, roots, and at silo filling. Says farm in exceptionally high state of cultivation—well manured—well fenced—doesn't think a farm in township exceeds in productivity. Values Townsend farm $10,000.00 based on productivity, buildings and what he knows other farms sold for. Values the land at $40.00 per acre.

Frank Townsend, Farmer on the 6th line at Orangeville Road—had done threshing for Wm. Townsend, and had changed work for fifteen years. Says grain was always first-class, straw long and clean. Says farm very attractive—good buildings, well situated. Says he would expect the farmer to make a comfortable living and have something to spare.

Romeo Landoni, Eramosa Township, worked for Townsend in 1923, 1924, 1925, to February 1st, 1926. His father bought his farm in 1921—100 acres for $10,000.00 and values the Townsend farm same.

James M. Broadfoot—Had farm on 6th line, across river from Townsend, 100 acres on north side and 100 acres on south side. Sold to Grand River Conservation Commission in fall of 1938, for $14,000.00 and was allowed to remove buildings and some fences, with exception of the house. Says $10,000.00 a fair price for Townsend.

Jas. L. Gregson, Clerk of West Garafraxa, gave evidence re assessments of farms in the Township referred to by witnesses; also gave evidence re Township by-law for closing roads and re agreement with the Commission re right-of-way between 6th line and Belwood. He stated that Council had kept the 6th line bridge as long as possible as an accomodation to Townsend and that contract for its removal was awarded on February 3rd, 1943, and work started immediately thereafter. This action was taken when Council has been advised that the Commission was expropriating the whole of the Townsend farm. Witness referred to Exhibit 13, showing the location of new road, along the Railway right-of-way to Belwood and the agreement between the Township and the Commission re its construction. This location had later been abandoned by the Commission in favor of the location along the south-easterly boundary of the farm. Townsend and others had objected to this change, but the Township Council had come to agreement with the Commission and the necessary by-law would be passed at its next meeting. On the strength of this, contract had been let for the construction of the new road and work had been commenced.

George Bilton was called to make comparison of the productivity of the Davidson farm with the Townsend, and stated that its productivity was about half that of Townsend's.

Wm. G. Bayne, Farmer, gave evidence re farms in vicinity that were referred to as comparisons with farm in question.

Mr. Sims, for the Respondent, called:

M. B. Shantz, Real Estate, Kitchener. Stated that he considered the Townsend farm a good farm in the hands of a good farmer, but felt that some features detracted from value. He cited the contours of the farm required fences to make fields too small and discounted the value of a concrete Block house as saleability. He said stables were dark and lacked steel stanchions; that the gulley between buildings and road detracts from value; that he had seen indications of wet subsoil which would be improved with tile drainage. Mr. Shantz said a liberal value to the farm before any activity of the Commission was $6,000.00 and fixed $1,500.00 as a fair compensation for inconveniences to Mr. Townsend and all other matters. In cross-examination witness admitted he had valued the first expropriation at $3,000.00 for less tha one third of the land, and had later revised this amount to $3,600.00. He felt that losing about 30 acres of land decreased the value of the farm $2,000.00 and left $1,600.00 for inconvenience, etc.

Edgar Brookes, Brantford, described the farm as a fair, good farm, in good condition and well farmed, but cut by a railway and with low, undesirable spots. He placed a market value of $5,700.00 on the farm as of December, 1942, and values all other damages to Townsend at $1,500.00. In cross-examination witness admitted valuing 30 acres expropriated at $3,500.00, based on a loss of ⅓ the returns from the farm and inconvenience suffered and necessity to construct a new lane. He then valued the land taken at $30.00 per acre, and $2,600.00 was damage for inconvenience, etc.

Wm. Elliott, Farmer near Galt, described the Townsend farm as very rolling-hilly in spots, drainage appeared to be inadequate in spots, buildings above the average, lane poor and placed a market value on the farm of $5,750.00, and fixed additional compensation for all interference including forcible taking at $1,000.00.

R. H. Smith, Valuator for the Commission, described the Townsend farm as a rather productive farm and Townsend as a good farmer; buildings reasonable, house a trifle above average and barns the same, Railway severance at a good place, rolling land got rid of top water readily, part of back field inclined to be damp, lane approach poor, creek, not a spring creek and dries up and hence not valuable as a source of water. Smith stated that at December 8th, 1942, it would be difficult to sell the farm at $6,000.00 half cash.

In Argument:

Mr. Delaney, for the Claimant, argued that the claim of $12,500.00 had been supported being $10,000.00 for the farm and $2,500.00 for loss, inconvenience and costs; that the claim started shortly before the first expropriation notice was served, dated October 6, 1941 (Exhibit 1) and that claimant suffered the loss of 30 acres from that time as well as continued interference in the use of his farm, and was kept in a state of uncertainty until notice of expropriation of the whole farm, December 10th, 1942, after which time he was unable to move out due to lack of access to a highway. He stated his client had been put to double expense due to the two expropriations and arrangements having been made for proceeding with the hearing re the first expropriation. He claimed his client was entitled to an allowance for loss of revenue for the year 1943. Mr. Delaney argued that sales referred to were not a good criterion and that Assessments filed were not of much value in establishing a ratio with sales.

Mr. Sims argued that evidence submitted fixed the market value of the farm at date of expropriation at $6,000.00 and damages $1,500.00 or a total compensation of $7,500.00. He claimed that assessments given represent relative values and that the average advance of sale price over assessments in four properties cited was 37% and that taking Townsend's assessments of $4,000.00 plus 37% gave $5,480.00. He contended that Townsend's present encumbrances of $2,000.00 mortgage, $950.00 note, and $600.00 loan on Insurance indicated that Claimant did not make an extraordinary amount out of the farm. Mr. Sims stated that Claimant is entitled to damages for all inconvenience suffered plus forcible taking, but that there was an onus on the Claimant to minimize damages and that he had made no effort to do so. He argued that the damages should be limited to those of being deprived of the use of the area of the right-of-way and the inconvenience of working the farm, using a substitute lane and forcible taking and argues that these damages amount to less than the $1,500.00 allowed by the Engineer's report. The Commission had made the offer to Townsend to remain on the farm to June 30th, 1943, rent free and for a further year for a rental of $150.00 and had not received an answer.

The Board has weighed all of the evidence submitted and has considered argument of counsel and comes to the conclusion that a fair value of the Townsend farm at the time of expropriation, December 10th, 1942, is $6,000.00 and that a fair compensation for all damages and inconvenience to the Claimant through the expropriations and any other actions of the Commission is $1,500.00 and the Board allows 10% of the $7,500.00 or the sum of $750.00 for forcible taking. In view of the awards of the amounts of $1,500.00 and $750.00 for damage, inconvenience and forcible taking the Board allows interest only from the date of final expropriation, December 10, 1942, to the date of payment at the rate of 5% per annum on the total award of $8,250.00.

The Respondent shall pay the Board's fee fixed at $125.00 and shall pay the Claimant $100.00 as costs. There shall be no further costs allowed either party.

Dated at Toronto, this 30th day of August, A.D., 1943.

IN THE MATTER of Section 79 of the "Highway Improvement Act," Chapter 56, and

IN THE MATTER of the Application of the Department of Highways of Ontario for the determination by the Board of the compensation to be paid to Harold Holgate and Clara W. Holgate, in respect to certain lands expropriated by the said Department, described as portions of Lot 6, Concession 1, of the Township of Louth, in the County of Lincoln, in the province of Ontario.

DECISION OF THE BOARD

THIS IS AN APPLICATION by the Department of Highways for the fixing of the compensation to be paid to Harold Holgate and his wife, Clara W. Holgate, in respect to certain lands expropriated by the Department, being portion of Lot Number 6, in the 1st Concession of the Township of Louth, in the County of Lincoln, for the purposes of a Divided Highway.

The Board appointed Tuesday, the 11th May, 1943, at the hour of ten o'clock, in the forenoon, at the Court House, in the City of St. Catharines as the time and place for hearing the said application, and, as no specific claim had been filed by the Claimants, ordered that they file particulars of their claim with the Department within five days after service of the Appointment for Hearing.

The Appointment was served by Fred Graves, Sheriff of the County of Lincoln, on the 27th April, 1943. Mr. Holgate told the Sheriff that he would not appear and, on the same date, Holgate wrote a letter, Exhibit 2, to the Minister of Highways, enclosing the Appointment served on him, and informing the Minister that he would not consent to appear, and asking what guarantee he has that he would receive a fair hearing and whether the Department would guarantee all the expenses of the hearing. The Minister wrote to Holgate on May 6th, 1943, Exhibit 4, advising him that, should he have a good reason for not being prepared to go on, that he appear before the Board and ask for an adjournment.

The evidence shows that Notice of the first expropriation of 4.244 acres, a letter dated July 28th, 1937, to Harold Holgate and Clara W. Holgate (Exhibit 9), was served personally on them by Joseph Smith. Mr. Smith said that, when he saw what the Notice was, Holgate threw his copy into Smith's car and said he would not accept service. On the 13th January, 1938, Holgate wrote to the Minister of Highways (Exhibit 10) saying that claim for compensation was $30,000.00, and $129.00 for loss of crop in 1937, made up as follows: $104.00 for destruction of peach crop and $25.00 for loss of pear crop.

Notice of the second expropriation (Exhibit 11) was dated July 11th, 1938, and was for a triangular piece of land containing 1.651 acres.

Notice of the third expropriation (Exhibit 13) dated August 29th, 1941, of a strip of land containing 0.549 acre, south of the lands first expropriated was served.

The total of the lands expropriated is 6.444 acres.

Neither Holgate nor his wife appeared when the hearing was opened before the Chairman and Vice-Chairman at the Court House, at St. Catharines, on the 11th May, 1943, at 10.00 a.m., and the Board waited until 10.30 a.m. Neither of them appeared and the hearing was commenced.

Service of the Appointment for Hearing and of the Notices of Expropriation were proven to the satisfaction of the Board.

The evidence shows that Holgate and his wife, before expropriation, owned 25 acres of land, which they had purchased with the equipment on December 11th, 1928, for $12,000.00, assuming, as part of the purchase price, a mortgage to the Agricultural Development Board for $6,000.00. The farm is well equipped and well planted with fruit. It has two houses and other buildings suitable for a 25-acre fruit farm.

To prove value, the Department called:

1. Arthur A. Craise, a former fruit farmer and for some years an appraiser of fruit farms in the Niagara district, who lives within 1¼ miles of the Holgate farm. He valued

the land taken, planted as it was, at $600.00 per acre, and said that the balance of the farm, by reason of the reduced acreage was damaged to the extend of $75.00 an acre. This would include compansation for forcible taking.

2. Howard Rose, a Real Estate Broker, who had been selling and appraising lands in the Niagara district for thirty years, valued the farm before expropriation at $600.00 per acre, or $15,000.00, and said that the land after expropriation, 18½ acres, would still sell at $600.00 per acre or $11,100.00. He was of the opinion that, because about one-quarter of the farm had been expropriated, Holgate should be allowed an additional compensation of $50.00 per acre on the remaining land, or $925.00. In his opinion Holgate is entitled to $4,825.00 as compensation; and

3. James R. Stork, a fruit farmer who owns a 50-acre fruit farm about 1¼ miles from the Holgate farm. He valued the farm at $600.00 per acre or $15,000.00. Because Holgate had sufficient buildings for a 25-acre fruit farm, he was of the opinion that he should be allowed $600.00 per acre for the 6.44 acres expropriated, or $3,866.00, and a further allowance of $1,300.00, $200.00 per acre for the 6.44 acres taken for damages and forcible taking, making a total of $5,166.00 in all.

The members of the Board, having known of and heard these three men in the past, have confidence in their fairness and ability to place a valuation on these lands. From the correspondence from Holgate filed at the Hearing, it appears that he has no confidence in the Department, the Board, or any one else, and refused to attend the Hearing. In the opinion of the Board the witnesses were most generous in their valuations, and Mr. G. W. Mason, K.C., who appeared on behalf of the Department of Highways, was generous in suggesting that Holgate be allowed interest. The Department has allowed Holgate to harvest the crops since the expropriation.

The Board fixed the compensation to be allowed Holgate and his wife at $5,000.00 and $1,250.00 as interest, in all $6,250.00, for lands taken, damages sustained including compensation for forcible taking.

The Department will pay the Board's fees fixed at $25.00.

Dated at Toronto, the 19th day of May, A.D., 1943.

R. S. COLTER,
Chairman.

W. P. NEAR,
Vice-Chairman.

P.F. B-1629

IN THE MATTER of Section 79 (a) of "The Highway Improvement Act," as enacted by the Ontario Statutes, 1939, Chapter 19, Section 7, as amended, and

IN THE MATTER of an application by the Department of Highways for Ontario for approval of the closing of portions of certain streets in the Township of Stamford, being Alliston Ave., from South limit of Jocelyn Street, to North-East corner of Lot 28, Plan 44; Highland Ave. from South-East angle of Lot 207 to North-East angle of Lot 44; Glenholme Ave., from South-East angle of Lot 218 to 41 feet Southerly from North-East angle of Lot 70, plan 44, extension Northerly of Prince Edward Ave. from Southerly limit of Plan No. 369 to Southerly limit of Lot 242; Bellvue Street as deeded by Hydro Electric Power Commission of Ontario to Township of Stamford, Southerly from North-West corner of Lot 258, 403 feet, thence Westerly to Dorchester Road, Dorchester Road (or Fourth Concession Road) Northerly 175 feet from South-Westerly angle of Township Lot 114, and Southerly therefrom 788 feet.

G. W. Mason, Esq., K.C. .... Counsel for the Applicant

W. C. LaMarsh, Esq., K.C. .... Counsel for the Township of Stamford

DECISION

THIS IS AN APPLICATION by the Department of Highways under R.S.O. 1937, Cap. 56, Section 79 (a) for approval of this Board to the closing of portions of Alliston Ave., Highland Ave., Glenholme Ave., Prince Edward Ave., Bellvue Street, and Dorchester Road, in the Township of Stamford, in the County of Welland, in order to prevent access at those streets by the Public to the Queen Elizabeth Way as constructed by the Department in the said Township.

The Department of Highways was constructing a divided Highway from Fort Erie to Hamilton and Toronto as a through highway and projected a connecting highway through the Township of Stamford and the City of Niagara Falls to the Rainbow Bridge. This connecting highway was designated as a divided highway.

In October, 1940, Mr. R. M. Smith, Deputy Minister of Highways, and Mr. A. A. Smith, Chief Engineer of the Department of Highways conferred with the Council of the Township of Stamford re the right-of-way for this connecting link. Certain lands owned by the Township were required for the right-of-way. Closing of streets, paving of service roads in the Township in the vicinity of the Highway, access to the highway, and drainage problems were apparently discussed and agreed upon verbally. There is no written understanding arrived at by this conference but, under date of September 23rd, 1941, a letter from A. A. Smith to M. F. Ker, Engineer of the Township of Stamford (Exhibit 8A), submits a plan showing proposed paving and in referring to the paving of Alliston Ave. from Frederica Northerly to the new Highway, and also the paving of Bellvue Ave. from Drummond Road Westerly about three hundred feet and then Southerly to the new Highway, this letter says:

> "I might say that these two connections to the new highway will only permit of one-way traffic, and on no account will the traffic be allowed to cross the boulevard. You will appreciate, of course, that the bridge on Drummond St. was built with the sole intention of eliminating any connection with the Highway. The same applies to Portage Road."

This letter was presented to the Council of Stamford on September 25th and Mr. Ker wrote Mr. A. A. Smith on September 26th (Exhibit 8B) and in reference to an extension to a service road, Mr. Ker says:

> "Our Council feel that we are not asking too much when we ask that the Department give us a service road parallel to the Queen Elizabeth Way from Prince Edward Ave. to Stanley Ave., when we are only having one entrance on the Queen Elizabeth Way from Dorchester Road to Stanley Ave."

In Mr. Ker's report to Stamford Council dated October 6th, 1941 (Exhibit 8C), he says:

> "In Mr. Smith's letter of September 23, 1941, he suggests that the Department will construct service roads either the red or the blue, as shown on the plan. I am sure our request has been misunderstood as we requested a service road from Prince Edward Ave. to Stanley Ave., with one entrance to the Queen Elizabeth Way at Drummond Road, as you will recall that we were only promised one entrance to Queen Elizabeth Way by Mr. R. M. Smith, in 1940."

and later he says:

> "The proposed entrance to Queen Elizabeth Way for East bound traffic will be at Alliston Ave. and the entrance to Queen Elizabeth Way for West bound traffic will b approximately three hundred feet West of Drummond Road on Bellvue St."

The Department of Highways did not construct the entrances to the Queen Elizabeth Way at the locations above described, but did construct entrances in lieu thereof in closer proximity to Drummond Road and in locations on right-of-way purchased by the Department and apparently in positions on the East and West sides of Drummond Road that are improvements over the proposed locations.

The Department of Highways proceeded with the construction of the Queen Elizabeth Way and re-surfaced or paved service roads in the Township as indicated, shaded pink, on the Plan submitted as Exhibit 1. The Department also provided and paved the entrances to the Queen Elizabeth Way on the east and west sides of Drummond Road, constructed drains to remove surface water from the Highway and, in general, appear to have carried out their verbal and written undertakings with the Township Council and after the completion of these works the Township Clerk wrote the Department of Highways under date of November 17, 1942 (Exhibit 9) as follows:

"Township of Stamford,
Niagara Falls, Ont., November 17th, 1942.

Department of Highways,
Parliament Buildings,
Toronto, Ontario.

Gentlemen:—

A delegation was present at the Council meeting last night regarding the closing of the West end of Bellevue Street and Glenholme Avenue, and the following resolution was passed:

"That we protest the closing of Glenholme Avenue across the Queen Elizabeth Highway, insofar as a portion of Bellvue Street is isolated from grocery, street car and school facilities."

The Council have always believed that the West end of Bellvue Street would be left open to Dorchester Road, but the delegation claim that Bellvue Street was closed and are asking now for a crossing on Glenholme Ave.

Yours truly,

(Signed) DAVE ALAIR,
Township Clerk."

Plan (Exhibit 1) indicates an extension of Bellvue Street through to the Traffic Circle at Dorchester Road and Counsel for the Department stated that this extension will be provided and suggested that the Board in its order might include a provision which would ensure the extension of Bellvue to Dorchester Traffic Circle.

It would appear that the protest of the Council of Stamford Township, as per letter above was based on the representations of the delegation, that Bellvue Street was being closed and that, therefore, Glenholme Ave. should be left open and the protests re closing of Glenholme grew from this point on.

Mr. LaMarsh appeared for the Council of the Township of Stamford and submitted

1. That Dorchester Road within the Traffic Circle should not be closed to pedestrians or bicyclists.
2. That extension of Bellvue to Dorchester Road should be provided.
3. That Glenholme Ave. should not be closed.

Otherwise the Township had no objections to offer to the application.

Mr. LaMarsh called Merle F. Ker, Engineer to the Township of Stamford.

Mr. Ker stated that it would be more dangerous for pedestrians to follow around the Dorchester Road Traffic Circle than to cross the Highway and follow the old location of Dorchester Road within the Circle. Mr. Ker was present at the original conference with officials of the Highway Department in October, 1940, and had concluded from this conference that the Department were agreeing to provide a crossing between Drummond and Dorchester and naturally assumed that Glenholme would be that crossing. He stated that entrances to the Highway were proposed after that. He admits that there is no correspondence expressly dealing with the crossing at Glenholme and that his report of October 6th, 1941, referred to one entrance only to the Highway.

A crossing at Glenholme at the grade of Highway would also provide an entrance and the Board cannot accept Mr. Ker's evidence given at the hearing as against the reports and letters filed as exhibits.

Mr. LaMarsh called Roland Booth, Deputy Reeve of Stamford—who had been Reeve in 1940, but was not a member of the Council in 1941 and 1942. Mr. Booth was present at the conference in October, 1940, and said that the plans submitted at that time did not provide for a street crossing the Highway between Dorchester and Drummond, but stated that R. M. Smith admitted the reasonableness of such a crossing.

Mr. Booth contended that the residents of area between Lundy's Lane and Bellvue are injured in regard to their access to the North End of the City. He stated there were some thirty-eight houses on Bellvue and that he would not advise any one to buy a lot and build on Bellvue with Glenholme closed.

Cross-examined by Mr. Mason, Mr. Booth maintained that one crossing was agreed upon somewhere between Dorchester and Drummond, if possible near the centre.

Mr. LaMarsh called Donald Glintz, a member of Stamford Council in 1940 and since. Mr. Glintz stated that it was his impression that R. M. Smith would give a crossing between Drummond and Dorchester, although he admitted he had not seen any plan showing a crossing at Glenholme.

Several residents of Bellevue supported a crossing at Glenholme Ave., to provide access from their street to a store and church on the south side of the Highway and to the transportation and business district at Lundy's Lane. These residents are claimants for damages resulting from the closing of Glenholme.

No opposition was made to the closing of Alliston Ave., Highland Ave., nor Prince Edward Ave.

The opposition to closing Dorchester Road developed at the hearing.

The extension of Bellvue to the Dorchester Road Traffic Circle would answer any opposition to the closing of the Easterly part of Bellvue.

The chief concern of the Council and residents was the closing of Glenholme Ave.

Mr. LaMarsh submitted in argument that at least a pedestrian crossing should be provided at Glenholme.

The Board has no hesitation in finding that the Department of Highways has carried out its part of the verbal agreement, corroborated in parts by subsequent correspondence and reports. The closing of the streets in question may result in inconvenience to some residents, and some may suffer damages. Provision is made for the filing of claims resulting from the closings and for arbitrating if necessary. Some claims for damages have been filed and will be disposed of at a later date.

The Board finds that the closing of the streets, as applied for by the Department of Highways, is in the Public interest, and therefore approves of such closing on condition that the Department shall provide for the extension of Bellvue Street to the Dorchester Road Traffic Circle as shown on Plan. (Exhibit 1).

The application is therefore granted.

The applicant will pay the Board's fee fixed at $25.00.

Dated at Toronto the 19th day of March, A.D., 1943.

IN THE MATTER of Section 79 (a) of the "Highway Improvement Act" as enacted by Section 7, Chapter 19, Ontario Statutes, 1939, as amended; and

IN THE MATTER of an application by the Department of Highways of Ontario for approval of the closing by the Department of that portion of Buchanan Street, shown on Plan 2628 for Stamford, registered in the Registry Office for the County of Welland; lying between the South-West corner of Lot 704 and the North-West corner of Lot 683; and that portion of Slater Street or 5th Avenue shown on said Plan lying between the North-East corner of Lot 666 and 23 feet North of the North side of Roberts Street, and that portion of Liberty Street shown on plan number 35 (Stamford) lying between the North and South limits of deposited Plan number 347, for Stamford.

G. W. Mason, Esq., K.C..Counsel for the Department of Highways

W. C. LaMarsh, Esq., K.C..Counsel for the Township of Stamford

F. C. McBurney, Esq., K.C..Counsel for General Fred. W. Hill

W. M. Musgrove, Esq., K.C......Counsel for Chas. Kerrio and affected Ratepayers generally.

DECISION

THIS IS AN APPLICATION by the Department of Highways under Section 79 (a) of the Highway Improvement Act, R.S.O. 1937, Chapter 56, for approval of this Board of the closing of a portion of Buchanan Street, a portion of Slater Street, and a portion of Liberty Street, all in the Township of Stamford in the County of Welland.

The Department of Highways constructed a highway, known as the Queen Elizabeth Way, between Hamilton and Fort Erie, with a branch running into the City of Niagara Falls. This Highway, together with the branch into Niagara Falls, was by Orders-in-Council, dated the 22nd day of May, A.D., 1940, and the 19th day of March, A.D., 1941, designated a divided Highway. The section of the Queen Elizabeth Way in question in these proceedings lies between Portage Road on the West and the City limits of Niagara Falls on the East, and is wholly within the Township of Stamford. The right-of-way includes the street allowance known as Roberts St., which was 135 feet wide from the City limits to Stanley St., and 66 feet wide from Stanley St. to Liberty St. Roberts St. was located parallel to and between Stamford St. and Kitchener St. The City limits of Niagara Falls follows Portage Street Northerly to Kitchener Street, Easterly along Kitchener St. to Stanley St., Southerly along Stanley St. to North St., Easterly along North St. to a point approximately 250 feet East of Fifth Avenue or Slater Street, Northerly parallel with Slater Street to Stamford Street, Westerly along Stamford St. to the West side of Stanley Street and Northerly to Valley Way Road. That part of Liberty Street between Kitchener and Stamford Streets had never been opened for public use and there was no objection voiced to the closing of this Road.

With reference to the closing of Buchanan Street, it was urged that, owing to the fact that the road through the Park is closed as a war measure, nearly 80% of the traffic from Buffalo uses Buchanan Street to reach the highway leading to Hamilton, and it would be necessary, if Buchanan Street is closed for such traffic, to proceed one block West to Stanley Street to gain access to the Queen Elizabeth Way. At the junction of Stanley Street and Queen Elizabeth Way there is a level crossing at which the Department has erected Stop and Go signals. Frank Cupolo owns a house on Stanley Street, but he also owns a vacant lot to the rear, which faces on Buchanan Street and he objects to the closing of Buchanan Street because it might affect the value of the rear lot. Pane Yerick was called and he objected to the closing of Buchanan Street. After construction was started by the Department he erected a Restaurant and Tourist Camp at the corner of Buchanan and the highway, which he said was worth $30,000.00. He had also said his holding was worth $25,000.00, and also $20.000.00. In cross-examination he admitted that the Department had agreed to give him an entrance to Queen Elizabeth Way and that he had written a letter dated June 27, 1942 (part of Exhibit 9) saying that the arrangement made with the Department was perfectly satisfactory to him. No other evidence or argument was given to show that the local residents on either side of Roberts Street would be unduly affected by the closing of Buchanan Street.

With reference to Slater Street evidence was given on behalf of the local residents and the Township Council opposing the closing. It was pointed out that residents in the Section South of Roberts Street used Slater Street to go to the hospital and the swimming pool, and residents to the North used Slater Street to get to the Arena and other sections of the City. Charles Kerrio or Gaudioso has been very active in organizing opposition to the closing of this part of Slater Street and presented a petition signed by twenty-one persons, some of whom were tenants. He lives at the corner of Kitchener Street and Slater Street, and his mother lives in a house on Slater Street facing Roberts Street, and on the opposite side of the Highway from his home. He says he will be compelled to travel nearly one-half mile to go to his mother's if the road is closed. The Department had purchased most of the houses adjoining the right-of-way, except Mrs. Gaudioso's house, and removed them. Her house is a better class than the other houses in the neighborhood. He says that if Slater Street is closed as asked the only way to get to her house would be near the rear entrance. The front of her house is at the North limit of the Queen Elizabeth Way, or Roberts Street. There are small houses between the Highway lands and Stamford Street, but North of Stamford Street most of the Lots are vacant and practically all vacant lots are owned by the Township.

Before commencing these proceedings officials of the Department of Highways approached the Township Council and, as a result, on the 14th June, 1942, the following resolution was passed by the Council: "That we approve of the closing of Buchanan Street and Slater Street (Fifth) at Roberts Street, crossing, on condition that Stamford and Kitchener Streets are to be paved; that is the Township portion of these streets East of Stanley Street." The Department have since paved not only the streets mentioned, but also Stanley Street and Kitchener Street West of Stanley Street. This paving seems to have pleased the residents. The house of Charles Kerrio or Gaudioso, who was active in having the petition signed, faces on the paved portion of Kitchener Street.

On November 17th, 1942, after the paving was completed, Dave Alair, Clerk of the Township of Stamford, wrote a letter to the Department of Highways, as follows:

"Township of Stamford, Township Hall,
Niagara Falls, Ont., November 17th, 1942.

"Department of Highways,
Parliament Buildings,
Toronto, Ontario.

"Gentlemen:—

"At the Council meeting last night a petition was presented, a copy of which is herewith attached, protesting against the closing of Slater Avenue and Buchanan Avenue. The most objection is to the closing of Buchanan Avenue as it is the Township border line, and the following resolution was passed:

"That we protest the closing of Slater Avenue and Buchanan Avenue to the Department of Highways as per petition presented by the ratepayers in that district, and a copy of the petition to be sent to the Highway Department."

"Yours truly,
(Signed) DAVE ALAIR,
Township Clerk."

On December 1st, 1942, Mr. Alair again wrote the Department, as follows:

"Township of Stamford, Township Hall,
Niagara Falls, Ont., December 1, 1942.

"Ontario Municipal Board,
Parliament Buildings,
Toronto, Ontario.

"Gentlemen:

"At the meeting of the Stamford Township Council held last night, the following resolution was passed:

" 'That owing to the petitions brought to this Council against the closing of Slater and Buchanan Avenues, also Glenholme Avenue that the Municipal Board be asked not to give a decision in the matter until a public hearing is held concerning the matter, the hearing to be held in the Township Hall.'

"Yours truly,
(Signed) DAVE ALAIR,
"Township Clerk."

Mr. LaMarsh, Solicitor for the Township of Stamford, opposed the closing and stated that the membership of the Township Council had been changed at the last election and that the present Council is opposed to the closing of these roads, and that because the 1942 Council did not pass a By-law, this year's Council is not bound by what last year's Council did. Mr. Mason filed copies of correspondence with the Township of Stamford (Exhibit 9) and this indicates that Stamford Council on June 14th, 1942, passed a resolution approving of the closing of Buchanan and Slater Streets on condition that Stamford and Kitchener Streets are to be paved. The same Council on November 16th passed a resolution protesting the closings. In the meantime the Department of Highways had paved the streets agreed upon.

One claim for damages in pursuance of the notices published and served has been filed by Mr. McBurney, on behalf of Fred. W. Hill, the owner of certain lots in the vicinity. Particulars of this claim will be filed on or before the 8th day of Feburary, A.D., 1943, and Counsel for both parties have agreed to proceed with the hearing of the claim on the 18th day of February, A.D., 1943, at 10.00 a.m.

The Board has considered the evidence submitted on behalf of those objecting to the closing of the streets in question, and has decided that such evidence is not sufficient to justify the Board in withholding its approval to the application and the Board, therefore, approves of the application of the Department of Highways to close the portions of Liberty Street, Buchanan Street and Slater Street, as per Plan filed as Exhibit 1.

The application is therefore granted.

The applicant will pay the Board's fee fixed at $25.00.

Dated at Toronto, the 19th day of March, A.D., 1943.

IN THE MATTER of Section 79 (a) of "The Highway Improvement Act," and amendments; and

IN THE MATTER of an Application of the Department of Highways for approval of the closing by the Department of that portion of the Township Road in Lot 5, Concession 1, Scarboro Township, known as Franklin Avenue, which is crossed by the new Divided Highway.

DECISION OF THE BOARD

NOTICES OF THE HEARING were duly served and posted by the Department of Highways, as required by the Board, and the matter came before the Board for Hearing on the 6th day of May, 1943, at the Board's Chambers, in the Parliament Buildings, in Toronto.

Four persons appeared before the Board at the Hearing in opposition to the closing, namely:

Fred. B. Reed,
Thos. Geo. Crandall,
Misses Irene B. and Gladys E. Kemp.

Fred. B. Reed objected to the closing of the road because he was a butcher and gardener and ploughed and did other work for residents on the North side of the Highway and, if the road was closed, it would force him to travel a greater distance to get to the residences of those people for whom he was working. On the 3rd day of July, 1942, he had signed a Release to the Department of Highways for the sum of $1,650.00 (for land taken to widen the divided Highway and for land taken for a service road and for land taken to widen the said service road, an extra 12 feet, and for all claims in connection with the taking of the said lands including all claims for closing Franklin Avenue at the said Divided Highway). Under the circumstances the Board refuses to allow his objection.

Thomas George Crandall objected to the closing because he though people should be allowed to cross the Highway and would be satisfied if a turnstile were installed. The Board finds that on the 30th April, 1942, in consideration of the payment of $300.00 to him by the Department of Highways, he released all claims or demands that he had or might in the future have for any damages caused, any injuries sustained by him (through the construction of a service road) and any settlement of all claims when Franklin Avenue is closed at the dual Highway. Under the circumstances, the Board refuses to allow his objection.

With reference to the claim of the Misses Irene B. and Gladys E. Kemp, they own parts of Lots 5 and 6 in the First Concession of the Township of Scarboro to the North of the location of the Divided Highway and part of their lands were purchased for the purposes of the Highway. In the first purchase of lands from them, they were offered $833.00 as payment for the land and damages on the understanding that a gateway would be constructed from their lands to the Highway so that they could get on to the Highway from their lands and proceed in a Westerly direction along the new Highway. Later, the Department decided that there should be no entrances to the Highway at that point and a settlement was arrived at between the parties, the Department to pay them the sum of $1,033.00 (for sufficient land to carry the Highway across their property). The above is in full compensation of all damages to property and for all inconveniences. The Misses Kemp say that, at the time this settlement was made, they did not understand that the Department had decided not to allow them an entrance to the Highway, but the Board has noted that there was an increase in the amount to be paid to them. Later, the Department decided to take a further strip along their property and entered into an agreement with them for the purchase of this property. Nothing was said then about an entrance to the Highway and the evidence as submitted to the Board was not very clear as to whether they fully understood that there was to be no entrance. On the 6th day of January, 1942, a release was signed by them for "0.229 acre of land taken for widening the divided Highway." The Board feels that it might be unfair to the Misses Kemp if they were not given a further opportunity to prove damages, and therefore, reserves the question of damages, if any, to be paid to them.

The Board approves of the closing of the Highway.

The Misses Kemp will be given a further opportunity to file a claim for damages.

Dated at Toronto, the 14th day of May, A.D., 1943.

IN THE MATTER of Clause (ii) of Section 59 of "The Ontario Municipal Board Act," (R.S.O. 1937, Chapter 60), as enacted by Ontario Statutes, 1940, Chapter 20, Section 1, and

IN THE MATTER of Applications by the Corporations of the Township of Nepean, the Township of Gloucester, the Town of Eastview, and the Village of Rockcliffe Park, for fixing by the Board of the rates to be charged by the City of Ottawa for water supplied thereto.

Mr. J. H. Thomson,
Mr. W. Judson.. Counsel for the Applicant

Mr. F. B. Proctor, K.C.,
Mr. G. C. Medcalf..Counsel for the Respondent

Mr. Alan Van Every ....Counsel for the Department of Municipal Affairs

DECISION

The Ontario Municipal Board appointed Tuesday, the 14th day of May, 1940, at the hour of ten o'clock in the forenoon, at the Court House, Ottawa, for the hearing of all parties interested. This appointment was adjourned until Tuesday, the 21st of May, 1940, at the same hour for applicant Corporations to make application to the said Ontario Municipal Board for directions and for an order for production, and for examination for discovery of the Chief Engineer of the Respondent, and generally as to the procedure to be followed.

Under date of May 10th, 1940, Mr. Proctor advised the Board that he proposed moving before the Board that this application be dismissed on the ground that the Board is without jurisdiction to hear it and requested a date to be fixed for hearing the motion prior to the appointment of May 21st.

The Board appointed May 29th, 1940, at 10.00 o'clock a.m., at the Board's Chambers, for the hearing of both motions—the motion attacking the jurisdiction of the Board to be heard first and the motion by Long and Daily for production immediately thereafter.

Under date of August 15th, 1940, the Board gave judgment on the motion by the Respondent, to set aside the proceedings launched by the Applicants and dismissed the motion.

Under date of September 11th, 1940, Mr. Proctor for Respondent, gave Notice of Motion for leave to appeal this decision.

Notice of setting down of appeal was dated September 25th, 1940.

Under date of September 27th, 1940, Board's Formal Order issued, dismissing Application to set aside proceedings.

Globe and Mail, of December 19th, 1940, gave decision of Court of Appeal, and dismissed same as to Town of Eastview and Village of Rockcliffe Park.

Under date of June 12th, 1941, Mr. Proctor submitted memorandum prepared for his appeal before the Supreme Court.

This appeal was dismissed by the Supreme Court.

Under date of September 22nd, 1941, the Board gave an appointment for October 14th, 1941, for the hearing of the application re rates, for directions and order of production.

On October 8th, 1941, notice was received from Messrs. Long and Daly that the Township of Gloucester had withdrawn from the proceedings.

Hearing of October 14th was adjourned to November 4th.

Under date of October 27th, 1941, Mr. Proctor registered objection to Mr. Van Every sitting as a member of the Board after having acted as Solicitor for the Department of Municipal Affairs on behalf of the applicants.

Order of the Board dated November 7th, 1941, issued for examination for discovery and production of documents.

Under date of November 3rd, 1941, a copy of memorandum from Mayor Lewis, of Ottawa, dated October 24th, 1941, to the outside Municipalities was filed with the Board.

Under date of November 24th, 1941, Mr. Proctor filed Affidavit of W. E. MacDonald, Waterworks Engineer for Ottawa, and schedule of documents which respondent does not object to produce, and also schedule of documents that respondent objects to producing.

January 15th, 1942—Mr. J. Stewart, Administrator of Services, submits copy of letter to Township of Nepean re his position with respect to water rates.

Under date of February 7th, 1942, the Board gave an appointment for February 27th, 1942, for the hearing of a motion by the applicants for direction. At this hearing, it was agreed that each side should file a Brief and then at a hearing before the Board the authors of the Briefs would submit to cross-examination.

March 20th, 1942—Mr. Storrie's Brief was filed by Applicants.

April 13th, 1942—Ottawa Brief was filed by Respondent.

April 25th, 1942—Mr. Storrie's reply was filed.

The Board fixed May 27th, 28th, 29th, 1942, for hearing in Ottawa, at which time evidence was submitted by Applicant and Respondent.

On May 29th, Mr. Proctor moved for a mistrial on the grounds that Mr. A. J. B. Gray was a member of the Ontario Municipal Board, although not sitting on this rate case, and at the same time Mr. Gray was Deputy Minister of Municipal Affairs and, as such, was interested in the direction of the affairs of Eastview as a supervised Municipality.

Mr. Proctor then withdrew from the trial.

Later an appointment was given by the Board for October 8th and 9th, 1942, at Ottawa, to complete the evidence.

Mr. Judson, for the Municipalities, called Mr. William Storrie, Consulting Engineer, who had previously filed a Brief summarizing the situation for the Municipalities and dated March 20th, 1942—some of the salient features of which are:

(1) The outside Municipalities for some years have purchased water from the City of Ottawa through a meter at their respective Municipal boundaries and have paid at the rate of twenty cents per thousand Imperial Gallons.

(2) By-law 8267 of the City of Ottawa, dated August 4th, 1936, provides that "The rate to outside Municipalities under Section 56 is not to be less than 50 per cent. in excess of the rate fixed by such by-law for water-takers inside the City. The inside rate is 16.82 cents per 1,000 gallons and the outside rate, therefore, would be at least 25.23 cents per 1,000 gallons under the terms of the By-law."

(3) Meter Rates Charged, Cents per 1,000 Gals.

City Consumers	16.82
Non-Resident Individual Consumers	28.00
Outside Municipalities	25.23
Town of Eastview (Increased from 20c on May 1st, 1937)	25.23
Rockcliffe Park (Increased from 20c. on October 1st, 1938)	25.23
Nepean Township (Increased from 20.73c. on August 5th, 1940)	25.23
Gloucester Township (Agreement expired on April 18th, 1942)	20.00
Rockcliffe Air Station (Conforms to By-law)	28.00
Dominion Government (up to 200 m.g.)	16.25
All buildings inside the City and Experimental Farm outside the City (all over 200 m.g.)	12.50

(Increased in 1932 from 13 cents and 10 cents, respectively.)

(4) Eastview and Nepean have refused to pay the increased rate, 25.23 cents, and Rockcliffe Park has paid the same under protest.

(5) In the year 1941 outside Municipalities used 2.97% of total water pumped and paid 6.53% of the total revenue received.

(6) Summary on Page 4 of information contained in the Annual Returns of the Waterworks System to the Department of Municipal Affairs shows:

For capita consumption in Ottawa since 1935 is 111 gals, per day.

Revenue per 1,000 gals., 1941,	13.332c
Net Expenditure per 1,000 gals. produced	12.730c
Net surplus per 1,000 gals. produced,	.602c

Administration charges increased from 0.526c in 1934, to 1.245c in 1941.

(7) New filtration plant was put in operation in 1932. Table on page 5 shows that per capita consumption is almost halved in the past 20 years.

Table on page 6 shows that average gallonage pumped per day is slightly less in 1941 than in 1932, and is 2 per cent. greater than 1934—two years after the filter plant was put in operation.

(8) Average rate per 1,000 gals. paid by Dominion Government in 1938, 14.72c; 1940, 14.34c.

(9) Mr. Storrie indicated a relation between the Sewage Disposal problem of the City of Ottawa and source of water supply for the Municipalities downstream.

(10) Allowance for Leakage:

Annual returns by the City of Ottawa used 20% for leakage or unaccounted for water for the years 1934 to 1939, inclusive, and 25% for the years 1940 and 1941.

Mr. Storrie contended that Ottawa is the only Municipality in Ontario listed in the Ontario Department of Municipal Affairs Annual Report of Municipal Statistics which makes any deduction from the total water produced before ascertaining the cost of production per 1,000 gals. He said the total production of water may be definitely known whereas the leakage in a system is a mere matter of guess work. He said "Leakage exists in the City distribution system whether or not outside Municipalities take water from the City System."

Leakage has two main sources—from the mains comprising the distribution system and from the services to the properties being served. He said that no portion of leakage from services should be taken into account in arriving at a rate to be charged outside Municipalities.

During the last 7 years the per capita consumption has averaged 111 gallons daily, and yet in 1940 and 1941 allowance for leakage is increased to 25%.

(11) Water rates in Ottawa are based on an assessment basis, or meter charge, whichever is the greater.

No charge is made in the general tax rate for water supply for fire protection purposes.

"Water free of all charge is supplied to Police Stations, Fire Halls, Hospitals, Public Baths, Detention Home, Registry Office, Central Heating Plant, Public Libraries, City Parks, Exhibition Grounds, Street Sprinklers, Sewer Flushing, and the Dominion Government for Parks and Driveways."

In 1938 this free water supplied was estimated to be 273 million gallons.

(12) In 1938 there were 2,129 meters in Ottawa of which 1423 meters were discarded in favor of the increased charge on the assessment basis. These 1423 users paid an average of 34c per 1,000 gallons. In 1940 only 6.2% of City services were metered.

(13) Table on page 14 gives cost of producing water and charges made in five Municipalities:

	Cost of Producing	Rate charge outside
Ottawa	12.76	20.00(25.23 new)
Toronto	11.81	16.00
Windsor	17.62	19.38 20.77
Trenton	12.21	12.8 Airport
Scarborough	19.46	17.

City of Windsor Utilities Commission sell on a wholesale basis at 10% in excess of the cost to the citizens of Windsor. Cost is determined by dividing the total expenditures for the year by the total plant output.

Sandwich West, with no agreement, is charged cost plus 15%.

(14) Mr. Storrie cited difference in set up between Public Utility and a private water company.

Public Utility finances capital expenditure by the issue of debentures which are paid off at maturity.

Cross-examined by Mr. Proctor, Mr. Storrie said:

(1) Agreement with Dominion Government for "a supply of water" provides a contribution of $100,000.00 per year—apparently not credited to revenues of Water Department—but if added to the metered price of water to the Dominion might increase the meter rate to 20c or maybe 25c.

(2) Admitted leakage has to be allowed for. Said in a modern system leakage should be less than 25%.

Said 25% is ample allowance for all contingencies and reasonable profit—excluding house services. Said total water pumped is the only known quantity and rate should be based on this, using a reasonable percentage to cover all contingencies. Said setting up a depreciation fund and paying off debenture debt is one and the same thing.

(3) Stated that Eastview was refused permission to take water from the Ottawa River because of pollution. Admitted if Ottawa did not exist that Rockcliffe would still have to filter and chlorinate for protection of a water supply from the river and to remove turbidity.

J. F. Casault, Clerk of Eastview, called by Mr. Judson, stated that the first bill to Eastview under Ottawa By-law No. 8267 was rendered after March 1st, 1939, for water consumed in period November 22nd, 1938, to March 1st, 1939 (Exhibit 16). Account was paid on basis of old rate.

Albert E. Morris, Clerk-Treasurer of Nepean, stated first account under new rate to Nepean was rendered in November, 1941, for water consumed in the period August 27th, 1941, to November 27th, 1941.

Account was paid on basis of the old rate under old agreement—20c and a fraction.

Reference was made to the ruling of the Court of Appeal as to whether the Nepean agreement is still in effect.

Exhibit 18—copy of Rockcliffe Bill at $16.75 per 100 cu. ft. for a period of December 12th, 1938, to March 14th, 1939—which was paid under protest.

Reeves Newsom, Consulting Engineer, New York, called by Mr. Proctor, said:

(1) Rate should be based on water sold. In fully metered system 80 to 85% of water can be accounted for—in such cases the maximum night flow is 35 to 40%.

Said in Ottawa, where minimum night flow of 37.3% is lowest in past several years, that 25% for unaccounted for water is conservative.

(2) Exhibit 19—Submits memorandum:

"If a fair return is to be earned upon the present value of the property and plant of the waterworks system the price to be charged should be 34.7c per 1,000 gallons. If the charge is to be based upon a return on a value equivalent to the mean between the present value and the cost of construction of the plant now in use, the charge should be 31.0c per 1,000 gallons."

(3) Said "In 1940, if amount of taxes properly chargeable, $267,000.00, had been included as expense and added to the revenue as payment for the service and Municipal use of water, it would have been 23.7% of the total income." "After allowance for water now furnished free there would have remained approximately 22% as a fire service charge." This, he considered a proper amount for such service in a city the size of Ottawa.

(4) Mr. Newsom's calculations were on the basis that a public utility owned by the City should be considered as a private utility in establishing a rate to an outside municipality.

Mr. Gordon, Finance Commissioner, called by Mr. Proctor, stated:

(1) Gross unmatured waterworks debenture debt at December 31st, 1941, was $4,893,536.31 with sinking fund assets of $1,995,232.02. Average rate paid on Waterworks debt—4.942%. Sinking fund earnings average slightly over 4%. Short term debenture issues now resulting in declining debt requirement.

(2) Admitted that cost of collection of accounts is charged into cost of water. Said that the accounting for pension fund in 1940 had nothing to do with this water rates case.

(3) Annual Waterworks Debt charges, 1934—$411,000.00

Annual Waterworks Debt charges, 1941, $439,000.00

(4) Stated new rate for water to Dominion Government in effect June 15th, 1942, is 20.826 cents.

(5) Admitted that if $100,000.00 paid by Dominion Government had been credited to the Waterworks in 1941, there would have been a surplus of $142,304.00.

W. E. McDonald, Waterworks Engineer, for the City of Ottawa, called by Mr. Proctor.

Exhibit 23—Mr. McDonald's report found a fair rate to be charged is 24.99005c.

Estimated amount of water delivered in 1941, at 75% of total quantity pumped

Costs of pumping, purification and distribution	8.09056
Allowance for capital investment at 6% on Book Cost of Plant, $8,305,353.19	9.42785
Depreciation on physical property at .89% on $14,679,426.19 appraised value (this is equivalent to 1.57% on the Book Cost)	2.47363
	19.99204
Additional charge to outside Municipalities, 25%	4.99801
	24.99005

Based on 1942 expenditures this same computation would result in a rate of 25.85.

Mr. McDonald supports 25% for leakage, or unaccounted for water, in Ottawa system. Exhibit 26—Nepean losses, 28.6%; Gloucester losses, 29%.

Refers to increased population in Ottawa, 28½% since 1930. Filtration Plant lacks reservoir reserve; a new filtered water reservoir is required. Lawn watering makes excessive demand in spite of control through staggering hours of watering and the pumping of more water from the Rideau by the Improvement Commission.

Two new filters recommended.

$85,000.00 expenditure on pump equipment now in progress.

Mr. McDonald, cross-examined by Mr. Judson:

Admitted he could name no other Canadian City using 25% for leakage. Has been convinced for past 2 or 3 years that 25% leakage exists as a result of study of the problem of fixing rates to outside Municipalities.

Admitted running of taps to protect from freezing is fairly common in some areas. City has conducted leakage surveys—from which 27½% as an average was arrived at.

Admitted a higher per capita consumption where meters not used.

Said that outsiders are getting water cheaper than citizens of Ottawa.

Admitted no average rate applies in Ottawa. Contended there is an undue strain on the City system—that the mains into outside Municipalities have a capacity to draw 20/35 of the capacity of the plant.

Admitted possibility of such a combined drain is very remote.

Mr. McDonald referred to an extra cost on the Waterworks System through the policy of clearing snow from certain streets. This cost the Waterworks Department $60,000.00 in a particular winter.

Mr. Proctor, in argument:

Contended that the Ottawa rate structure has no bearing on this case—whether metered flat or based on assessment, and should not affect the establishing of a fair rate to be charged outside Municipalities.

Mr. Newsom's Brief and Mr. McDonald's calculations are based on water delivered—not water pumped and on assumption of 25% leakage or unaccounted for water.

Suggested the Order should have a time limit—say 2 years, on account of abnormal times and fluctuation in costs.

Asked permission to submit case law in a memorandum.

Mr. Judson in argument:

Contended that commercial basis of fixing the rates should be rejected.

Said outside Municipalities cannot install their own systems—sewage situation has made this impossible and they therefore must deal with Ottawa, the only system able to supply.

Said no economic justification for such waterworks duplication.

Said cost, plus a fair return, should be allowed.

Said returns to the Department represents proper accounting basis to arrive at cost.

From hearing the evidence produced and reading the documents filed and a study of cases submitted, the Board has arrived at the following:

(1) The Board does not accept the principle that the outside Municipalities should be charged for the water supplied by meter at their respective boundaries on a strictly commercial basis or, in other words, that the City-owned Public Utility should be considered as a private utility in establishing such a rate.

(2) The Board is of the opinion that the City of Ottawa should assume a responsibility for the supplying of water to the outside Municipalities and more particularly is this the case here because of the evidence submitted to show that Ottawa is contributing a pollution to the River which renders its water non-usuable to the Municipalities down stream. This responsibility it has voluntarily assumed in the past and, when the percentage of its water production involved is in the neighborhood of only 3 per cent. on the average, there would seem to be no good reason for avoiding this responsibility now.

(3) Applicant Municipalities admit that the rate to be charged should include a reasonable percentage to cover all contingencies. The evidence of Mr. Storrie is that the total water produced or pumped is the only definitely known quantity on which to base a rate. The various methods of trying to fix a rate for leakage or unaccounted for water were not very conclusive although all witnesses admit that there is leakage in every system of waterworks.

(4) The Board agrees that the system of collecting water rates in the City of Ottawa has no bearing on this case, and yet it finds that the Ottawa By-law No. 8267 provides for a rate 50 per cent. in excess of the rate fixed for water-takers inside the City. The inside rate is taken as the meter rate of 16.82 cents per 1,000 gals. There is no evidence, however, to show that this meter rate of 16.82 cents has been properly arrived at to establish it as a fair cost of water delivered. The number of metered services in the City of Ottawa in 1940 represented only 6.2% of the City services.

(5) The Board agrees that it is the business of the City of Ottawa as to its system of charging for fire protection, free water for certain services and institutions, agreements with the Dominion Government, and as to the size of surplus on waterworks accounts and the disposition of this surplus.

But the Board also finds that a consideration of these items and the revenue side of the waterworks accounting renders the rates charged in Ottawa, meter or otherwise, as an unsound and unstable basis to use to fix a fair rate for an outside Municipality.

(6) The Board is thus forced to accept what appears in the evidence submitted as the only definite known quantity to be used for the basis of fixing a rate, and that is the annual total water produced divided into the total expenditure involved in its production to give a rate per 1,000 gallons of water produced. The rate thus arrived at is to be increased by a percentage to cover contingencies including that of leakage. The Board finds the evidence as to what this percentage should be is conflicting and not at all conclusive. Mr. Storrie says 25%; Mr. McDonald uses 25% for leakage and then 25% to cover other contingencies. By-law No. 8267 of the City of Ottawa establishes the principle of "not less than 50% in excess of the price fixed by this By-law for water-takers for use in the City of Ottawa."

The motion by F. B. Proctor, K.C., Counsel for the City of Ottawa, made during the Hearing in this matter for a declaration that there has been a mistrial, on three grounds:

(1) That the Board is without the right to function.

(2) That A. J. B. Gray, a member of the Ontario Municipal Board, has been actively consulting with the Applicants and advising their Counsel during the Hearing.

(3) That the application of the Township of Nepean had been dismissed by the Court of Appeal.

The motion is really the result of the fact that A. J. B. Gray is Deputy Minister of the Department of Municipal Affairs and also a member of the Ontario Municipal Board, and that the Town of Eastview, one of the Applicants is a defaulting Municipality and under the supervision of the Department of Municipal Affairs.

The Ontario Municipal Board is composed of three Members, one to be appointed as Chairman and one as Vice-Chairman. R.S.O. 1937, Chap. 60, Section 7. Section 8 provides that a vacancy in the membership of the Board may be filled by the Lieutenant-Governor in Council. Section 13 provides that "two members shall form a quorum and be sufficient for the exercise of all the jurisdiction and powers of the Board." Section 69 provides that "the Board may, under certain circumstances and after a public hearing, dispense with a vote of the Ratepayers provided that no such order shall be made by the Board unless the same is made by the unanimous decision of all the members thereof." Generally two members of the Board have sat on the hearing and the third member consulted after the hearing.

During the month of August, 1940, D. S. Charlton, then Vice-Chairman of the Board, was granted leave of absence, he then being on Active Service with the Military Forces of Canada.

Shortly after he left, an application to dispense with the vote of the Ratepayers was made to the Board and, so that the matter might be considered by a Full Board, the Board requested that Alan Van Every, Solicitor for the Department of Municipal Affairs, be appointed a member of the Board and, as I felt that W. P. Near, the other Member of the Board, and I could, at least for a time, attend to the business of the Board, that he be not required to devote his whole time to the business of the Board. He was so appointed on the 12th day of August, 1940, but he continued his duties as Solicitor for the Department of Municipal Affairs. Until his resignation on the 6th day of November, 1941, Mr. Van Every was asked to assist the Board in very few cases—I would say not more than ten times.

Upon Mr. Van Every's resignation, A. J. B. Gray, Deputy Minister of Municipal Affairs, was appointed as a member of the Board to replace the said Alan Van Every, and he was not required to devote his whole time to his duties as a member of the Board. He continued to devote his time to his duties as Deputy Minister of Municipal Affairs.

Since his appointment and until the 27th day of May, 1943, Mr. Gray has acted as a Member of the Board only twice: Once in a conference with representatives from the City of Hamilton with reference to providing money, where a vote of the Ratepayers, or dispensation of such vote, was necessary, and it required three members of the Board to dispense with the vote; and once on a hearing with reference to the annexation of certain lands to the City of Brantford.

The application to fix the Rates to be charged by the City of Ottawa was commenced in April, 1940, long before Mr. Gray became a member of the Board, and the proceedings were continued up to the time of the appointment for hearing on the 27th day of May, 1942, and Mr. Gray, either before or since his appointment, has not been consulted with by the Board, with reference to the Ottawa Rates Case.

An appointment for the hearing by the Board of an application by the City of Ottawa, to dispense with the Vote by the Ratepayers with reference to the City of Ottawa providing the sum of $200,000.00 for addition to the Hospital, the said sum to be raised by the issue of debentures, was given for Friday, the 29th day of May, A.D., 1942, at Ottawa. The hearing of the Water Rates case had been set for the 27th day of May, A.D., 1942, and the Board decided to hear the other matter while it was in Ottawa.

A few days before we went to Ottawa, Mr. Gray was asked to come to the Board's Chambers to discuss the application of Ottawa to dispense with the Vote of the Ratepayers. Mr. Gray was told the facts as the Board had them at that time, and that Judgment would be reserved so that all the facts could be given to him after the hearing. He then told us that he would be in Ottawa at that time attending the Mayor's Convention.

The Water Rates case was not discussed, nor did either Mr. Near or myself know that Mr. Gray would be appearing before the Board on behalf of the Town of Eastview, or assisting its Counsel.

This application was commenced long before Mr. Gray became a member of the Board, and at no time has he, with the knowledge of the other Members of the Board, taken any part in these proceedings as a Member of the Board.

Because, for instance, a Justice of the Court of Appeal is, in some manner interested in the subject matter of an Appeal before that Court, does not invalidate the proceedings before that Court. The Justice, who is interested, does not take any part in those proceedings. It is therefore held that because Mr. Gray, a member of the Board, is as Deputy Minister of Municipal Affairs interested in the proceedings, a mistrial is not created.

Mr. Proctor also contends that the Board is without the right to function in the ground that an appointment had been issued by the Board on the 23rd day of April, 1940, for a hearing on the 14th day of May, 1940, when the sixty-day period, after the 24th day of February, 1940, the date of prorogation of the Legislature had not expired.

The Solicitor for the Applicants served Mr. Proctor with Notice to Produce documents at the hearing, and Mr. Proctor served Notice of Motion to set aside the application for lack of Jurisdiction, and it was decided that both Applications should be heard on May 29th. The Motion on behalf of Ottawa was heard and dismissed. On appeal, the Court of Appeal allowed the appeal of Ottawa with respect to Gloucester and Nepean on the ground that there were valid and subsisting agreements between those Townships and Ottawa, but dismissed the Appeal with respect to Eastview and Rockcliffe Park. On Appeal by the City of Ottawa to the Supreme Court of Canada with reference to Eastview and Rockcliffe Park, the Appeal was dismissed.

On September 4th, 1941, the Board received a letter dated September 3rd, 1941, from Messrs. Long and Daly as follows:

> "On behalf of the Corporations of the Township of Nepean, the Town of Eastview and the Village of Rockcliffe Park, we wish to apply for an appointment for hearing of the applications of these Municipalities pursuant to Clause (ii) of Section 59 of The Ontario Municipal Board Act, R.S.O. 1937, Chapter 60, and all amendments thereto; under which the Board has authority to vary or fix the rates for water supply by the City of Ottawa to the said Municipalities.
>
> "On the date given for the hearing, we shall move for directions and for an order for production and for the examination for discovery of the Chief Engineer of the Respondent and for the right to inspect the waterworks system of the Respondent and, generally, as to the procedure to be followed in respect of the said applications. This is in accordance with the Order of the Ontario Municipal Board dated 27th September, 1940."

And, on the 22nd September, 1941, the Board issued an appointment for a hearing at its Chambers in Toronto for the 14th day of October, 1941.

Under Agreement between the parties, memoranda were filed by both parties and a Hearing commenced at Ottawa on the 27th May, 1942. The Hearing continued until almost the close of the third day, when Counsel for the City of Ottawa raised the question that the Act under which the proceedings were commenced was not in force when the application was made.

The Board finds that Mr. Proctor should have raised his question when he launched his Motion on May 29th, 1940, to set aside the proceedings. The Board also finds that these proceedings were commenced when Messrs. Long and Daly, on behalf of Eastview, Nepean and Rockcliffe Park, wrote the letter dated September 3rd, 1941.

The Agreement between the City of Ottawa and the Township of Nepean re Water Rates was dated the 15th day of December, 1930, and expired on the 15th day of December, 1940, one year's Notice thereof having been given by the Township.

Both Motions are therefore dismissed.

The Board, after considering all of the evidence and the circumstances, accepts 50% as the increase to be allowed to cover all contingencies in this particular case.

(7) The Board fixes as a rate to be charged per 1,000 gallons for water delivered to the meters at the respective Municipal boundaries of Eastview, Nepean and Rockcliffe Park the amount of 18.72 cents, such rate to apply to the water delivered from and including May 1st, 1940, and thereafter for the year 1941 and for each successive year, subject to adjustment for the year 1946, and each subsequent five year period based upon the following principle:

> The average net cost of producing water, for the years 1936 to 1940, inclusive, is 12.48 cents per 1,000 gallons according to Exhibit 26, Page 4, and adding 50% for all contingencies to the net average cost so arrived at gives 18.72 cents for 1,000 gallons as the rate to be charged.

The Board directs that a further fee of Fifty Dollars shall be payable by each of the Appellant Municipalities, namely: The Township of Nepean, the Town of Eastview, and the Village of Rockcliffe Park.

Dated at Toronto, the 7th day of January, A.D., 1943.

R. S. COLTER,
Chairman

W. P. NEAR,
Vice-Chairman.

P.F. A-9343

IN THE MATTER of Clause (ii) of Section 59 of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60), as enacted by Ontario Statutes, 1940, Chapter 20, Section 1, and

IN THE MATTER of Applications by the Corporation of the Township of Nepean, the Township of Gloucester, the Town of Eastview, and the Village of Rockcliffe Park, for fixing by the Board of the rates to be charged by the City of Ottawa for water supplied thereto.

BETWEEN:

THE CORPORATIONS OF THE TOWNSHIP OF NEPEAN, THE TOWN OF EASTVIEW, AND THE VILLAGE OF ROCKCLIFFE PARK,
Applicants

—and—

THE CORPORATION OF THE CITY OF OTTAWA,
Respondent

Mr. W. Judson .... Counsel for the Applicants

Mr. F. B. Proctor, K.C. .... Counsel for the Respondent

---

This is a motion on behalf of the Township of Nepean, the Town of Eastview and the Village of Rockcliffe Park to settle the formal Order in this matter, and the Applicants move:

1. To vary the decision of the Board so as to provide that in the case of the Township of Nepean, the rate shall apply from and after the dates of the termination of the Agreements between the City of Ottawa and the Township of Nepean, namely, in the case of the Stevenson Place area of the Township from and after the 30th July, 1940, and in the case of water area Number One of the Township from and after 15th December, 1940.

2. To vary the style of Cause by striking out the name of the Township of Gloucester.

Pursuant to resolutions passed by the Councils of Nepean, Eastview, Rockcliffe Park and Gloucester, requiring the Board by virtue of Section 59, Clause (ii) of the Ontario Municipal Board Act, R.S.O. 1937, Cap. 60, to fix the rates to be charged by the City of Ottawa for water supplied to the said Municipalities the Board, on the 23rd day of April, A.D., 1940, appointed Tuesday, the 14th day of May, A.D., 1940, at 10 a.m. at the Court House in the City of Ottawa for the hearing of all parties interested, and notice of Appointment was sent to G. C. Medcalf, Assistant Solicitor for the City of Ottawa, and to the Department of Municipal Affairs.

The Respondent served a Notice of Motion, dated the 18th day of May, A.D., 1940, for an Order dismissing the Application on the following grounds:

1. That by reason of the provisions of the various Special Acts of the Legislature relating to the Waterworks of the Corporation of the City of Ottawa, and by reason of the powers vested in the Council of the Corporation of the City of Ottawa under such Acts and by further reason of the provisions of such General Acts of the Legislature as are applicable to the said waterworks, the Ontario Municipal Board has no authority or jurisdiction under the provisions of Clause (ii) of Section 59 of The Ontario Municipal Board Act as enacted by Section 1, of Chapter 20 of the Acts of the Legislature passed in the year 1940, to hear and determine the application of the Applicants to vary or fix the rates charged or to be charged in connection with water supplied thereto by the Respondent Corporation.

2. That by reason of the provisions of the Acts above referred to and the provisions of an Agreement for a supply of water entered into between the Corporation of the Township of Nepean of the one part and the Corporation of the City of Ottawa of the other part, dated the 30th day of July, 1930, the Ontario Municipal Board has no jurisdiction or authority to vary or fix the rates charged or to be charged in connection with water supplied to the said Township by the Respondent Corporation during the continuance of such Agreement.

3. That by reason of the provision of the Acts above referred to and of the provisions of an Agreement for a supply of water entered into between the Corporation of the Township of Gloucester of the one part and the Corporation of the City of Ottawa of the other part, dated the 6th day of December, 1933, the Ontario Municipal Board has no jurisdiction or authority to vary or fix the rates charged or to be charged in connection with water supplied to the said Township by the Respondent Corporation during the continuance of such Agreement.

By formal Order of this Board, dated the 27th day of September, A.D., 1940, the Motion was dismissed.

On Appeal from the Order to the Court of Appeal for Ontario, it was held (1941 Dominion Law Reports at page 489) that:

"In so far as the Respondent Townships are concerned, with each of whom Appellant had at the time when the amendment of 1940 was enacted, a contract still current by which the prices for water to be supplied are fixed for the term of the contract, I am of opinion that the rule of construction is to be applied to the Act of 1940, that it is not to be deemed to affect rights existing at the time of its enactment. It does not appear, either by express words or by plain implication, that the Legislature intended the amendment to have such an effect; Western Counties R. Co. v. Windsor and Annapolis R. Co. (1882), 7 App. Cas. 178; Re Cuno, Mansfield v. Mansfield (1889), 43 Ch. D. 12. As was said by Lord Watson in the case first cited, at p. 189, 'It must also be shown that the Legislature have authorized the thing to be done at all events, and irrespective of its possible interference with existing rights.'

"No doubt the power given the Municipal Board by the amendment of 1940, includes the power to vary rates now charged, as well as to fix rates to be charged; but it is something substantially different to alter the prices agreed to be paid as the consideration for a contract to supply water on terms formally agreed upon and for a period of years, already in part elapsed, the Municipal Board having no power to vary the terms of the contract in any other respect, or to relieve the appellant of its obligation under the contract to continue to supply water to the end of the period.

"The Appeal should therefore be allowed on the ground last mentioned as to the Townships of Gloucester and Nepean, and it should be dismissed as to the Town of Eastview and the Village of Rockcliffe Park. Costs should follow the event in the case of each Municipality."

From this Judgment the Corporation of the City of Ottawa appealed to the Supreme Court of Canada. The Municipalities did not appeal. The Judgment of Rinfret, Crocket and Taschereau, delivered by Rinfret, J., dismissing the appeal said (page 459):

"We may now, therefore, discuss the main question arising on the appeal: Whether the special Acts regulating the waterworks system of the City of Ottawa have the effect of excluding the application to the latter of subs. (ii) of Section 59 of the Ontario Municipal Board Act.

"Section 59 deals with the general jurisdiction and powers of the Board in relation to Municipal Affairs.

"Subsection (ii), added in 1940, extended the jurisdiction of the Board so as to give it the power to hear and determine the application of any Municipality to confirm, vary or fix the rates charged or to be charged in connection with water supplied thereto by any other Municipality.

"The subsection obviously presupposes the existence of an already valid and binding contract between the applicant Municipality and the Municipality which supplies water; otherwise the words 'confirm' and 'vary' would be deprived of any meaning whatsoever. The Board is given the competency to confirm or vary rates already charged. This can happen only in cases where the supplying Municipality has made a contract or an agreement with the Applicant Municipality. It must mean, therefore, that the Board is given authority to intervene in contracts or agreements and to modify the rates already agreed upon. The occasion for the Board's intervention may be a change of conditions or of circumstances; but the Board evidently is to be the judge of the necessity or, it may be, the opportunity of varying the rates, subject to the right of appeal from the Board to the Court of Appeal, upon a question of jurisdiction, or upon any question of law, as provided for by Section 103 of The Board's Act. If the Board is not satisfied that circumstances warrant a variation in the rates, it need only confirm the latter.

"It is not as easy to foresee under what conditions the Board may be called upon to 'fix the rates charged or to be charged,' for the Board is not given the power to compel a Municipality to supply water to another Municipality. As a result, the mere fixing of rates would become quite meaningless and inoperative. Conceivably the Legislature had in contemplation the case where a Municipality would be willing to supply water to another Municipality willing to take it, and where the two Municipalities would find it impossible to agree on the rates. They may then refer the matter to the Board, which, in that case, may exercise the power to fix those rates

"And, of course, there may be a case, such as we have in this appeal, where the City of Ottawa has been supplying water for some time to the Respondent Municipalities without having previously fixed the rates therefor, and, assuming that the supplying and consuming Municipalities would find it impossible to agree on the rate that should be charged for the supply, the Legislature has, by the legislation of 1940, designated the Ontario Municipal Board as the proper forum to go to for the purpose. Until that legislation was passed, presumably the supplying Municipality would have had to apply to the ordinary courts for the fixation and recovery of the amount due to it on the basis of a quantum meruit.

"It would seem that such is the situation here, in so far as concerns the amount due to the Appellant by the Respondents for the water already supplied. If it be true, as we understood it to be, that for some time the water has been supplied to the Town of Eastview and to the Village of Rockcliffe Park without any agreement as to rates, and, as it would appear, the parties cannot come to an understanding as to the proper compensation to be paid for the water so supplied, the Application of the Respondents to have the rates fixed was properly made to the Ontario Municipal Board under Section 59 (ii).

"The above conclusion, however, can hold true only if the Appellant was unable to show, as found by the Court of Appeal, that, up to the Statute of 1940, it had the exclusive right to fix its own rates for water supply, and that the Statute of 1940, which is of general application, cannot prevail against the Special Acts concerning the waterworks systems of the City of Ottawa."

(Page 464)—"The authority of the Ontario Municipal Board, under Section 59 (ii) is for the purpose of supervising and controlling the rates charged or to be charged in connection with water supplied by one Municipality to another Municipality. As aleady noted, it presupposes that the prices or rates have already been fixed or agreed upon between the two Municipalities; and, for some reasons of public concern present in the mind of the Legislature of Ontario, it enacts that the Board may confirm or vary these prices or rates charged or to be charged.

"The two powers are not inconsistent. Those given in the general Act may well be read into the special Act without repugnancy. The City of Ottawa, in making its agreement with the other Municipalities, will fix the rates; but, for some special reasons such as the happening of fresh circumstances or conditions, the Board may be asked to intervene and to vary those prices and rates and it will be within the competency of the Board to order the variation to be made. The two provisions can stand together within the principle laid down in this Court, and already referred to, in Toronto Railway Company v. Paget (1); and, as a consequence, the maxim, generalia specialibus non derogant, does not operate in the present case to exclude the City of Ottawa from the jurisdiction of the Ontario Municipal Board in this particular matter.

"That jurisdiction is to 'hear and determine the application of any Municipality to confirm, vary or fix the rates charged or to be charged,' etc. The words 'confirm, vary' imply that the rates are already in existence, either by having been agreed upon between the two Municipalities or through having been fixed by the supplying Municipality and accepted by the Municipality taking the water. In that case, presumably the reason for the application to the Board for varying the rates might be the happening of fresh facts, changed conditions, or new circumstances of a nature to justify a modified price or consideration for the water supplied.

"But the language of the legislation necessarily supposes already existing rates in respect of which the Applicant Municipality moves the Board to order a modification.

"Of course, in the present case, the Court of Appeal, dealing with the applications of the Townships of Gloucester and Nepean (which had joined the present Respondents in applying to vary or fix the rates for water supplied by the City of Ottawa), found that, at the time when the amendment of 1940 was enacted, the two townships has a contract still current by which the prices for water to be supplied were fixed for the term of the contract. It was deemed that the new legislation was not intended 'to affect rights existing at the time of its enactment'; and, for that reason, the Court of Appeal decided that the Appeal should be allowed as to the Townships of Gloucester and Nepean.

"If, however, the new legislation does not affect contracts or agreements already in existence at the time it came into force, there can be no question that the intention of the Legislature was to vest in the Board the necessary competency to modify, in respect of rates, contracts or agreements entered into at a date subsequent to the coming into force of the legislation.

"It is also apparent that the Board has been given the power to fix rates for water already supplied, in cases where there has been no agreement as to rates. We apprehend that the right to 'determine the application of any Municipality to . . . fix the rates charged' can have no other meaning, or, at all events, is sufficiently wide to include such a power.

"The Board accordingly has jurisdiction to fix the price of water supplied by the City of Ottawa to the Town of Eastview and the Village of Rockcliffe Park from the time when an actual agreement in respect of rates ceased to exist between the City and the two other Municipalities, respectively, and for as long as the supply of water continues without the price or rate thereof being agreed upon by the parties themselves."

(Davis, J., at page 469)—"On those facts I think it plain that the case is covered by the 1940 amendment to The Ontario Municipal Board Act, and that the Board was right in saying that it would proceed to hear the applications to fix the rates to be charged. Such a decision is plainly something incidental to the administrative functions of the Board. I should dismiss the Appeal with costs."

(Hudson, J., at page 469) says:—"I think that the true construction of the enactments is that the Ontario Municipal Board has power to fix the rates charged or to be charged by Ottawa to these Municipalities but that the City of Ottawa has the right, in so far as the Board is concerned at least, to refuse to deliver water if the rates thus imposed are not satisfactory."

This Judgment was delivered on the 26th June, 1941.

On the 3rd day of September, 1941, Messrs. Long and Daly, wrote to the Board as follows:

"On behalf of the Corporations of the Township of Nepean, the Town of Eastview and the Village of Rockcliffe Park, we wish to apply for an appointment for hearing of the Applications of those Municipalities pursuant to Clause (ii) of Section 59 of The Ontario Municipal Board Act, R.S.O. 1937, Chapter 60, and all amendments thereto; under which the Board has authority to vary or fix the rates for water supply by the City of Ottawa to the said Municipalities. On the date given for the hearing, we shall move for directions and for an Order for production and for the examination for discovery of the Chief Engineer of the Respondent and for the right to inspect the waterworks system of the Respondent and, generally, as to the procedure to be followed in respect of the said applications. This is in accordance with the Order of the Ontario Municipal Board dated 27th September, 1940., and an appointment under the following Style of Cause:"

"IN THE MATTER of Section 59, Clause (ii) of "The Ontario Municipal Board Act" (R.S.O. 1937, Chapter 60), as enacted by Ontario Statutes, 1940, Chapter 20, Section 1, and

"IN THE MATTER of Applications by the Corporations of the Township of Nepean, the Township of Gloucester, the Town of Eastview and the Village of Rockcliffe Park, for the fixing by the Board of the rates to be charged by the City of Ottawa for water supply thereto."

was issued by the Board on the 22nd September, 1941, and sent to Messrs. Long and Daly with instructions to serve the City of Ottawa and the Township of Gloucester. Mr. Judson of Long and Daly called the Secretary to the Board saying that the Township of Gloucester was not a party to the proceedings and he was given authority to strike out the name of that Township in the Style of Cause and in the copy of the Appointment attached to proof of service filed with the Board the words "the Township of Gloucester" were struck out. From that time to the date of the Decision of this Board the Style of Cause did not include the Township of Gloucester but inadvertently the Township of Gloucester was included in the Style of Cause in the Decision rendered by the Board, although in that Decision, on Page 2, it was noted that on October 8th, 1941, Notice had been received from Messrs Long and Daly that the Township of Gloucester had withdrawn from the proceedings.

Mr. Judson contends that the Contracts between the Township of Nepean and the City of Ottawa expired on the 30th July, 1940, and on the 15th day of December, 1940.

Mr. Judson moves to vary the Decision of the Board so as to provide that the rate fixed by the Board to be paid by the Township of Nepean shall apply from and after the dates of the termination of the said Agreements, in accordance with the Judgment of the Court of Appeal for Ontario, and to vary the Style of Cause in the Decision by striking out the name of the Township of Gloucester.

Section 49 of the Ontario Municipal Board Act provides:

> "The Board may rehear any Application before deciding it or may review, rescind, change, alter or vary any decision, approval or order made by it."

The Board finds that the Motion should be granted and the "Decision" of the Board shall be amended accordingly.

There will be no costs, except that the Applicant shall pay the Board's fee of $10.00 in respect of this Motion.

Dated at Toronto, the 17th day of March, A.D., 1943.

IN THE MATTER of "The City of Toronto Act" 1943 (Chapter 50), Section 5, and

IN THE MATTER of an Application by the Corporation of the City of Toronto for the fixing by the Board of the proportion to be paid by the Township of North York for the construction of a temporary concrete pavement on Eglinton Avenue East from 100 feet East of Walder Avenue to Bayview Avenue, including the construction of curbing, necessary drainage and the reconstruction in a permanent location of the sidewalk on the South side thereof at an estimated cost of $19,500.00.

R. C. Baird, Esq.	For the City of Toronto
C. Frank Moore, Esq., K.C	For the Township of North York
H. E. Manning, Esq., K.C	For the Walker Estate and Other Property Owners in North York abutting this portion of Eglinton Avenue.

DECISION OF THE BOARD

THIS IS AN APPLICATION by the City of Toronto to the Ontario Municipal Board to determine the portion of the cost of the pavement constructed on Eglinton Avenue, West of Bayview, which shall be paid by the Township of North York to the City of Toronto who built the pavement.

Section 5 of the City of Toronto Act, 1943, Chapter 50, provides:

> "5. (1) Notwithstanding the provisions of any other Act, the construction by the Corporation of the City of Toronto, at the expense of the Corporation at large and without local assessment, of a temporary concrete pavement on Eglinton Avenue East from 100 feet East of Walder Avenue to Bayview Avenue, including the construction of curbing, necessary drainage and the reconstruction in a permanent location of the sidewalk on the South side thereof, at an estimated cost of $19,500.00 to be met out of the current revenues of the Corporation for the year 1943, is hereby authorized, validated and confirmed.
>
> "(2) The Corporation of the Township of North York shall upon completion of the work mentioned in subsection 1 pay to the Corporation of the City of Toronto such portion of the actual cost thereof as may be agreed upon or failing agreement as may to the Ontario Municipal Board be deemed reasonable and just after hearing representations on behalf of the said Corporations and the Ontario Municipal Board shall have jurisdiction to hear and determine any such application and the decision of the said Board shall be final and conclusive and shall not be subject to appeal.
>
> "(3) The Corporation of the Township of North York may assess its portion of the cost determined as provided in subsection 2 in the same manner as if the work had been carried out under The Local Improvement Act.

Before this work was commenced the Township authorities were approached with a view to arriving at a voluntary basis of contribution by the Township and letter of H. G. Baker, Engineer for the Township of North York, to Works Commissioner Harris, under date of May 11th, 1943, said:

> "Your letter of April 30th has been submitted to the Township Council and I have been instructed to advise you that the Township of North York is not prepared to make a voluntary contribution to the pavement on Eglinton Avenue. We prefer that the distribution of the cost of the work between the Municipalities be referred to and settled by the Ontario Municipal Board as provided for in the special legislation."

Appointment was given for hearing this application for October 27th, 1943, and Mr. Moore for North York Township, and Mr. Manning for the owners of the abutting property in North York requested an adjournment, which was granted. Hearing of this application was pursued on November 18th, 1943, when Mr. Moore called G. H. Baker, Engineer for

North York. Mr. Baker stated that Eglinton Avenue for the portion involved was entirely within the City of Toronto and that a small area of North York populated by approximately 400 people lay to the north of this portion of Eglinton. To the north of this residential section lies Mount Hope Cemetery and then Waterworks Park, owned by the City of Toronto. Witness contended that this residential area had its logical access to the City and to Bayview via Broadway Avenue.

Mr. Baker stated that Lawrence Avenue, next concession north of Eglinton, was surface-paved by the Township at a cost of $5,050.00 per mile and that Sheppard Avenue, Westerly from Dufferin to the plant of DeHaviland Aircraft, was paved 16 feet in width with a black base asphalt surfaced pavement, costing $15,255.00 for a length of 4,000 feet, or at the rate of $20,200.00 per mile. This latter pavement was laid 3 years ago and was carrying heavy traffic to this factory. Mr. Baker had a traffic count on Eglinton taken to compare with the estimated traffic to and from DeHaviland plant and contended that the black base pavement, 16 feet wide, at a cost of $20,200.00 per mile would carry the Eglinton traffic if in the Township, whereas the pavement built by the City was 36 feet wide and cost at a rate of $107,000.00 per mile.

Mr. Baker stated that there had been no demand from the Township to have Eglinton paved and that no industry or population in the Township required the type of pavement as constructed by the City.

In cross-examination, Mr. Baker said that the Broadway Avenue subdivision was about 40% built upon; that Bayview Avenue, north from Eglinton, is entirely in North York Township but was declared a County Road and, later, a suburban road under the jurisdiction of the Toronto and York Good Roads' Commission. Mr. Baker admitted that, on Sheppard Avenue, there were no underground services, nor surface drainage works, nor street intersections and that the character of the localities is different. Mr. Baker said there had been agitation for the Eglinton Avenue pavement for probably ten years.

Mr. R. C. Harris, Commissioner of Works, produced correspondence with Mr. Baker since 1930, which showed that various solutions had been sought, from the proposal to annex a tier of Lots on the north side of Eglinton to the City of Toronto, to a joint pavement 20 feet wide, to be widened as demand developed, to the construction of a 54 foot pavement as a joint Local Improvement pavement. The Township went under supervision in 1935 and on a cash basis for construction of works of this kind.

Mr. Baker submitted that the pavement of Eglinton in Leaside, easterly from Bayview, was 24 feet wide, black base and of similar type to the Sheppard Avenue pavement to DeHaviland.

Mr. Manning, for the Walker Estate, owner of the property in North York abutting on the work, called Mr. Frank McLaughlin, who described the property as a rough piece of land, although the frontage on Eglinton pretty well conformed to the grade of the street. Witness placed a nominal price of $5.00 per foot on the Eglinton Avenue frontage, or about $7,000.00 for the whole property, which is assessed: Land, $15,500.00; Buildings, $800.00 and the taxes in 1943 were $654.00.

Mr. Baird, for the City of Toronto, called R. C. Harris, Commissioner of Works, who said the maximum grade of this part of Eglinton was 6% and, in his estimation, not a hill; that Eglinton pavement in Leaside consisted of 6-inch stone foundation, 2-inch black base and 1-inch top, and was about 24 feet wide; says the frontage on the City side was not assessed because of the difficulties in launching the work under the Local Improvement Act and not because the pavement was not of use to the properties abutting.

The evidence submitted indicates that, in previous years, the Councils of the City and Township were negotiating along the principles laid down in the Local Improvement Act governing boundary streets. These negotiations had lapsed for several years. Special legislation was secured by the City of Toronto in 1943 which stated that part of the cost of the undertaking shall be paid by North York and that, failing an agreement as to the portion of the cost, the matter should be arbitrated before the Ontario Municipal Board.

The City asks that one-half of the cost of the work be charged to the Township. The Township, on the other hand, argues that the construction of this work does not benefit the lands or population of the Township and, if any costs are to be charged to the Township, such should be based on the cost of pavements constructed in the Township to meet similar traffic conditions, and Mr. Moore suggested a sum in the order of $2,500.00 would represent such cost.

The Board is of the opinion that both by the implications of previous negotiations and by the fact that the Special Act was passed, the Township of North York is to be assessed with its fair share of the cost of the work. The City has built the pavement 36 feet in width, with curbs, connecting a pavement 54 feet wide, with curbs, to the west and a pavement in Leaside 24 feet wide without curbs. The pavement is on a grade with a maximum of 6% and on this account and, in conformity with their usual practice, the City saw fit to build the curbs and provide drainage facilities. The Board, however, feels that effect should be given to the evidence of the Township that they would have built a pavement of lower cost type had the street been under their jurisdiction. From the costs of pavements built in the Township and the cost given of this work, the Board is of the opinion that the Township could have constructed their type of pavement at approximately one-half the cost per square yard and, applying this principle to one-half the cost of the work, arrives at a share of one-quarter as being a fair share to be charged to the Township.

The Board, therefore, finds that one-quarter of the amount of $19,262.12, being the sum of $4,820.53, is the reasonable and just amount which shall be paid by the Township of North York to the City of Toronto towards the cost of paving of Eglinton Avenue in the portion west of Bayview under consideration.

The Board makes no finding in regard to the owner of the property in the Township abutting on this work. The Special Act referred to in Subsection 3 gives to the Township of North York the authority to assess its portion of the cost in the same manner as if the work had been carried out under the Local Improvement Act and if the Township takes this course the owner of the property assessed will have the right to appeal re his assessment as provided by the Local Improvement Act.

The Board orders that its fees in the amount of $40.00 be paid half by the City of Toronto and half by the Township of North York and makes no further order as to costs.

Dated at Toronto the 7th day of December, A.D., 1943.

IN THE MATTER of "The Township of York Act, 1935," Section 7,and

IN THE MATTER of By-law No. 11996 of the Corporation of the Township of York and

IN THE MATTER of the Appointment of a Referee by the Ontario Municipal Board, pursuant to Section 4 of the said Act, and the adoption of the said Referee's Report.

H. A. Hall, Esq., K.C ....For the Corporation of the Township of York

H. W. Manning, Esq., K.C ....For Ratepayers

---

DECISION

The Township of York Act, 1935, being Chapter 100 of the Statutes of Ontario, 1935, authorized the Municipal Council of the Township of York to pass a By-law to amalgamate all the sewer areas in the said Township into one area.

The Council of York Township passed By-law 11996 on February 4th, 1941, to amalgamate St. Clair Sewerage Area No. 1 and St. Clair Sewerage Area No. 2 into one Sewer Area to be known as the consolidated Sewer Area of the Township of York. Such By-law provided that it would come into force and take effect at such time as the Ontario Municipal Board may by its Order direct.

This By-law was approved by the Department of Municipal Affairs and under date of February 13th, 1941, H. A. Hall, Solicitor for the Township of York, applied to the Board for the appointment of a Referee under the provisions of Section 7 of the 1935 Township of York Act, which reads as follows:

> "7. (1) All rights and claims between the respective parts of the said Township made into one sewer, water, fire or transporation area under the authority of this Act shall be valued, adjusted and determined in an equitable manner by a Referee to be appointed by the Ontario Municipal Board within three months after the passing of a By-law to effect such amalgamation or dissolution.
>
> (2) The Ontario Municipal Board and any Referee appointed by it shall have and may exercise such jurisdiction and powers as may be necessary for the purpose of having all or any of the said rights and claims valued, adjusted and determined, and the provisions of The Ontario Municipal Board Act, 1932, shall be applicable.
>
> (3) A Referee appointed under this Section shall proceed to hear and report upon such rights and claims as may have been referred to him subject to such orders and directions as the said Board may from time to time make or issue, and he shall submit his report to the said Board within three months after the time of his appointment or within such further time as the said Board may allow, and a Referee shall for his services be paid such fee as the said Board may direct and allow.
>
> (4) Upon the report of a Referee being filed with the said Board it shall forthwith take the same into its consideration and may hear such representations in respect thereto as it may see fit, and before adopting any such report the said Board may remit the same to the referee for his further consideration.
>
> (5) The said Board may by its order adopt, vary or amend the report of any referee appointed under this section, and the order of the said board adopting such report or varying or amending the same shall be final and conclusive and not open to question or appeal, and the terms thereof shall be binding upon the said corporation and the ratepayers thereof or of any area affected thereby.
>
> (6) The Council of the said Corporation shall impose and levy annually such special rates against the lands assessable therefor as may be directed in any order of the said Board for the purpose of adjusting the said rights and claims.
>
> (7) No By-law passed under the authority of Sections 4, 5 or 6 shall come into force or take effect until such time as the said Board may by its order direct, and no such order shall be issued until the said Board has made an order under Subsection 5 hereof."

The Board by its order of August 12th, 1941, appointed Kenneth B. MacLaren, K.C., of the Township of York, as Referee, and by a subsequent Order dated March 14th, 1942, extended the time within which the report of Kenneth B. MacLaren, K.C., shall be filed to the first day of June, 1942.

The Report of Referee MacLaren was filed under date of May 30th, 1942, and under date of June 3rd, 1942, the Board gave an Appointment for June 30th, 1942, for the hearing of all parties interested.

At this hearing, H. W. Manning, representing certain interested property owners in Sewer Area No. 2, drew attention to the fact that Kenneth B. MacLaren was a property owner in Sewer Area No. 1 and, as an interested party, is disqualified from acting as Referee in this matter.

Mr. Manning applied for a Stated Case to be submitted to the Court of Appeal and the Board granted this application by its Order of June 30th, 1942, and by the same Order adjourned the further hearing of the application to October 1st, 1942.

Decision of the Court of Appeal was given under date of October 10th, 1942, to the effect that the Referee was not disqualified from acting.

In the meantime the hearing of the application was further adjourned to October 22, 1942, and again to November 22, 1942.

The application and consideration of the Referee's report came on for hearing before the Board on November 23rd and 24th, 1942.

H. A. Hall, for the Township of York, read the Referee's Report (Exhibit 1), and stated that in the Township of York, Fire Areas and School Sections have already been amalgamated under other legislation and that Transportation areas have been amalgamated under the same legislation as now being used to amalgamate Sewer Areas Nos. 1 and 2. He stated that the general effect of the Referee's Report was to bring about an equalization of the general sewer rates in the two areas in a period of not more than ten years, at the end of which the effect would be to reduce the sewer rate on Area 1 by approximately 2 mills and increase the sewer rate on Area 2 by approximately 10 mills.

H. W. Manning submitted that the Referee had failed to value any rights or claims as between the two sections.

From the evidence submitted and reports filed the history of the development of these Sewer Areas may briefly be stated as follows:

Between the years 1914 and 1922, in which year the Township of North York seceded from the original Township of York, the only sewers constructed in York Township were on streets northerly from St. Clair Ave. and whose natural grades were southerly into the City of Toronto. Certain of these streets were sewered into the City of Toronto sewer system under separate agreements for each street. These agreements provided for the payment of outlet and maintenance rates to the City of Toronto on a frontage rate basis. The outlet rates varied from 7 cents per foot per year in early agreements to 30 cents per foot per year in later agreements and these charges were to run for a period of ten years. The Maintenance rates varied from 10 cents per foot per year in earlier agreements to 16 cents per foot per year in later agreements and these charges were to continue as long as the sewers are connected to and discharge into the Toronto Sewer System.

In 1922 the City of Toronto refused to grant any further outlet sewer facilities to the York Township Streets. In 1923 the Township of York Council engaged Consulting Engineers to report on a system of sewerage and later an agreement was entered into with the City of Toronto whereby the City consented to the draining of certain streets in the Cedric Ave. area into the City sewers providing that the Township would cut off and reverse the flow of certain surface drainage which had previously drained in the City System.

This Engineer's report and agreement with the City led to the creation of Sewer Areas 1 and 2.

A new system of sewers was built in Area No. 1 and was assessed under terms of a Special Act which provided that $1.50 per foot be assessed against the assessable frontage abutting on Service Sewers and that the remainder of the cost of the sewer system and sewage disposal plant be charged to the rateable property in the Sewer Area. According to Mr. Falls' report this resulted as follows:

Cost to Sewer Area No. 1	$6,234,303.00
On frontage basis	963,253.00
Total cost	$7,197,556.00

In Area No. 2 sewers had been built on many of the streets before the Area was created, and these had been assessed under the Local Improvement Act and the statutory Corporation share had been charged to the Corporation at large. After the setting up of the Sewer Area, these Corporation Shares were charged to the rateable property in the Area. According to Mr. Falls' report this construction up to the end of 1934 resulted as follows:

To Sewer Area No. 2	$ 26,200.00
To Corporation at large	8,316.00
On frontage basis	112,988.00
Total	$ 147,504.00

The same report of Mr. Falls proceeds to say that:

"Had no Special Legislation been secured and had the sewers in Sewer Area No. 1, been assessed in accordance with the terms of the Local Improvement Act the cost of the following parts of the system would have been assessed to the Corporation at large, namely:—

(a) The cost of construction, maintenance and operation of sewage disposal plant and sewage pump houses.

(b) The cost of relief storm sewers, outlet and out fall sewers.

(c) The whole cost of trunk sewers where not used for local purposes.

(d) One-third the cost of all sewers in excess of 4 square feet in cross sectional Area.

(e) The cost of all sewers at intersections and the flankage cost of all Local Improvement Sewers.

By-law 9424 of the Corporation passed Dec. 19th, 1927, amended By-law 8372 to provide that all maintenance charges payable to the City of Toronto under any agreement with the Township or with individuals in the Township where sewers are connected to the City System shall be raised by a special rate on all rateable property in the sewer area.

The Board has considered the report of the Referee, the other material and Exhibits filed, and the argument of both Counsel and find the following:

1. Under the Referee's report Area 1 continues to benefit on the frontage rate basis to the extent that the $1.50 per foot frontage rate is less than the various rates assessed on streets in Area 2. On the other hand Area 1 has borne the Sewer Area Mill rate to meet the cost of maintenance, operation and debt charges on the Area System, in the years 1926 to 1942 inclusive amounting to $5,180,109.98. The mill rate to produce this amount has varied from 8.8 mills to 20.8 mills and during the same interval the sewer mill rate in Area 2 varied between 0.4 and 3.6 mills.

2. Sewers built in Area 2 were laterals and of small dimensions and, generally speaking, of low costs and yet according to the evidence of Mr. Dick the average frontage cost per foot in Area 2 was $1.84.

In Exhibit 4a Mr. Dick gives an instance of a frontage rate of $2.33 per foot.

In Exhibit 4b a rate of $3.55 per foot.

In Exhibit 4c a rate of $1.24 per foot.

These instances indicate the difficulty of attempting to have regard for the difference in frontage rates as between $1.50 in Area 1 and the average rate of $1.84 in Area 2, when there has already existed the wide variation of costs in Area 2, namely $1.24 to $3.55.

3. Area 2 has benefitted by the agreement with the City of Toronto at the time of creation of the two sewer areas, whereby outlet privileges into the Toronto sewer system was extended on the understanding that Area No. 1 would assume obligations for providing its outlet and disposal works and that an area of 1,960 acres would be severed from Area 2 and become a part of Area No. 1.

4. Had not sewer areas been created, Area 2 would have contributed to the Statutory Corporation's share of the sewer system built for Area No. 1, during a period from 1927 to 1942. The equalizing process proposed by the Referee's report does not purport to be retroactive and hence Area No. 2 may be deemed to gain to the extent of the share of this Corporation's portion that would have been charged to that Area up to the end of 1942.

5. Prior to the formation of Sewer Areas, an amount of $8,316.00, being the Statutory Corporation's share of sewers built in Area No. 2, had been paid by the Corporation at large.

6. Area No. 1 Assessment bears to the assessment of Area No. 2 a ratio of, approximately 4 to 1. A considerable amount of frontage in Area No. 1 has reverted to the Township by reason of failure to pay taxes. These lands become an asset or a liability of the whole Municipality.

7. A rate adjustment as between the Sewer Area Mill Rates in the two sewer areas was effected in the year 1940 by the Department of Municipal Affairs, the general result of which was: The General rate of the Township was increased 4 mills.

Area No. 1 Sewer Rate was decreased by 4.5 mills.

Area No. 2 Sewer Rate was decreased by 1 mill.

The effect of this rate adjustment was to debit the General Levy with an amount of $108,200.00 and credit Sewer Area No. 1 with $103,000.00 and Area No. 2 with $5,200.00, the approximate net result of which was to credit Area No. 1 with $16,000.00 and charge Area No. 2 with the same amount.

Further annual adjustments could have been similarly effected had York Township remained under the supervision of the Department of Municipal Affairs.

8. The Council of York Township passed By-law 11996 on February 4th, 1941, amalgamating the Sewer Areas Nos. 1 and 2 into a Consolidated Sewer Area. The apparent object of the Special Statute and this By-law of the Township Council was to eliminate the differential in sewer area rates as between the two sewer areas. The Board feel that the plan presented by Mr. Dick only partially gives effect to this amalgamation in that it maintains special separate rates until the debentures mature. It is also felt by the Board that the Referee's report may be similarly criticized in that the plan proposed continues a differential in area rates for a period up to ten years. The purpose of this extended plan of rate adjustments is to avoid the hardship of making the adjustment effective at once and, in this respect the Referee's plan finds merit with the Board.

9. The Board has considered the feasability of levying a supplementary frontage rate on the assessable frontage in Area No. 1 to replace either partially or entirely the plan of the Referee to equalize the sewer taxation by adjustments of the mill rates on the Areas.

The Frontage Rate assessed in Area No. 1 is $1.50 per foot.

Had the sewer system in Area 1 been assessed as a Local Improvement and had the cost other than those charges that are properly the Statutory Corporation Share been assessed on a Frontage basis, the resulting frontage rate would have been approximately $4.40.

The average rate for cost of construction in Area 2 has been given as $1.84 but this is not comparable to $1.50, nor to $4.40, because in Area 2 an outlet rate was paid to the City of Toronto in varying amounts from 7 cents to 30 cents per foot frontage for ten years. These charges should be commuted and the average added to $1.84 to give an average frontage rate for sewer and outlet that would be comparable with Area 1 rates. Even then it must be remembered that the outlet rate was paid in Area 2 as a frontage rate and the cost of outlet, sewage disposal, surface drainage, etc., was borne in Area 1 as a charge on the mill rate.

Having weighed the above items of benefit to the one area or the other and having studied alternative proposals, the Board has come to the conclusion that no more equitable plan for adjustment than that found by the Referee offers itself and the Board, therefore, adopts the Referee's Report.

The Board directs that its fee herein fixed at $100.00 shall be paid by the Township of York.

Dated at Toronto the 2nd day of March, A.D., 1943.

ASSESSMENT APPEALS

P.B. B-2022

IN THE MATTER of The City of Hamilton Act, 1943 (Chapter 42), Section 3.

BETWEEN:

AEROVOX (CANADA) LIMITED,
Applicant

—and—

THE MUNICIPAL CORPORATION OF THE CITY OF HAMILTON,
Respondent

Application for determination by the Ontario Municipal Board of the assessment of certain lands of the Applicant annexed to the City of Hamilton by Order of the said Board and pursuant to the said Special Act.

S. R. Jefferess, Esq...Counsel for Applicant

A. J. Polson, Esq., K.C...Counsel for Respondent

DECISION OF THE BOARD

This is an application by the Aerovox (Canada) Limited for the determination by the Board of the amount for which their lands on Barton Street East, in the City of Hamilton, containing 10.32 acres, should be assessed. The lands in question are part of the lands formerly in the Township of Saltfleet annexed to the City of Hamilton and are a part of the lands referred to in the City of Hamilton Act, O.S. 1943, Cap. 42, which provides:

> "Sec. 3:—
>
> "Any lands in the portion of the Township of Saltfleet annexed to the City of Hamilton by the said Order and now used for agricultural purposes shall, so long as so used, be assessed in each year for a period of five years at such amount as may be agreed upon by the Corporation of the City of Hamilton and the person assessed or failing such agreement as shall be determined by the Ontario Municipal Board."

The lands of the applicant consist of Part of Lot 34 in the 1st Concession of the Township of Saltfleet, extending from Barton Street on the South to the lands of the Canadian National Railway, on the North. The lands are bounded on the West by the Right-of-Way of the Hydro Electric Power Commission of Ontario and, on the East, by lands privately owned. The Buildings for the carrying on of the applicant's manufacturing business are constructed on the Southerly part of the lands, and the applicant claims that the Northerly part of their lands are not used for their business, and are farm lands and should be assessed as such. In 1942 the lands in question were assessed by T. J. Mahoney, the assessor for the Township of Saltfleet, as follows:

Plant acreage, 4 acres	$ 2,000.00
Farm acreage—6.32 acres	1,500.00
Buildings on—4 acres	50,000.00
Total	$53,500.00

After these lands were annexed to the City of Hamilton, they were assessed by W. E. Hill, Assessment Commissioner for the City of Hamilton, "upon which taxes for 1943 shall be levied," as follows:

Factory, Barton E., 10.32 acres—actual value of land	$11,120.00
value of buildings	68,000.00
Total value of Real Property	$79,120.00

The Applicant appealed this Assessment to the Court of Revision, Hamilton, and the Appeal was dismissed.

The lands were purchased by the Applicant in October, 1941, from the Bauer Estate for $11,500.00. At that time the Township Assessment was $3,500.00. There were no buildings on the land. There had been no cultivation for some years. The evidence shows that in 1942 the hay on the 6.32 acres had been given to a man who cut it. This part of the land is low. There is a creek on the East side and it would not be possible to put in sewers without the use of pumps. It is land locked.

Thomas Crompton, called by the Applicant, said that the Reid Wrecking Company offered $1,000.00 per acre for land in this vicinity, providing it could get a license for a wrecking yard, but the deal was not completed. He said that good land in Saltfleet could be purchased for $350.00 and some for $250.00 per acre. He valued the rear 6.32 acres at $300.00 per acre.

The Board must decide whether this land comes within the words of the Act which are "and now used for agricultural purposes."

Annandale's dictionary defines agriculture as:

> "The cultivation of the ground, more especially with the plough and in large areas or fields; it may include also the raising and feeding of cattle or other live stock; husbandry; tillage; farming.

and agricultural as:

> "pertaining to, connected with, or engaged in agriculture."

There is no evidence that any part of this 6.32 acres has, during the past many years, been ploughed or cultivated in any way, or that it has been used for pasturage. The evidence submitted by the Applicant to prove that it is now used for agricultural purposes is that a farmer was allowed to cut and remove the hay in 1942. It also submits that the land cannot be used for anything except agricultural purposes.

On the evidence, the Board finds that the said lands were not, at the time the Act was passed, used for agricultural porposes, and, therefore, the Board has no authority to fix the amount at which the said lands should be assessed.

The Applicant having paid the Board's fee, there will be no costs allowed to either party.

Dated November 4th, 1943.

F. A. A. Campbell, Esq., K.C..Counsel for the Respondent

DECISION

This is an Appeal by Sir William Mulock against the Assessment of properties described as 95, 95A, 97 and 97A, Yonge Street. The properties have a frontage of 25 feet and 25 feet 3 inches, respectively, and were assessed at $1,600.00 and $1,750.00 per foot. These assessments were reduced by the Court of Revision to $1,400.00 and $1,550.00 per foot. The County Court Judge dismissed the Appeals from the Court of Revision. This Appeal came before the Board for hearing on February 22, 1943.

A Plan (Exhibit 1) showing the division of this property was submitted. The parcel marked "B" has no buildings thereon and is assessed at $150.00 per foot, or $3,750.00. The Appeal with reference to this was withdrawn. The buildings on "A" and "C" are old and in a poor state of repair, and are assessed for $11,000.00. The appeal with reference to the buildings has been withdrawn. The Appeal prosecuted before this Board is as to the assessment of the Southerly of these two properties 25 feet frontage with 70 feet depth, assessed at $1,400.00 per foot and the property adjoining to the North, 25 feet, 3 inches frontage, with 104 feet depth, assessed at $1,550.00 per foot.

Evidence as to value was given by two experienced Realtors, Robert M. Yeomans, for the Appellant, and Vernon H. Edwards, for the Respondent.

Mr. Yeomans filed a statement showing the assessments of this property (Exhibit 3) and the returns on the assessed value since 1932. The assessment of this land has been reduced from $234,937.00 in 1932, to $88,888.00 (after reduction by the Court of Revision) in 1943. He pointed out that in 1941 there was a net loss of $1,427.84. (There was a vacancy in that year) and that in 1942 the Return on the assessed value was 85%. He said that the City has been gradually reducing the Assessment but that until 1920, between Adelaide and King Streets was an exclusive shopping district; that since 1920 Community Centres have drawn the trade from this section; that the depression helped the deterioration of this Section by increasing these Community Centres and that at the present time it is impossible to sell and almost impossible to rent at a figure which will give any return on the assessed value. In his opinion the assessment should be $900.00 per foot. Even at $900.00 per foot the return to the owner would be $2,201.74, or approximately 4%, on an assessment of $48,975.00 for land and $11,000.00 for building, a total assessment of $59,975.00.

Mr. Edwards valued this land at $1,600.00 per foot. He said that the owners have not kept the properties between King and Adelaide in repair; that the properties North of Adelaide were in the same condition up to ten years ago but that in that section, by alterations and repairs, the owners have been able to increase their rents. In his opinion the condition of the buildings today would not permit an increase in rentals, and that sale values are suffering because people do not wish to invest their money in properties in lower Yonge Street. He admits that he could not have increased the revenues of this property in the past four years.

Mr. Harry Nixon, the Assistant Assessment Commissioner, said that the assessments have been reduced materially, but that the owner has not improved the buildings on this property and one cannot obtain proper rents unless repairs and improvements are made from time to time.

The Northerly 25 feet 3 inches of this property, having a depth of 104 feet, is assessed, since the reduction by the Court of Revision, at $1,550.00 per foot. The Southerly 25 feet, having a depth of 70 feet, is assessed at $1,400.00 per foot, and the property in the rear of this latter property is assessed at $150.00 per foot, making $1,550.00 per foot for the 104 feet depth.

The Board notes that the Corner of Adelaide and Yonge is assessed at $4,300.00 per foot; the adjoining property Southerly is assessed at $2,800.00 per foot, a reduction of $1,500.00 per foot. The next adjoining property is assessed at $2,300.00, a reduction of $500.00; the next adjoining property is assessed at $1,850.00 per foot, a reduction of $450.00 per foot. The property in question, which adjoins the last mentioned property was assessed at $1.750.00 per foot and this was reduced by the Court of Revision to $1,550.00 per foot, a reduction of $200.00.

Having heard and considered all the evidence, the members of the Board are of the opinion that the property in question should be reduced by $100.00 per foot. The Board, therefore, finds that the Northerly 25 feet 3 inches of the property in question, having a depth of 104 feet, should be assessed at $1,450.00 per foot; the Southerly 25 feet, having a depth of 70 feet, should be assessed at $1,300.00 per foot; and the rear of this latter property, 25 feet frontage, with a depth of 34 feet, should be assessed at $150.00 per foot for the 25-foot frontage. There will be Judgment accordingly.

The Respondent shall repay to the Appellant the Board's fee of $25.00 paid to the Board by the Appellant. There will be no other costs.

Dated at Toronto the 2nd day of April, 1943.

IN THE MATTER of Section 84 of "The Assessment Act" (R.S.O. 1937, C. 272).

BETWEEN:

THE HENRY W. W. TISDALL ESTATE
(Toronto General Trusts Corporation, Executors)
Appellant

—and—

THE CORPORATION OF THE CITY OF TORONTO
Respondent

C. P. Tisdall, Esq........Counsel for Appellant

F. A. A. Campbell, Esq., K.C........Counsel for Respondent

DECISION

This is an Appeal to the Ontario Municipal Board by the Henry W. W. Tisdall Estate (Toronto General Trusts Corporation, Executors), from the Judgment of His Honour Judge Barton, of the County Court of the County of York, dated the 2nd day of December, 1942, in respect of the assessment of the buildings of the Appellant at 468 to 472 Wellington Street West and known as the Butterick Building on the grounds that same are over assessed, and came on for Hearing on the 29th day of January, 1943.

The buildings in question occupy lands 60 feet by 215 feet at 468 to 472 Wellington Street West.

The lands are assessed at $125.00 per foot, or a total of $7,500.00. The assessment for the land is not appealed.

The building known as the Butterick Building was assessed in 1942 for the levy of 1943 at $66,000.00. This amount was confirmed by the Court of Revision and was, on appeal to the County Judge, reduced by $2,000.00 to $64,000.00 and this is the assessment now under Appeal before this Board.

Mr. Tisdall called George G. Farquhar, Property Manager of S. E. Lyons, Ltd., and Mr. Farquhar manages the building under appeal. Witness submitted a list of other properties, their assessments and rate of assessment per square foot for comparison (Exhibit 1). Butterick Building is given as 50x200 by 5 storeys—Assessment $64,000.00 or $1.28 per square foot. Assessments of buildings compared ranged from 79½c per square foot to $1.14 per square foot.

Comparisons of buildings as given by Mr. Farquhar and cross-examined by Mr. Campbell did not give a result that proved of much assistance to the Board.

Mr. Farquhar stated that the celling price for the property, land and buildings, would be $50,000.00.

Cross-examined by Mr. Campbell, Mr. Farquhar stated that total rentals for 1942 were $12.900,00 and submitted Exhibit 2 as an operating statement for the year, showing a net earning of $4,429.29 without depreciation. He admitted that average net earnings over the last 5 years were $4,545.22.

No other witness was called by Appellant.

Mr. F. A. A. Campbell for the City of Toronto called Mr. H. A. Wickett, General Contractor, who cubed the building at 590,000 cu. feet at 25c per cu. ft........$147,500.00
Depreciated 54% (2% per year for 27 years)........79,650.00

Giving Valuation........$ 67,850.00

Mr. Campbell called Mr. H. Nixon, Deputy Assessment Commissioner, who said that the building adds to the value of the land not less than $64,000.00. He calculated that the average net earnings for the five year period gave a net yield of 6.3% on the assessment and from his experience he stated this is above the average.

In argument Mr. Tisdall stated that his chief concern was the difference by comparison with other assessments, that 6.3% including depreciation was a low yield and that assessment should be reduced to $1.14 per sq. ft. to be on a par with No. 436 Wellington St. West.

Mr. Campbell argued that comparison is only one factor to be considered and that actual value is the controlling factor. He submitted that it would be dangerous to compare the Buildings cited with so little information and submitted that Mr. Wickett's valuation represents present day value.

The Board finds that there is not sufficient evidence placed before it to justify any decrease in the assessment and the appeal is, therefore, dismissed and the assessment fixed as follows:

Land, 60 feet x 215 feet, at $125.00	$ 7,500.00
Buildings	64,000.00
Total	$71,500.00

Dated at Toronto, the 1st day of April, A.D., 1943.

J. Palmer Kent, Esq., K.C. .... For Appellant

Alexander D. McKenzie, Esq., K.C. .... For Respondent

DECISION OF THE BOARD

This is an Appeal by the Corporation of the City of Toronto from the Judgment of His Honour Judge MacDonall, in which he allowed the Appeal of the Respondent herein and held that the Lands in question were not assessable.

The lands in question adjoin other lands of the Respondent which are exempt from assessment under Subsection (5) of Section 4 of the Assessment Act, on which are constructed the College buildings and play grounds of Havergal College. These lands were purchased by the College about the time adjoining lands to the East were purchased by the City of Toronto for the site of the Lawrence Park Collegiate. A deep ravine ran through both parcels of land and, with the consent of the College, the City is filling in the ravine.

An Appeal with reference to the assessment of these lands came before the Board in March, 1942. At that time, there was no evidence before the Board of any use being made by the College, and there was not even a gateway between these lands and the other College lands, and the Board held that they were not entitled to exemption.

The evidence submitted before the Board on this Appeal is to the effect that conditions have changed.

George Hurst, City of Toronto, Assessor, inspected the property and said that a gate had been constructed between these lands and the College land. There were some golf boxes constructed, but the land did not look as if it had been used for golf, and there was no visible use of the land by the school pupils. On July 9th, 1943, the hay had been cut and was being removed by truck. On November 25th, when he again inspected the property, the grass had been cut around the golf boxes, but there was a short stubble on the balance of the lands. He said the pupils might have been using the land for driving golf balls. He was not there between September 23rd and November 25th. Cinders had been put in around the golf boxes.

Lewis G. Manton, of the Survey Department at the City Hall, said that he was at the grounds making a survey on November 1st, 3rd and 4th. The weather was suitable for outdoor playing and girls were playing within the College Grounds, but he saw no girls on these lands.

Geo. W. Worrell, Assessor for Toronto, was on the lands on the 17th, 18th, 22nd and 24th November, but saw no girls playing there. A man and a woman crossed the grounds, and some boys were playing with a kite. Girls were playing on the Courts and football field within the College Grounds.

David W. Pinkerton, another Assessor, was with Worrell and corroborated his evidence.

Wm. B. Fraser, a Dominion Income Tax Officer, who lives near the property, said that, because of the Appeal for Victory Gardens, he asked permission of the Principal to have a Community Garden on these lands. After she had communicated with the Secretary, he was refused the use of the lands as a Community Garden, but he and one, Bennett, were given permission to use a part of the lands as a garden in consideration of their promise to assist the Teachers and the Girls in gardening. They used part of the land that had been ploughed and the balance was used by the College. He was on the ground only in the evenings and on Saturdays. On Saturdays he sometimes saw the girls playing on this land, driving golf balls and skiing on the hill. They helped also in gathering up the potatoes.

Henry S. Bennett, a neighbor, who put in a garden with Fraser, said that the College Gardener did the work on the College part of the garden. The girls helped with the potatoes, but he did not see any playing on the grounds.

Alex. M. McLeod, from the Street Cleaning Department, said he was employed levelling the dump. He was not there during the summer. He saw girls from the College eating a lunch on the grounds and they sometimes came and watched the work going on.

For Havergal College, Gerald Y. Ormsby, Secretary, said the lands had been purchased for College purposes and that they were the only lands available for extension of the College Grounds and that they were necessary for extension of the playing fields. As soon as the fill is completed, the present fence will be removed and a new fence erected at the College grounds limit. He said that, owing to shortage of labour, they had been able only to keep the front of the College grounds in proper shape. The new gate was put in to give access to these lands from and to the College grounds. The golf driving tees were constructed in the fall of 1942. The garden was ploughed in the fall of 1942 and most of it was used for growing vegetables for the College.

For the City, Mr. Kent argued that the Act, providing as it did for exemption, should be strictly construed and that the evidence showed that it was not being used in connection with and for the purposes of a seminary of learning.

For the College, Mr. McKenzie relied on the evidence of use by the College for College purposes.

Section 4, Subsection (5), of the Assessment Act, provides:

> "The buildings and grounds not exceeding in the whole fifty acres of and attached to, or otherwide bona fide, used in connection with and for the purposes of a seminary of learning maintained for educational purposes, the whole profits from which are devoted or applied to such purposes, but such grounds and buildings shall be exempt only while actually used and occupied by such seminary, and such exemption shall not extend to include any part of the lands of such a seminary which are used for farming or agricultural pursuits and are worked on shares with any other person, or if the annual or other crops, or any part thereof, from such lands are sold.

Should this Board hold that, because a small part of these lands were used by neighbors for garden purposes, that part should be assessed? In the opinion of this Board it would be most unreasonable, under present circumstances and conditions, to so hold. This garden was not worked on shares; part of it was used by two neighbours who supplied their own seed and took the crop. The balance was used by the College for its own purposes. The Board finds that the use made of this garden does not render this part of the lands liable to assessment.

The Act provides for the exemption from assessment of the buildings and grounds (1) not exceeding in the whole fifty acres; (2) of and attached to; or (3) otherwise bona fide used in connection with and for the purpose of a seminary of learning; (4) maintained for educational purposes; (5) the whole profits from which are devoted or applied to such purposes.

It is not contended by the City that the lands belonging to the College, including the lands in question, exceed fifty acres, nor that the College is not a seminary of learning maintained for educational purposes, or that the "whole profits from which are devoted or applied to such purposes." Its only contention is that, although these lands have been purchased by the

College, they are not now "attached to or otherwise bona fide used in connection with and for the purposes of" the College because: (1) there is a fence separating them from the other College grounds and (2) there is no evidence that they have been used as required by the Statute.

The Board finds that the fact that there is at present a fence which has not yet been removed does not prevent this land from being attached to the College grounds. They adjoin the other lands and there is a gateway allowing passage between the two parcels.

The Board also finds that, because the said lands have not received the proper care and been kept in proper condition, under present circumstances, is not sufficient evidence to prove that they are not used, as provided for in the Statute. The use of a part of the garden is surely in these difficult times such a use as is contemplated by the Legislation. There is ample evidence that golf driving tees have been constructed and have been used; and that the pupils from the College came on these lands and used them for picnics. In fixing the amount of land to be exempted at fifty acres, the Legislation could not have contemplated that every part of the fifty acres should be in actual use at all times.

Under all the circumstances, the Board finds that these lands are entitled to exemption and the Appeal is, therefore, dismissed.

The Appellant having paid the Board's fee, there will be no order as to costs.

Dated at Toronto the 10th day of December, A.D., 1943.

P.F. B-1498

IN THE MATTER of an application by The Public Utilities Commission of the City of Port Arthur, pursuant to Section 177 of "The Railway Act" (R.S.O. 1937, Ch. 259), for approval of a reduction in Street Railway fares as follows: the existing 7c cash fare to be reduced to 5c; the existing adult ticket fare of 4 tickets for 25c to be reduced to 5 tickets for 25c.

DECISION OF THE BOARD

The Public Utilities Commission of the City of Port Arthur on the 29th October, 1942, applied for permission of the Board to reduce Street Railway fares as follows:

Existing 7c cash fare to be reduced to 5c;

Existing adult ticket fare of 4 tickets for 25c to be reduced to 5 tickets for 25c.

and submitted a brief showing that, from and including 1931 to 1941, there had been deficits totalling $74,315.45 in the years 1931-32-33-34-35-36-38 and 39, and that there had been a surplus in the years 1937-40 and 41, amounting in all to $70,838.54, and that, during those eleven years, there had been paid in Bonded indebtedness and interest the sum of $210,730.00. The Bonded Indebtedness of the Street Railway was fully paid-up in 1941.

During the first half of the year 1942, there had been a very marked increase in the earnings of the Company and the Commission were of opinion that, even with reduced fares, there would be a large surplus at the end of the year.

The Board refused the application because it seemed to be premature.

On February 1st, 1943, the Commission asked for a reconsideration of the decision and the Board suggested that reconsideration should be deferred until it was known what legislation might be passed by the Legislature at its next Sittings.

On June 3rd, 1943, the Board issued formal Appointment for Monday, June 28th, 1943, at 10.00 a.m., at the Council Chamber, Port Arthur, for the hearing of the application, and directed that Notice of the Appointment should be published in one issue of the local newspaper, ten days prior to the hearing.

At the hearing, Mayor Cox, who is also a member of the Commission, spoke strongly in favor of the reduction, and he was supported by Commissioners Ashton and Bengamin, Bruce Magnuson, Secretary of the Trades and Labor Council, and other ratepayers. The reduction was approved by R. E. Walsh, the Chairman of the Commission, who had formerly supported the application, but who had honestly changed his opinion, and by Commissioner McDonald, who said he had moved the first resolution supporting a reduction in fares, because he wished to place the Mayor on record, but that he had always been opposed to a reduction.

After hearing the arguments advanced, the Board is of opinion that a reduction in fares is warranted, and approves of the reduction of cash fares to 5c and that adult ticket fare be 5 tickets for 25c, until the 1st day of August, 1945, and that, on and after the 1st day of August, 1945, the present rates of fares shall be collected unless before that date application has been made by the Commission to continue the reduced fares and the application has been granted.

At a joint meeting of The Public Utilities Commission of the City of Port Arthur and the Council of the City held on June 14th, 1943, the following resolution was passed:

> "This is a matter with which this Board has not the jurisdiction to deal but the Commission and the Council might consider the legislation passed at the last session of the Legislature—7 Geo. VI, 1943, Cap. 16, Section 6."

Dated at Toronto the 8th day of July, A.D., 1943.

IN THE MATTER of Section 84, Subsection (1) of "The Assessment Act" (R.S.O. 1937, Chapter 272).

BETWEEN:

TORONTO GENERAL TRUSTS CORPORATION
(With whom is joined the Westminster Realty Company, Limited),
Appellant

—and—

THE CORPORATION OF THE CITY OF TORONTO,
Respondent

(Assessment Appeal.)

Eric W. Cross, Esq., K.C. .... Counsel for Appellant

F. A. A. Campbell, Esq., K.C. .... Counsel for Respondent

DECISION

This Appeal came on for Hearing before the Board on the 24th day of February, 1943, and is against the assessment of 145 Yonge Street, having a frontage of 25 feet 7½ inches, and on which property is constructed a ten-storey, re-inforced concrete building. It is admitted that the upper eight stories are of no value, but that it would be very costly to remove them. There is no Appeal as to the Building Assessment.

The land was assessed at $3,400.00 per foot. This was reduced to $3,300.00 by the Court of Revision, and the building assessment was reduced from $15,000.00 to $12,000.00. The County Judge confirmed this assessment. The assessments of three other properties, one to the North and two to the South were reduced from $3,400.00 to $3,300.00 per foot by the Court of Revision, but no Appeals with reference to these have come to the Board.

Frank B. Poucher, for the Appellant, said that in 1938 he made a valuation of this property for the Toronto General Trusts Corporation and said that the valuation then given by him was $50,000.00 for land and buildings and he advised that it would not sell readily at that figure. He said that the Building added little to the value of the land. He said that assessment of properties South of Adelaide at $1,300.00 and this at $3,300.00 would be out of line. In cross-examination he said that the value of the front building would be $10,000.00 to $12,000.00, and stated that renewal of leases in the area showed a steady depreciation.

Lewis S. Yolles said that he is a Director of the Company which purchased the property for $53,000.00—terms: $3,000.00 cash; balance, Mortgage at 3% without covenants; that there have been no buildings erected in thirty years and there have been no extensive improvements to the buildings in this area. The front of this building is narrow by reason of an elevator, and the rent is $350.00 per month.

A. M. Hobberlin, the tenant, said that he had been tenant of this property for some years, that there had been a tremendous change in retail trade in the past fifteen to twenty years, owing to the creation of outside centres, and that values have greatly decreased.

For the defence, V. H. Edwards said that, in his opinion, this land is worth $3,500.00 per foot or $82,687.00, but he said he wouldn't say that he could get that or even $60,000.00 for the property today, because you can't move merchants today and the property is rented at a low figure. He referred to rentals obtained from adjoining properties and showed that they are much higher than obtained from the property in question. In cross-examination Mr. Edwards stated that rentals during the last few years in the block in question had been upwards.

Harry Nixon, for the City, said that in 1929 this land was assessed at $6,000.00 per foot and the building was assessed in 1914 at $65,000.00; that in 1929 the mortgage on the property was $195,000.00. In that year Small mortgaged to the Toronto General Trusts Corporation for $125,000.00, which mortgage was foreclosed in 1940.

It is admitted that the lands on the East side of Yonge Street from Richmond South are not so valuable as those on the West side and that the sale of the premises in question is the only sale in the vicinity on the East side of Yonge for some years. It is also admitted that values on Yonge Street South of Richmond, especially on the East side, have decreased very materially since 1929. Assessments in that vicinity have been materially reduced, but the Appellant says they have not been sufficiently reduced.

Land must be assessed at its actual value (R.S.O. 1937, Cap. 272, Sec. 39 (1)) but "The Court may in determining the value at which any land may be assessed, have reference to the value at which similar land in the vicinity is assessed." (R.S.O. 1937, Cap. 272, Sec. 73 (17):

> "That the price paid for land and the money expended upon it, do not constitute its value, is a matter of every day's experience. We incline to think its value depends much upon the number of persons who at the moment are willing to purchase, coupled with the unwillingness of the owner to sell, and in a less degree by the amount of capital held for investment in land at the time. The anxiety of the owner to sell, when few are willing to buy, frequently reduces it to a value more nominal than real. Strictly speaking, the value of land, like any other commodity, is the price it will bring in the market at the time it is offered for sale; but to apply this rule to land in this country would be manifestly unjust, for there would be found times when no one would be willing to buy at any price, and for the simple reason that capital is not, and the land always is abundant."

(Squire qui tem v. Wilson (1865) 15 C. P. 284).

> "A valuation arrived at honestly by a competent assessor is not lightly to be interfered with."

(In re Mackenzie, Mann & Co. Assessment (1915) 22 B.C. 15).

That this land has been honestly assessed at $3,400.00 by a competent Assessor, there can be no doubt. But the Court of Revision has seen fit to reduce that assessment to $3,300.00. However, this property was sold in 1940 for $53,000.00 on very advantageous terms as to payment by a Company which was not forced to sell but which considered it was good business to take its loss and get rid of the property. Mr. Edwards says that, although he valued the land at $82,687.00, it could not be sold for that price today, because tenants will not rent subject to a sale clause in the lease and owners do not wish to tie up the property under existing conditions.

Having read and considered all the evidence, the Board is of the opinion that a reduction of assessment of this land to $3,100.00 per foot is reasonable and fair and finds that it should be so assessed.

The assessment roll shall be amended accordingly.

The Board's fee of $25.00 having been paid by the Appellant, it is ordered that the Respondent shall repay this to the Appellant. There will be no other costs awarded to either party.

Dated at Toronto the 6th day of April, A.D., 1943.

37	1942	124

During the year 1943 the following legislation was enacted:—

WOODSTOCK, THAMES VALLEY AND INGERSOLL ELECTRIC RAILWAY COMPANY

Corporate existence of Company terminated (O.S. 1943, C. 53)

FORMS THAT MAY BE USED IN CONNECTION WITH THE EXAMINATION OF MOTORMEN

Name of City or Town

....19....

Name of Railway

This is to certify that, acting under "The Railway Act," (R.S.O., 1937, C. 269), Section 265, I have examined the..who is..............................years of age and..................................feet..................................inches high, weighs....................lbs., complexion.................................., as to fitness as a motorman, that the said...is of steady habits, and is in physical ability, intelligence and general knowledge of, and experience in, this work, qualified to act as motorman on any electric car of said Company.

I have been duly appointed an examiner under the said Act, my appointment being dated..

Name..

Examiner.

FORM TO BE USED BY COMPANIES IN REPORTING ACCIDENTS

Accidents: Regulations under and in pursuance of Sections 281 and 282 of "The Railway Act," (R.S.O. 1937, C. 259)

Accidents—Every Company upon the happening of an accident shall give to the Ontario Municipal Board notice thereof in writing by delivering the same at the office of the Board in the City of Toronto or by mailing it, postage prepaid, in a registered letter and addressed to the Board.

Such notice shall contain a statement signed by duly authorized officer of such company setting forth the information and particulars hereinafter mentioned.

Such statement shall be divided into paragraphs, each of which shall include and refer to one (or one group) only of the numbered particulars hereinafter mentioned, and the paragraph referring to each respective numbered particular shall bear the number corresponding to the number hereinafter given for each such particular.

The numbers of paragraphs and the particulars to which each shall refer as aforesaid are as follows:

1. Name or names of company or companies concerned in accident.
2. Numbers of train, engine, car or motor.
3. Date and time of accident.
4. Nature of accident.
5. Exact location.
6. Name in full, address and legal addition of each person injured or killed.
7. Age.
8. Married or single.
9. Passenger, employee or other.
10. If employee, length and nature of service with dates and periods of different occupations (if more than one).
11. If employee, character, experience, skill and fitness with respect to occupation at time of accident.
12. How engaged at time of accident and how long on duty.
13. Cause of accident, how same occurred, with full particulars and details and diagram, if required.
14. Persons in charge, with full names, addresses and the particulars referred to in paragraphs 10, 11 and 12.
15. Result to person and particulars of injury.
16. Result to property, including amount of damage.
17. Names and addresses of all persons present at, or eye witnesses of, the accident.
18. What investigation (if any), and the result of same.
19. Verdict (if any).

The Board reserves the right to require such further and other details, particulars, maps, plans, profiles, documents, models and information or illustration of any kind as to the nature of the accident and a full understanding thereof may suggest or require.

In pursuance of Sections 281 and 282 of said Act, the Board declares that all such information so given in pursuance of this regulation shall be privileged.

Signature of Officer.

N.B.—Give name of officer who fills out this report.

REGULATIONS

REGULATIONS AS TO HEIGHT OF CAR STEPS

Under and in pursuance of a certain order of the Board bearing date the 2nd day of June, A.D., 1909, the Ontario Municipal Board made the following regulations.

The steps on all cars hereafter constructed and used by the Toronto Railway Company and all other street and electric railways under the jurisdiction of this Board shall have steps confirming to the following regulations.

On closed single truck cars the height of the first step above the ground shall not be less than twelve nor more than fifteen inches.

On closed double truck cars the height of the first step above the ground shall not be less than fourteen nor more than sixteen inches.

On open single truck cars the height of the first step above the ground shall not be less than twelve nor more than fifteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and nine inches respectively.

On open double truck cars, the height of the first step above the ground shall not be less than fourteen nor more than sixteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and fourteen inches respectively.

REGULATION RE DRINKING WATER ON PASSENGER CARS

Every Electric Railway in Ontario, subject to the jurisdiction of the Board, shall provide in each passenger car which runs 20 miles or more, a suitable receptacle for water with paper cups attached upon or near such receptacle, and shall keep such receptacle, while the car is in use, constantly supplied with cool drinking water for the use of passengers and the conductor and motorman in charge of such car.

This regulation shall not apply to street railways in towns or cities

Dated at Toronto, this 10th day of April, A.D., 1928.

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Annual Report upon the Ontario Training Schools for the year ending 31st March, 1943.

Respectfully submitted.

N. O. HIPEL,
Minister.

HONOURABLE NORMAN O. HIPEL,

Provincial Secretary of Ontario.

SIR:—

The statistics and reports of the Training Schools and the report of the Training Schools Advisory Board for the year which ended March 31st, 1943, are submitted herewith for your consideration.

War conditions have directly affected these Training Schools. In the Autumn of 1941 the Ontario Training School for Boys, Bowmanville, was requisitioned by the Federal authorities for war purposes. That school had been widely known as a successful re-adjuster of problem boys. Officials responsible for its management were determined that its good work would be continued even under the handicap of operating without suitable buildings and equipment. Very limited temporary quarters were found in the town of Bowmanville and thus late in the autumn of 1941 there were fifteen to twenty-five boys in the school and about six hundred on parole instead of about one hundred and fifty in the school and four hundred on parole. It is evident that these temporary quarters could only be in the main, a clearing house and disciplinary centre. It was a condition and experiment which was forced on us by war conditions. It has been truly said that the results achieved by an institution and the value of that institution depend on the calibre, personality, determination and work of the staff. That has been amply proved at Bowmanville. Success was attained by their influence on the boys in the short period they could remain in the school, by careful selection of foster homes (mostly rural), frequent visits and proper, firm discipline. All these boys were rather serious delinquents. It could not be expected that they could be quickly re-adjusted. Some succeeded in the first placement, others in the second, third or fourth. In any salvaging work it cannot be expected that 100% will be saved. This experiment has continued less than two years with success beyond expectations, considering the conditions, and it is still too early to reach final conclusions, but it does appear that if delinquent boys, ten to thirteen years of age, are transplanted to good home conditions under careful supervision, the big important job in developing them into good citizens has been accomplished. Boys over thirteen years are a much more difficult problem. Therefore, it is of the utmost importance that delinquent boys be placed early under proper influence.

In the Summer of 1942 the Federal authorities also requisitioned the property and buildings of the Ontario Training School for Girls, Galt. To the officials responsible for this school, who appreciated the difficulties in rehabilitating delinquent girls, this appeared to be a major calamity. However, it was necessary to make the best of the situation. Following the Bowmanville precedent, temporary quarters were found at Cobourg by getting possession of a large summer home on seven landscaped acres and at some considerable expense adapting it for use as a school for girls. The pupils at Galt exceeded one hundred and it was not practical to provide for more than fifty in the Cobourg house. The difficulties were aggravated by increased court commitments and the pupil population has steadily increased to more than sixty in spite of rapid—perhaps too rapid placements.

All that has been said in tribute to the Bowmanville staff for the manner in which they met their emergency, equally applies to the staff of the Ontario Training School for Girls. But it is not yet evident that they have achieved equal success. Bowmanville school has no great difficulty in finding suitable rural placements for the boys. Unfortunately, good rural homes are in general reluctant to accept delinquent girls. Therefore, it is necessary to place them in the urban centres and there the temptations are greater and the relapses more frequent.

The three Private Training Schools, St. John's, St. Joseph's and St. Mary's, have not been subject to the upheavals which struck the two Ontario Training Schools, but while they retained their buildings and properties they have in all other similar matters been in like manner and degree affected by war conditions. Their staffs have been equally conscientious and consistent in their efforts to develop their pupils into good citizens.

Present conditions which take fathers from their homes into the Armed Services, mothers into war industries, obviously lessen child supervision and weaken home training. High wages which boys and girls receive are not always wisely spent. There are unhealthy excitements and unusual temptations during the stress of war. All these inevitably tend to increase juvenile delinquency. It is evident that there are parents in increasing numbers who fail to fulfil their obligations properly in child training and it is a condition which must give serious concern to all serious thinking citizens. To the extent juvenile delinquency is prevented, the stream of youths to the Reformatories and Prisons will be proportionately reduced.

All Children's Aid Societies, Big Brother and Sister Associations, many other groups officially and a great number of private citizens have given assistance to the Training Schools during the past year and we are grateful to them and solicit their continued support.

Early in the year at the request of Military Headquarters, Mr. A. R. Virgin, Superintendent of the Bowmanville School, was granted leave of absence to accept a commission in the Army to do personnel work. Mr. J. J. Brown, who for many years has been in charge of the school placement staff, has since been Acting Superintendent. Late in the Winter Miss Charleson, Superintendent of the Cobourg School, resigned and accepted an Army Commission also to do personnel work and Mrs. Pender, her first assistant at Cobourg, was appointed Superintendent.

There have been other staff changes but all Superintendents have been fairly fortunate in finding suitable replacements and maintaining the combination of personality and ability requisite for such work.

Practically every week throughout the year the Advisory Board meets and advises concerning each pupil. It is a Board whose work is invaluable and the members generously give their time to this work without any financial remuneration. The Board's report this year is particularly interesting and informative.

C. F. Neelands,

Deputy Provincial Secretary.

REPORT OF
TRAINING SCHOOLS ADVISORY BOARD

To The Honourable N. O. Hipel,
Provincial Secretary.

Sir:—

We have the honour to present the twelfth annual report of the Training Schools Advisory Board for the year ending March 31st, 1943.

During the year 50 meetings were held, and an average of 89 cases reviewed at each meeting. The record of each boy and girl residing in the Schools, or on parole under supervision of the Schools, is examined every four months, and in addition special consideration is given whenever required.

The Training Schools of the Province are training, re-adjusting and educational in their function, and should not be looked upon as penal institutions.

Upon entering a Training School each pupil is given a thorough physical examination, including tests for diphtheria, scarlet fever, and vaccination against smallpox. A tuberculin test is also made, and if this is positive it is followed by periodical X-ray examinations of the chest. Mental examinations are given in each case, and these prove of great value in determining specific requirements in the training and education of the individual pupil, and also to the Advisory Board.

In the great majority of cases the delinquencies resulting in commitment of boys and girls to the Training Schools have been traced to home conditions,—lack of training in the home and negligence of the parents. Therefore the great need is for improved home conditions, and increased parental responsibility.

Desirable results are achieved by placing the younger children back in their own homes, or in suitable foster homes as soon as possible, and only 9% of those in the Training Schools at present are under the age of twelve. The number of boys and girls placed in boarding homes was 289 which is 42% of all placements for the year. When older boys and girls are ready for parole, whose own homes are considered unsuitable, they are placed in work positions and encouraged to become self-supporting. Constant supervision is given by Placement Officers over all paroled cases, and in order to secure the best adjustment in the community it is frequently found necessary to try several placements.

The Board has been actively interested in keeping an eye on the rate of wages paid to boys working on farms, and care is taken to see that they, and all boys and girls placed at work, receive adequate wages. Many of the School wards are now working in munition plants with high earnings, a portion of which they are instructed to save, investing in war certificates and Government bonds.

Wardship was terminated over paroled wards of the Schools in 451 cases as follows:—

92	Enlisted in the Armed Forces.
37	Married.
34	In other institutions.
17	Moved out of the Province.
24	Whereabouts unknown.
247	Satisfactory adjustment in community.

In the Fall of 1941 when the Ontario Training School for Boys, Bowmanville, was moved to a temporary building to be used as a receiving and clearing house, there were 142 boys who had to be placed immediately. The Board is very much interested in the following facts in respect to their re-adjustment in the community:

50 Successful in first placement.
41 Successful in second placement.
11 Successful in third placement.
5 Successful in fourth placement.
4 Re-admitted and at present in the School.
3 Absent without leave from home.
28 In the Reformatory or Gaol.

Of the 142 evacuated—21 have been released from guardianship. Those who do not adjust with repeated placements are boys who have serious personality difficulties and such failures undoubtedly belong to reformatories and prisons. An attempt has been made to give these boys further training by opening up the Ontario Training School for Boys, Guelph.

The Advisory Board regrets that the war necessitated the Ontario Training School for Girls, Galt, being transferred to the W.R.C.N.S. and did recommend to the Minister that the W.R.C.N.S. be housed elsewhere. In September 1942, the Department took over a temporary building in Cobourg for the Girls' School, which the Board considers is too crowded for the proper training and care of these problem girls, who because of lack of accommodation have to be placed in the community before receiving sufficient training.

On June 19th, 1942, the Advisory Board visited the Ontario Training School for Girls, Galt. Also on November 25th, 1942, visited the Ontario Training School for Boys, Bowmanville, and the Ontario Training School for Girls, Cobourg.

There are two recommendations which this Board has made to the Department in former years, and which we wish to emphasize again:—

(1) The great need for a separate institution for mentally defective delinquents. 12% of the new children received during the past year were defective mentally and are not fit subjects for our Training Schools. Since we believe, that the Training Schools are not the proper places for the mentally defective children, we suggest that the Magistrates should commit defectives of low mentality direct to the Ontario Hospital School, Orillia.

(2) That the Department of Indian Affairs at Ottawa should have their own training school to receive delinquent Indian children. From experience we feel that we have not helped greatly in their adjustment.

The Board appreciates the reports received from the Ontario Department of Education as a result of inspections made by Public and Separate School Inspectors, which show that academic and vocational work carried on in the Training Schools is in keeping with the standards and requirements of the Department.

The Board also wishes to express appreciation of the work of the Mental Health Clinics under Dr. Katherine M. Barrington, Hamilton, and Dr. M. G. Rendall of Brockville, also the Out-Patient Department, Toronto Psychiatric Hospital under Dr. E. P. Lewis in examining the pupils of these Schools. We regret that the Clinic at Whitby is unable to function due to war conditions. The Board also appreciates the results attained by making the special training facilities available at the Ontario Hospital Schools, Orillia and Cobourg.

We wish to thank the Superintendents and staffs of the Training Schools for their co-operation in supplying reports, and acting on suggestions of the Board in respect to wards of the Schools. Since September 1942 Mr. A. R. Virgin has been serving the military authorities as personnel officer, and Mr. J. J. Brown has been ably carrying on as Acting Superintendent of the Ontario Training School for Boys, Bowmanville. At the Ontario Training School for Girls, Cobourg, there has also been a change of Superintendent when Miss Laurie Charleson resigned in March 1943 and was succeeded by Mrs. M. E. Pender.

Mrs. West of the Advisory Board is serving the Department at Ottawa as Director of Women's Voluntary Services. The Board will be pleased when she is able to return.

George W. Hambly, *Chairman.*
Nell West,
E. P. Lewis, M.B.,
Charles D. Gordon,
John M. Bennett, M.A., Ph.D.

REPORT OF THE ONTARIO TRAINING SCHOOL FOR GIRLS, COBOURG

April 1st, 1942 to March 31st, 1943.

The Girls' Training School formerly of Galt, was moved to its present location last September. Previous to the move many of the girls were placed on probation so that only twenty-two girls actually moved to Cobourg with the School. This exodus started near the first of July and was carried out while the original buildings were in the process of being made suitable for the W.R.C.N.S. During that time the School girls co-operated in a truly remarkable way, not only in the actual packing for the move, but in the harvesting of the garden early, keeping up the appearance of the grounds outside and keeping the buildings themselves in a fairly habitable state.

The present quarters of the School were originally occupied by a family from the United States who used the residence as their summer home. In this residence the girls all sleep in dormitories. Two large dormitories give accommodation for twenty-four girls, while each of the eight smaller rooms, hold four comfortably.

Medical Reports

When a girl is sent to the School she receives a medical examination from the School Doctor, who is a local physician, and the following Tuesday is given a dental examination by the Dentist for the School, also a local man. It is the aim of the School to have the girls in good physical health when they are ready for their period of probation.

Admissions	91
Readmissions	90

Treated for Vincent's Infection	4

ACADEMIC REPORT

The younger girls and those who have the mental capacity to absorb straight academic training are sent to School. The School course followed is prescribed by the Department of Education and is supervised by a qualified school teacher. We no longer have facilities to teach High School or Commercial work, but under the present conditions are still able to provide training to meet Entrance requirements.

" " " in Grade 8, March 31st	7
" " " received Lower School Certificate 1942	3

VOCATIONAL REPORT

The other girls are placed in the vocational groups where they receive training in household management, laundry work, sewing and domestic science. The training given in these groups, is of a very practical nature. The girls do the housework under the supervision of the housemothers. Laundry training is given, by having the girls do the laundry for the entire school while the sewing group receives training in hand and machine work by making pyjamas, nightgowns, and housecoats, and doing the mending for all of the School. Domestic Science is taught by working in the kitchen where seven girls cook and serve meals for the School and Staff members under the guidance of the dietitian.

During the summer the garden provides an added activity. Last year a splendid crop was harvested from the garden at Galt. The coming season will probably leave much to be desired since the garden at Cobourg has not been cultivated for some years.

LAUNDRY GROUP

Number of girls in class	61
Number of articles of girls' clothing	10,255
Number of articles of staff clothing	1,855
Number of articles of cottage linen	25,506

Linen place mats	16
Scrim curtains, pair	10
Fancy work given out to be worked by the girls for Christmas gifts (i.e., Pot holders, pillow tops, bibs, baby spreads, sewing aprons)	48

RELIGIOUS INSTRUCTION

Each day is started by a short chapel service. On Sundays the girls attend church and once a week the United Church Minister visits the School to give a talk at Chapel time.

MENTAL HEALTH

In trying to plan our programme to provide a wholesome outlook on life for the girls, we need to know their mental and physical ability, their ability for specialized groups and their particular interests as individuals. We have been unfortunate in that we no longer have the services of a visiting Mental Health Clinic to give us advice and help in handling this problem.

RECREATION

During the long winter evenings the girls gather in a large common room where they are encouraged to engage in hobbies such as knitting, handwork, scrapbooks, colour painting, and music. Once each week the girls write letters home and another evening is spent changing library books. We were not able to bring all our library books from Galt but still have a large number of books available for lending.

For a short time last winter we were fortunate in obtaining the gymnasium at the Anglican Church for physical training for two periods each week.

A skating rink on the front lawn provided excellent healthful recreation for the winter and baseball is a favorite summer game. Cross country hikes during Spring, Fall and early Winter were a source not only of recreation but of education in nature lore.

Several Cobourg organizations have been thoughtful in extending invitations to the girls to attend public entertainments, among which were the following:

Roman Catholic Young People's Sodality	St. Patrick's Day
Hatfield Hall, Girls' Private School	Entertainment
Anglican Young People's Association	Play

With the move of the School from Galt there has been a marked increase in the number of girls placed in the community. Foster home finding is increasingly more difficult and girls who do not satisfactorily adjust in a community tend to spoil that district for further placements.

Openings for girls as domestics are numerous, as are factory, store and laundry positions, but the placement officer must necessarily make sure that the home in which the girl will live is a normal, happy one where the girl will be accepted as one of the family group.

Prospective foster parents and employers must first satisfy the placement officer that they are not merely desirous of increasing their income or obtaining "cheap" labour and must give references which are carefully checked by the placement officer. Even when satisfied with the home conditions the placement officer must give careful consideration to the personality, ability, social needs and health of the girl who is ready for placement. All these factors are important in finding the "right" home for the right girl.

The Placement Officers visit the School at stated intervals where they meet with the regular staff members to consult together regarding the girls ready for placement. During the winter months each placement officer spent four days at the School at five-week intervals. These visits gave the outside workers an intimate glimpse of the routine work of the School and relieved the regular staff at a time when the process of re-organization was at its height.

Of the ninety-nine girls resident in the School on April 1st, 1942, fifty-one are placed in various communities. These girls have not remained in their first placement but have made an adjustment to such an extent that they are able to remain in a community. Nine other girls are still in original placements. Seven are absent without leave from placement; eleven were transferred directly to Ontario Hospital Schools. Because of inability to adjust in the community it was necessary to transfer seven of the original ninety-nine to the Andrew Mercer Reformatory while eleven others were sentenced to the same institution by the courts. One girl is held in custody pending a court appearance and two are still in the School. The real problem is to bring an element of stability into the lives of the girls. First placements are not always successful but changes in placement do not necessarily mean unsatisfactory conduct on the part of the girls.

On many occasions the broad question is asked as to the measure of successes obtained by the girls after their training at the School, and at this time I wish to present a brief summary of the six hundred and thirty cases covered from August, 1933, until the end of March 1942.

In August, 1933, a group of girls was transferred from the Alexandra Industrial School to the Ontario Training School. From that time until March 1934, 44 girls were sent to the School, of that group only one is still under the care of the School. In the next year, 1934-35 only 19 girls were sent to the School, none of them now remaining in our care. Of the fifty-three admissions in 1935-36, two are still wards, while only one of the twenty-nine admissions in 1936-37 remains a ward. Forty-one of the fifty girls sent to the School in 1937-38 have been released from our care, and forty of the sixty-three sent in 1938-39 are now released. In 1939-40 there were eighty-seven admissions and thirty-seven are released. In 1940-41 the admissions reached their peak amounting to 106. Twenty-three of these girls are no longer our wards. Of the eighty-eight admissions in 1941-42 there are already five released from wardship and to date none of the girls admitted during the past year has been released.

Reasons for releasing girls from wardship vary and no summary would be complete without giving at least an outline of them. It is well worth noting that forty-eight girls were released because of good progress before reaching their twenty-first birthday. Thirteen others joined the armed forces and with good records there, were given their release from guardianship. Five are deceased; nine are still in Ontario Hospitals, twenty-five reached the age of 21; twenty-two were transferred to other departments or institutions; twenty-one were returned to the guardianship of their parents as it seemed to be in the best interests of the girls to take this step. Sixteen have been released while absent from supervision, and by far the greater number, 128 were released by marriage. Altogether two hundred and eighty-seven girls of the six hundred and thirty are no longer wards.

This summary by no means shows what lasting results the training received while under the supervision of the School may have, but is intended to show that the efforts expended by the women who have engaged in this work have led to more wholesome, and happier lives for a considerable number of girls.

The following statistical report will show the various placements for the girls remaining under supervision.

Placement Reports

REPORT OF THE ONTARIO TRAINING SCHOOL FOR BOYS, BOWMANVILLE

April 1st, 1942 to March 31st, 1943.

Our commitments for the year April 1, 1942 to March 31, 1943, have shown an increase of eighteen over the previous year. Our re-admissions are also higher. This is accounted for by the fact that with our policy of rapid placement, it is often necessary for us to try a boy in more than one placement before finding the home best suited to his needs.

Three hundred and thirty-four boys were discharged, the majority being placed in foster homes. We have been most fortunate in securing boarding homes, but difficulty is experienced in districts where war industries are located.

The demand for farm help exceeds our supply.

All boys placed in work positions are encouraged to save money and buy bonds and war saving certificates. This is especially true in the case of factory workers. The idea appeals to the boys, and they are pleased to have a part in this war effort.

At the present time we have three full-time, and one part-time, placement officers. Their work is to secure suitable homes for the children committed to our care, and to provide supervision. The policy of rapid placement made necessary by our moving to smaller quarters, has proven very satisfactory thus far. Our experience has shown that very often a boy needs only a change of environment, away from the temptations which beset him in his own home town or city, in order to adjust to satisfactory conduct. We try to select homes where the foster parents will be understanding and capable of handling the boy's particular problem. Foster parents are expected to provide recreational and social opportunities, and give the child a weekly spending allowance.

At the school new commitments are referred to the doctor and dentist and any treatment required is given. Intelligence tests are administered by the teacher in charge of the academic department.

The maintenance of the grounds and buildings on the school properties provides necessary work activities.

The boys enjoy outdoor and indoor sports as part of their recreation and training.

During the year, Mr. A. R. Virgin, Superintendent, was granted leave of absence to the Army. One of our Placement Officers also enlisted. The loss of these two men made it necessary to re-adjust the staff and the work.

Splendid co-operation has been received from the social agencies throughout the Province. They have been always willing to help with any problem affecting the School and its wards.

The Salvation Army conducts weekly religious services.

The School has enjoyed the benefit of a staff that have worked together in the best interests of the Institution.

ACADEMIC DEPARTMENT

The course of study as prescribed by the Department of Education is followed in all grades from 1 to 10. Auxiliary class training is also provided. The number of boys attending the various grades was as follows:

Grade 10	8 boys	Grade 5	42 boys
Grade 9	18 boys	Grade 4	25 boys
Grade 8	27 boys	Grade 3	24 boys
Grade 7	42 boys	Grade 2	8 boys
Grade 6	36 boys	Grade 1	5 boys
Auxiliary	31 boys		

The academic department is in operation five and a half days each week.

Individual instruction is given in order that the boys are properly qualified to enter grades in outside schools.

Much time is spent in adjusting boys' habits so that they conform to those of accepted behaviour. Efforts are made to make boys industrious and to teach them to gain satisfaction from having done a task well. All this helps when he is placed in the community to attend school or work.

In addition to the straight academic course, we provide handwork, such as the making of scrap books, etc. During special seasons, the boys make greeting cards for the occasion. Supplementary reading is used as an aid to teaching social studies and natural science. Library books are provided for recreational reading.

Group games and sports are supervised by this department.

During the summer months, academic lessons are discontinued and time spent working in the garden, on the lawns and the perennial borders.

The Academic Department gives Binet and Group Intelligence Tests. During the period, September to March, fifty-five tests were recorded.

REPORT OF

ST. MARY'S TRAINING SCHOOL FOR GIRLS, TORONTO

April 1st, 1942 to March 31st, 1943.

The time has come to present a word picture of the activities in St. Mary's Training School for twelve months. The picture, apart from incidentals, is a replica of all preceding twelve months and we wonder what changes of shading, light, background can be made in order to produce an interesting study. Perhaps the tracing of a single figure may vary the picture for this year. We tell the story of Doris.

April of 1942 was pleasant, fair, mild. This was the first spring spent in the new grounds and the children revelled in space, freedom, distant horizons. Their reactions might be grouped thus:—a. unperceiving; b. admiring; c. boisterous; d. understanding. The pupils would fit in one or other of these classifications. Doris added a practical side to her appreciation and around this trait in her character our picture is traced.

She asked for garden seeds and these were supplied. No seeds for flower culture were in her list. She wanted vegetables, only, and she gave no reason for her choice. Spading, hoeing, shaping beds came next and this was attacked, vigorously. Speculation was rife but Doris kept a discreet reticence about her plans. Every moment of spare time was employed in the beds and no one among her associates were allowed to approach. Since Doris owned and operated a temper her companions learned, soon, to be wary. At the hours she spaded and delved a circle of her classmates formed avid with curiosity but prepared to disperse instantly. One never knew the target toward which a spadeful of earth might be directed. In due course onions, lettuce, radish, carrots, cabbage shoved up and then weeding was necessary. This was done diligently and regularly and the beds flourished. Weeks slipped away and interest waned in Doris and her garden where she worked with untiring perseverance.

Toward the end of August Doris presented a list of articles selected from Eaton's catalogue and asked that they be ordered.

"But you have no money, Doris. You cannot buy without the price."

"Oh, yes. I have money enough to buy these things."

"Tell me where you found the money. You have not been sent any from home."

"I got it from the kids," Doris answered with calm assurance.

Then followed the reason for the hard work in vegetable beds. Doris had exact knowledge of every pupil receiving money from friends and she had been selling her vegetables. 1 carrot, 5 cents; 2 radishes, 5 cents; 1 onion, 2 cents, with cabbage and lettuce leaves at her own price. She claimed to have more than ten dollars in hand or outstanding. She plied her trade during recreation periods and she did not give away even one lettuce leaf. To deal with the unexpected without showing surprise or emotion is an art and this situation called for its prompt exercise.

April, 1942, opened with eighty-nine pupils in residence. Thirty-nine were admitted during the year and thirty-two were dismissed. At the close of March, 1943, ninety-six pupils were in residence. A majority number of girls admitted were of average intelligence, of clean and prepossessing appearance. A number were outsize. By this is meant that for children thirteen and fourteen years of age they were unusually tall and massive. They have the build and carriage of eighteen years.

Academic standing at the time of admission was lower, generally, than in other years and there was a widespread objection to school routine and discipline. Truancy had become habitual and desirable. Dishonesty, theft, lying had placed their taint everywhere in greater or lesser degree. These girls are clear-sighted and they estimate persons, places and things quickly, but their values are in error, therefore, their findings are also in error.

A childhood estranged from unhappiness had been denied and the last four years have obliterated the endearing simplicities of the young. Fathers are mobilized, mothers are in war industries, homes have no allurement, children are shaping their own thoughts and actions. How can they be prepared against the day when duty becomes imperative? They gaze with indifference toward the future and they accept instruction for the first few months with bland cynicism. They try to make the thoughts and acts of maturity their own, but they have the handicap of youth and inexperience with a basic artlessness. When the veneer cracks and falls away real training begins. They find in themselves the qualities of childhood and youth and to this appeal they respond, readily.

The academic year proved fruitful. Fifteen pupils passed the Entrance with good marks. The High School prospered and the Commercial classes were pursued with the usual enthusiasm. After the first months the children have love for and interest in the academic training. A good foundation is laid for future building.

An instructress in domestic science attended every week and the pupils enjoyed the work. Skill in the domestic qualities is latent in these young girls and it develops practically as they grow older. For four months preceding the New Year they were occupied in making ear muffs for a wholesale house in the city and this kept all spare periods occupied. Friends gave them spending money and they ordered from the catalogues wool, dress goods, stamped needle-work. They knitted sweaters, socks, bedroom slippers, caps, mittens, for their own use or to send to their mothers. They cut out and made up house dresses and housecoats, using fabrics or printed cotton. They have ready for display at any time a creditable exhibit of fine needle-work, art, and crochet work. Nearly all have good taste in colour, line, harmony. Their conversations on these subjects are laughable, more particularly when the unobservant girl offends against existing rules. The tide of criticism is scathing but it is truly helpful.

The School was spared serious illness. The general health was excellent and for this we thank God. We owe a debt of gratitude to the devoted medical officers who, at inconvenience to themselves, direct these operations.

After care work was uneventful. Steady and careful supervision was needed but no great difficulty was encountered. When children leave the School they plan, often, to continue their education in stenography or in High School by attending night classes. Every avenue is left open to further such plans where the girl has superior intelligence. We concede all the arguments which urge a business course, a nursing course or similar occupational pursuits. Theoretically it is the correct procedure, practically it dissolves. We find that with the way left open and, at times, with the help of parents, girls do not take advantage of such opportunities. Financial necessity is the great obstacle but we hazard an opinion which does not take this difficulty into consideration.

These young girls lack, in themselves, that vital element or quality which will go forward, onward, upward without pressure from external forces. They grow absorbed in the small interests of their small world. Dress, theatre, personal appearance, boy friend engross the attention and they will not accept the restraint, sacrifice, hardship exacted when high ideals are followed through to attainment. They will not take propulsion from outsiders and they will not drive themselves. In a five-year period we find four of our wards who fitted themselves for clerical work. The present times are opportune.

We close our narrative in a spirit of gratitude for manifold blessings granted by Divine Providence. Chief of these blessings is the kindness and cordial assistance which comes to us from the Department under which we are fortunate to operate. We thank each member of the staff with willing sincerity. The burden of the work would be great if we were not granted the wise tolerance, the unfailing help, the prudent counsel which the Department gives with courtesy and promptitude.

We thank the Advisory Board for the continued interest in St. Mary's School, for the considered wisdom of its rulings, and for its impartial attention to all details.

We have the honour to remain, your obedient servants,

SISTERS OF THE GOOD SHEPHERD.

REPORT OF

ST. JOHN'S TRAINING SCHOOL FOR BOYS, TORONTO

April 1st, 1942 to March 31st, 1943.

The number of boys paroled from this School during the past year was 108. There were 89 new admissions during this period.

Health

Our first interest, when a boy arrives at the School, is for his health. We realize that this is, perhaps, the most important factor in determining whether or not the proper mood will be developed for adjustment. A thorough physical examination is made and if necessary Dr. John Hurley suggests immediate treatment locally or at St. Michael's Hospital. As a precaution against diphtheria, every boy on entering is given diphtheria toxoid. We have not had any serious illness to report during the past year.

Our dental clinic operates weekly and listed below is the major portion of the work to be recorded:

Boys seen at clinic	329	Cement fillings	8
Extractions	157	Synthetic Porcelains	7
Restorations	97	Surgical treatments	36

Equally important to the medical and dental attention to the newcomer is the healthy mental attitude to be developed towards the School and his adjustment. To achieve this the beginner is placed in the hands of an "honour section" intelligent lad who has been carefully instructed in the method of initiating his charge into the routine of the School. This phase soon passes and usually smooth sailing is ahead with both lads becoming very intimate friends.

Religion

Religion should hold an important place in the lives of these boys. All assemble for daily Mass and for prayers before retiring at night. Special religious instructions are given in the class rooms. I do not wish to give the impression that long prayers are recited or lengthy chapel exercises are held. I believe that these should be short and made appealing to the lad so that they will not be discontinued when he leaves the School. The boys are at liberty to visit the chaplain.

Academic

The regular public and separate school programme for the Province is followed, with special adaptations suited to the needs and limitations of some of the boys. All grades are included from the auxiliary class to grade X. Apart from the auxiliary pupils all the boys are one-half day in academic classes and one-half day in vocational classes. The auxiliary class had an average enrolment during the year of 29.

VOCATIONAL

Printing: This department supplies a practical course in the printing trade. The shop is exceptionally good for teaching accuracy and neatness. A number of our former pupils have followed this vocation and are engaged as printer's assistants.

Tailoring:	New trousers	196
	New shirts	358
	New household linen	707
	Trousers repaired and pressed	2,490
	Boys' suits pressed	660
Shoemaking:	New shoes	131
	Shoes repaired	1,820

Gardening: Apart from the regular seasonable vegetables the following is to be noted: Potatoes 120 bags; carrots 3 tons.

ATHLETICS

Athletics are classified as a vocational training and seasonal schedules are followed with the same supervision as is maintained in a class room. Experience indicates a close relationship between delinquency and the lack of play habits. All are engaged according to age in such competitive games as hockey, baseball and football. Because of this vocational attitude towards athletics the boys excel in these sports and usually enter into the finals with their competitors.

WEEKLY NOTES

For the purpose of informing the lads what progress or lack of progress they are achieving a system of weekly notes is used. When a boy enters the School he is placed in a section known as the "good section", and his conduct, performance of duty, etc., enable him to advance to a higher section or to recede. The advance sections are very good, excellent and honour. The receding groups are fair, unsatisfactory or very unsatisfactory. The section in which a boy finds himself has been decided by the notes he obtained whether they be good or bad. These notes are conscientiously read weekly and are looked forward to with keen interest. A boy is in the excellent or honour section before being paroled.

SUMMER PROGRAMME

We are fortunate in exchanging a number of men on our staff with teachers of other sections of the country for the vacation months, thus bringing new talent to the School. Formal academic classes are not held. The boys engage in manual and mechanical work and play. During this season we replaced our annual visit to the Toronto Exhibition by a picnic across Lake Ontario to Port Dalhousie. In the late summer the entire School population, including the staff, went to De La Salle Camp, Jackson's Point, for a three weeks' outing. A well-balanced programme of work and play added greatly to the happiness and physique of the boys.

PLACEMENT OFFICER'S REPORT

During the year our full-time placement officer made 703 visits to boys placed on parole throughout the Province. Close contact with the boys through correspondence was also continued. A great number of our former pupils have enlisted in His Majesty's Service and it is also gratifying to learn of the number who are investing safely in Victory Bonds and War Saving Certificates.

I wish to thank, in a very special manner, the members of the School Staff and all others who in any way have contributed to the success of the past year.

Sincerely yours,

BROTHER STEPHEN,
Superintendent.

REPORT OF

ST. JOSEPH'S TRAINING SCHOOL FOR BOYS, ALFRED, ONTARIO

APRIL 1ST, 1942 TO MARCH 31ST, 1943.

Attendance Report:

Number in Residence, April 1st, 1942	121
Number in Residence, March 31st, 1943	103
Average Daily Attendance	108.66

Report of School Programme.

Forty-three new boys were admitted to the School during the year. These included all grades from primer to grade nine in High School. Auxiliary training was provided for a certain number of boys of defective mentality; and occasionally it was found very hard to cope with the requirements of the retarded or mentally deficient pupil. The regular inspections have been carried out, and the reports given were, on the whole, satisfactory and in some respects very good.

Enrolment in Each Grade.

Grades 7, 8 and 9	45
Grades 5, 6	38
Grades 3, 4	17
Grades 1, 2 and Auxiliary	53

Singing lessons were given every day from half past eleven to twelve, as a regular morning exercise, and occasionally in the afternoon from five to six. This, with weekly lessons in voice training, both in French and English, provided the lads with plenty of material to put on a good show, not only at Christmas, but frequently during the year, specially on reception days, as for instance when the School received Judge Fraser, of Ottawa.

A special course in drawing and wood-working was organized in September in favour of the full-time pupils. These boys were allowed to practise in the wood-shop an hour a week at stated periods. We had four classes numbering in all seventy-six full-time students and twenty-six part-time. On March 31st, there were thirty-one boys doing full-time vocational shop and thirty part-time. Boys of twelve years of age attended school the whole day, as well as a few others who were not physically fit to do vocational work. The classes were in operation five and a half hours on week days.

The library activities were about the same as last year. It was open four hours a week; and the reading done under the supervision of the Chief Librarian who saw to the distribution and proper care of the books taken.

It contains 900 books, an increase of 208 over last year's total. We bought a large translation dictionary in two volumes; and paid for twenty-four "Topix", a very interesting weekly publication for boys.

Moral Training.

Delinquency is fundamentally a moral problem, and there can be no solution to it apart from the influence of religion and the Church. Hence the detailed plan of our programme of religious training and procedure, aims at giving the boys under our charge, a progressive course in religion and imparting the fundamentals of good and proper living. Consequently, knowledge of religion and exhortation to good living are the dual objectives in this phase of ethical education. In this way, instruction in religion has the advantage of correlating theoretical information with practical application aiming at securing the most desirable results. Besides being with the boys during their school time, the teachers who constitute the teaching staff, have excellent opportunities of observing them in their "home" life, and in fact, during the entire day. This gives an opportunity of calling attention to the necessity of the boys' daily life being in accordance with the principles and practices inculcated during the formal lessons in religion.

Of course, the religious instruction of our boys must be thorough; but we are aware that we are dealing with delinquent boys and are cognizant of the fact that these boys will spend only a year and a half with us; and finally, our study of case histories reveals that, in general, our religious programme is the first ever to be followed by these youths. In a short space of time, we have to acquaint every boy with a practical knowledge of the important truths of religion, therefore, practical rather than theoretical discussions are in order. We stress fundamental doctrine: repeat over and over again the duties owed to God and the neighbour as contained in the Commandments. Many of the lessons given deal with the virtues of honesty, purity and truthfulness. Since time is an important consideration, the teacher necessarily puts first things first and in a limited space of time emphasizes those things most necessary to salvation.

Naturally, in the instructional part of our religious programme, the Reverend Chaplain plays a most important and significant role. He is, in the true sense of the word, the father of his youthful congregation. He is the instrument appointed by God to administer the Sacraments and the Interpreter of His Divine Word.

In order to render the Chapel service more interesting, we bought 150 booklets known as: "La Sainte Messe en Cantiques"; and 150 French and 150 English prayer books, and the prayers in those small books are read aloud by all during Mass.

This programme is planned and arranged with a view to meet the needs of the boys and return them to society strongly imbued with a desire to be faithful to their duties to God and their neighbours. How far this mental hygiene has been effective in securing a permanent readjustment to the conditions the boy will meet when he leaves our Institution, is very hard to tell.

Physical Training.

From the standpoint of the work covered and results obtained, the past year has been very good. The programme in physical education and organized sports was carefully built up and the material of the course was happily received by the boys. Class periods followed precise course of instruction in view of a definite purpose; and we are glad to say that the response was enthusiastic and spontaneous.

An interesting summer project was the improvement of the swimming pool, a piece of work which occupied fifty boys for two months—May and June. The swimming pool is now 200 feet long by 100 wide, and from four to twelve feet deep. During July and August, the boys were allowed to use the pool twice a day, and in early September, once. For gymnastic purposes, the boys were divided into two groups, the senior group made up of fifty athletes, and the junior, of sixty-five. The programme is of 220 numbers, exercises on the mats, the parallel bars and the spring-board. When one of the numbers is mastered by the young athlete, the result is recorded and he is allowed to work on the next number. So far, twenty-four boys know the complete physical programme of the School, that is 220 different exercises.

Military drill was given forty-five minutes daily, and the annual inspection was held in uniforms. The benefits derived from those military exercises are many; they give the boys alertness, poise, discipline and train them to steady attention. More than 150 of our graduates joined the armed forces, and many of those enrolled served as instructors in physical training, due to the formation they got at the School.

Boy Scouts' knot tying exercises were also introduced, and regular course was given in the afternoon, from five to six. The selection of knots has been limited to those generally useful, and where there are several specialized methods of tying a knot, the most adaptable was preferably selected. Actually, twenty-four boys know the sixty-three chosen knots, splices and lashings.

"A First Aid" course was started in December with fifty boys, in which was stressed the idea that the science of First Aid to the Injured is based on fundamental principles of practical medicine and surgery, a knowledge of which, in cases of accident and sudden illness, enables trained persons to render such skilled assistance as will preserve life, promote recovery, or prevent aggravation of the injury or condition until the arrival of the doctor or during transport.

About three miles from the School, there is an immense peat bog being exploited by a company from Montreal. Due to war conditions, workers could not be had in sufficient number during the summer season. At the request of the manager of the firm, at least forty-five boys of the First Division were permitted to work at the plant during July and August, on an average of five hours a day. Half the money they earned was given the boys to buy whatever they liked, and with the rest, the School was provided with the following second-hand articles:

22	pairs of skis.
200	reels of silent films.
1	amplifier.
2	loudspeakers.
1	Acme Projection Machine.
1	gramophone.
1	radio.
200	records for gymnastic exercises.

Twenty-five boys were given regular lessons in Indian Club exercises as a preparation for the celebration of the Tenth Anniversary of the foundation of the School, an event to be held June 20th, 1943. Fifteen movements were taken, from the Bend Arm Circle to the Wrist Circle.

The Morse Code, Semaphore and Flag Signals were added to the ordinary course in military exercises.

A library was organized in the First Division recreation hall for the exclusive benefit of the taller boys. It contains 1,000 books, magazines, Funnies and True Comics. All the books in the library were bound in the bookbinding shop of the School.

Twelve Muscle Stretchers were bought and put in the gym. and the boys are free to use them every day.

A Championship Roll of Honour was put up in Division Hall on which were posted every month, the names of the champions in every interior game as, chess, checkers, etc., and in the competitions, for the high dive, high jump, long dive, etc. Sometimes our boys engaged the local school organization in the major sports, and although lacking the maturity of the players against whom they competed, they generally managed to give a good account of themselves in every game, and no rival regarded our team as an easy mark.

The good effects of such an extensive programme are immediately apparent. The boys after being here for a short period of time present the appearance of well-trained athletes, well conditioned and ready for their play and work. Moreover supervised play periods are part of the daily schedule of each section and special games are played in all competitive sports.

Intra-class competition in the team sports serves to ready the boy for participation in the inter-class leagues. These leagues are the high-points of all our athletic competitions. The enthusiastic rivalry and good sportsmanship displayed are worthy of high commendation. Winning teams and individuals in all competitions are rewarded.

Camp Organization.

The camp programme for the First Division was the following:

Morning: Bugle Call.
Bath.
Mass, Devotional Exercises.
Breakfast.
General Cleaning.
Berry picking, boys divided into four supervised groups.

Afternoon: Dinner.
Rest under supervision.
Games.
School Work.
Swim.
Supper.
Boat Ride on the Ottawa River.
Camp Fire, Devotional Exercises.

The camp was opened July 4th and closed September 4th. The School was divided into groups of about thirty boys, and each group stayed a week at the camp.

Vocational Programme.

Number of boys in each department during the year:

Printing	12
Kitchen, Dining-Hall	14
General Domestic	3
House Maintenance	87
Barber Shop	3
Farming and Horticulture	13
Shoe Making and Repairs	37
Tailoring	16
Wood Working	35

Woodshop Report.

Two instructors gave regular classroom instruction in wood-working and drafting. Forty-nine pupils were taken to the carpentry shop as a weekly schedule.

We bought for them:

14 Hammers.
1 Combination Tool, including a Circular Saw.
2 Wood-Turning Lathes and Motors.
2 Sets of Chisels.

Projects completed:

6 Shelves for the laundry.
60 Wooden swords for the gymnastic dance.
8 Chapel pews.
10 Office desks.
1 Kiosque built on the campus.
36 Tables (Playing-card Tables).

The maintenance work included the repairing of the roof of one of the barns, thrown down by the weight of the snow in February. Eight boys of this department under the supervision of their instructor took three weeks to rebuild it. Five partitions were made in the piggery, a work which took a month to complete. All the wooden rods in the window shades were changed; new ones were made in the woodshop and put in the shades all around the building. Moreover, one full day was set aside for general repairs, every week, in and around the School.

Shoeshop Report.

Seventeen apprentices are still working in the shoeshop, twelve as full day workers from 9.30 to 11.30 o'clock in the morning and from 1 to 4 in the afternoon; five others, work only in the afternoon. They made and repaired most of the leather articles used by the boys and the staff of the School.

Made:

Boots and shoes	244	pairs
Baseball Bases	12	
Protectors	22	
Leather Aprons	4	
Leather Belts	135	
Shoes, Rebuilt	127	pairs

Repaired:

Boots and Shoes	1,159	
Skates	61	
Mittens and Gloves	90	
Balls	18	
Leather Coats	20	
Leather Caps	25	
Suspenders	39	
Suitcases	18	
Skates, Sharpened	515	pairs
Boots, Oiled	400	pairs

Tailoring Division Report.

The boys here worked twenty-two hours a week at the shop, half the time being spent in mending the clothes.

Made:

Shirts	362
Pants	505
Sundry Articles	60

Mended:

Pants	1,112
Shirts	985
Underwear	723
Coats	136
Sheets	82
Pillow Slips	78
Windbreakers	33
Coverlets	34
Cassocks	16
Sundries	314

Culinary Report.

Fourteen boys worked in the kitchen or in the dining-hall. Five are actually doing kitchen work under the supervision of a clever chef. Every day they bake the 125 loaves of bread needed for the School. They helped to can thousands of gallons of vegetables, fruits, meat, and preserves distributed as follows:

String beans	250	gallons
Tomatoes	2,700	"
Peaches	704	"
Cranberries	35	"
Meat (Chicken, Veal)	15	"
Ham, cured and smoked	800	pounds

Agricultural Report.

The general crop was good; the hay was a little better than last year; the grain crop was ordinary and the corn and turnip crops slightly better than the average.

Farm Products:

Potatoes	2,300	bags
Carrots	45	"
Beets, Turnips	50	tons
Corn and Ensilage	150	"
Hay	40	"
Grain	1,804	bushels
Celery	200	dozen heads
Tomatoes	2,700	gallons
Milk	10,212	"

Animals of the Farm:

Horses	3	Cattle	25	Hogs	78

The production per acre is $51.57, which is considered a good rendering. Three instructors and six boys worked regularly on the farm, with the whole School giving help occasionally in the summer time.

The maple-syrup season was very poor, due probably to heavy winter frosts. Seventy-five boys worked several days to shovel the snow, at places eight feet deep, to make roads in the sugar-bush.

The School staff numbers nineteen teachers, supervisors and counsellors, with five vocational helpers. Two of them left during the year, the shoemaker to join the army, and the blacksmith to work in a munition plant.

Horticultural Report.

Horticulture includes greenhouse and landscape work; and the care of the grounds. More than 2,300 annual bedding plants for the flower beds were attended to in winter, put in hotbeds in the spring and transplanted all around the property. In front of the Main Building alone, there were more than 1,000 flowers of fifteen different kinds. The grounds are fairly extensive and require considerable attention during the summer months. The lawn is cut once a week and the perennial hedge in front of the house, three times during the season. The lawn, flower-beds, and the flower stands have to be watered every day. In September, eight trees were cut in front of the School; this work occupied five boys a full week. During May, June, July and August four boys and their instructor devoted three hours a day to the care of the grounds and flowers.

Health Report.

Medical:—We are quite satisfied with the medical care given the School by Dr. J. R. Titley, who came regularly to the clinic once a month to examine or re-examine, every time, from thirty to forty boys.

Number of boys at the clinic	2,174
Medical Examinations	286
Pneumonia	3
Mumps	3
Surgical Treatments	6
Fractures	4
Rheumatism	2
Scrum Pox	6

Dental:—Dr. H. H. Kirby gave his services free to the lads of the Institution, and he was permitted to use the clinic for the benefit of the public, every Tuesday morning.

Examinations	286
Number of Extractions	136
Number of Fillings	127

Placement Officer's Report.

Our Placement Officer, Brother Urban, did a very good job this year, as usual, and this report, from him, is certainly a praise to his credit.

Boys receiving supervision at beginning of period	89
Boys discharged during period	81
Re-admitted	17
Released from guardianship	54
Placed in foster-homes	14
Placed on farms	14
Home to seek employment	26
Home to attend school	18
Transferred to other institutions	4
Former pupils enlisted	140
Boys under supervision at end of period	85
Number of visits to boys	411

BRO. JEROME,
Superintendent.

CHAIRMAN'S LETTER OF TRANSMITTAL

To His Honour

The Honourable Albert Matthews, LL.D.,

Lieutenant-Governor of Ontario

May It Please Your Honour:

The undersigned respectfully presents the Thirty-Sixth Annual Report of The Hydro-Electric Power Commission of Ontario for the fiscal year which ended October 31, 1943.

The record of the Commission's work presented in this Annual Report relates to three principal fields—the co-operative municipal field, the field of rural supply, and the northern Ontario field. The first two cover the Commission's activities on behalf of the co-operative systems, and the last relates to its trusteeship of the Northern Ontario Properties on behalf of the Province. Throughout the various sections of the Report dealing broadly with physical operation of the plants, constructional activities and financial statements, these fields of activity are clearly differentiated.

The Report also presents for the calendar year 1943 financial statements and statistical data relating to the municipal electric utilities operating in conjunction with the several co-operative systems for the supply of electrical service throughout the Province.

War Activities

After more than three years' spectacular growth in load, resulting from the change-over to war production and the construction of great new factories for the manufacture of munitions, and of equipment required for mechanized warfare, Ontario last winter attained close to its peak output of industrial production for war. The accomplishments of North American production of armaments, planes and ships, depends upon the adequacy of electrical service which has had to meet the pyramided demands of all these loads. The outcome of this struggle is being determined largely by the ability to produce mechanized equipment. Canada's ability to harness for this purpose large hydro-electric resources has proved an important factor.

The outstanding fact regarding Hydro service during 1943 is that notwithstanding increased difficulties, due to shortages both in labour and materials, the power demands for all war industries in Ontario were met and, except over a few peak-load periods, essential civilian power requirements suffered no shortage.

The mandatory and voluntary savings in the use of power were necessarily continued and were an important factor in enabling the Commission to handle effectively the increasing war demands. We look forward to the time when these restrictions can be lifted, but that time has not yet come. Production and still more production must characterize the efforts of the home front till final victory is gained.

Operating Conditions

The Commission now owns and operates forty-seven hydro-electric plants with an aggregate normal plant capacity of 1,630,000 horsepower. In addition it purchases 910,000 horsepower, thus putting to use in Ontario a total of 2,540,000 horsepower.

On the whole, climatic conditions affecting run-off were favourable. Precipitation and stream flow were greater than normal and speaking generally, adequate supplies of water for the forty-seven hydro-electric generating plants of the Commission were available.

The construction of the remedial weir on the Niagara river above the falls and higher levels of lake Erie had an appreciable effect in increasing the output of the Queenston generating station. Completion of the Ogoki diversion project in north-western Ontario ensured an adequate supply of water for the operation of the Nipigon river plants of the Thunder Bay system.

Generating stations were not seriously affected by ice during the winter of 1942-43. Only on two brief occasions was there appreciable loss of capacity due to ice runs.

The winter of 1942-43 was characterized by many severe snow and sleet storms. The most devastating of these occurred in the St. Lawrence district of eastern Ontario on December 29 to 31, 1942. It was the worst storm in this area in fifty years, crippling power and communication lines, paralyzing transportation of all kinds, and causing widespread property damage. Its severity may be judged by the fact that it was not until January 25 that Hydro service throughout the district was completely restored.

The exceptional demands made upon the 36-year-old Toronto Power plant during the war years, in part at least, were the cause of mechanical failures in several of the generating units during 1943. The long vertical steel shafts connecting the generator with the turbine failed on five units. These, however, are being repaired and most of the 70,000 horsepower temporarily out of commission was available to assist with the winter peak loads of 1943-44.

Load Conditions

During 1943 there was a much smaller growth in load. This is not surprising in view of the great growth previously recorded since the war started. Nevertheless, the demands for primary power were consistently higher throughout the year and averaged 1.5 per cent greater than in the previous year. All of this increase occurred in the Niagara, Georgian Bay and Eastern

Ontario systems of southern Ontario. In this area demands for primary power exceeded the average demand of the previous year by 2.3 per cent.

Due chiefly to curtailment of gold mining activities in northern Ontario, the output for primary power in the areas served by the Northern Ontario Properties was 3.6 per cent less than in the previous year.

The total energy output handled by the Commission from all sources in 1943 exceeded 11,730,000,000 kilowatt-hours being slightly above the record output of 11,674,000,000 kilowatt-hours of the previous year, and 55 per cent greater than the energy output of the pre-war year of 1938.

New Construction for Power Supplies

Three outstanding projects were completed during the year; the new plant at DeCew Falls, the Ogoki diversion project, and the transmission line to Steep Rock Lake.

On October 15, 1943 the new six million dollar plant at DeCew Falls with its single unit rated at 65,000 horsepower but developing under favourable conditions 71,000 horsepower, was officially opened by the Prime Minister, Colonel George A. Drew.

The new plant at DeCew Falls with its single unit develops more power than do the nine units in the nearby original plant constructed in 1898, and the power house is only one-third the size. Power is generated at 25 cycles to augment the supplies of the Niagara system. Owing to the fact that the total fall or head utilized at DeCew is only a little greater than that developed at the Abitibi Canyon plant in northern Ontario, it was feasible to transfer a spare turbine and generator from Abitibi to DeCew Falls. The use of this unit enabled the Commission to complete the development with the minimum interference to other wartime production.

The water required for the operation of this plant is provided by the increased diversion at Niagara resulting from the agreement with the United States respecting use of the additional inflow to lake Superior provided by the Ogoki and Long Lake diversion projects which divert water from the Albany river drainage basin one thousand miles away.

The Ogoki diversion project was completed and officially opened on July 20, 1943. Since that date the diverted flow has been gradually increased from an initial flow of 950 cubic feet per second to its designed average flow of 4,000 cubic feet per second. The Ogoki diversion will make possible the addition of 90,000 horsepower at developed and undeveloped sites on the Nipigon river, and the combined flows of the Ogoki river and Long Lake diversions will make available a total of 360,000 additional horsepower at various sites along the Great Lakes-St. Lawrence River waterway.

Great Iron Deposits Being Developed

The increased flow of the Nipigon river resulting from the Ogoki diversion enables the Commission to provide more effectively the power required to develop the iron deposits at Steep Rock lake. It also justifies the installation of a fourth unit of 20,000 horsepower at Alexander generating station, for which orders for equipment have been placed.

The responsibility for the fact that the Commission operates so widely in northern Ontario rests with the Province and not with the co-operating municipalities. It was, therefore, at the request of the Provincial Government that the Hydro Commission co-operated to ensure that ample supplies of power for these extensive operations would be available.

The diversion of the Seine river, which flowed into Steep Rock lake—a necessary preliminary to the pumping out of the lake—has put out of commission a power plant of 10,000 horsepower known as the Moose Lake plant

DISTRIBUTION OF PRIMARY AND SECONDARY POWER TO SYSTEMS

20-Minute Peak Horsepower—System Coincident Peaks

of the Ontario-Minnesota Pulp and Paper Co. It is to replace this power and to supply about 7,000 horsepower for the pumping and mining operations of the Steep Rock Iron Mines Ltd., that The Hydro-Electric Power Commission has constructed the new transmission line. The transmission line, completed in November 1943, extends 120 miles from a transformer station at Port Arthur to the Moose Lake plant of the Ontario-Minnesota Pulp and Paper Co. The Steep Rock Iron Mines is constructing the additional few miles of line required to distribute the power from this plant to the various points of use.

In constructing this line, power conductors were used from certain sections of the Niagara transmission networks that had decreased in importance as a result of the development of the Commission's eastern sources of power supply. The total cost of the transmission line, including the cost of switching and metering equipment and the adaptation of the two generators in the Moose lake plant for use as condensers, and of the step-up transformers for stepping down power for the Steep Rock Iron Mines, will be about $1,500,000.

If the iron ore deposits in extent and quality come up to the standard anticipated as a result of the scientific prospecting and drilling that has been done, the importance of these developments to Canadian economic life will unquestionably be far-reaching and of great importance.

The gross capital expenditures during the fiscal year were about eight and one-half million dollars.

Heavy War Loads Increase Maintenance Problems

The heavier loads being carried by the Commission's generating plants result in wear and tear that involves additional maintenance work. Due to shortage of skilled labour and supplies, only the more urgent work required to ensure maximum service is being carried out in these war years.

For the Georgian Bay system the reconstruction of No. 2 pipe line at Eugenia Falls development was completed. This is a wood-stave pipe, except the uppermost 540 feet which is of reinforced concrete. At the South Falls generating plant on the South Muskoka river the foundations of the wood-stave pipe were stabilized with heavy rock fill.

For the Eastern Ontario system the wood-stave pipe line at High Falls, Mississippi river was dismantled and is being replaced by a new wood-stave pipe. At Bark lake dam, Madawaska river, rip-rap and gravel were placed on the dam to raise it to uniform grade and designed elevation.

These were the chief maintenance items relating to hydraulic structures dealt with during the year, but many smaller matters received attention in the constant effort of the Commission to ensure continuing efficiency so essential to maximum production in war time.

Transmission and Distribution Problems

During the year additional equipment and extensions to lines were required on all systems. Among industries of recent additional growth may be cited the steel industry which, during the past year, installed additional electric furnaces for the manufacture of high grade alloy steel; the aircraft plants where some expansion took place, and the ship-building industry which manufactures the smaller vessels of war.

The total mileage of transmission circuits constructed in the year comprised 123 miles of 110 kv., 7.75 miles of 12 to 60 kv. and 40 miles of rural circuits.

Rural Electrical Service

During the latter part of 1941 and through 1942, following five years of intense activity when the mileage of rural primary lines was nearly doubled, construction of extensions to rural lines virtually came to a standstill except where required to serve certain war industries established in rural areas. However, on March 30, 1943, the Dominion Metals Controller issued an order releasing to some extent the rigid controls previously enforced and permitting service to farmers where the farmer could show definitely that by the use of electric service increased food production could be obtained. From May to October, 1943 more than 2,100 farm applications were approved by the Commission and a large proportion of these were actually being served at the end of the year.

At the end of 1943 the Commission was serving 136,000 rural customers including about 65,000 farms, over 20,100 miles of rural transmission lines.

Special Report to Ontario Legislature

At the 1943 session of the Legislative Assembly of Ontario a motion was passed requesting the Commission to examine the causes of differences in the cost of power supplied municipalities and rural power districts in Ontario; and to consider, in conjunction with partner municipalities concerned, ways and means of eliminating or reducing such differences. The Commission was also requested to consider the matter of service charges in connection with rural billing. In Appendix II of this Report the Commission's report to the Legislature respecting these matters is printed.

Amalgamation of Southern Ontario Systems

During the latter part of 1943 the Commission was intensively studying the amalgamation of the Niagara, Georgian Bay and Eastern Ontario co-operative systems. Physical inter-connection and the greater exchange of power resulting from co-ordinated operation in the interests of maximum production for war, had made it clear that the time was opportune for the full amalgamation of the southern Ontario systems. Similar amalgamations had been made previously in forming the Georgian Bay and Eastern Ontario systems. Since, however, the three enlarged systems had for many years functioned in their existing grouping and had become well established as separate entities, the problems of amalgamation were of greater significance and importance.

For this reason and because there was a strong active municipal organization representative of all co-operative systems, the Commission was able effectively to consult with and secure approval by the municipalities concerned. Actually these moves were not complete until February 1944, but as they were made retroactive to include the annual cost of power adjustment for the year 1943, and have been given effect to in the financial statements of the Commission herein presented (Section IX), it is necessary to refer to the matter in this Report. Except for Section IX the customary references to the three systems are presented under their respective headings, but in next year's Report the three systems will be amalgamated as the Southern Ontario system.

Uniform Service in Rural Ontario

Owing to its importance and to the fact that all the preliminary work in connection with it was done in 1943, reference is here made to the comprehensive revision made by the Commission, after consultation and with the consent of the Government, in connection with its rural electrical service.

The revised rural service was put into effect on January 1, 1944. It amalgamates into three rural power districts—one each for southern Ontario, for the Thunder Bay area, and for northern Ontario—all the areas formerly served by 120 rural power districts. It furthermore embodies for all areas served by these three rural power districts, a uniform rate structure with a common rate applicable to each class of rural service, and simplifies and revises the classification of consumers.

As this new set-up does not affect the 1943 records of service or rates to consumers, details are not given in this Report, but a full record of the first year's operation and the new rates will be given in next year's Report.

Other Activities

During the year promotion of the use of electricity was subordinated to war service. These activities included the campaign for conservation in the use of power for less essential purposes and for more efficient use by war industries. The workshops of the Commission continue to participate in the "Bits and Pieces" programme of the Dominion Government. Engineering assistance was given to a large number of industrial consumers and plant surveys, undertaken at the request of such industries, resulted in more efficient use of electrical service through the installation of power-factor corrective equipment, improved lighting, and in other ways. Many effective advertisements were issued in connection with the power conservation campaign.

The research laboratories of the Commission continue to give service to the Dominion Government in connection with investigation of materials for war purposes and in standardizing and testing such materials.

CAPITAL INVESTMENT

The total capital investment of The Hydro-Electric Power Commission of Ontario in power undertakings is $354,706,924.38 exclusive of government grants in respect of construction of rural power districts' lines ($19,580,575.94); and the investment of the municipalities in distributing systems and other assets is $132,316,073.87, making in power undertakings a total investment of $487,022,998.25.

The following statement shows the capital invested in the respective systems, properties and municipal undertakings, etc.:

Southern Ontario system (including Hamilton street railway)	$287,174,007.58
Thunder Bay system	20,012,642.61
Office and service buildings	3,702,425.32
Construction plant and inventories	3,132,267.91
Total capital investments in co-operative systems	$314,021,343.42
Northern Ontario Properties—Operated by H-E.P.C. on behalf of the Province of Ontario	40,488,593.97
Northern Ontario Properties—Construction plant and inventories	196,986.99
Total Commission capital investments	$354,706,924.38
Municipalities' distribution systems	102,272,852.40
Other assets of municipal Hydro utilities	30,043,221.47
Total	$487,022,998.25

RESERVES OF COMMISSION AND MUNICIPAL ELECTRICAL UTILITIES

The total reserves of the Commission and the municipal electric utilities for depreciation, contingencies, stabilization of rates, sinking fund and insurance purposes, amount to $313,824,873.44, made up as follows:

Southern Ontario system (including Hamilton street railway)	$161,267,904.23
Thunder Bay system	11,174,159.16
Office and service buildings and equipment	1,457,843.94
Total reserves in respect of co-operative systems' properties	$173,899,907.33
Northern Ontario Properties	16,247,669.18
Fire insurance reserve	111,862.93
Miscellaneous reserves	473,950.96
Employers' liability insurance, and staff pension reserves	9,869,649.79
Total reserves of the Commission	$200,603,040.19
Total reserves and surplus of municipal electric utilities	113,221,833.25
Total Commission and municipal reserves	$313,824,873.44

Financial Operating Results for 1943

The measures taken during 1942 to conserve power supplies for essential war purposes continued throughout 1943 to restrict revenues received from the supply of power to municipalities and rural power districts. However, the Southern Ontario system had about two per cent more revenue than in 1942 and the balance available for reserves is somewhat greater than that of last year. In the Thunder Bay system results were substantially unchanged from those in 1942. The Northern Ontario Properties notwithstanding continued decline in the revenue from the power supplied to goldmines, were able to make adequate provision for reserves.

REVENUE OF COMMISSION

The revenue of the Commission at interim rates from the municipal utilities operating under cost contracts, from customers in rural power districts and from other customers with whom—on behalf of the municipalities—the Commission has special contracts, all within the Southern Ontario and Thunder Bay systems, aggregated $49,517,905.28. The revenue of the Commission from customers served by the Northern Ontario Properties, which are held and operated in trust for the Province, was $4,834,377.88, making a total of $54,352,283.16.

Summarized operating results of these co-operative systems and rural power districts and of the Northern Ontario Properties, follow:

SUMMARIZED OPERATING RESULTS

OF THE

SOUTHERN ONTARIO SYSTEM—EMBRACING NIAGARA, GEORGIAN BAY AND EASTERN ONTARIO DIVISIONS—AND THE THUNDER BAY SYSTEM

Revenue: amount received from or billed against municipalities and other customers		$44,045,663.41	
Revenue from customers in rural power districts		5,472,241.87	
Total revenue, systems and rural			$49,517,905.28
Operation, maintenance, administration, interest and other current expenses		$32,391,032.14	
Provision for reserves—			
Renewals	$2,656,424.34		
Contingencies and obsolescence	8,349,049.68		
Stabilization of rates	1,783,429.13		
Sinking fund	3,129,283.90		
		15,918,187.05	
			48,309,219.19
Balance			$ 1,208,686.09

SUMMARIZED OPERATING RESULTS

OF THE

NORTHERN ONTARIO PROPERTIES

Held and operated by The Hydro-Electric Power Commission of Ontario
In trust for the Province of Ontario

Revenue: amount received from or billed against municipalities and other customers			$ 4,834,377.88
Operation, maintenance, administration, interest and other current expenses		$ 2,574,004.89	
Provision for reserves—

MUNICIPAL ELECTRIC UTILITIES

The following is a summary of the year's operation of the local electric utilities conducted by municipalitites receiving power under cost contracts with the Commission:

Total revenue collected by the municipal electric utilities		$41,124,145.84
Cost of power	$26,155,296.97	
Operation, maintenance and administration	6,597,785.98	
Interest	832,909.44	
Sinking fund and principal payments on debentures	1,851,918.33	
Depreciation and other reserves	3,773,937.58	
Total		39,211,848.30
Surplus		$ 1,912,297.54

With regard to the local Hydro utilities operating under cost contracts, the following statements summarize for each of the co-operative systems administered by the Commission, the financial status and the year's operations as detailed in Section X of the Report.

SOUTHERN ONTARIO SYSTEM

The total plant assets of the Southern Ontario system utilities amount to $98,084,326.12. The total assets, including an equity in the H-E.P.C. of $58,707,266.74 aggregate $185,172,105.08. The reserves and surplus accumulated in connection with the local utilities, exclusive of the equity in the H-E.P.C., amount to $108,083,610.43, an increase of $5,864,254.74 during the year 1943. The percentage of net debt to total assets is 9.9 a reduction of 2.0 per cent.

The total revenue of the municipal electric utilities served by this system was $39,994,581.73, a decrease of $664,454.24 as compared with the previous year. After meeting all expenses in respect of operation, including interest, setting up the standard depreciation reserve amounting to $2,822,424.90 and providing $1,845,887.55 for the retirement of instalment and sinking fund debentures, the total net surplus for the year for the municipal electric utilities served by the Southern Ontario system amounted to $1,767,449.09, as compared with $2,674,765.44 the previous year.

THUNDER BAY SYSTEM

The total plant assets of the Thunder Bay system utilities amount to $2,738,741.40. The total assets, including an equity in the H-E.P.C. of $3,324,406.39, aggregate $7,252,026.16. The reserves and surplus accumulated in connection with the local utilities, exclusive of the equity in H-E.P.C., amount to $3,567,363.17, an increase of $239,579.37 during the year 1943. The percentage of net debt to total assets is 6.5, a reduction of 0.6 per cent.

The total revenue of the municipal electric utilities served by this system was $1,129,564.11, an increase of $54,425.05 as compared with the previous year. After meeting all expenses in respect of operation, including interest, setting up the standard depreciation reserve amounting to $52,901.06 and providing $6,030.78 for the retirement of instalment and sinking fund debentures, the total net surplus for the year for the municipal electric utilities served by the Thunder Bay system amounted to $144,848.45, as compared with a net surplus of $111,248.49 for the previous year.

* * *

Excellent co-operation by local commissions and by officials of Hydro utilities again characterized the year's activities. The Press also was cooperative in its continued interest and support. Finally I desire to acknowledge once again the faithful and efficient service given by the Commission's staff.

Respectfully submitted,

T. H. Hogg,

Chairman

TORONTO, ONTARIO, MARCH 31, 1944.

T. H. HOGG, ESQ., B.A.Sc., C.E., D.ENG.,

Chairman, The Hydro-Electric Power Commission of Ontario,
Toronto, Ontario.

Sir:

I have the honour to submit, herewith, the Thirty-Sixth Annual Report of The Hydro-Electric Power Commission of Ontario for the fiscal year which ended October 31, 1943. This report covers the operations of the Commission with regard to the supply of power to, or on behalf of, the partner Municipalities of the Co-operative Systems, as well as the administration of the Northern Ontario Properties, which are held and operated by the Commission in trust for the Province of Ontario.

I have the honour to be, Sir,

Your obedient servant,

OSBORNE MITCHELL,
Secretary

THIRTY-SIXTH ANNUAL REPORT

OF

The Hydro-Electric Power Commission of Ontario

FOREWORD

and

Guide to the Report

THE Hydro-Electric Power Commission of Ontario administers a co-operative municipal-ownership enterprise, supplying power throughout the Province of Ontario. The Commission was created in 1906 by special act of the Legislature and followed investigations by advisory commissions appointed as a result of public agitation to conserve the water powers of Ontario as a valuable asset of the people and to provide a more satisfactory supply of low-cost power in southern Ontario. In 1907 the Power Commission Act (7-Edward VII Ch. 19) was passed amplifying and extending the Act of 1906, and this Act—modified by numerous amending acts which now form part of the Revised Statutes of Ontario, 1937, Chap. 62, and subsequent amending Acts—constitutes the authority under which the Commission operates.

The Hydro-Electric Power Commission of Ontario consists of a Chairman and two Commissioners, all of whom are appointed by the Lieutenant-Governor-in-Council to hold office during pleasure. One of the Commissioners must be a member of the Executive Council and two may be members.

In 1909, work was commenced on a comprehensive transmission system and by the end of 1910 power was being supplied to several municipalities.

The Commission has now been supplying electrical energy for more than thirty-three years and the Report contains diagrams depicting the growth of the enterprise. During this period the costs of electricity to the consumer have been substantially reduced and the finances of the enterprise have been established on a secure foundation.

At the end of 1943 the Commission was serving 903 municipalities in Ontario. This number included 26 cities, 105 towns, 305 villages and police villages and 467 townships. With the exception of 14 suburban sections of townships known as "voted areas", the townships and 121 of the smaller villages were, during 1943, served as parts of 120 rural power districts.

From January 1, 1944, all rural power districts in southern Ontario, in the Thunder Bay area, and in northern Ontario respectively have been combined to form three rural power districts, but throughout the whole of the Province served by these three rural power districts there is a uniform rate structure with a common rate applicable to each class of rural service.

Financial Features of Co-operative Systems

The basic principle governing the financial operations of the undertaking is, that electrical service be given by the Commission to the municipalities and by the municipalities to the ultimate consumers at cost. Cost includes not only all operating and maintenance charges, interest on capital investment and reserve for renewals or depreciation, for obsolescence and contingencies, and for stabilization of rates, but also a reserve for sinking fund or capital payments on debentures.

The undertaking from its inception has been entirely self-supporting and no contributions have been made from general taxes except in connection with service in rural power districts. In this case, the Province, in pursuance of its long established policy of assisting agriculture and with the approval of the urban citizens, assists extension of rural electrical service by a grant-in-aid of the capital cost and in other ways as specified and detailed in the Report.

As the principle of "service at cost" is radically different from that obtaining in private organizations, where profit is the governing feature, it naturally results in different and in some ways unique administrative features.

The undertaking as a whole involves two distinct phases of operations as follows:

The *First* phase of operations is the provision of the electrical power—either by generation or purchase—and its transformation, transmission and delivery in *wholesale* quantities to individual municipal utilities, to large industrial consumers, and to rural power districts. This phase of the operations is performed by The Hydro-Electric Power Commission of Ontario as trustee for the municipalities acting collectively in groups or "systems", and the financial statements relating to these collective activities of the municipalities are presented in Section IX of the Report. Each system of municipalities, as provided in *The Power Commission Act*, forms an independent financial unit and the accounts are therefore segregated and separately presented for each system. In order, however, that there may be a comprehensive presentation of the co-operative activities of the undertaking as a whole, there are presented, in addition, for the two main systems and miscellaneous co-operative activities, a balance sheet of assets and liabilities, a statement of cost distributions, a tabulation of fixed assets, and summary combined statements respecting the various reserves.

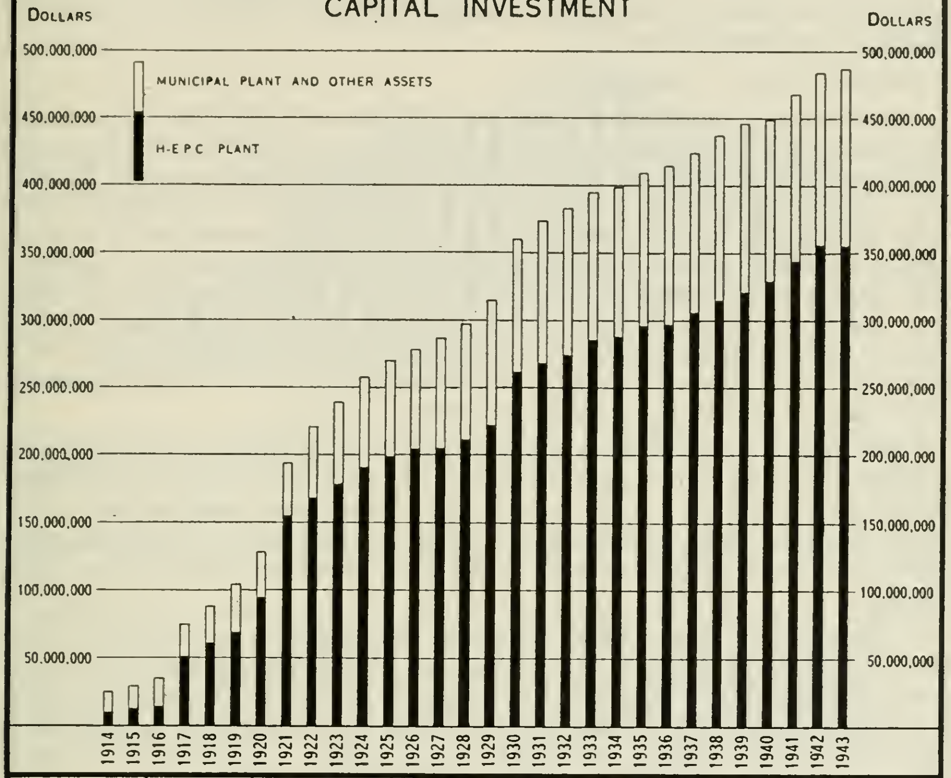
The *Second* phase of operations is the *retail* distribution of electrical energy to consumers, within the limits of the areas served by the various municipal utilities and throughout the rural power districts. In the case of the consolidated rural power districts The Hydro-Electric Power Commission not only provides the power at wholesale, but also—on behalf of the respective individual townships—attends to all physical and financial operations connected with the distribution of energy at retail to the consumers within the rural power districts. Summary financial statements relating to the rural power districts are presented in Section IX of the Report, and a general report on their operation is given in Section IV.

In the case of cities, towns, many villages and certain thickly populated areas of townships, retail distribution of electrical energy provided by the Commission is in general conducted by individual local municipal utility commissions under the general supervision of The Hydro-Electric Power Commission of Ontario. The balance sheets, operating reports and statistical data relating to the individual urban electrical utilities are presented in Section X of the Report.

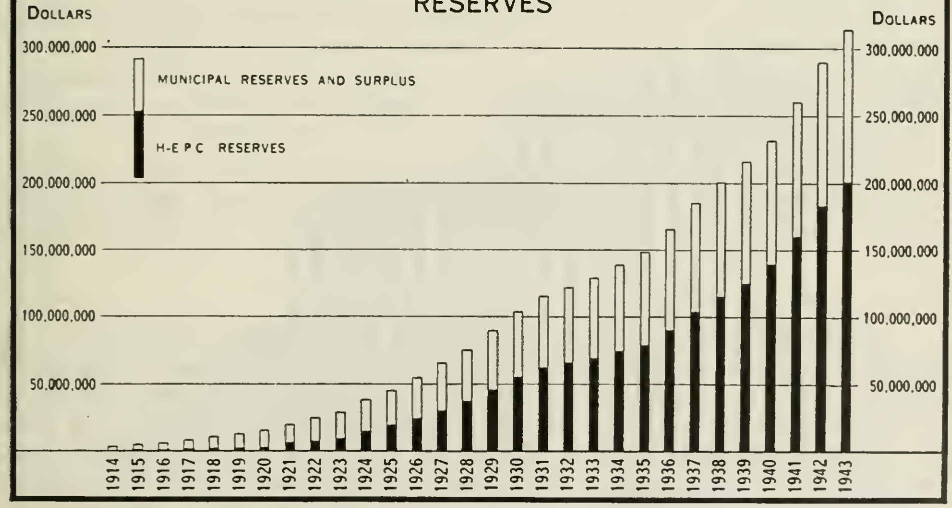
THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

THIRTY YEARS RECORD — ALL SYSTEMS

CAPITAL INVESTMENT



RESERVES



For the Northern Ontario Properties held and operated by the Commission in trust for the Province there are also presented in Section IX financial statements including a balance sheet, an operating account, and statements respecting reserves and capital expenditures.

Further details respecting administration and explanations of the financial tables presented in the Report are given in the introductions to sections IX and X on pages 93 and 171.

Co-operative Systems Operating

From time to time in accordance with provisions in *The Power Commission Act* various groups of municipalities have been co-ordinated to form systems for the purpose of obtaining power supplies from convenient sources. In some cases these small systems grew until their transmission lines interlocked with those of adjacent systems and it proved beneficial to consolidate the transmission networks and the financial and administrative features. Early in 1944 the three systems serving southern Ontario, the Niagara, Georgian Bay and Eastern Ontario systems, were amalgamated to form the Southern Ontario system and financially the amalgamation was made retroactive to apply to the fiscal year 1942-3. The three former systems are now known as *divisions* of the Southern Ontario systems.

The Niagara division embraces municipalities in all the territory between Niagara Falls, Hamilton and Toronto on the east and Windsor, Sarnia and Goderich on the west. It is served with 25-cycle power supplies from plants on the Niagara river, supplemented with power transmitted from generating plants on the Ottawa river and with power purchased from Quebec companies.

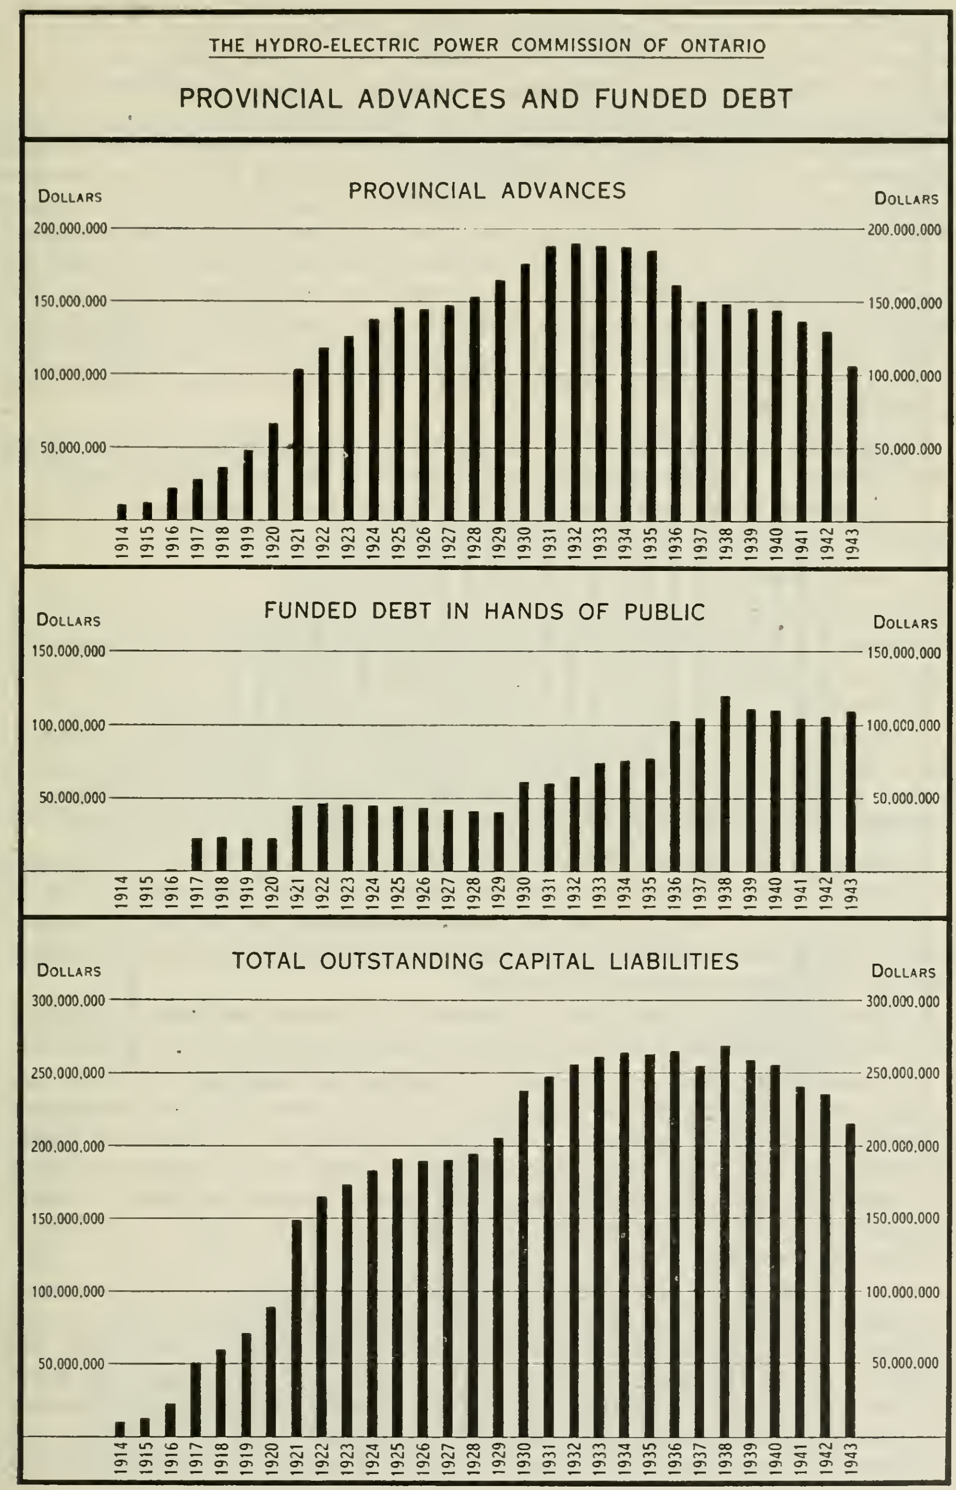
The Georgian Bay division comprises municipalities in that part of the Province which surrounds the southern end of Georgian Bay and lies to the north of the territory served by the Niagara division. It includes the districts surrounding lake Simcoe and extends as far north as Huntsville in the Lake of Bays district and south to Port Perry. Its power supplies, 60 cycles, are derived chiefly from local water power developments.

The Eastern Ontario division serves all of Ontario east of the areas comprising the Georgian Bay and the Niagara divisions. It includes the districts of Central Ontario, St. Lawrence, Rideau, Ottawa and Madawaska; formerly separate systems. Its power supplies, 60 cycles, are from local developments supplemented by purchases from other sources.

The Thunder Bay System comprises the cities of Port Arthur and Fort William, adjacent rural sections, the village of Nipigon, and the mining district of Longlac. Two developments on the Nipigon river supply 60-cycle power.

Northern Ontario Properties

In addition to its operations on behalf of the partner municipalities, the Commission, under an agreement with the Province, holds and operates the Northern Ontario Properties in trust for the Province. For the purposes of financial administration these properties are treated as one unit. The principal areas in the vast territory of northern Ontario at present receiving service are the *Abitibi District* comprising the territory served by 25-cycle power from the Abitibi Canyon development, together with a small area in



THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

PROVINCIAL ADVANCES AND FUNDED DEBT

PROVINCIAL ADVANCES

FUNDED DEBT IN HANDS OF PUBLIC

TOTAL OUTSTANDING CAPITAL LIABILITIES

the southern portion of the district of Sudbury in which mining properties are served with 60-cycle power; the *Sudbury District* comprising the city of Sudbury and the adjoining mining area known as Sudbury Basin; the *Nipissing District* centering around the city of North Bay on the shore of lake Nipissing; the *Patricia District* comprising the territory within transmission distance from the Ear Falls development at the outlet of lac Seul on the English river including the Red Lake mining area, and the territory immediately north of lake St. Joseph in the territorial district of Patricia served with power from a development at Rat Rapids on the Albany river; and the Rainy River district which derives its power from the Thunder Bay system. Included in the Northern Ontario Properties are rural districts on Manitoulin island, and others adjacent to the communities served in the various districts of northern Ontario. Power supplies are 60 cycles except from Abitibi canyon development.

The geographic boundaries of the various systems and districts are shown on the maps of transmission lines and stations at the back of the Report.

The power supplies for the systems and Northern Ontario districts are listed in the first table of Section II of the Report on pages 8 and 9.

The Annual Report

The table of contents, pages xix and xx lists the matters dealt with in the Report. At the end of the Report there is a comprehensive index. To those not conversant with the Commission's Reports, the following notes will be useful.

In Section II, pages 7 to 32, dealing with the operations of the systems, are a number of diagrams showing graphically the monthly loads on the several systems and districts. Tables are also presented showing the amounts of power taken by the various municipalities during the past two years.

The rural distribution work of the Commission has proved of widespread interest and special reference to this is made in Section IV on pages 39 to 53.

In Sections VI and VII will be found information respecting progress of work on new power developments and on transmission system extensions, together with photographic illustrations.

About one-half of the Report is devoted to financial and other statistical data which are presented in two sections IX and X already referred to above.

Frequent enquiries for the rates for service to consumers are received by the Commission. For the urban municipalities served by the Commission these are given in Statement "E" starting on page 316. For the rural power districts they are given in a table starting on page 48. Certain statistical data resulting from the application of the rates in urban utilities are given in Statement "D". This statement is prefaced by a special introduction starting on page 296.

In its Annual Reports the Commission aims to present a comprehensive statement respecting the activities of the whole undertaking under its administration. Explanatory statements are suitably placed throughout the Report. The Commission receives many letters asking for general information respecting its activities, as well as requests for specific information concerning certain phases of its operations. In most cases the enquiries can satisfactorily be answered by simply directing attention to information presented in the Annual Report.

SECTION I

LEGAL

AT the 1943 Session of the Legislative Assembly of the Province of Ontario four Acts respecting The Hydro-Electric Power Commission of Ontario were passed. The said Acts are reproduced in full in Appendix I of this Report. The short titles of the Acts are as follows:

The Ottawa River Water Powers Act, 1943, Chapter 21.

The Power Commission Amendment Act, 1943, Chapter 22.

The Power Commission Insurance Amendment Act, 1943, Chapter 23

The Steep Rock Iron Ore Development Act, 1943, Chapter 29.

The agreements between The Hydro-Electric Power Commission of Ontario and municipalities, persons and corporations mentioned in the list hereunder given were approved by Orders-in-Council.

RIGHT-OF-WAY AND PROPERTY

WITH the war effort of Ontario approaching its peak there was a falling off in the number of new property purchases and easement rights acquired, as compared with recent years. But resulting from the abnormal conditions previously obtaining a large number of rights remained for settlement in 1943.

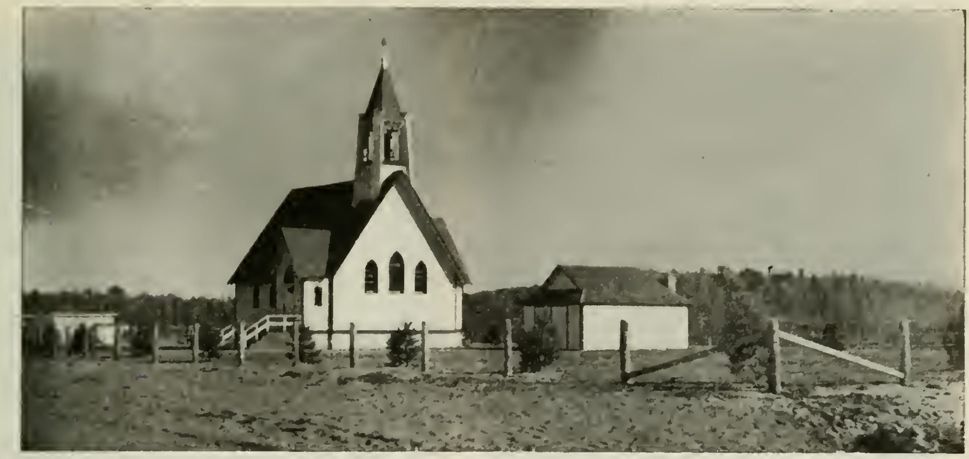
Niagara System

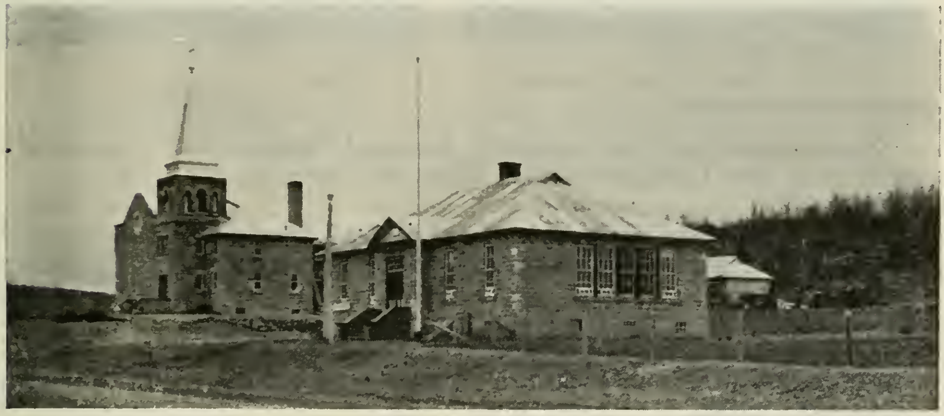
Acquisition of fee in rights-of-way and easement rights continued and in some cases was practically completed on the following transmission lines: Beaudet to Burlington transformer station, Atlas Steels Limited to Crowland transformer station, DeCew Falls transformer station to St. John's Valley junction, St. Thomas transformer station to Essex transformer station, Cooksville transformer station to York transformer station.

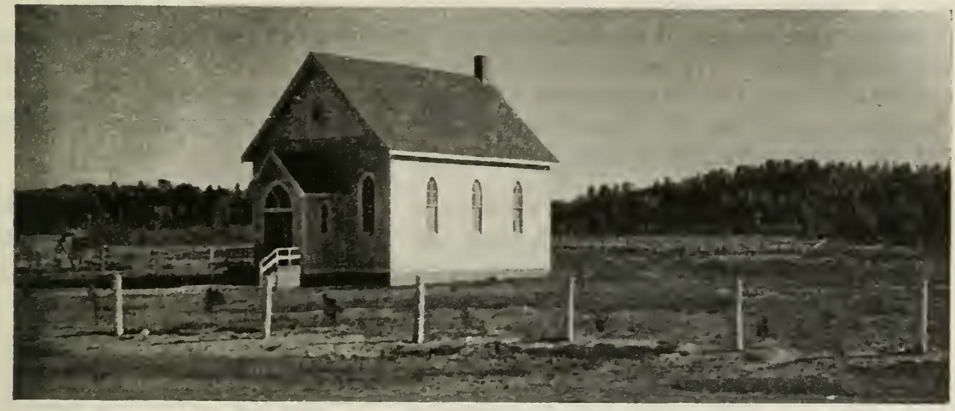
Renewal of easement rights, maturing in 1939, necessitated some purchases in fee, but in the main the old agreements were replaced by easements in perpetuity. The original steel-tower transmission line has been covered, together with other wood-pole lines where rights expire in the period 1939-1944.

Land purchases and agreements to clear both sides of the Welland river from Hog island to Montrose have been concluded in accordance with the needs of the Department of National Defence.

In connection with the new development at DeCew Falls, agreement was reached with the Department of Transport for a defined limit between its properties and the Commission's properties from the Allanburg intake to Marlatt's pond, township of Thorold. It was also necessary to purchase land and rights for disposal of material where Twelve Mile creek was deepened and throughout the waterway from the tailrace to Port Dalhousie.







BARRETT CHUTE DEVELOPMENT—MADAWASKA RIVER

Public buildings moved from area to be flooded to new site one mile distant (a) Anglican Church moved intact (b) Separate School and Roman Catholic Church taken down and rebuilt (c) United Church moved intact

Some claims on the Ogoki and Long lake diversions were settled.

Permanent rights were acquired for a patrol road paralleling the Gatineau tower lines from Fitzroy township to the village of Madoc.

Some rural offices were acquired and reconditioned for Commission occupancy.

Sales of excess Commission land have continued with reduction of carrying charges.

Georgian Bay System

Renewals of expiring wood-pole easements and many tree trimming rights were secured.

The Baysville dam site at the outlet of Lake of Bays was acquired.

Rights for a road from Severn Falls station to Big Chute generating station were negotiated.

Eastern Ontario System

Negotiations with the Canadian National Railways for acquisition of right-of-way from Colborne to Port Hope were initiated.

Transmission line rights, involving renewals and in some instances the purchase of fee, were procured for the following lines: Arnprior to Galetta, Heely Falls to Peterborough, Trenton to Oshawa, Peterborough to Lindsay arsenal, Cornwall to Farran's Point distributing station.

Additional property was purchased to provide for expansion of Frontenac transformer station.

A number of damage claims involving in some instances purchase of property were settled in connection with the Barrett Chute development and Bark lake storage. A number of parcels of land adjacent to Kamaniskeg lake associated with the Madawaska development were purchased. The work involved in moving the town site of Madawaska was practically completed. See accompanying illustrations.

Flooding, resulting from the creation of storage reservoirs affected roads in many municipalities. For the most part the lands affected were not of high value but their flooding involved negotiations for the closing of many road allowances and the opening of others in lieu thereof.

A large amount of work was caused by the inter-provincial agreement respecting the Carillon power site on the lower Ottawa river. A permanent base line was established and monumented for reference of all properties affected.

Certain properties were procured to protect the Commission's possible requirements in any development at Des Joachims on the Ottawa river.

ONTARIO QUEBEC BOUNDARY MONUMENT

Erected at Pointe Fortune 1860

BARRETT CHUTE DEVELOPMENT

Typical boundary post in rock lots 18-19 con. 1, Brougham Twp.

Thunder Bay System

Purchases of right-of-way from Port Arthur transformer station to William Street junction were completed.

Right-of-way requirements for transmission line from William Street junction to Great Lakes Pulp and Paper Company station, Fort William, were completed.

Additional easement rights were procured from Cameron Falls generating station to Port Arthur transformer station.

Northern Ontario Properties

Permanent roadway rights were procured to obtain access to the storage reservoirs of the Nipissing district.

Right-of-way requirements for the new transmission line from Port Arthur to the Steep Rock Iron Mines involved purchases of fee through Port Arthur, easement rights and licenses of occupation extending over a distance of 125 miles.

Surveys

Surveys were completed of all properties acquired and 142 standard monuments were placed. New and renewal easements were surveyed where registration was required.

Work included surveys relating to:

Niagara System

DeCew Falls development.

Agreed upon boundary between properties of the Department of Transport and of the Commission—Allanburg to Marlatt's pond, Thorold township.

Purchases of additional width of right-of-way, Cooksville transformer station to York transformer station.

Renewal of pole line easements.

Location of boundaries for fencing of owned properties where required throughout the Province.

Georgian Bay System

Road from Severn Falls to Big Chute.
Baysville dam.
Renewal of pole line easements.

Eastern Ontario System

Hurd Lake dam.
Oshawa transformer station.
Mud lake (Barrett Chute)
Kamaniskeg lake.
Des Joachims power site.
Frontenac transformer station.
Tweed rural office site.
Transmission line, Ranney Falls to Peterborough.

Thunder Bay System

Transmission line, Port Arthur transformer station to William Street junction to Great Lakes Pulp and Paper Company, Fort William.

Cameron Falls generating station to Port Arthur transformer station.

Northern Ontario Properties

Transmission line from Port Arthur, Rainy River switching station to Moose Lake switching station supplying Steep Rock Iron Mines, including sites for patrolmen's dwellings.

General

Assessments and tax bills from 313 municipalities were certified and where necessary, appeals were entered against assessments not in accordance with the provisions of The Power Commission Act.

The Commission's extensive property holdings have been substantially increased by additional properties acquired during recent years.

Owned rights-of-way and other lands were leased wherever possible for agricultural, industrial or residential use; all residential properties were well maintained. Revenue from leased properties amounted to $118,134.

In all 1,381 documents were recorded during the year. Property purchased comprised 1,508 acres; property sold 518 acres.

SECTION II

OPERATION OF THE SYSTEMS

PRACTICALLY no trouble was experienced from ice conditions during the winter of 1942-43 in the operation of the Commission's generating stations. During the latter part of the year, the output of a number of the units at the Toronto Power plant was lost by failure of the long vertical steel shafts connecting the generators with the turbines. As a result, the available output of the Toronto Power plant had, by the end of October, been reduced some 70,000 horsepower.

The winter of 1942-43 witnessed many severe snow and sleet storms; the most devastating of these occurred in eastern Ontario on December 29-31, 1942. It was the worst storm in this area in fifty years, crippling power and communication lines, paralyzing transportation of all kinds, and causing great property damage. It was not until January 25 that the Commission completely restored all Hydro service which the storm had disrupted. Electrical storms caused many isolated disturbances and some damage to property, particularly in one instance on the Niagara system when the Preston transformer station building and equipment suffered severe damage by an explosion, indirectly due to lightning.

Water conditions throughout the year averaged above normal on most watersheds. The construction of the remedial weir on the Niagara river above the falls and higher elevations of lake Erie have had an appreciable effect in increasing the output of the Queenston generating station. Completion of the Ogoki diversion project in north-western Ontario has ensured an adequate supply of water for the operation of the Nipigon river plants of the Thunder Bay system. Part of the increased diversion that has been obtained on the Niagara river since the outbreak of war resulted from this added inflow from the upper waters of the Ogoki river.

Parallel Operation of the Systems

It is important to record that throughout the year parallel operation of the Niagara and Eastern Ontario power resources and of the Niagara and Georgian Bay power resources was maintained through the frequency-changer equipment at Chats Falls and at Hanover respectively. Thus, so far as their physical operation is concerned the power resources of southern Ontario have virtually been pooled. Complete integration will be secured when

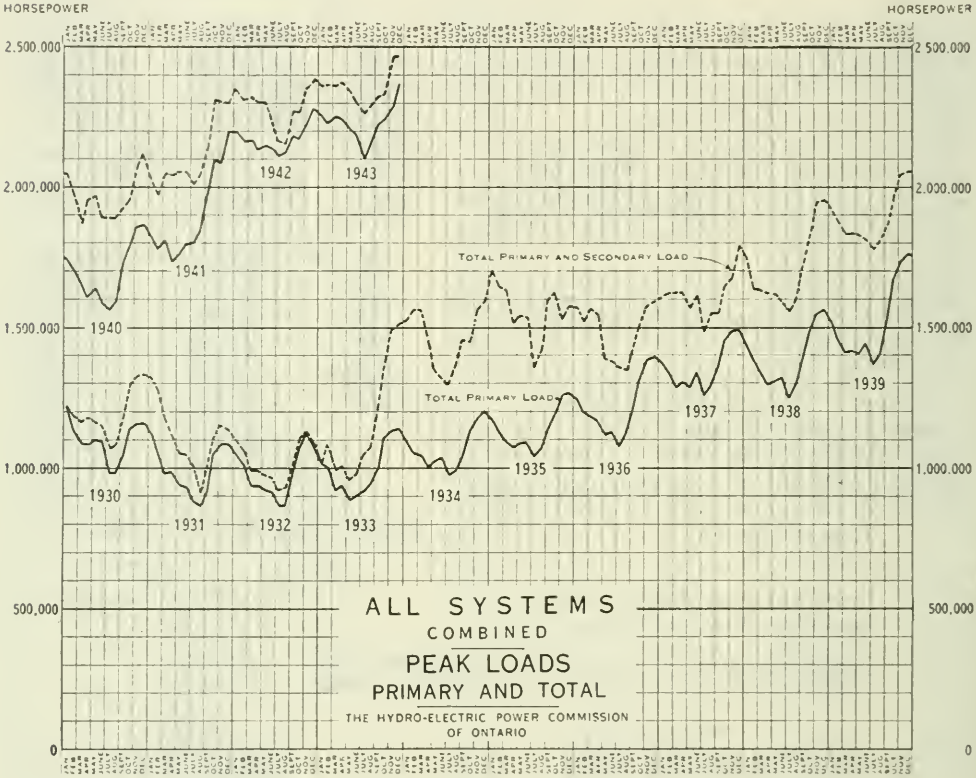
CAUTION: The figures for "Maximum normal plant capacity" reflect the capacity of the various plants under the most favourable operating conditions which can reasonably be considered as normal, taking into consideration turbine capacity as well as generator capacity, and also the net operating head and available water supply.

Owing, among other things, to changes in generating equipment due to wear and tear or the replacement of parts, also to changes in limitations governing water levels and effective net heads, the maximum normal plant capacity is not a fixed quantity but is one which must be revised from time to time.

It is particularly important to bear in mind that the column headed "Maximum normal plant capacity" cannot be taken as an indication of the dependable capacity of the various plants: in some cases it is, but in many cases it is not. Chief among the factors which govern the maximum dependable capacity of an hydraulic power plant and which are not reflected in column headed "Maximum normal plant capacity" are abnormal variations in water supply and operating limitations encountered when plants are so situated on a given stream as to be affected by one another.

additional 60-cycle tie-lines are provided between the Georgian Bay and Eastern Ontario systems, with some additional equipment for the exchange of power between 60-cycle and 25-cycle areas.*



Load Conditions. November 1, 1942, to October 31, 1943

The aggregate peak load supplied by the Commission occurred in the winter of 1942-43 and was 2,383,923 horsepower. This was 34,100 horsepower above the previous winter's peak. Notwithstanding the restrictive measures which have been in force since September 1942 in the use of power for non-essential purposes, the aggregate primary peak load for all systems and the Northern Ontario Properties exceeded all previous records, reaching a maximum in December of 2,275,183 horsepower. Compared with the corresponding peak of 2,202,612 horsepower of the previous winter it shows an increase of 3.3 per cent.

---

*Early in 1944 the Niagara, Georgian Bay and Eastern Ontario systems were amalgamated to form the Southern Ontario system. For further details consult the statement on page xi of the Chairman's letter of transmittal.

The total energy output during the year was 11,780,477,667 kilowatt-hours. It exceeded the previous year's record output by about 1.0 per cent. Energy output for primary power purposes also exceeded all previous records, rising from 10,689,922,448 kilowatt-hours in the previous year to 10,852,987,547 kilowatt-hours, an increase of 1.5 per cent.

The small increase in primary load over the previous year reflects in part the effect of mandatory restrictions and the appeal for voluntary curtailment in the use of power, but it also reflects the fact that during the winter of 1942-43 Ontario attained close to its peak output of industrial production for war. The restrictive measures, which commenced in the fall of 1942 and were continued through the current year, made possible, except on a few rare occasions, an uninterrupted supply of power to all war industries in the power shortage area of southern Ontario. Without these measures, war production would have been seriously retarded. In the areas served by the Northern Ontario Properties, where a power shortage did not exist, the average output for primary power purposes receded 3.6 per cent from the previous year's average. This was due chiefly to curtailment in gold mining activities.

Details regarding the peak loads of each of the co-operative systems and of the several districts of the Northern Ontario Properties are given in the load curves in this section of the Report.

NIAGARA SYSTEM

During the year, the monthly primary peak loads of the Niagara system* averaged 3.4 per cent higher than in the previous year.

The total energy output on the Niagara system for primary and secondary power was 2.0 per cent greater than in the previous year. The output of energy classed as primary was about 93.0 per cent of the total energy and exceeded the corresponding output in the previous year by 1.5 per cent.

Under wartime regulations, 50,500 cubic feet of water per second has been available for the generation of power on the Canadian side of the Niagara river throughout the year. This diversion was sufficient to operate all of the Commission's generating stations on the Niagara river at full rated capacity twenty-four hours per day, until the DeCew Falls 25-cycle development came into service in October 1943. The construction of the remedial weir on the Niagara river above the falls, commenced in the previous year, together with the rising levels of lake Erie, had an appreciable effect in increasing the output of the Queenston generating station. During September and October 1943, the output of the Toronto Power plant was considerably reduced by the failure of the long vertical steel shafts on five of the units.

Comparatively little trouble was experienced from ice conditions at the generating stations during the winter. Only on two occasions was there an appreciable loss of capacity and then only for short periods when ice entered the intakes of the Ontario Power and Toronto Power plants.

---

*Now Niagara division, Southern Ontario system, see footnote on page 10.

Normal operating conditions existed at Chats Falls throughout the year and the natural flow of the Ottawa river was about average. Except during the spring run-off, maximum use was made of the river flow in the operation of the Chats Falls plant.

The DeCew Falls 66⅔-cycle generating station operated continuously throughout the year and with the 4,950 horsepower purchased from the Department of Transport, which was arranged for in the previous year, met all the power demands of the Dominion Power and Transmission division of the Niagara system. On February 6, 1943, the frequency changer set at Niagara Falls, which•had failed on August 28 of the previous year, was returned to service and was available throughout the remainder of the year for the transfer of surplus energy from the 66⅔-cycle Dominion Power and Transmission division to the 25-cycle system, where a market existed for off-peak power.

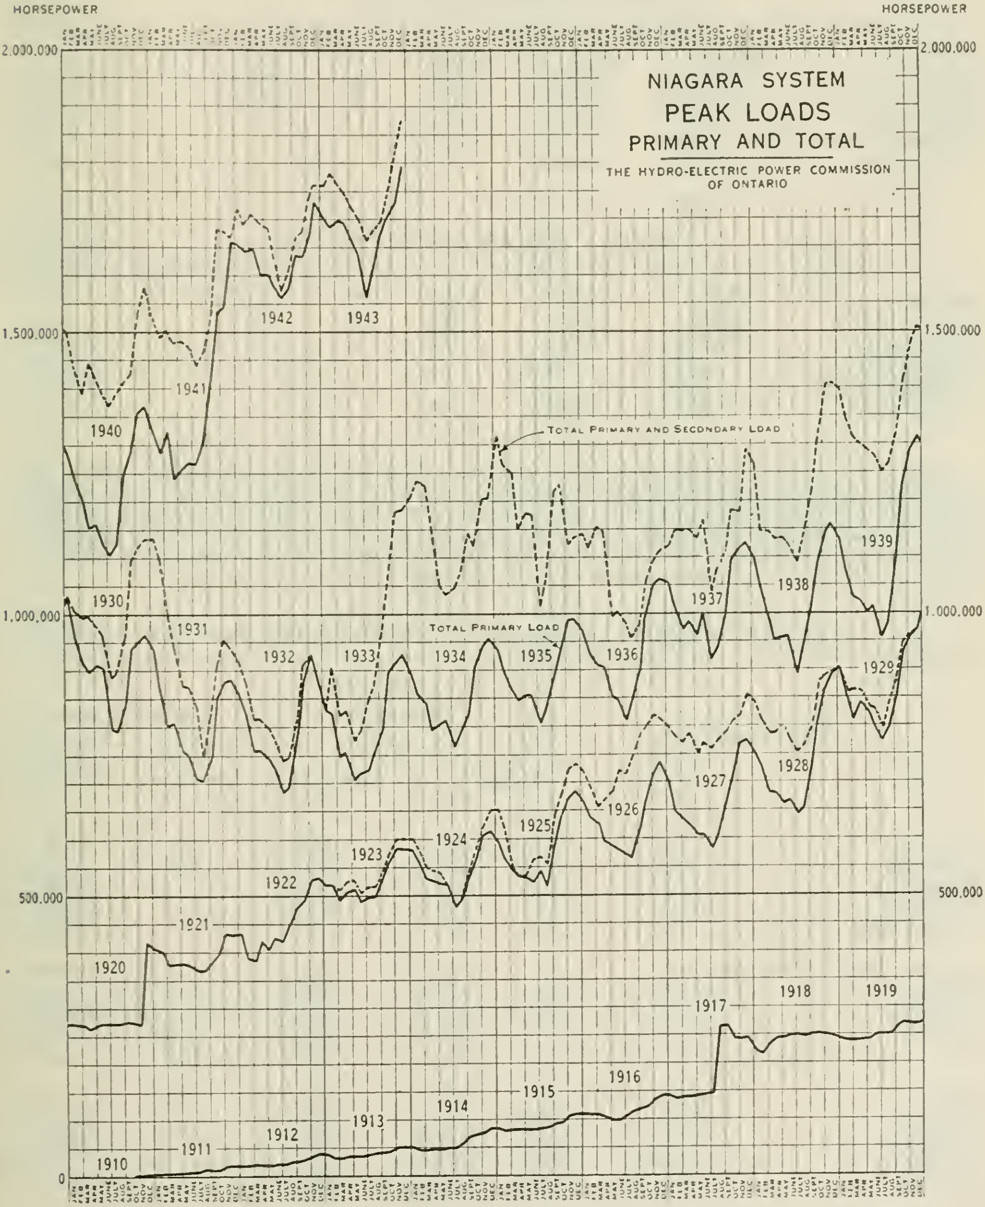
The 65,000-horsepower unit of the newly constructed DeCew Falls 25-cycle development was first tested out on actual load conditions at 5:17½ p.m., September 29, 1943. The unit continued intermittently on test runs until October 15 when the new plant was officially opened and placed in continuous commercial service.

All purchased power supply available to the Niagara system was used to the greatest possible extent. A portion of the Quebec delivery was cut off at intervals over several days when lines failed as the result of the severe sleet and snow storms in eastern Ontario, which commenced on December 29, 1942. During the year, 30,184,500 kilowatt-hours were resold to the Beauharnois Light, Heat and Power Company for the use of the Aluminum Company of Canada.

Resources of the Niagara and Eastern Ontario systems were operated in parallel throughout the year. On January 11, 1943, a 25-cycle transformer bank of 47,100-kva capacity was placed in service at Chats Falls generating station, which permitted greater and more flexible interchange of power through the frequency-changer set. Parallel operation with the Georgian Bay system was also maintained throughout the year through the Hanover frequency changer station, supplying shortages on the latter system over peak-load periods and the Niagara system absorbing such surplus power as was available on the Georgian Bay system during off-peak periods.

Although the winter of 1942-43 witnessed an unusual number of severe snow and sleet storms, there were no extensive interruptions to customers served over the Niagara system's lines as a result of these storms. Electrical storms were the cause of many isolated disturbances and some damage to property, particularly in one instance when the Preston transformer-station building and equipment suffered severe damage by an explosion, indirectly due to lightning.

To meet local load conditions, the transformer capacity of three high-tension stations was increased during the year: Crowland transformer station from 75,000 to 100,000 kva; Burlington transformer station from 150,000 to 225,000 kva and Hamilton Gage transformer station from 50,000 to 75,000 kva. As a war measure, a 6,000-kva transformer bank was placed in service at the Steel Company of Canada in Hamilton to provide a further channel for disposing of surplus off-peak power from the Dominion Power and Transmission division of the Niagara system.



SUMMATION OF PEAK LOADS IN HORSEPOWER AS SUPPLIED TO URBAN MUNICIPAL UTILITIES AND TO RURAL POWER DISTRICTS, SHOWING TREND OF POWER DEMANDS 1942-1943

System	Total of peak loads in horsepower		Net increase in horsepower	Number of utilities with			Total
	July to Dec. 1942	July to Dec. 1943		Decreases	Increases	No change	
URBAN MUNICIPALITIES							
Niagara	975,124	1,023,308	48,184	55	124	2	181
Georgian Bay	36,367	37,713	1,346	19	41	4	64
Eastern Ontario	127,448	135,585	8,137	14	46	....	60
Thunder Bay	40,732	42,604	1,872	1	4	....	5
Northern Ontario Properties	15,951	16,664	713	9	6	1	16
RURAL POWER DISTRICTS							
Niagara	72,561	77,763	5,202	13	51	....	64
Georgian Bay	12,208	12,771	563	3	19	....	22
Eastern Ontario	17,696	18,162	466	11	15	1	27
Thunder Bay	714	724	10	....	1	1	2
Northern Ontario Properties	2,242	2,690	448	1	4	....	5

NOTE: The yearly peak demands of the individual municipal Hydro utilities and also of the rural power districts do not all occur during the same month of the year nor, for any given municipality or rural power district, do they always occur in the same month in successive years; in nearly all cases however the yearly peak occurs during the second half of the calendar year. For this reason a comparison of the peaks occurring during the second half of the year as shown in the tables of this Section shows most satisfactorily the general trend of the local loads.

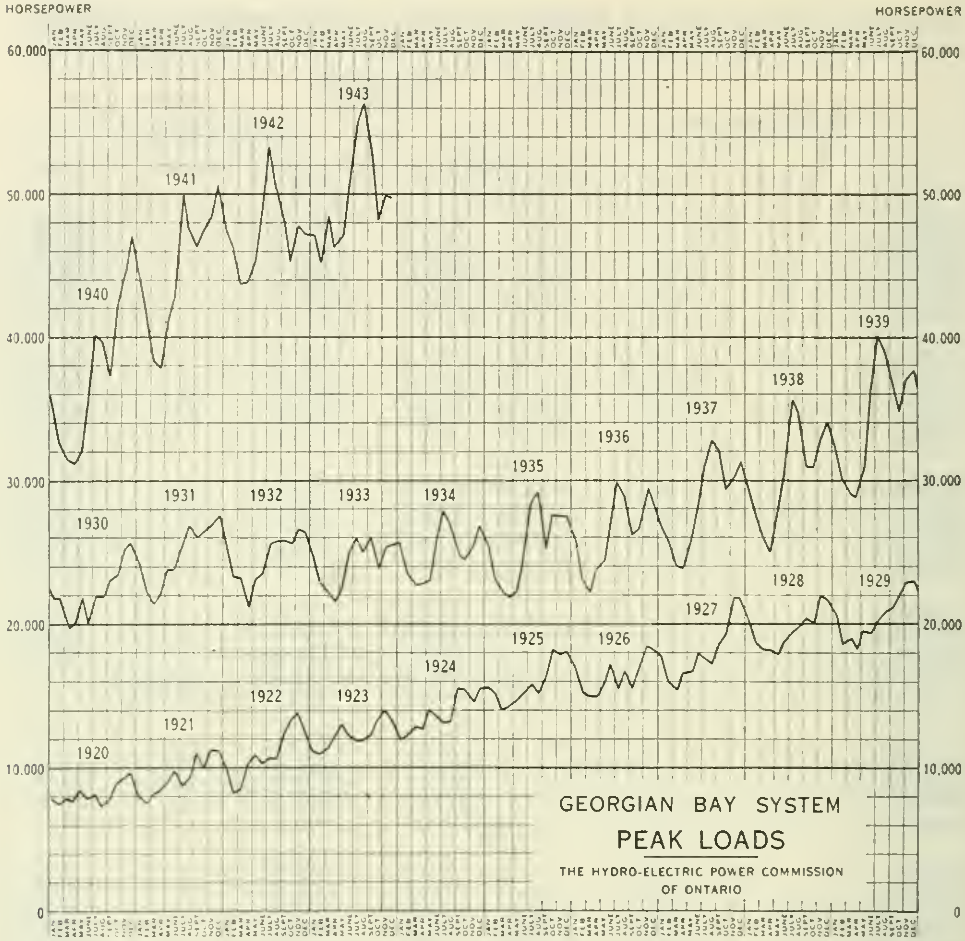
GEORGIAN BAY SYSTEM

The primary load of the Georgian Bay system occurred in the summer, which is the normal peak period of this system, and was 56,295 horsepower. It exceeded the peak of the previous summer by 5.7 per cent. The total energy output used for primary load during the year was 4.0 per cent greater.

Water storage and river flow on the Georgian Bay system was considerably above normal during the greater part of the year. The energy



output of the generating stations on this system exceeded that of the previous year by 14.0 per cent.

The Hanover frequency-changer station, the connecting link between the Georgian Bay and Niagara systems, was in constant operation throughout the year. The Georgian Bay system required assistance over the peak periods of most days and also energy assistance during late summer and early fall months when river flows were at their usual low point. From November 9, 1942, to the middle of June, 1943, approximately 17,500,000 kilowatt-hours of surplus energy was generated on this system at off-peak periods. Except for a small amount supplied to a war industry, this surplus was absorbed by the Niagara system.*

Assistance was given to the Orillia Water, Light and Power Commission over many of their peak-load periods, chiefly during the summer and fall months of 1943.

There were no serious failures of equipment during the year and service in general was well maintained throughout the Georgian Bay system.

EASTERN ONTARIO SYSTEM

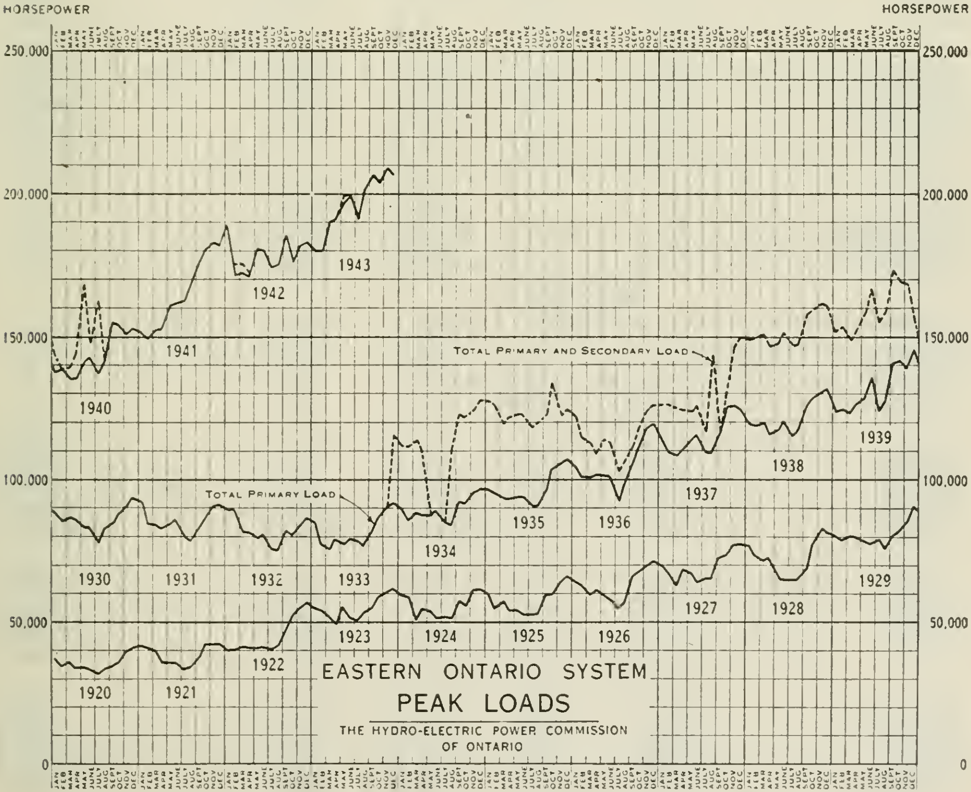
Although restrictive measures in the use of power were in force on the Eastern Ontario system throughout the year, the primary peak load of 206,452 horsepower, which occurred in September 1943, exceeded all previous records and that of the previous year by 10.9 per cent. The total energy output used for primary load was 10.2 per cent greater.

The Eastern Ontario system has been operated in parallel with the Niagara system throughout the year, thus permitting the continuous interchange of power to the mutual advantage of both systems. During the summer and early fall months, when river flows were low and it was desirable to conserve storage on the Eastern Ontario system, some 37,000,000 kilowatt-hours were supplied from the Niagara system. At other times the Eastern Ontario system had a surplus of approximately 146,000,000 kilowatt-hours which was supplied to Niagara system customers. Thus river flow and storage facilities of the Eastern Ontario system were utilized in a manner which most benefitted the load requirements of southern Ontario as a whole.*

Stream flow conditions on the rivers in the Eastern Ontario system averaged above normal. Compared with the previous year the generating stations on the Trent Valley watershed produced about five per cent more energy and the output of Barrett Chute plant was above normal expectations.

---

*See footnote on page 10



Under a program of water conservation, the Eastern Ontario system endeavored to absorb such surplus energy as was available from purchase-power sources. During the year, the energy thus purchased totalled about 8,500,000 kilowatt-hours.

Ice conditions at the generating stations were not particularly troublesome during the winter and there was no extensive reduction in capacity from this cause. The paralyzing sleet storm of December 29, 1942, was the cause of much damage to transmission lines and resulted in many extended service interruptions in the eastern portion of the system. Unfavorable weather and transportation conditions which followed the sleet storm, made repairs, which were mostly of a temporary nature, difficult. The permanent repairs, which have progressed as occasions permitted, were not fully completed at the end of the fiscal year.

THUNDER BAY SYSTEM

The primary demand of the Thunder Bay system reached a maximum in December 1942 of 108,552 horsepower. This was practically the same as the previous year's peak. The energy output for primary load was also the same as in the previous year.

By the completion of the Ogoki diversion project in July, some 4,000 c.f.s. was added to the former inflow to lake Nipigon. During the year outflow has been regulated to maintain approximate constant level of lake Nipigon and has enabled the generation of 98,144,140 kilowatt-hours in excess of the primary load demands of the Thunder Bay system. This surplus power was supplied to the electric boilers at the paper companies. From about May 15 to September 15, a flow of some 700 cubic feet of water per second was used to drive pulp wood past the generating stations.

Arrangements were continued in 1943 enabling the paper companies under the control of the Abitibi Power and Paper Company to transfer power for electric steam boiler operation from the generating station of the Kaministiquia Power Company, a subsidiary of the Abitibi Power and Paper Company, through the Commission's transformers and over the Commission's transmission circuits. During the year, 13,413,760 kilowatt-hours were thus transferred to the paper companies which, with the surplus energy available at the Cameron Falls and Alexander generating stations, produced a total of 111,557,900 kilowatt-hours for electric boiler operation.

At the close of the year changes in the location of the 110,000-volt lines at Port Arthur transformer station were completed, preparatory to the delivery of power to Steep Rock and Ontario-Minnesota Pulp and Paper Company.

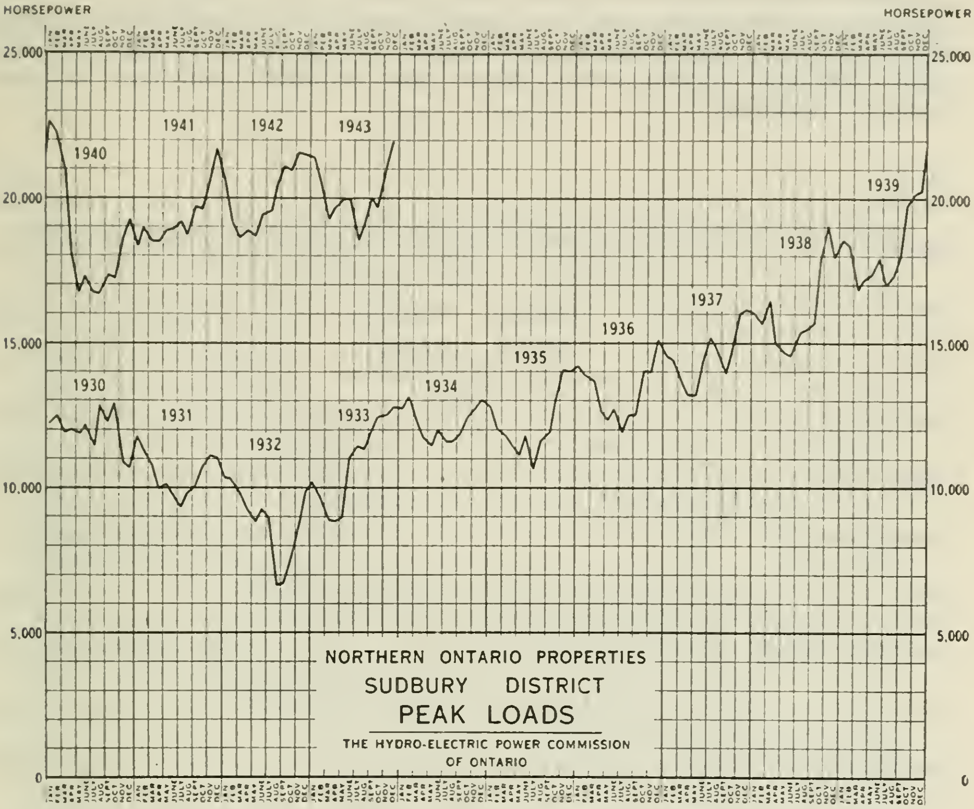
NORTHERN ONTARIO PROPERTIES

Abitibi District

During the year the demands for primary power in the Abitibi district were slightly lower than in the previous year. Both peak demands and the year's energy output for primary load receded about 2.5 per cent. The demands for the refining of nickel were greater but this increase was more than offset by the reduction in the power requirements of the gold mines.

River flow and water storage conditions, while being subnormal this year, permitted the generation of some 134,000,000 kilowatt-hours in excess of the primary load. This excess energy, which was delivered to the electric boilers at the paper mills of the Abitibi Power and Paper Company, represents about 13.0 per cent of the year's output of the Canyon plant.

Operation of the Canyon generating station, all transmission lines and transformer stations, was in general satisfactory throughout the year. The dismantling of No. 3 unit at the Canyon generating station and its shipment to the new 25-cycle development at DeCew Falls, was completed early in the year.



Sudbury District

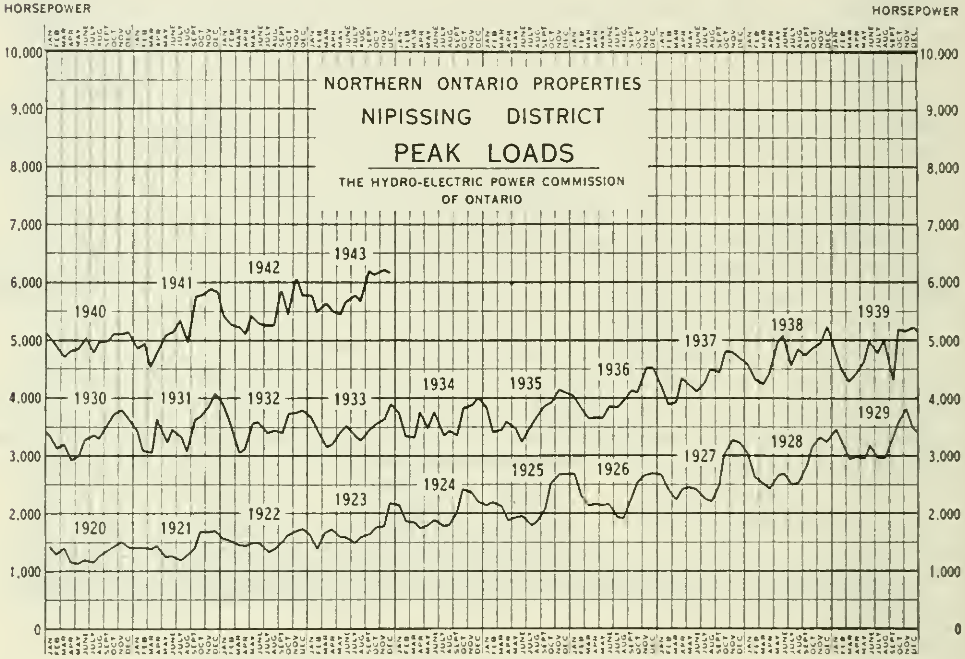
The primary peak and the year's energy demands in the Sudbury district were practically the same as in the previous year. No secondary or surplus energy was distributed in this district.

Water conditions were about normal in the Sudbury district throughout the year. The purchase of power from the Abitibi Power and Paper Company, under arrangements made in the summer of 1942, was discontinued at the end of March 1943. This purchase was a measure taken to conserve water storage in anticipation of an increase in the Sudbury district load.

Nipissing District

Both the Nipissing district peak load and year's energy requirements exceeded that of the previous year by a little more than five per cent.

Water conditions in this district have been above normal but as has been the case in recent years, the water supply has not been sufficient to satisfy the district load requirements. During the current year the shortage was some 5,000,000 kilowatt-hours, which was supplied from the Sudbury district's resources.



Manitoulin District

Throughout the year the operation of the Manitoulin district was normal and load changes from the previous year were insignificant.

Patricia District

Further recession in gold mining activities has resulted in reduced loads compared with the previous year. The Patricia district peak and year's energy demands were both about 25 per cent smaller.

Operation of the district was normal throughout the year except that after June 25, the Rat Rapids generating station was operated intermittently because of staff reduction.

MISCELLANEOUS

Forestry

The Forestry division continued its regular transmission and rural line clearing operations to protect the Commission's plant and service from tree interference.

The year's maintenance operations involved treatment of 84,590 trees and 910 pole spans of underbrush spread over 3,029 miles of power transmission, telephone and rural distribution lines.

Line clearing operations were performed for seventeen municipal Hydro systems in the Niagara, Georgian Bay and Eastern Ontario systems. This work involved treatment of 7,213 trees spread over 103 miles of local primary and secondary lines. These figures show an increase in the number of municipalities served and volume of work performed.

SECTION III

MUNICIPAL WORK

THE Commission acts in an advisory capacity to the municipalities with which it has contracts, and assists municipal officials to purchase, construct or extend distribution systems. As provided under The Power Commission Act, all rate adjustments are approved by the Commission, therefore, a study of the operating conditions of all utilities is made annually and adjustments recommended.

In rural power districts, the Commission, on behalf of the township corporations, operates the rural power systems and distributes electrical energy to the customers of the respective corporations in all such rural power districts. Consult Section IV of Report.

NIAGARA SYSTEM*

The expansion of the Commission's facilities, which was undertaken in 1941 and 1942, has been largely completed and towards the end of the year the DeCew Falls generating plant of 65,000 horsepower capacity, came into operation. This added capacity was made available to supply increased demands for war industries.

Load conditions on this system did not maintain the phenomenal rate of growth which occurred in 1941 and 1942, but power for war industries did increase to such an extent that the Commission's generating and purchased-power capacity was completely used.

During the year, the controls instituted by the Dominion Power Controller were maintained, with the result that a large block of power, formerly used by commercial-lighting customers and to some extent by domestic consumers, who voluntarily curtailed their use of energy, was made available for war industries.

The total average load sold to all customers, including war industries, was approximately the same as in 1942. Loads in urban municipalities indicated a small decrease and in rural power districts a small increase. However, the amount delivered by the Commission directly to war industries was increased.

---

*Consult in Chairman's Introduction references to amalgamation of southern Ontario systems.

Engineering Assistance to Municipalities

General engineering assistance was given to nearly all municipalities of the Niagara system respecting the operation and management of their local Hydro utilities.

Certain municipalities received special engineering advice and assistance respecting matters which are more fully referred to below:

Aylmer—Due to the proposed widening of the eastern portion of the main street, plans are under way to remove the poles and wires and run them in the lanes at the rear.

Aurora—The ratepayers recorded an affirmation vote at the municipal elections, to Aurora becoming a Hydro municipality and receiving power from the Commission at cost.

Baden—An additional power bank of three 50-kv-a transformers was installed to provide for an increased power load.

Beachville—Changes to the distribution system were made in order to improve the service and also to serve to better advantage the new larger substation of an industrial power customer.

Bolton—An increased supply of power was delivered to two manufacturers of war supplies.

Brantford—To serve increased war loads, the Brantford Commission found it necessary to increase substation capacity to the extent of one 3,000-kv-a transformer.

Chatham—Some of the oldest lines of the local distribution system were rebuilt with thirty-five foot western cedar, butt-treated poles and larger copper conductors.

Exeter—A building on the main street has been purchased and is being remodelled to provide adequate accommodation for the Utility.

Galt—The installation of high-frequency equipment for the control, during peak periods, of the flat-rate water-heater load was completed.

Hamilton—During the year the city annexed a portion of the township of Saltfleet in which approximately 1,100 rural consumers were served. The lines and equipment serving these customers were purchased and incorporated with the distribution network of the Hamilton Hydro-Electric Commission.

Ingersoll—Static condensers were installed by two large war industries in order to save line and step-down transformer capactities.

Oakville—Estimates were made in connection with supplying 25-cycle power to a company for the manufacture of material for the armed services. Work on this project is expected to proceed early in the coming year.

St. Catharines—The city supplied increased load to several concerns working on war orders.

Wallaceburg—Plans have been made to serve a large canning company, which anticipates an initial load of 400 kilowats and an ultimate load of about 1,200 kilowatts. This load may be supplied by an extension of the local distribution system at 4,000 volts, or an alternative proposal contemplates a second station to supply the large industrial loads in the southern portion of the municipality.

Windsor—A new substation at Wyandotte and Crawford streets—6,000-kv-a. capacity, with provision for an additional capacity of 3,000 kv-a.—was placed in operation. The load taken up by this substation was in the residential area formerly supplied from the substation at Erie and McDougall streets.

GEORGIAN BAY SYSTEM

In 1943 this system embraced sixty-four urban municipalities and twenty-two rural power districts. The trend of the local loads is indicated by the fact that increases in the peak load were recorded in forty-one urban municipalities and in all but three of the rural power districts.

Power for the Georgian Bay system is supplied from twelve hydro-electric generating plants and a frequency-changer station through which 25-cycle power is obtained from the Niagara system and transformed to 60-cycle power for the Georgian Bay system.

The maximum dependable generating plant capacity inclusive of the frequency-changer is 58,250 horsepower. No increased capacity was added during 1943 and no additional transmission lines were constructed. The transformer stations at Meaford and Thornton were enlarged to provide for increased loads.

The aggregate average load supplied by the Commission to the cost contract municipalities comprised in this system was 32.299 horsepower, an increase of 1.3 per cent. It is of interest to note that due to the large summer resort load throughout the area served by the Georgian Bay system the maximum peak load for this system usually occurs in the summer with a smaller peak about the month of December.

There was a substantial increase in the load supplied to war industries in 1943.

Engineering Assistance to Municipalities

General engineering assistance was given to all urban municipalities of the system respecting the operation and management of their local hydro utilities.

EASTERN ONTARIO SYSTEM

In 1943 this system embraced sixty urban municipalities and twenty-seven rural power districts. The trend of the local loads is indicated by the fact that increases in the peak load were recorded in forty-six urban municipalities and in fifteen of the rural power districts.

The aggregate increase was substantial notwithstanding the fact that the Dominion Power Controller's restrictions continued in effect throughout the year and the establishment of new industries is closely controlled.

The Barrett Chute power development with its rated capacity of 54,000 horsepower and the additional storage provided by the Bark Lake dam, both of which were provided in 1942, enabled the Commission to carry the increased loads and supply power on occasions to the Niagara system. No important changes were made during 1943 to the capacity of the Commission's lines and local transformer stations which had been adequately strengthened during the previous year.

At the end of December 1942 one of the worst ice storms in the Commission's history occurred in an area extending approximately from Brockville to Cornwall and north to the Quebec boundary including the Ottawa area. Transmission lines and rural distribution systems were torn down by the weight of the ice and much damage was done. Some towns and parts of rural districts were without power for more than a month. Large gangs of men and trucks were brought in from many parts of the Province in order to effect repairs as soon as possible.

Engineering Assistance to Municipalities

Engineering assistance was given to municipalities in connection with the operation and management of their local hydro utilities. Certain municipalities received special advice and assistance regarding matters referred to below.

Kingston—The Public Utilities Commission has completed a new substation to serve the growing load in the west end of the city. This station has at present one 3-phase, 3,000-kv-a transformer, with provision for adding another of the same size.

Oshawa—New power feeders are planned to provide duplicate service to all major industries in the southern part of the city. These changes will improve voltage conditions and provide stability of service. The purchase of the local transformer station is also being considered by the Oshawa Commission.

THUNDER BAY SYSTEM

The Thunder Bay system comprises the cities of Fort William and Port Arthur, a voted area in Nipigon township and two rural power districts.

As contrasted with the cooperative systems in southern Ontario a much larger proportion of the service supplied by the Thunder Bay system is utilized by large industries including the pulp and paper industry and the grain trade, and in gold mining areas where mines and their associated townsites are supplied.

In 1943 all industrial loads were affected by war conditions. The grain movement and gold mining operations were somewhat curtailed but the pulp and paper industry, although also affected by war conditions, somewhat increased its power demands. The municipal loads were increased substantially.

The two major events which affected the Thunder Bay system in 1943 were the completion and placing in operation of the Ogoki diversion and the development of the Steep Rock iron mine. This mine is served through the newly created Rainy River district of the Northern Ontario Properties and its total power requirements will be purchased from the Thunder Bay system and supplied by the Nipigon River developments.

The additional flow on the Nipigon river obtained as a result of the Ogoki diversion will enable power plants on that river to operate at close continuous capacity output. This condition is very advantageous for supplying the high load factor loads characteristic of the pulp and paper and mining industries, the demands for which as above noted predominate on this sytem.

Engineering Assistance to Municipalities

Engineering assistance concerning local operating and management problems was given to the Port Arthur, Fort William and Nipigon village commissions, and all the operating mines in the district were visited periodically for the purpose of rendering assistance in power supply problems.

NORTHERN ONTARIO PROPERTIES

During 1943 a new district to be known as the Rainy River district was added to the Abitibi, Sudbury, Nipissing and Patricia districts constituting the Northern Ontario Properties which the Commission administers in trust for the Province.

Power for the four districts is supplied from ten hydro-electric generating plants having a combined maximum normal plant capacity of 288,300 horsepower. Power for the Rainy River district is supplied by the Thunder Bay system. For Manitoulin rural power district, which also forms part of the Northern Ontario Properties, power is purchased from a local source.

During 1943 the Northern Ontario Properties served sixteen municipalities and five rural power districts; increases in municipal peak loads were recorded in six, those in Sudbury and North Bay being 3.2 and 10.2 per cent respectively. Four of the five rural power districts recorded substantial increases. The chief customers in the districts of northern Ontario are, of course, the mining companies. At the end of 1943 there were 32 mines receiving Hydro service, a reduction of 5 from 1942. The aggregate average load for all districts for the year was 196.577 horsepower, a decrease of 2.8 per cent. The decrease was chiefly in the gold mines; demands of the mines whose main product is war metals again increased.

The newly formed Rainy River district includes the territory adjacent to the transmission line constructed to supply the Steep Rock iron mines. Contracts were executed with Steep Rock Iron Mines Limited, The Ontario-Minnesota Pulp and Paper Company Limited and Seine River Improvement Company to provide power for development work at the mine and later for operation; also for supplying replacement power to The Ontario-Minnesota Pulp and Paper Company which was needed because of the closing down of the company's Moose Lake generating plant to permit the diversion of Seine river and the pumping out of Steep Rock lake.

Conditions in the Manitoulin rural power district remained much the same as in the previous year. The average load was 464 horsepower.

Engineering assistance concerning power supply and management problems were given to all the cities and towns in the area served by the Northern Ontario Properties and all of the mining properties under contract for power supply by the Commission were visited by the Commission's engineers for similar purposes.

SECTION IV

RURAL ELECTRICAL SERVICE

IN ONTARIO

BECAUSE of the continued necessity for conserving construction materials for war purposes the Commission during 1943 was unable to undertake large rural extensions. Near the end of the year 1941, most rural construction closed down except where service was required in connection with war industries. On March 30, 1943, the Metals Controller for Canada, released material for the construction of short lines up to 600 feet of circuit to serve primary producers of foodstuffs, where electrical service would increase the production of foodstuffs in short supply, or prevent the serious diminution of such production. On October 28, 1943, the permissible extension was increased from 600 to 1,000 feet of circuit.

The land area of the Province of Ontario extends over a vast territory of 363,282 square miles, of which about 35,700 square miles are occupied for agriculture. The total rural population in the area served by The Hydro-Electric Power Commission, or in adjacent areas within transmission distance of the Commission's power supply, is approximately 1,100,000.

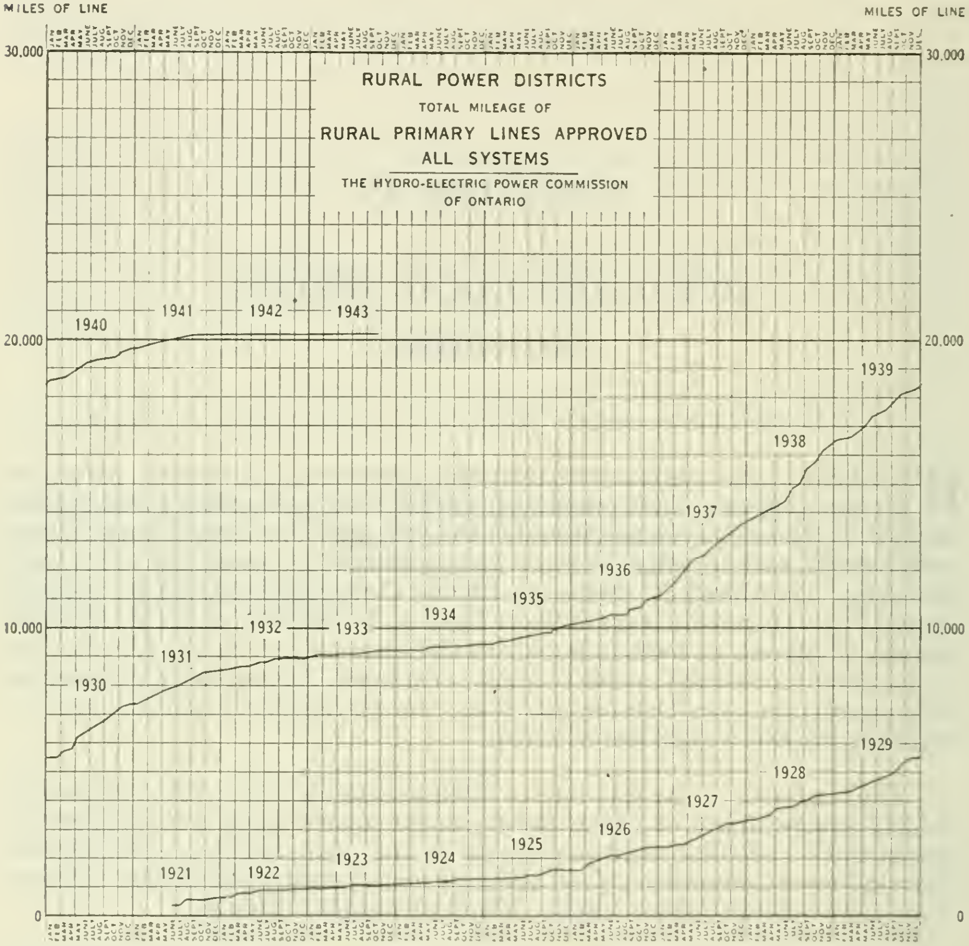
In 1943 there were 120 operating rural power districts, and power was delivered to approximately 136,341 rural consumers, comprising farms and dwellings in various groups. The consumers are situated in 434 organized townships; 23 unorganized townships and 121 police villages, villages and small towns and are served over a network of rural primary lines which aggregate 20,119 miles. In addition to the 457 townships served by rural power districts, 10 townships are served jointly by rural power districts and voted areas.

During the past year the mileage of rural-line extensions, approved for construction in rural power districts in Ontario, was 45. The total number of consumers added after allowance for cancellations was 2,025. During the year 1,092 rural consumers were annexed by an urban municipality.

The average aggregate peak load* supplied to all rural Hydro consumers, including war industries in rural areas in the Province, amounted to 88,186

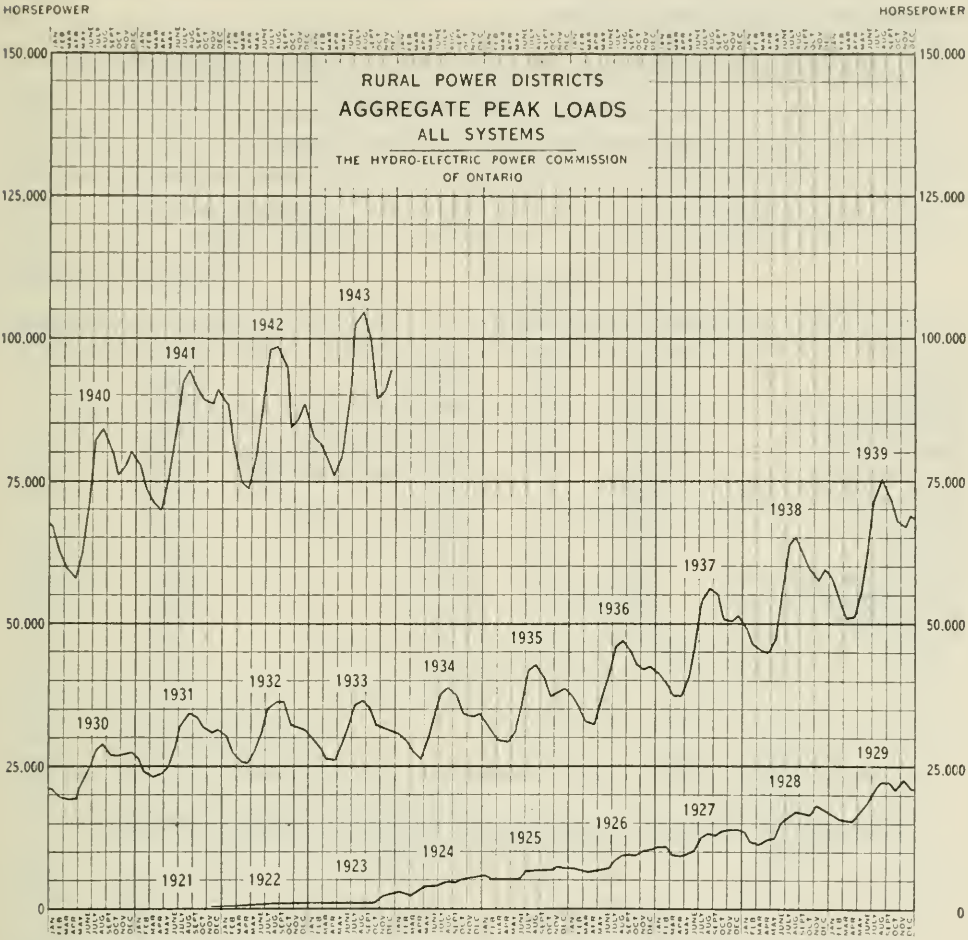
---

*Average aggregate peak load is the summation of the twelve monthly peak loads for each and all rural power districts, divided by twelve.



horsepower, an increase of 1.9 per cent over 1942. The delivery of power was reduced during the winter months, due to restrictions imposed by the Dominion Power Controller, and to voluntary economies by consumers.

Census data indicate that there are approximately 200,000 farms in Ontario, varying from one acre to six hundred acres, or larger. It would be erroneous, however, to conclude that hydro-electric service will eventually extend to such a number of farms. Approximately ten per cent of these are very small, and service to them, if available, is supplied by the Commission under rates applicable to non-farm classes. There are also large numbers of farms jointly owned and tenanted, some having no residential buildings on them, and there are also a large number situated in remote districts out of reach of Hydro lines and stations.



During the period that the regulations respecting service to rural consumers required a minimum of three farm contracts per mile of primary line, the Commission made surveys in various parts of the Province and estimated that approximately 75,000 standard or large farms would comprise the probable ultimate total of farms that could be served on this basis. Since that time new regulations have been made permitting service on the basis of two farms per mile, which necessarily has increased the number of additional farms that may be served.

Due to war conditions and regulations, the construction of rural primary lines during the coming year will be limited to war industries or to primary food producers for increase in foodstuffs, which are in short supply, all of which are regulated by Dominion Metals Controller.

Recent estimates of the major electrical appliances used in rural districts are set out in the following table:

ELECTRICAL APPLIANCES IN USE AMONG FARM CONSUMERS IN RURAL POWER DISTRICTS

Data for all systems for the year 1942

On the farm			In the farm home		
Item	Number of appliances	Percentage of saturation	Item	Number of appliances	Percentage of saturation

Standard Number of Consumers per Mile

Effective May 1, 1938, the Commission received authority by Order-in-Council to construct rural primary lines on a basis of two farms per mile under existing rates. This new basis does not include service to summer cottages, which remains on the previous basis of contracts equivalent to three farms per mile. The standard number of consumers required per mile varies according to the class of service rendered. For this purpose a unit rating is allocated to each class of consumer. A total of ten units per mile made up by various classes of consumers is required before construction work is undertaken.

Note: As previously indicated, no construction is being undertaken except to or because of war industries or for increased production of foodstuffs.

The following table shows the number of units for each class of service:

Class of Consumer	Service	Units per class applicable to number per mile—May 1, 1938			
		A—Regular rural consumers		B—Summer cottage consumers	
		Units per contract	Contracts per mile	Units per contract	Contracts per mile
1B	Hamlet lighting..................	2.25	4.4	1.5	6.7
1C	Hamlet lighting (range)...........	3.75	2.7	2.5	4
2A	House lighting....................	1.9	5.3	1.25	8
2B	Small farm service (50 acres or less).	3.5	2.9	2.35	4.3
3	Light farm service (over 50 acres)..	5	2	3.35	3
4	Medium farm service (single phase).	5	2	3.35	3
5	Medium farm service (three-phase).	5	2	3.35	3
6A	Heavy farm service (single-phase)..	5	2	3.35	3
6B	Heavy farm service (three-phase)...	5	2	3.35	3
7A	Special farm service (single-phase)..	5	2	3.35	3
7B	Special farm service (three-phase)..	5	2	3.35	3

Cabin Service

Arrangements were made during 1940 to provide the Commission's rural customers with electric service to cabins at special rates, which call for a service charge of 30 cents gross per cabin per month and five kilowatt-hours extra per cabin per month to be added to the first kilowatt-hour block. The rates are subject to the usual ten per cent discount for prompt payment. This cabin service is supplementary to the regular supply contract and applies to the months of June, July, August and September of each year.

Maximum Consumption Charge

The Commission has found that the maximum economic limit of the first domestic use through the rural power districts of the Province is 6 cents per kilowatt-hour. In all rural power districts the first consumption rate is fixed at a maximum of 6 cents per kilowatt-hour. The second rate has a maximum of 2 cents per kilowatt-hour which applies to all districts. These circumstances continued through 1943.

Low Third Consumption Rate for Long-hour Users

In 1934 the Commission made available for rural consumers a special energy rate for long-hour users of power. This low rate particularly affects under-earth heating (hot-beds) and heating of water. Where the extra use of energy may be obtained from the present equipment, a third follow-up rate per kilowatt-hour of 0.75 cents gross is given in all districts. The first rate remains unchanged, except that as pointed out above it is subject to a maximum of 6 cents per kilowatt-hour, and the kilowatt-hours to be charged at the first rate remain unchanged. The number of kilowatt-hours to be charged at the second rate varies both with the class of service and the first kilowatt-hour rate. At the head of the table of rural rates, at the end of this section, is a schedule which shows the class of service, the number of kilowatt-hours per month to be charged for at the first rate, and the number of kilowatt-hours at the second rate according to the governing first rate. The classification of services for rural power districts is given on page 47.

During the year, studies were commenced for the purpose of adjusting rural rates throughout all rural power districts and a new rate structure will be introduced in 1944. Consult statement on pages xi and xii of Chairman's letter of transmittal.

Average Cost to Rural Consumers Decreasing

The remarkable benefits obtained by rural communities in regard to the amount charged to them during the period 1928 to 1942 are indicated in the following tables:

HAMLET AND HOUSE LIGHTING SERVICE

Classes 1B, 1C and 2A

	Annual Revenue	Kilowatt-hours consumed	Number of consumers billed*	Average revenue per kw-hr.	Average monthly bill	Average monthly consumption—kw-hr.
	$ c.			cents	$ c.	
1928	530,407.00	10,702,031	17,585	4.95	2.51	50.7
1929	663,311.00	14,424,770	21,219	4.60	2.85	62.0
1930	757,558.00	17,815,987	25,013	4.25	2.73	64.2

*It may be observed that the number of consumers reported here does not agree with those shown in other sections of the Annual Report of the Commission. This is due to the fact that the figures given here represent consumers actually billed, but do not include power or special contracts, whereas elsewhere in the Report the tables show the number of contracts executed to the end of the fiscal year. In many cases service is not given until the following year.

†In the period 1937 to 1940, there was an increase in the **statistical average** revenue per kilowatt-hour and a decrease in the **statistical average** monthly consumption per consumer. Actually there was a great increase in the use of electricity by nearly all individual Hydro consumers and a corresponding decrease to each consumer in the average cost per kilowatt-hour. But due to the tremendous growth at this time in new consumers, who for the first few years are not equipped to use large quantities of electricity each month, the smaller monthly consumption of the new consumers when averaged with the increased use of the older consumers produced **per consumer** averages which obscured the true trends of individual growth in use and individual reductions in costs.

Rural Loans

Under The Rural Power District Loans Act, 1930, authority was given to The Hydro-Electric Power Commission of Ontario to finance the installation of wiring and the purchase of specified electrical equipment by rural farm consumers.

Owing to the necessity to conserve funds for war purposes this financing was discontinued on October 31, 1940. Up to that time 1,776 loans had been granted, amounting to $360,852. Details are as given in previous Annual Reports.

To October 31, 1943, 1,628 loans had been repaid in full, either through the maturing of the loan or by being paid in advance by the borrower.

Northern Ontario Properties	332.36	2,785	735	3.520	1,022,408.00	511,204.00
Totals	*20,119.17	63,880	72,461	136,341*	48,520,193.15	24,149,466.08

*These totals include 32.10 miles of primary line under construction on October 31, 1943 and service to 177 new consumers, not completed until after the end of the fiscal year.

During the year 1,092 rural consumers were annexed by an urban municipality and this group has been deducted from the total number of consumers.

In the rate tables on the following pages are listed the names of the rural power districts operated by the Commission on October 31, 1943.

CLASSIFICATION OF SERVICES FOR RURAL POWER DISTRICTS

When contracts between the consumer and the township have been executed, users of power in townships are supplied with electric service under general classes, according to the requirements and conditions of the individual consumer, as follows:

Class	Service	Class demand kilowatts	Phase	Volts	Fuse rating amperes (maximum)
1B	Hamlet Lighting................	1.32	1	110	20
1C	" "	2	1	220-110	35
2A	" "	1.32	1	110	20
2B	Small Farm Service.............	2	1	220-110	35
3	**Light Farm Service**............	**3**	**1**	**220-110**	**35**
4	Medium Farm Service...........	5	1	220-110	50
5	" " "	5	3	220-110	35
6A	Heavy Farm Service.............	9	1	220-110	100
6B	" " "	9	1 and 3	220-110	60
7A	Special Farm Service............	15	1	220-110	According to load
7B	" " "	15	1 and 3	220-110	According to load

Class 1: Hamlet Service—Includes service to customers (other than farm and power users) in hamlets, where four or more consumers are served from one transformer. Service is given under two-sub-classes as follows:

> **Class 1-B:** Service to residences or stores, including use of portable appliances, and permanently installed appliances not exceeding 1,320 watts.
>
> **Class 1C:** Service to residences or stores with electric range or ordinary permanently installed appliances greater than 1,320 watts. Where a combination of residence and store can be supplied from one service, the combination is billed as a single Class 1-C consumer. Special or unusual loads will be treated specially.

Class 2-A: House Lighting—Includes service to all consumers other than farm and power users that cannot be grouped as in Class 1.

Class 2-B: Farm Service, Small—Includes service for lighting of farm buildings, power for miscellaneous small equipment and power for single-phase motors not exceeding 2 horsepower and electric range if motors and range are not used simultaneously, on a farm of fifty acres or less.

Class 3: Farm Service, Light—Includes service for lighting of farm buildings, power for miscellaneous small equipment and power for single-phase motors not exceeding 3 horsepower and electric range if motors and range are not used simultaneously.

Class 4: Farm Service, Medium Single-Phase—Includes service for lighting of farm buildings power for miscellaneous small equipment, and power for single-phase motors up to 5-horsepower demand and electric range if motors and range are not used simultaneously.

Class 5: Farm Service, Medium 3-Phase—Includes service for lighting of farm buildings, power for miscellaneous small equipment and power for 3-Phase motors up to 5-horsepower demand and electric range if motors and range are not used simultaneously.

Class 6: Farm Service, Heavy—Includes service for lighting of farm buildings, power for miscellaneous small equipment and power for motors up to 5-horsepower demand and an electric range, or 10-horsepower demand without an electric range. Single- or three-phase service will be given at the discretion of The Hydro-Electric Power Commission of Ontario.

Class 7: Farm Service, Special—Includes service for lighting of farm buildings, power for miscellaneous small equipment, power for 3-phase motors from 10- to 20-horsepower demand and electric range. Single- or three-phase service will be given at the discretion of The Hydro-Electric Power Commission of Ontario.

NOTE: Classes 2B to 7B are designed primarily to cover the service requirements of farmers. Consumers other than farmers who require a more comprehensive service with greater demand than is provided for in classes 1B, 1C and 2A may obtain this service upon payment of the specified service charge listed in the table of rates.

NOTE: Class 2B has been the service usually supplied to farms of fifty acres or less and Class 3 the service usually supplied to larger farms. More than 90 per cent of recent contracts for farm service are in one or other of these classes.

Total, all systems: Miles of line, 20,119.17. Number of consumers, 136,341. These totals include 32.10 miles of primary line under construction on October 31, 1943, and service to 177 new consumers which was not completed at the end of the fiscal year.

SECTION V

PROMOTIONAL AND WAR SERVICES

DURING the year, promotional services were subordinated to the greater demand for war services of an essential and helpful nature. In general, the growing production of war equipment, the scarcity of materials and appliances, and the requirements of power for war industry, made it impossible to promote uses of electricity other than those of the most essential nature.

Following the practice of previous war years, every effort was made to assist industry in the efficient use of electric power. Participation in the "Bits and Pieces" program of the Dominion Government was continued and augmented, and the important problem of priorities in the obtaining of essential equipment and material for the Commission's use, was given concentrated attention.

Industrial Section

Technical assistance was rendered to approximately two hundred industrial consumers. This assistance included sixty-one plant surveys where reports were submitted to guide the consumer in re-arrangement of motors for better loading, and to suggest new uses for electric energy which would relieve labour shortage and increase production of war supplies. Conservation measures also were included in these services, and reports were made which led to the improvement of plant power-factor. During the year, approximately 5,000 kva in power-factor corrective equipment was installed by industrial consumers, thereby benefiting the capacity of the Commission's supply equipment by an amount equivalent to providing an additional 3,000 kva in generating capacity.

The Commission's maintenance shops, working in conjunction with the Public Utilities Wartime Workshop Board, produced in 1943 a total of 225,000 pieces or parts, aggregating $115,000 in value. This production included the machining of studs for cargo boats, gun mount cradles for tank guns, machining of cylinders and crankshafts for marine engines, and the assembly of gear units for naval guns.

REPRESENTATIVE ADVERTISEMENTS USED IN CONSERVATION PROGRAMME

Domestic and Rural Activities

Since it was not possible, under existing war conditions, to proceed with promotional work for domestic and rural load, work was restricted to carrying forward the voluntary conservation programme inaugurated in the previous year. Looking forward to the post-war period, a certain amount of research and planning was carried out in anticipation of promotional programmes when the relaxation of war restrictions permit.

Lighting

The advisory service on lighting problems for war and essential industry was maintained throughout the year, and assistance was rendered to a large number of industries and essential projects on the efficient use of lighting for increased production, and other war services. Approximately seventy recommendations in detailed form were supplied, supplemented by others given in conference.

Advertising

The general advertising programme of the Commission was again devoted to encouraging conservation, and was supplemented with advertising carrying information of value to Hydro consumers. In addition, advertising copy and printed matter were prepared for and supplied to municipal Hydro utilities.

During the year, a sound motion picture in colour, entitled "The Romance of a River" was produced. This picture illustrated the Ogoki diversion project and associated it with the DeCew Falls power development. This film is now being shown extensively throughout the Province.

Sales of Lamps and Equipment

Sales of appliances and water heating equipment were made only for replacement and repair purposes, and therefore the volume was comparatively low. Hydro lamp sales increased during the year, due to increased purchases by industrial companies.

Priorities

Clearances of material and equipment required by the Commission, were effected, and all necessary supplies for maintenance, repairs and operation were secured. Further assistance was also rendered to municipal Hydro utilities in their priority problems.

SECTION VI

HYDRAULIC ENGINEERING AND CONSTRUCTION

TWO major projects were completed and brought into operation in 1943, and essential maintenance work and rehabilitation of operating equipment and structures was carried on. In the Niagara system,* the DeCew Falls Extension was completed and put into service on September 29, 1943; and in Northern Ontario, the Ogoki diversion was completed and officially opened on July 20, 1943. It is of interest to note that this diversion from the watershed of the Albany river into the Great Lakes system is utilized, in part, by the new DeCew Falls plant.

The construction of the Niagara river remedial weir was continued. Various other projects were carried out during the year in different sections of the Province for regulating and augmenting water storage, and for the maintenance of existing generating stations.

NIAGARA SYSTEM

DeCew Falls Development

The decision to proceed with the DeCew Falls development was reached early in 1941, following an agreement between the Governments of Canada and the United States for the immediate use for power at Niagara falls by The Hydro-Electric Power Commission of additional waters equivalent in quantity to that which would be diverted from the James Bay watershed into the Great Lakes system by the Ogoki and Long Lake diversions. The power demands of war industries made it evident that the construction of new generating capacity was imperative. The location of a new plant at DeCew Falls was feasible, both from the viewpoint of economy and speed, and from the fact that many war industries were in close proximity.

Situated near the city of St. Catharines, with the power canal intake at Allanburg on the Welland ship canal and the outlet at Port Dalhousie on lake Ontario, the development traverses a district which is highly industrialized. Consequently, an unusually large number of problems were encountered involving public utilities and private establishments, and much attention has necessarily been given to that phase of the work. protection of private property, the reconstruction and new construction of bridges and roadways, and the relocation of all types of underground and overhead services were involved in this project.

DECEW FALLS POWER DEVELOPMENT
Intake structure from downstream side

The new intake structure is about one mile north of the old intake at Allanburg and is approximately one-quarter of a mile from the Welland ship canal. In the design of this intake, which is of sufficient capacity to pass not only the water for the new plant but also that which was formerly drawn through the old intake, use was made of an unfilled portion of the Third Welland canal, which at this point joins the ship canal at an acute angle. This circumstance made it possible to secure, at reasonable cost, an outlet from the ship canal with sufficient area to avoid a side draft which might make navigation difficult for passing vessels. By the enlargement of this disused navigation channel, the water was conveyed to within a few hundred feet of the artificial lake forming the head pond for the development, and a channel, in which were constructed on sound limestone foundations the intake control works, was cut through to the head pond.

The intake control works consist essentially of a series of piers with supporting wing walls, between which there are six tubes, each 7 feet in diameter. At the downstream end of each tube, an elbow, at 20 degrees with the horizontal, deflects the issuing jet upward from the channel bottom to prevent scouring action. Stop-log checks are provided at both the upstream and downstream ends of the tubes to enable dewatering when required for inspection and maintenance. The function of these tubes is to control and measure the amount of water which is drawn from the Welland ship canal.

Control of the flow is effected by means of a butterfly valve in each tube, four of which are motor operated. The measurement of discharge is accomplished by using each tube as a meter. One manometer tap is connected to the upstream face of the structure and another to the tube upstream from the butterfly valve. The pressure differential between these points is used to determine the flow.

Lake Gibson, into which water from the intake canal flows, forms the head pond of the development, and consists of two main pools connected by an excavated channel. This head pond has a capacity of approximately 1,600 acre feet between the operating elevations of 556 and 552.

From lake Gibson to the new head works, which is east of the old DeCew Falls gate house, a headrace canal 2,100 feet long and 40 feet wide was excavated in rock to a normal depth of 28 feet, which is sufficient to carry the flow for the present unit and one additional unit of the same capacity.

DECEW FALLS POWER DEVELOPMENT
Looking up nearly completed canal from headworks

The headworks, a concrete structure complete for two units, has racks and control gates installed for one unit. The deck of this structure and retaining walls adjoining it were carried to an elevation sufficient to provide for abnormal water levels due to surges in the headrace canal resulting from the sudden shut-down of the generating units. To protect against leakage from the canal between the various rock strata, the area along the cliff was pressure grouted with holes varying in depth from 10 to 150 feet for a distance of 300 feet on either side of the headworks.

DECEW FALLS POWER DEVELOPMENT
Rock fill weir in Twelve Mile creek under full flow

The steel penstock some 401 feet long from the headworks to the power house is 16 feet 8 inches outside diameter, is of rivetted construction throughout and is enclosed in a concrete envelope having a minimum thickness of 18 inches. See frontispiece.

The power house is of reinforced concrete with a superstructure of windowless design faced with cut stone. It provides support for a crane of 280 ton capacity for handling the equipment including the transformers. The later are installed in an outdoor station but are so arranged that they may be brought into the power house erection bay for maintenance and repairs.

The power house contains one 65,000 horsepower unit which operates under the available head of 265 feet the removable parts of which were transferred from the Abitibi Canyon development. The turbine unit, built by the Canadian Allis-Chalmers Company, is of the vertical Francis type, set in a steel plate scroll case and is controlled by an Allis-Chalmers oil pressure governor. It is directly connected to a Canadian General Electric generator with a rated capacity of 48,500 kva, at 13,800 volts, running at 150 r.p.m.

To provide emergency discharge capacity from the head pond into the tailrace, a nozzle has been provided on the steel plate turbine casing having a capacity of 2,000 cubic feet per second under normal head. This nozzle is equipped with a Howell-Bunger disperser valve, which will dissipate the energy in the issuing jet and thus prevent damage to the tailrace slopes.

In constructing the substructure for the present installation, a large amount of excavation for an additional unit was carried out. This included not only excavation for the power house substructure, but also the cliff excavation other than the slot for the second penstock. The downstream portion of the substructure for the second unit was also constructed, including tailrace piers with stop-log checks, so that the area to be occupied by the second unit may easily be dewatered and the excavation and concrete work for this further installation carried out without the necessity of constructing a cofferdam.

A tailrace channel was excavated from the power house to Twelve Mile creek, a distance of some 300 feet. Here the discharge from the power house joins the flow of Twelve Mile creek, which includes the discharge from the old DeCew Falls power house. The combined discharges are carried in Twelve Mile creek for three miles to its junction with the Second Welland canal in the city of St. Catharines, follow this waterway to Martindale pond, and pass thence through the outlet works into Port Dalhousie harbour and lake Ontario. To accommodate this flow and to prevent excessive scouring, the course of Twelve Mile creek was enlarged and straightened.

Twelve Mile creek, in its course from the power house to its junction with the Second Welland canal, falls fifteen feet. This gradient, in the enlarged channel, would develop velocities dangerous to the bed and banks. Channel velocities were kept within permissible limits by constructing four weirs of loose rockfill, at each of which a portion of the fall was concentrated and its energy satisfactorily dissipated. A fifth weir was built in the channel between the old and new power houses to maintain suitable tailrace levels at the former.

From the confluence of Twelve Mile creek and the Second Welland canal to Welland Vale the channel was improved and enlarged and, where sufficient widening was not permissible, the banks were protected with rip rap. At Welland Vale, the former elevations were maintained by removing the disused lock No. 2 of the canal, enlarging the channel and constructing a rock filled timber crib weir therein with concrete wing walls to protect the banks from the high velocities. The weir has a fixed crest and is so designed

DECEW FALLS POWER DEVELOPMENT
Fixed weir in tailrace channel at Welland Vale

that, when a second unit is added to the plant, the crest can be lowered sufficiently to maintain the present elevation above the weir.

From Welland Vale to Martindale pond, a distance of one and one-half miles, the channel of the Second Welland canal was enlarged by dredging, and rip rap protection was placed where necessary at deflections and where the available area is somewhat restricted.

Martindale pond has an area of 425 acres and its elevation is maintained as required for navigation, by spillways at Port Dalhousie. To provide the additional capacity necessary to carry the increased flow a channel 700 feet long, with control structure and concrete highway bridge was constructed immediately to the east of the navigation channel and lock No. 1 of the Third Welland canal. The control structure contains four submerged sluiceways, designed to accommodate Taintor gates between concrete piers, with supporting gravity wing walls at each side of the channel. Two of these sluiceways are now equipped with motor operated Taintor gates, while the remaining two are closed with stop logs until further additions at the power plant require installation of control gates.

Active work on contruction of roads, the establishment of camps and clearing of the site commenced in September 1941. Construction work on the various elements of the job was well co-ordinated and the plant was brought into service two years later, the generating unit carrying commercial load under test for the first time on September 29, 1943, and was formally opened on October 15.

OGOKI DIVERSION WORKS—NORTHERN ONTARIO
Flow through sluices of Waboose dam before diversion commenced

Ogoki River Diversion

The Ogoki river diversion, the construction of which began in November 1940 was completed and officially opened on July 20, 1943. The scheme contemplates the diversion of almost all of the flow from the Ogoki river above Waboose rapids from the Albany river watershed into lake Nipigon

OGOKI DIVERSION WORKS—NORTHERN ONTARIO
Canadian National Railways' bridge and channel, looking north

and the Great Lakes. It is estimated that the diverted waters, on the average, will amount to some 4,000 cubic feet per second.

At Waboose Rapids, on the Ogoki river, a concrete dam, 50 feet high, was constructed and this together with the Summit control dam and a number of earth fill side dams created a reservoir having an area of approximately 100 square miles. This reservoir extends southerly through Mojikit lake into a small lake known as North Summit lake. From North Summit lake, a channel was cut through a saddle in the height of land to permit the water to flow into South Summit lake and thence by way of a chain of connected lakes and the Jackfish river to lake Nipigon.

Waboose dam is, by far, the largest dam in the project, it is of concrete construction, with a total length of 1,700 feet. Twelve sluiceways, 23 feet high and 16 feet wide, separated by 6 foot piers, provide for the discharge of water which cannot be impounded or diverted southerly, and a spillway, 765 feet long, is provided to take care of flows that might cause the normal high water level of the reservoir to be exceeded.

The Summit control dam, constructed at the north end of South Summit lake, is a concrete dam about 23 feet high to the top of the deck, it contains eight 16 foot sluiceways, separated by 5 foot piers and a concrete bulkhead section at each end, making a total length of approximately 405 feet of concrete dam, beyond which was constructed at the south end 120 feet of earth fill with a concrete core wall.

In addition to the above two main dams, several earth-fill dams were required to close low areas around the reservoir. Two of these are east of and near Waboose dam and are known as auxiliary dams No. 1 and No. 2. They are compacted earth-fill dams, having a timber sheet piling core, with rock toes and a layer of gravel 24 inches thick over the compacted material. Snake creek dam, near the source of the creek of the same name, is 7½ miles west of Mojikit lake, into which the creek flows. It provides protection at the time of high reservoir level against the possibility that some of the diverted water might pass westerly to Pikitiguchi river and pass down that channel

OGOKI DIVERSION WORKS—NORTHERN ONTARIO
Channel under Canadian National Railways' bridge at Jackfish

to lake Nipigon. It consists of a gravel fill with a 6 inch timber sheet piling diaphragm. Chappais lake dam, a cut-off dam, is constructed of compacted clay and gravel. It provides against a break through at the height of land to the headwaters of Seymour creek.

At the point where the Jackfish river passes under the Canadian National railway, it was necessary to provide a stable channel, which would accommodate the greatly increased flow without endangering the railway. A channel, 50 feet wide, was excavated in rock to the left of the natural river bed, an earth fill placed to close the old channel, and extensive protection was given by placing heavy rip rap on the slopes. A new bridge was constructed with solid concrete abutments and concrete piers. The bridge is of plate girder design with steel towers varying in height from 30 feet to 70 feet. As a conservation measure, this bridge was constructed of steel salvaged from other bridges dismantled in recent years. The total length is approximately 800 feet and the spans vary in length from 69 feet to 99 feet.

As stated above, the diversion project came into service on July 20, 1943. The flow at first was limited to 1,000 cutic feet per second for initial observation of the behaviour of the channels and structures. It was gradually increased and at the end cf October amounted to 5,000 cubic feet per second.

NIAGARA RIVER REMEDIAL WEIR
Large pieces of rock used in construction of weir. Cableway tower in background

Niagara River Remedial Weir

The construction of the remedial weir, in the Chippawa-Grass island pool of the Niagara river, continued. The weir is for the purpose of improving conditions for the generation of power in the present emergency and to raise the water level in the Chippawa-Grass island pool sufficiently to compensate for reductions in the level which were caused by the increased use of water for generation of power by both countries.

By an agreement made in October 1941 between the governments of Canada and the United States, additional diversions of water for the generation of power were authorized in each country. The situation made it even more necessary than it formerly had been to build compensating works for the maintenance of normal water levels and to overcome the detrimental effect of the increased diversions upon the appearance of the American falls.

Following joint preliminary study of the problem by Boards representing the United States and Canada, authority to proceed with the work was given in the spring of 1942. Design and construction of the weir are being supervised by a committee of four, two from each country and the task of constructing the weir itself was assigned to The Hydro-Electric Power Commission.

The weir consists of a loose rock fill, the major part consisting of masses varying in weight from 2 to 10 tons. These were placed from a cableway spanning the river from the Canadian shore to an artificial island about 2,200 feet upstream from Goat island. The construction of the island and the causeway to give access to it was itself a job of some magnitude. The United States Engineer Office at Buffalo took charge of this part of the work.

The work commenced in April 1942, continued until March 1943, when it was discontinued because of conditions unfavourable to satisfactory progress. An examination of the weir in the summer of 1943 indicated that some improvement was possible in its design, and work proceeded accordingly. At the end of the fiscal year, the weir was approaching completion and the designed increase in water level had been attained.

Ottawa River Sites

Preliminary surveys and investigations for the development of the Des Joachims site on the Ottawa river were completed. Negotiations in respect to undeveloped power sites on the Ottawa river were continued.

GEORGIAN BAY SYSTEM

Eugenia Falls

The rehabilitation of the number two pipe line at Eugenia Falls development, which was commenced on September 3, 1942 was completed and the conduit restored to service on December 8, 1942. The work consisted mainly of the dismantling of the old pipe line; the ballasting and grading of the foundations, and the erection of approximately 2,800 feet of new wood-stave pipe.

South Falls

The foundations of the No. 1 wood stave pipe line at South Falls were stablilized with heavy rock fill.

EASTERN ONTARIO SYSTEM

Bark Lake Dam

The moving to higher ground of the buildings in the village of Madawaska, which were flooded by the Bark Lake dam, was completed.

Sufficient rip rap was placed on the downstream face of the earth dam to trim the surface to a uniform grade and protect against scour, and gravel was placed on the top of the dam to form a crown at the designed elevation. A description of Bark Lake dam was given in the 1942 Annual Report.

High Falls

The wood-stave pipe line at High Falls was dismantled and is being replaced by a new wood stave pipe. This wood-stave pipe is 10 feet in diameter and 313 feet long. The pipe line was dismantled in October and the new pipe line was scheduled to be in service on November 20, 1943.

NORTHERN ONTARIO PROPERTIES

Dasserat Lake Diversion

The Dasserat Lake diversion, in the Abitibi district, was completed, thus rediverting these waters into the Abitibi river watershed, which was their normal course before lumbering interests diverted the water into the Ottawa river.

SECTION VII

ELECTRICAL ENGINEERING AND CONSTRUCTION

CONSTRUCTION work during 1943 was not as extensive as in preceding war years, the major plant additions and changes necessitated by the demands of war industry and military installations now being mostly in service or in advanced stages of completion. Details of some of the more important work in course of construction, or completed during the year, are given under the various system headings. In addition to these larger items, considerable minor work was also carried out.

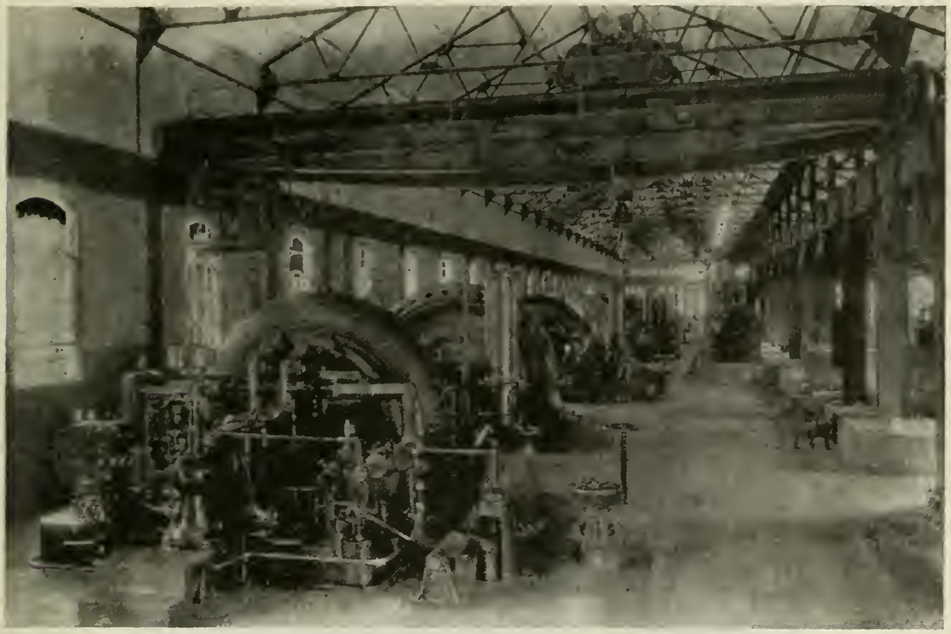
In order to ensure adequate supplies and distribution of power for vital needs, while at the same time conserving essential labour and materials, intensive studies have been necessary throughout the year: first, to permit the transfer of electrical equipment and transmission line material from places where the need was marginal to situations where the requirements were more urgent; and secondly, to point the way to operating arrangements which would enable the available power resources to be utilized in the most advantageous manner. Transformer, switching, control equipment, and other changes to this end are being carried out in a number of districts.

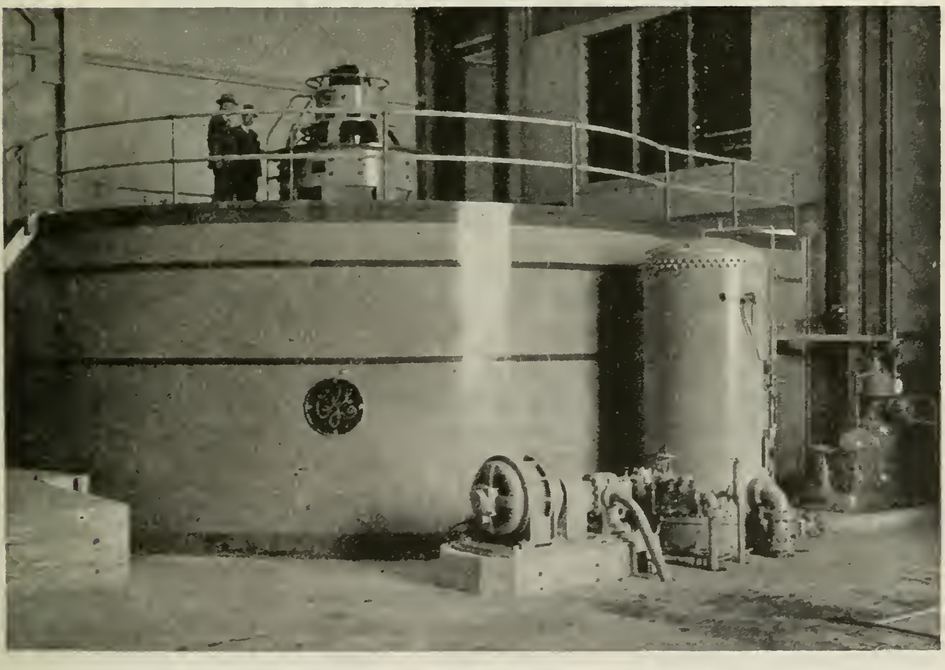
Engineering and other assistance has been given to a large number of municipalities and war industries in connection with the purchase and installation of new equipment; changes and additions to existing stations, and the design and construction of new stations.

A good deal of consideration has been given to the problems of power supply in the post-war era, more particularly in relation to the earlier years, to endeavour to form a conception of the programme of necessary construction, and of the system facilities which will be required.

Special efforts were made to release equipment and material to the salvage department for use in the war effort. The material released includes equipment which has been in disuse, and where, because of more or less obsolete design, there was little probability that it would be reused; also surplus material and equipment held in stores or elsewhere.

At the end of this section is given a tabulation of the transformer and distributing stations where major increases in transformer capacity have been made. It will be noted that in some cases, where the design permitted, these increases have been effected by the installation of cooling fans.





DECEW FALLS GENERATING STATIONS—OLD AND NEW

The upper photograph shows one wing of the 46-year-old development with its nine units aggregating 50,000 horsepower. These have given excellent service since they were constructed in the pioneer days of electric power transmission on a large scale. In contrast, the lower view shows the new development with one unit of 65,000 horsepower capacity installed in a power-house having only one-third the floor area of the older plant.

Approximately 17 miles of transmission lines were constructed and placed in service during the year. In addition, work was commenced and substantial progress made on the construction of a 120-mile transmission line from Port Arthur to Moose Lake, as described in more detail in a succeeding paragraph. More than 100 miles of obsolete transmission circuits were removed, in some cases with their supporting structures, to provide material for new construction or for salvage.

Extensions to distribution lines and systems have been limited to services most essential to the war effort, due chiefly to the scarcity of copper and aluminum. Short rural extensions have been made to farms for the increase of food production, a tabulation of which, at the end of this section, shows the mileage and number of consumers served. Supply lines and distribution systems have been built for airports, training centres, prison camps, proving grounds, radio transmitting and receiving stations, wartime housing, and other Dominion Government projects. The most extensive was that built for Polymer Corporation Ltd. at Sarnia for temporary construction power. This installation was comparable to that required by a municipality of 6,000 people.

NIAGARA SYSTEM*

The DeCew Falls Extension generating station (25 cycles), reported under construction last year, was placed in service on October 15, 1943, adding approximately 48,500-kva generating capacity to the Niagara system.

The third bank of transformers at the new 220,000-volt transformer station at Burlington was placed in service on April 4, 1943, increasing the station capacity by 75,000 kva; and progress is continuing on the installation of the synchronous condensers previously reported. The first 40,000-kva unit is expected to be in service early in 1944. The permanent control building which was scheduled for service in 1943 will not be placed in operation until 1944.

The additional 47,100-kva bank of transformers at Chats Falls generating station, installed for use with the frequency-changer set, was placed in service.

Load control devices are being installed at the Queenston, Ontario Power, and Toronto Power generating stations, for continuous automatic division of load between the three stations, and to assist in making the maximum use of available power resources.

Preliminary studies and estimates were made in connection with the proposed Des Joachims development on the Ottawa river as a future source of power.

Work was commenced on the elimination of the 46,000-volt power supply to the Welland area from Niagara transformer station, and on local station changes incidental thereto. Some of these changes are described in succeeding paragraphs. Upon completion, the Welland area will be entirely supplied from the recently constructed Crowland and Atlas Steel transformer stations, which were installed to provide for the greatly increased local load, and where 110,000-volt power is now stepped down to 26,400 volts.

---

*Re amalgamation of Southern Ontario systems consult page xi in Chairman's introduction.

HEAVY STORM, EASTERN ONTARIO, WINTER 1942-3
Ice loading—in excess of one inch—on distribution circuit

Arising from the above, the four 46,000-volt transformer banks at Niagara transformer station are being dismantled, together with the 46,000 and 12,000-volt switching equipment for these banks. One bank of three transformers has been released for temporary use in war industry. The remaining three banks are expected to be dismantled in 1944.

In the Welland area, the capacity of Crowland transformer station was increased by the installation of one 25,000-kva 3-phase transformer, and four additional 26,400-volt feeders, together with the necessary switching equipment, to serve the two plants of the Electro-Metallurgical company and the municipalities of Dunnville and Welland. A new switching station is being constructed at the Electro-Metallurgical Company's Union Carbide plant to take care of the change from 46,000-volt to 26,400-volt supply, and Dunnville municipal station was changed for 26,400-volt operation. Two 3,000-kva, 3-phase transformers at Welland distributing station and one 3,000-kva transformer at Welland muncipal station No. 2, were equipped for forced-air-cooled operation.

HEAVY STORM, EASTERN ONTARIO, WINTER 1942-3
Trouble on a 4,000-volt distribution line at Martintown

The third 25,000-kva transformer at Hamilton-Gage transformer station was placed in service.

A new 12,000-kva, 66⅔ cycle, 44,000 2,300-volt step-down station was constructed at the Steel Company of Canada's plant at Hamilton.

Forced air cooling equipment was installed at Hamilton (Stirton) transformer station, increasing the capacity of each of the six transformers from 5,000 kva to 6,750 kva; and also at Norfolk transformer station, increasing the existing transformer capacity from 6,000 kva to 8,000 kva.

To meet the needs of the Polymer Corporation, the capacity of the temporary station supplying power for construction purposes at its Sarnia plant was increased from 2,000 kva to 4,000 kva. The Commission is now constructing for the corporation a permanent 25-cycle, 2,000-kva stand-by station at the plant. Two frequency-changer units with their related switching equipment were sold to the corporation.

POWER FOR STEEP ROCK IRON MINES

Transmission line 110,000 volts, Rainy River switching station to Moose Lake switching station.

Considerable equipment was removed from the Hamilton steam plant. The turbo-generators, auxiliaries, power-house crane, and part of the switching equipment were disposed of to the Polymer Corporation. The boilers and a portion of the boiler room equipment were disposed of for re-use elsewhere. The remaining equipment is being placed in salvage stores, except for the step-down portion of the plant which has been retained to enable existing 13,200-volt service to be continued to certain customers. Service and lighting transformers and battery charging facilities were installed at this step-down portion, now known as Firestone (Hamilton) distributing station, and the remainder of the steam plant site and building, now known as Service Building (Beach Road) Hamilton, is being used for the storage of construction plant and reserve equipment.

GEORGIAN BAY SYSTEM

To provide for increased war loads in the Midland-Penetang district, the two 3,000-kva auto-transformers at Fergusonvale auto-transformer station were interchanged with the two 1,500-kva auto-transformers at Waubaushene auto-transformer station.

The Mount Forest frequency-changer station was totally dismantled, and the frequency-changer set and switching equipment disposed of to the Polymer Corporation. The building was sold to the Mount Forest Water

MOOSE LAKE POWER PLANT—RAINY RIVER DISTRICT

This 10,000 horsepower development was put out of commission by the diversion of Seine river in order to unwater Steep Rock lake seen in foreground. It now forms the receiving station for Hydro power from Port Arthur and the generators of the plant are being used as synchronous condensers in connection with the supply of power to Steep Rock Iron Mines Limited

and Light Commission. The 60-cycle transformers were placed in reserve equipment; and the other transformers, and the high-voltage switching equipment are being disposed of.

Studies were made regarding possible future additional sources of power for the Georgian Bay system, including interconnection with the Eastern Ontario system.

EASTERN ONTARIO SYSTEM

To take care of increased load at Sidney transformer station, forced air cooling equipment for the main 15,000-kva transformer bank, the new 5,000-kva spare transformer, and the 15,000-kva voltage-regulator was installed, increasing the transformer bank capacity from 15,000 kva to 21,000 kva.

A new 3,750-kva, 44,000/600-volt outdoor step-down station was installed for the Department of Munitions and Supply at Lindsay Arsenal.

NORTHERN ONTARIO PROPERTIES

Rainy River District

Studies were actively carried on, plans were developed, and construction is now well advanced for the supply of power to Steep Rock Iron Mines Ltd.

and The Ontario-Minnesota Pulp and Paper Company Ltd. Power is supplied from the new Rainy River switching station, located at Port Arthur transformer station, over a new 110,000-volt single-circuit wood-pole transmission line, 120 miles in length, to a new switching station at The Ontario-Minnesota Pulp & Paper Company's Moose Lake generating station, to replace the original generating station output, and to supply power to Steep Rock Iron Mines Ltd. The problem of operation in parallel with the pulp and paper company's system required considerable study, and the generators at the company's Moose Lake plant are being converted to synchronous condensers for the regulation of voltage at that point.

*Removals. †Net increase.

‡The 1942 Annual Report shows a total of 7,226.82 route miles of transmission lines. In certain cases low-voltage power circuits are carried on structures erected for telephone service and had been recorded as route miles instead of circuit miles only.

NOTE: Circuit miles of 220,000-volt line, in the province of Quebec, connected to H-E.P.C. lines = 103.45. Total 220,000-volt system interconnected circuit miles = 1,173.42.

TRANSMISSION LINE CHANGES AND ADDITIONS MADE DURING YEAR ENDED OCTOBER 31, 1943

NIAGARA SYSTEM

High-Voltage Lines

A 110,000-volt, double-circuit, steel-tower line with one circuit only erected was built from DeCew Falls generating station 2.72 miles to St. John's Valley junction.

The 110,000-volt double circuit and ground cable were removed from 0.58 mile of the steel-tower line "A", Niagara transformer station to Allanburg junction.

The 110,000-volt double circuit and ground cable were removed from 38.03 miles of the steel-tower line "A", Allanburg junction to Dundas transformer station.

A 110,000-volt circuit was removed from 2.97 miles of the double-circuit, steel-tower line, St. John's Valley junction to Pelham junction.

One tower was removed from the 110.000-volt, double-circuit, steel-tower line, Kitchener transformer station to Erbs junction.

Five towers were removed from the 110,000-volt, single-circuit, steel-tower line, Erbs junction to Stratford transformer station.

Two towers were removed from the 110,000-volt, single-circuit, steel-tower line, Stratford transformer station to St. Marys transformer station.

A 60,000-volt wood-pole line was completed ready for service from "O.P." transformer station 2.41 miles to Cyanamid transformer station.

Low-Voltage Lines

NIAGARA DISTRICT:—The 46,000-volt, single-circuit, wood-pole line from Elec. Steel & Eng. junction 21.34 miles to Dunnville municipal station was removed for 1.41 miles and the balance was transferred to the Crowland 26,400-volt district.

The 46,000-volt, double-circuit, steel-tower line, Southworth Avenue junction 0.53 mile to Welland municipal station was transferred to the Crowland 26,400-volt district.

The 46,000-volt, double-circuit, steel-tower line, Welland 0.53 mile to Elec. Steel & Eng. junction was transferred to the Crowland 26,400-volt district.

The 46,000-volt line from Welland transformer station to Bridge No. 16 junction was removed.

The 12,000-volt line from Niagara transformer station to "T.P." transformer station was extended 0.12 mile to a new terminal structure.

The 12,000-volt, double-circuit line from "T.P." transformer station to "O.P." transformer station was converted to a single-circuit and 0.63 mile was relocated.

DUNDAS DISTRICT:—A 13,200-volt tap line was built 0.03 mile to a new Dundas municipal station.

TORONTO DISTRICT:—The 13,200-volt double circuit was removed from the wood-pole line Glengrove junction 1.80 miles to York Mills distributing station.

YORK DISTRICT:—A 26,400-volt line was built from Brown's Line junction 0.22 mile to the Aluminum Company of Canada for that customer.

HAMILTON DISTRICT:—A 13,200-volt line was built from Hamilton Gage transformer station 0.35 mile to the Steel Company of Canada for that customer.

ST. CLAIR DISTRICT:—A 26,400-volt line was built from Indian Road junction 0.79 mile to Polymer Corporation for that customer, and placed in service temporarily at 6,600 volts.

TORONTO AND LEASIDE DISTRICTS:—A section of the 13,200-volt line from Sun Brick junction at East York distributing station number one, 0.30 mile in length, was replaced by 0.27 mile in a new location.

TORONTO AND FAIRBANK DISTRICTS:—The 26,400-volt, double-circuit line from York Mills distributing station to Willowdale regulator station was converted to single-circuit pole-top-pin construction.

CROWLAND DISTRICT:—A 26,400-volt circuit was established from Crowland transformer station 21.62 miles to Dunnville municipal station by the erection of 1.22 miles of circuit on existing structures, construction of 0.47 mile of line and by transfer of 19.93 miles of 46,000-volt line from Niagara district.

A 26,400-volt circuit was established from Crowland transformer station 1.82 miles to Southworth junction by restringing 0.26 mile of line, construction of 0.49 mile of line and by transfer of 1.10 miles of 46,000-volt circuit from Niagara district.

A section of 26,400-volt line 0.30 mile in length was built to complete a circuit from Crowland transformer station 0.50 mile to Page Hersey junction.

A 26,400-volt line was built from Electro Metallurgical Co. station 0.19 mile to Page Hersey Tubes.

Port Colborne District:—The 13,200-volt double-circuit line from Dominion Government Elevator junction to Canada Cement Company station was converted to single-circuit pole-top-pin construction for a length of 1.24 miles.

Thorold District:—A 12,000-volt line from Power Glen junction 1.51 miles to DeCew Falls development was placed in service.

Niagara-Dominion District:—A 44,000-volt line was built from Irondale station 0.41 mile to the Steel Company of Canada.

The 10,000-volt line, Burlington distributing station to National Fireproofing junction, was relocated for a distance of 0.43 mile.

EASTERN ONTARIO SYSTEM

High-Voltage Lines

A 110,000-volt, single-circuit, wood-pole tap line was built two spans to a new Aluminum Company of Canada station and 0.38 mile of line to the original station was relocated.

Central District:—The 44,000-volt line from Deseronto junction 2.80 miles to Deseronto distributing station was restrung.

The 11,000-volt line from Lakefield generating station 2.32 miles to Douro generating station was removed.

The 6,600-volt line from Auburn generating station 7.92 miles to Lakefield distributing station was removed.

St. Lawrence District:—A portion of the ground cable, 12.87 miles in length, was removed from the 44,000-volt line from Cornwall transformer station to Martintown distributing station.

A portion of the ground cable, 4.44 miles in length, was removed from the 44,000-volt line from Martintown distributing station to Apple Hill distributing station.

A portion of the ground cable, 1.10 miles in length, was removed from the 44,000-volt line from Apple Hill distributing station to Dominionville junction.

A portion of the ground cable, 1.00 mile in length, was removed from the 44,000-volt line from Dominionville junction to Alexandria distributing station.

A portion of the ground cable, 4.59 miles in length, was removed from the 44,000-volt line from Dominionville junction to Maxville distributing station.

NORTHERN ONTARIO PROPERTIES

Patricia District:—A 44,000-volt tap line was built two spans from Hasaga junction to Hasaga Gold Mines station.

The 44,000-volt line from Howey junction 0.27 mile to Howey Gold Mines station was removed.

Sudbury District:—A 22,000-volt line was built from Stinson generating station 6.20 miles to Falconbridge Nickel Mines for that customer.

COMMUNICATIONS—ALL SYSTEMS

Niagara System—In the Niagara Falls district two 100-pair, paper-insulated, lead-covered telephone and control cables were installed underground a distance of 0.37 miles from the Toronto Power generating station to the Toronto Power transformer station to provide remote control and metering channels between these two points.

The four-circuit trunk telephone pole line from Wiltshire transformer station to Islington junction was completely rehabilitated for a distance of 4.54 miles.

In the Hamilton district a 150-pair, paper-insulated, lead-covered cable was installed underground from Hamilton Beach transformer station to Hamilton Gage transformer station, a distance of 0.9 mile, to provide channels for remote control and metering facilities.

In the Essex district a single telephone circuit, 14.83 miles long, was erected on 26,400-volt transmission line poles from Essex transformer station to Essex distributing station.

Carrier terminals were installed for the operation of voice channels over existing physical telephone circuits from London transformer station to Essex transformer station and from Burlington transformer station to St. Thomas transformer station.

Georgian Bay System—The No. 9 iron telephone circuit was replaced with No. 6 A.C.S.R. conductor, a distance of 1.31 miles from Derby Mills junction to Tara distributing station.

Eastern Ontario System—In the Cornwall and Ottawa districts, power line carrier antennae were erected at Federal, Cyrville and Merivale junctions to complete the operation of power line carrier terminals at Ottawa and Cornwall transformer stations.

Telephone line carrier equipment was installed at Chats Falls and Barrett Chute generating stations and the Gatineau Power Company switching station at Val Tetreau to provide for the operation of frequency control and telemetering channels between these points.

Northern Ontario Properties—A single telephone circuit is being erected to provide communication service between Port Arthur transformer station and the Moose Lake transformer station at the Steep Rock Iron Mines. Of this, about 90 miles representing 75 per cent of the distance, was completed by October 31, 1943.

DISTRIBUTION LINES AND SYSTEMS

IN RURAL POWER DISTRICTS

The following summary shows the mileage of distribution lines constructed by the Commission in rural power districts and the number of consumers served.

The summary indicates a total construction during the year of 21.2 miles of new primary line completed and giving service to 2,005 additional consumers.

SUMMARY OF CONSTRUCTION IN RURAL POWER DISTRICTS

System and district	At October 31, 1942		At October 31, 1943					
			Miles of primary line			Number of consumers		
	Miles of primary line constructed	Number of consumers receiving service	Constructed	Under construction or authorized	Total	Receiving service	Authorized	Total

SECTION VIII

RESEARCH—TESTING—INSPECTION

PRODUCTION AND SERVICE

THE importance of research work in the war programme has increased studies and investigations in the Laboratories in all branches of activities where assistance could be given to various departments of the Canadian government and the armed services. The assistance rendered has varied from simple acceptance tests on materials and apparatus to endurance and performance tests on completed apparatus under extreme service conditions. Intensive laboratory investigations have been made of special electrical equipment and materials being produced in Canada.

Several members of the staff have been released for special war research and engineering work by the government for the duration of the war.

The study, testing and factory inspection of equipment of various types for the Government, the Commission and the municipalities has been one of the chief activities of the Laboratories.

The Wire Test section of the Laboratories has performed a considerable amount of investigational work and type testing for the Royal Canadian Air Force, the Army and the Naval Services, on wires and cables insulated with synthetic rubber compounds which the Services considered as possible substitutes for wires insulated with compounds containing natural rubber.

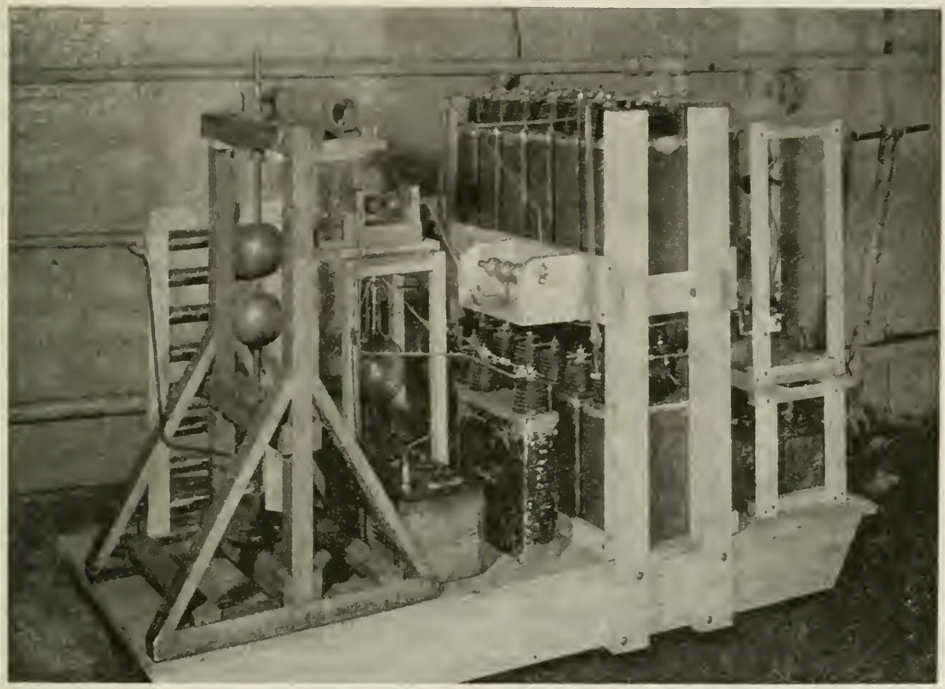
The Photometric section has made tests and recommendations to war industries on the use of infra-red radiation for paint baking and other industrial heating operations.

An extensive investigation was pursued with the purpose of improving conditions pertaining to the supply of electric power to farm services. Various causes dictated the desirability of such a study, including the fact that these services constitute an important part of the power load supplied by the Commission.

Attention has been given to important research problems in connection with the Commission's operations such as vibration of line conductors, joints in electrical conductors, electrical insulating materials, radio interference, concrete and corrosion and other problems associated with domestic electric water heating.

The Approvals Laboratory, which acts as an agent of the Canadian Engineering Standards Association, has continued to co-operate with the

Electrical Inspection department in testing devices and fittings and in studying problems of safety in handling domestic and other appliances in order to keep electrical accidents at a minimum.



.TESTING UNDER ARTIFICIAL LIGHTNING CONDITIONS

A new impulse generator which simulates lightning strokes for testing arresters, transformers and other distribution equpiment. The generator is compact, about 50 inches high and mounted on a platform, 32 x 72 inches, for ready portability.

RESEARCH AND TESTING LABORATORIES

Research

The Laboratories are continually active in studying research problems of the Commission and are equipped with a large amount of testing apparatus of varied nature by which tests and investigations can be made. Some of these investigations are conducted in the field using Laboratory equipment. Members of the Research staff co-operate with other departments of the Commission, and with the municipalities, toward the solutions of their operational problems.

Electrical Insulation

Investigations resulted in developing a method of sealing the ends of paper-insulated control cables. The insulating properties of modern plastics were studied.

Power factor tests were made on transformer oils as a means of indicating the improvement during reconditioning operations. Power factor tests made on bushings in the Laboratories supplemented gradient tests in the field in diagnosing bushing faults.

A surge generator was designed and assembled to study transient phenomena and for impulse testing of different types of insulation by simulating lightning strokes up to 120,000 volts.

Vibration of Line Conductors

The study of vibration in transmission line conductors and investigation of methods and devices for its suppression were continued. Field and laboratory tests resulted in the completion of designs of torsional dampers for all sizes of steel-reinforced aluminum conductors from No. 3/0 to 795,000 circular mils.

Investigations were made to determine the destructive effect of overstressing and mechanical surface damage on the fatigue properties of aluminum wire.

Joints in Electrical Conductors

Several long-term investigations to improve methods of making joints were continued through the year. Measurements of resistance of a large number of joints were made periodically to determine the amount of deterioration due to weathering. The data obtained in this investigation are being applied extensively in present construction practice.

Special attention was given this year to the cleaning of aluminum contact surfaces, and to aluminum-to-copper clamped joints with zinc or cadmium plating, or galvanizing of the intermediate member. A specification was drafted to cover field practice in preparing aluminum conductors and sleeves prior to making joints.

A new design of compression terminal for aluminum conductors was given an accelerated life test, and the effects of certain grease fillers on the mechanical strength of joints in steel strand cables were studied. Investigations were made of various types of live line clamps for use with rural transformers.

Grounding

Methods of grounding, and types and arrangements of ground connections were studied. The electrical contact resistance of two types of standard ground rod clamps on bare and galvanized steel rods were measured to determine comparative changes over a period of three years. The bare rods showed a coating of fine rust but no scaling. All of the combinations showed increase in resistance and most of them had a greater increase during the third year than in either of the previous years.

Tests were made to determine the degree of hazard and danger of shock in operating air-break switches in case of failure of switch insulators with the present grounding arrangement. These tests showed that a metallic plate or screen just below the surface of the ground, and connected to the grounding electrode, would reduce the hazard from line-to-ground voltage.

The grounding of rural services for the protection of live-stock, and other preventive measures, were studied as a result of several cattle having been electrocuted in their stanchions. The chief measures suggested as suitable for most cases were the separation of primary and secondary neutral conductors, the use of a continuous neutral conductor, bonding of non-current-carrying metal parts of service equipment and the insertion of suitable lengths of rubber hose or insulating pipe in air and water lines running to the stanchions.

Treatment of Wooden Transmission Structures

Inspection was made of samples of spruce and jack pine poles from Ear Falls which had been treated about four years ago with sodium arsenite and copper sulphate in the investigation of methods for preventing deterioration of wooden structures. These chemicals appeared fairly satisfactory in preventing decay although only small amounts were found to have reached the ground line. The use of pentachlorphenol as a preservative is now being investigated in eastern cedar poles.

The brush creosote treatment of poles in storage and the manner of piling poles were considered.

There has been close co-operation with the Bell Telephone Company in studying the problems in preservation of wooden structures. This work is proving valuable in the maintenance of transmission lines supported by wood poles.

A special committee is studying the matter of reforestation of Commission properties.

Domestic Hot Water Tanks and Heaters

The study of causes of corrosion in hot water tanks and heaters was continued in an effort to find means of increasing the service life of these devices. The tanks which have been under test for more than four years at York station were opened and examined again to observe the rate and nature of deterioration as part of this continued investigation. A comparatively new heater installation, after twenty-one months service, showed very little scale due apparently to special water treatment to keep the scale in suspension.

High-watt-density immersion heaters in iron tanks, at North York Township filtration plant, developed scale, more than 90 per cent of which was hard and adhered tightly, the remainder being soft and powdery. With low-watt-density immersion heaters, conditions were reversed, 92 per cent of the scale being of a powdery nature with only the small balance being hard and firmly set.

Strap-on heaters were tested in contact with wet rock wool and it was found that in rare cases water may enter the element by a type of breathing action.

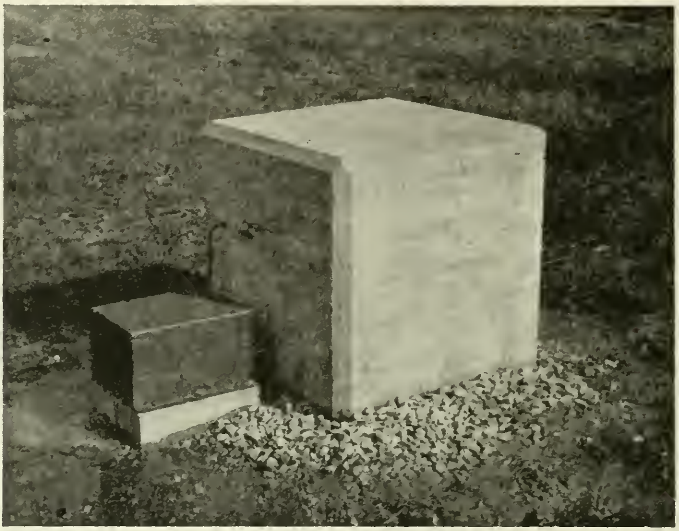
A transite hot water tank was constructed and special tests were started at the Laboratories. Samples of organic coatings were placed under test in the distilled water boiler.

Attention was given to plans for post war heater installations.

Illumination

The problem of flicker of fluorescent lamps at 25 cycles has been studied with a view to operation at higher frequencies, 400 to 500 cycles. Satisfactory tests were made at 440 cycles which showed that the 40 watt size could be operated at 60 volts, and with line power factor of unity, without the necessity of special starting switches. The ballast reactor would be much smaller than for 25 cycles and there is no apparent flicker when the lamp is started.

An auxiliary device for starting fluorescent lamps by application of an initial high voltage was tested and its merits studied.



CONCRETE CUBE FOR TEMPERATURE GRADIENT TESTS

This cubic yard of concrete contains sixty-four thermocouples for study of surface and internal temperature variations due to weather conditions and solar radiation. The leads from the thermocouples are brought to an automatic selector switch in the steel box at the left and connected to a recording thermometer in a small building nearby. The temperature at each point is registered about every hour.

Masonry Materials

Observations of temperatures and joint openings in Barrett Chute dam were continued to obtain information in the investigation of temperature distribution and stresses in mass concrete. A special concrete cube was prepared at the Laboratories for further study of heat transference in two or three directions and to show the temperature effect of sunlight in regard to freezing and thawing cycles. Comparative tests on Canadian cements were completed and studies were made of their chemical properties to supplement previous information on physical properties.

Field trials of absorptive form lining, which is intended to increase the durability of formed surfaces, were conducted on one project where trouble was encountered with surface dusting and honeycomb.

Progress was made in the investigation of the deterioration of cement as a result of long periods of storage.

Paints and Protective Coatings

Investigations were continued on house paints, shellac substitutes, paint removers, etc., which resulted in the elimination of some unsuitable materials. Tests made on paint removers enabled the Commission to obtain a better solvent type of material than that previously used. The principal work done was the study of the effect of paint pigments on the tendency of paint to blister due to moisture movements in the wood, which indicated that more attention should be given to proper priming of wood.

Tests also were made on aerial bases to determine the suitability of various compounds over extreme temperature range.

Petroleum Products

The solubility of air and carbon dioxide in insulating oils and the effect of vacuum filling on the air content of the oil were investigated, with many tests being made in the field on certain types of transformers. The reconditioning of old oil was continued and practical procedure for salvaging oil in large quantities was studied. Tests were made to determine how previously reconditioned lubricating and insulating oils were behaving in service.

Arrangements were made to participate in a long range study of insulating oils being undertaken by the Committee on Electrical Insulating Materials of the American Society for Testing Materials.

Miscellaneous Research

Research work in the Laboratories is done in cooperation with nineteen subcommittees each of which studies some specific problems. Not all of these subcommittees have been active during the year due to shortage of manpower and wartime restrictions. However, all projects have been prosecuted as actively as possible. In addition to those mentioned, attention has been given to several important problems and investigations.

The Laboratories commenced a study of the possibilities of certain electro-metallurgical processes which industry may find practical to introduce into Ontario after the war.

Studies were undertaken of small fast-freezing and storage refrigerating units to devise a suitable type for rural use.

The performance of carrier communication equipment at Leaside and Chats Falls was determined by tests on the transmission lines.

The investigation of causes of radio interference was continued and methods of rating interference from insulators were compared.

Metal spraying processes and the relief of welding strains by thermal treatment were studied.

Pilot wire, carrier current and wired radio methods for the remote control of domestic water heaters, street lighting and other services, were investigated by a special committee.

The problems involved in industrial applications of infra-red radiation for heating purposes were studied and comparison made of carbon and tungsten lamps. The effects of thickness of the material and position of the article being heated, the heat absorption of chemical pigments, concentration of radiation and control of convection currents were all investigated.

Routine Testing, Materials and Equipment Inspection

The Laboratories conduct a large number of routine tests on materials and equipment of different types and also inspect work being done for the Commission and for municipalities in the manufacturers' plants and in the field. These services aim to insure the highest quality in material and workmanship and also satisfactory characteristics and operation of equipment with a minimum of maintenance and expense and the greatest attainable reliability in service.

Electrical Equipment

Factory inspection of electrical equipment included 22 power transformers with total capacity of 110,950 kva, 23 oil circuit breakers with total capacity of 5,673,600 kva and 74 disconnecting switches with total rating of 7,534,200 kva. Metal clad and other switchgear for DeCew and Burlington stations were inspected, and also two special grounding reactors and several units of forced air cooling equipment.

Distribution transformers, both new and repaired, 342 in all, were tested, a large proportion being for airports. A total of 37,251 line and bus insulators, valued at $80,673, were inspected and tested at the manufacturers' plants.

Gradient tests were made on 606 transformer and oil circuit-breaker bushings to determine their condition and the extent of any defects that may be developing.

Routine tests were made at the Laboratories on 5,413 pairs of linemen's rubber gloves and on 1,231 samples of insulating oil. Special tests were made on 981 samples of oil. A total of 1,295 instrument and distribution transformers were tested, the latter being units repaired by the Production and Service department. Thermostats tested amounted to 53. High-voltage tests were made on 2,885 insulators. Nearly 5,000 repaired watt-hour meters were checked and 167 indicating instruments were calibrated.

Mechanical and Structural Equipment

The larger items of mechanical equipment inspected were for installation at DeCew Falls generating station and the transformer stations at Burlington and Niagara Falls.

For DeCew Falls, important equipment included the welded spiral casing and embedded parts for one turbine, one penstock 16.5 feet diameter and 465 feet long, one regulating valve, six 84 inch butterfly valves, two head gates and hoists, two tainter gates and hoists, one 280-ton travelling crane, a transformer transfer truck and three sump pumps.

For Burlington transformer station, the new equipment included two 40,000-kva synchronous condensers partly completed, also tanks for starting equipment and two five-ton cranes.

For Toronto Power generating station, there were two 14 inch diameter turbine shafts and two cast steel turbine runners.

A thrust bearing runner plate was inspected for Cameron Falls generating station.

The fabrication of tanks for transformers and oil circuit-breakers, particularly the welding, required inspection frequently at the factories. Welding of other equipment, including structural parts, was followed closely. Sixteen welded transformer tanks were inspected at the request of a transformer manufacturer.

Concrete

Four resident concrete inspectors and four other inspectors and assistants were stationed on seven construction projects. These inspectors tested the aggregates, supervised the processes and generally checked the quality of the concrete being used on these jobs.

Concrete, concrete aggregates and cement, a total of 498 samples, were tested at the Laboratories to determine quality and suitable proportioning.

PRACTICAL APPLICATION OF INFRA-RED RADIATION

Industrial infra-red ovens for baking the finish on tool boxes, built in accordance with recommendations of the Laboratories based upon tests and studies on experimental equipment. The articles being baked are suspended from conveyors and, entering at the smaller oven at the left, travel two feet per minute through the ovens, giving a baking period of two minutes for the primer coat of paint and six minutes for the final coat.

Soils

Seventy-five samples of earth dam materials, chiefly soils, were tested to obtain information as to the best method of using them.

X-ray and Microscopical Examinations

The X-ray laboratory has been specially busy and its services were enlisted by government departments in connection with war work.

Radiographic and fluoroscopic examinations were made on aluminum castings and cable joints to eliminate defective material, the total number of samples tested being 6,251. Microscopical examinations of 214 samples of metal were made to study the structure of the material.

Transmission Line Materials

The inspection of transmission line materials which pass through Strachan Avenue stores included crossarms, brackets, insulator pins, clamps, general hardware, wire and cable. The amount of copper wire and galvanized steel cable inspected was 251 tons, about 75 per cent of the quantity checked last year.

Steel and Timber

A total of 689 tons of structural steel was inspected for new installations and also 2,108 pine and cedar poles for distribution line construction.

General Materials

Tests were made on 301 samples of ferrous and non-ferrous metals and on 166 samples of wood, rope, leather and textiles.

Protective Coatings

Inspection of 146 samples of paints and other protective coatings for use on the Commission's structures has been carried on to insure high quality and satisfactory ageing properties. The weatherometer is used for accelerating the ageing tests.

Petroleum Products

A total of 448 samples of various petroleum products was tested.

Lamps and Lighting Equipment

In all 67,887 lamps were tested at the factory and 3,039 life tests were made at the Laboratories; 34 special tests on lamps were made.

Safety glass, reflex signals, direction signals and automobile head-light devices were tested for the Department of Highways.

Candlepower distribution and efficiency tests were made on three samples of lighting equipment, and three foot-candle meters were calibrated.

Eighty-two samples of paints were tested for gloss, and baking tests by infra-red rays were made on 32 samples.

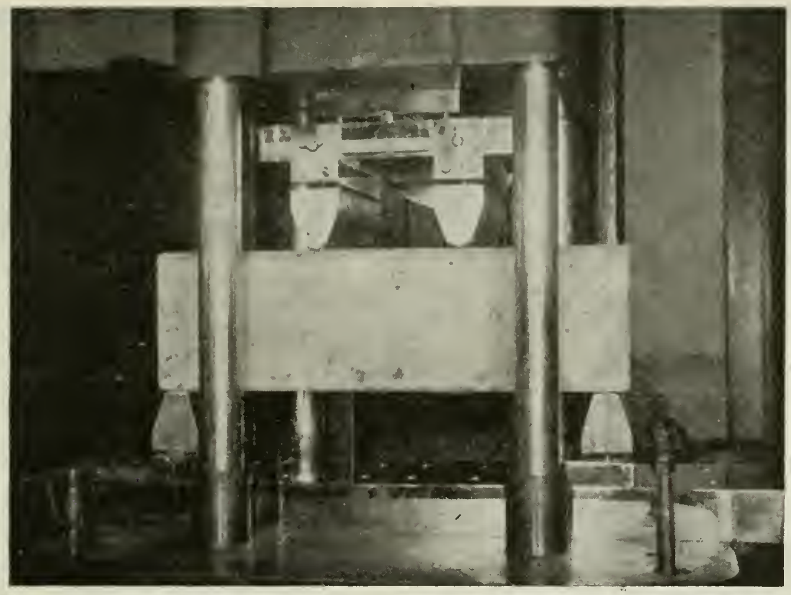
Inspection Investigations

In factory inspection, it sometimes is necessary to make investigations of the characteristics of certain equipment and materials to procure information in addition to that which is obtainable from the usual factory tests, or to determine the cause of unsatisfactory characteristics and to assist in correcting the faults. Failures of equipment also are investigated. During the year, these investigations included a 5,000-kva transformer which failed at Sidney transformer station, hottest spot indicating equipment for Hamilton Stirton transformer station, an order of fifteen air core reactors for Strachan transformer station, turbine shafts at Toronto Power generating station, and a moving coil type of regulator for the Wire Test laboratory.

New Equipment

Due to wartime restrictions, it has not been possible to obtain as much new equipment for research and testing as all of the activities of the Laboratories required. Some of the essential apparatus, however, has been bought or constructed at the Laboratories in order that important war work and assistance to the Commission and the municipalities would not be hindered.

A special low-temperature refrigerator was purchased for testing synthetic insulated wires and cables from room temperature down to 78 degrees below zero Fahrenheit. A 10,000 pound capacity proving ring was added to the equipment of the Structural Materials laboratory for calibrating machines used in mechanical testing. A new 140-volt storage battery was bought for general use in the Laboratories.



FLEXURAL TESTING OF CONCRETE BEAMS

This equipment is mounted in the compression test machine to apply loads up to 25,000 pounds to beam specimens of concrete and other structural materials. The maximum span length is thirty inches. The loading may be central or at selected points as shown.

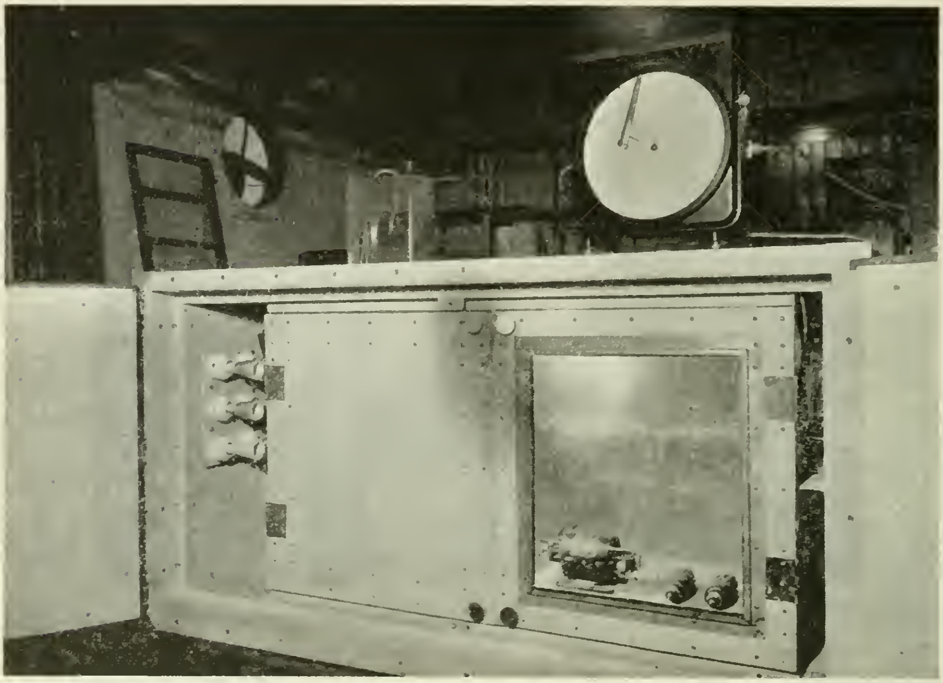
The equipment built or assembled in the Laboratories included a vibration machine to test lamps and lighting equipment for use on vehicles, an ozone generator for testing insulated wires and cables, a special device for shear tests on metal specimens, a pycrometer for determining air voids in plastic concrete, a comparator for determining length changes in concrete mortar bars, equipment for transverse and flexure tests on concrete beams, and a new motor drive for the 20,000-pound capacity physical testing machine.

Cabinets have been constructed in which to subject equipment to extreme weather conditions under closely controlled temperature and humidity; they are at present being used in tests and investigation of communication equipment for the armed forces. Equipment for measuring gloss of paints was rebuilt to comply with present standards.

The X-ray equipment was improved by the addition of an electrically operated shutter for the tube, a new high-intensity viewing table, with photoflood lamps immersed in water for examination of the films, and aluminum and steel slotted-wedge penetrometers for sensitivity calibrations on these materials. A special dark room was equipped for processing the films.

Specifications and Committee Work

Members of the staff co-operated in committee work with members of the following organizations—Canadian Engineering Standards Association, National Research Council, Canadian Electrical Association, Engineering Institute of Canada, American Institute of Electrical Engineers, American Concrete Institute, American Society for Testing Materials, International Association of Electrical Inspectors, Canadian Manufacturers' Association,



PRODUCING SPECIAL WEATHER CONDITIONS

One of two climate chambers for testing electrical equipment under extreme high and low temperature and humidity conditions, which are indicated by the instrument shown at the top. The free working space in each cabinet is twelve cubic feet.

Ontario Municipal Electric Association, Association of Municipal Electrical Utilities, Illuminating Engineering Society, Wartime Prices and Trade Board, Department of Munitions and Supply, Wartime Bureau of Technical Personnel and Dominion Board of Fire Underwriters.

APPROVALS LABORATORY

This section of the Laboratories has continued to function as agent of the Canadian Engineering Standards Association on approvals testing and factory re-examination of electrical equipment for Canada and for manufacturers in the United States who have applied for approval under the Canadian Electrical Code to sell their products in Canada. The Approvals engineer attended meetings of the administrative board held in Ottawa, Montreal and Toronto.

There has been a further decrease in the receipt of applications for testing and in the sales of approval labels but decrease in the latter has not been as great as in new applications for testing, so the Factory Inspection section has been more active than the laboratory testing section. Members of the staff have assisted again in the investigation of substitute materials to be used by manufacturers of electrical equipment and also in the preparation of rules and specifications for their use during the war period.

ELECTRICAL INSPECTION DEPARTMENT

The continued restrictions and other conditions due to the war have reduced the volume of inspection business.

Toward the end of the year there was some relaxation in restrictions respecting farm wiring which should bring increased activity.

Statistical

A total of 65,515 permits was issued, a decrease of 26.3 per cent from 1942, and a decrease of 36.3 per cent from the average number issued during the last five fiscal years, 1939-1943. Inspections made numbered 137,115, a decrease of 25.4 per cent from 1942.

Fires attributed to Electricity

As a result of the numerous routine investigations of fires reported as having been caused through wiring and equipment, eleven were found definitely to have started from this source. Two of these were due to hot plates overloading fixture wires and two to electric irons left heating and unattended. In another case combustible material was left in contact with a hot plate. A defective branch circuit cutout, a defective extension cord and short circuits in lamp sockets caused four more fires. Defective non-metallic sheathed cable and a ground in armoured cable also started fires.

Electrocutions and Fatal Accidents

Ten persons were electrocuted accidentally in Ontario due to electric wiring and equipment. One man and three children lost their lives by contact with 115-volt circuits; the man was adjusting a thermostat, the children came into contact with an extension cord, a portable heater in a bath room and a home-made brooder, all of which equipment was defective. Two men were killed on 550-volt circuits, one by touching a portable cable and the other by coming into contact with a feeder conductor. Two men received fatal shocks from 2,300-volt feeders, one of whom was lowering a pipe from a roof above live conductors. One man was electrocuted on a test floor by contact with equipment at a potential of 6,000 volts to ground, the accident evidently being due to confused signals and neglected protective equipment which had become defective.

Accidents, Non-Fatal

Six persons were reported as having received shock or injury which did not cause death. Three men received severe burns—two connected low-voltage test lamps to 550-volt and 2,300-volt circuits and the third was taping a conductor behind a 2,300-volt switchboard. One man suffered burns and a fractured shoulder when examining a 550-volt compensator. Two boys received shock from an ungrounded service conduit and an intentionally electrified fence.

Ground Tests

A total of 483 tests of consumers' grounds was made in isolated communities and rural districts, about 70 per cent of the work done in 1942.

Infractions of Regulations

Nineteen persons, or companies, were prosecuted for various infractions of the rules and regulations governing the installation, sale and disposal of electrical equipment.

Special Inspections of Equipment

During the year, 1,175 applications were received from manufacturers and distributors of electrical equipment for approval of special devices not listed as approved by the Canadian Engineering Standards Association, an increase in applications of about 11 per cent. The department reported on 1,126 of these applications, an increase of 33 per cent in reports.

Canadian Electrical Code

Members of the Engineering department and Electrical Inspection staffs, and engineers of the Canadian Engineering Standards Association, attended six meetings and assisted in compiling and revising sections of Parts I, II and IV of the Code.

The work associated with Part I of the Code, on Electrical Installations, includes attendance at meetings of the Central Committee and the issuing of interim revisions and interpretations. Part II, on Approvals Specifications for Electrical Equipment, covers the preparation of draft specifications and interim revisions of published specifications. The work on Part IV, on Radio Interference, includes preparation of drafts of sections of specifications to insure good practice in means of suppressing radio interference, and also the attendance at meetings of panels and subpanels of the Main Committee.

Three new specifications of Part II were published and nine other specifications were advanced. The work on specifications was curtailed considerably due to the war.

PRODUCTION AND SERVICE DEPARTMENT

The operations of the garage, machine shop and carpenter shop continued on a satisfactory basis.

The volume of work done in the garage was approximately equal to that of the previous year, and included the overhauling of 72 trucks and reconditioning of 79 units of gasoline-driven equipment for the Construction department. In addition, 1,330 orders for miscellaneous truck repairs were completed. Due to the restrictions on the manufacture of commercial vehicles, no trucks were purchased and consequently all efforts were confined to maintaining and rebuilding present equipment.

Special attention was given to the policy of regularly and systematically inspecting the Commission's fleet of 379 trucks. The mileage operated by the fleet during the fiscal year was approximately 2,500,000 which represents a reduction of 7.1 per cent from the previous year and a gross reduction of 24.2 per cent since gasoline rationing was first instituted. This reduction reflects the constant effort made by the various departments of the Commission to conserve rubber and gasoline.

The volume, type and value of work done in the machine shop and carpenter shop varied considerably and, based on the number of man hours expended in productive work, showed a decrease of approximately 20 per cent from the previous year.

Approximately 30 per cent of the facilities of the machine shop were devoted to war work done under the auspices of the Public Utilities Wartime Workshop Board.

SECTION IX

FINANCIAL STATEMENTS

Relating to

Properties Operated by The Hydro-Electric Power Commission on behalf of Co-operating Municipalities of the Southern Ontario System (Niagara, Georgian Bay and Eastern Ontario Divisions) and the Thunder Bay System,

and to

Northern Ontario Properties Held and Operated by the Commission in Trust for the Province of Ontario, and

The Hamilton Street Railway Company—A Subsidiary of the Southern Ontario System

IN this section of the Report financial statements relating to the activities of The Hydro-Electric Power Commission, segregated into certain distinct divisions, are presented. The first division relates to those activities on behalf of the co-operative municipalities, which are partners in the main "Hydro" undertaking comprising the Southern Ontario system (Niagara, Georgian Bay and Eastern Ontario divisions), the Thunder Bay system, and Rural Power districts associated with these two systems. The second relates to the administration of the Northern Ontario Properties which are held and operated by the Commission in trust for the Province of Ontario. The third relates to The Hamilton Street Railway Company, a subsidiary of the Southern Ontario system.

Co-operative Systems

In the Foreword to this Report a brief reference is made to the basic principle governing the operations of the "Hydro" undertaking in supplying electrical service at cost, and to the wholesale and retail aspects of the work. A description is also given of the systems into which the partner municipalities are co-ordinated for securing common action with respect to power supplies, through the medium of The Hydro-Electric Power Commission which, under The Power Commission Act, functions as their Trustee.

The amalgamation of the Niagara, Georgian Bay and Eastern Ontario systems into one system, to be known as the Southern Ontario system, is also described in the Foreword, and explained in the Chairman's Letter of Transmittal. As the amalgamation is effective for the fiscal year ended October 31, 1943, the financial statements herein presented are shown as relating to the Southern Ontario system.

Although for the purpose of financial administration the Southern Ontario and Thunder Bay systems are separate units, there is a similarity of procedure with respect to their operation which enables certain financial statements, as for example the various reserves, to be co-ordinated and presented in summary tables.

The first set of tables in Section IX gives collective results for the co-operative activities related to the two systems. These tables include a **balance sheet; a statement of operations and cost distribution** as detailed in the "cost of power" tables referred to below; schedules respecting **fixed assets, capital expenditures and grants—rural power districts, account with the Provincial Treasurer of the Province of Ontario, funded debt issued or assumed, power accounts receivable, renewals reserves, contingencies and obsolescence reserves, stabilization of rates reserves and sinking fund reserves.**

The tables which follow these general financial statements relate more particularly to the individual municipality's aspects of the wholesale activities of the Commission and for each system show the **cost of power** to the individual municipal utilities, the **credit or debit** adjustment remaining at the end of the fiscal year, and the **sinking fund** equity that has been acquired by the individual municipality. There is also included for each system a **rural operating** statement.

The charges for power supplied by the Commission to the various municipalities vary with the amounts of power used, the distances from the sources of supply and other factors. The entire capital cost of the various power developments and transmission systems is annually allocated to the connected municipalities and other wholesale power consumers, according to the relative use made of the lines and equipment. Each municipality assumes responsibility for that portion of property employed in providing and transmitting power for its use, together with such expenses—including the cost of purchased power if any—as are incidental to the provision and delivery of its wholesale power. The annual expenses and the appropriations for reserves are provided out of revenues collected in respect of such power, through the medium of power bills rendered by the Commission. The municipalities are billed at an estimated interim rate each month during the year and credit or debit adjustment is made at the end of the year,* when the Commission's books are closed and the actual cost payable by each municipality for power taken has been determined.

Included in the municipality's remittance to the Commission for the wholesale cost of power—besides such current expenses as those for operation and maintenance of plant, for administration, and for interest on capital—are sums required to build up reserves for sinking fund, for renewals, for contingencies and obsolescence, and for stabilization of rates. The first-mentioned reserve, namely, sinking fund, is being created on a 40-year basis for the purpose of liquidating capital liabilities. The other reserves are, respectively, being created to provide funds for the replacing or rebuilding of plant as it wears out; to enable the undertaking to replace existing equipment with improved equipment as it become available through advances in science and invention, and to meet unforeseen expenses which from time to time may arise; and to prevent rates from fluctuating unduly.

---

*The financial year for the Commission ends on October 31. The financial year for the municipal electric utilities however, ends on December 31, and the municipal accounts are made up to this date, and so recorded in Section X.

The ultimate source of all revenue to meet costs—whether for the larger operations of The Hydro-Electric Power Commission or for the smaller local operations of the municipalities—is, of course, the consumer. Out of the total revenue collected by each municipal utility from its consumers for service supplied, only an amount sufficient to pay the wholesale cost of power supplied by the Commission as outlined above is remitted to the Commission; the balance of municipal electrical revenue is retained to pay for the expense incurred by the local utility in distributing the electrical energy to its consumers.

Tabular Data

The following comments relate to the tabular data presented:

Balance Sheet.—The first tabular statement given in Section IX is a balance sheet showing the assets, and the liabilities and reserves of the co-operative systems.

Statement of Operation and Cost Distributions.—This statement is a summary of operating expenses and fixed charges as shown in the "cost of power" tables relating to the individual systems as referred to more particularly below.

Fixed Assets.—Details are given concerning the various fixed assets of each system and of the miscellaneous properties, showing in separate classifications the values of plant under construction and in service, depreciable and non-depreciable.

Capital Expenditures and Grants.—Rural Power Districts.—This schedule gives summary information respecting the total capital expenditures on rural power districts and grants-in-aid of construction paid or payable by the Province with respect to such rural districts.

Account with the Provincial Treasurer.—This schedule lists, both for the systems operated on a cost basis, and for the Northern Ontario Properties which are held and operated by the Commission in trust for the Province, the advances from the Province of Ontario and the repayments which have been applied to reduce this liability. It should be noted that Provincial advances to finance Northern Ontario Properties are shown in memorandum form only on the balance sheet of the Commission as the direct liability is carried on the Northern Ontario Properties' balance sheet.

Funded Debt Issued or Assumed.—This schedule presents a complete list of the outstanding securities issued or assumed by the Commission on account of the systems, and the Northern Ontario

Properties. It should be noted that securities issued to finance Northern Ontario Properties are shown only in memorandum form on the balance sheet of the Commission, whilst the direct liability is shown on the balance sheet of the Northern Ontario Properties.

Power Accounts Receivable.— This schedule sets forth the amounts collectable from all classes of power consumers and includes the annual adjustment figures from the "credit or charge" statements for municipalities. The main details of these debit balances three months or more overdue are stated.

Renewals Reserves,
Contingencies and Obsolescence Reserves, and
Stabilization of Rates Reserves.

These schedules show the provisions made to, the expenditures from, and the balance to the credit of, these reserves for each of the systems and other properties included in the power undertakings operated on a cost basis.

Sinking Fund Reserves.—This schedule summarizes the appropriations of principal and interest with respect to these reserves for each of the systems and certain other properties.

Following these statements, which are common to all systems, there are given for each of the co-operative systems four tabular statements as follows:

Cost of Power statement, which shows the apportionment to each municipality of the items of cost summarized in the operating account, as well as the apportionment of fixed assets in service listed in the balance sheet and the amount of power taken by each municipality. It should be noted that the cost of power given in this table is the wholesale cost—that is, the cost which the Commission receives for the power delivered from the main transformer stations serving the local utility. In the case of municipal electrical utilities not directly administered by the Commission, the respective costs of power appear in Statement "B" of Section X as "cost of power supplied by H-E.P.C."

Credit or Charge statement, which shows the adjustments made in order to bring the amounts paid by each municipal electric utility to the actual cost of service.

Sinking Fund statement, which gives the accumulated total of the amounts paid by each municipality as part of the cost of power together with its proportionate share of other sinking funds.

Rural Operating statement, which summarizes for the rural power districts of the system the various items of cost, and the revenues received, in connection with the distribution of electrical energy to rural consumers.

Northern Ontario Properties

The statements and schedules respecting these properties which are held and operated by the Commission in trust for the Province of Ontario include the balance sheet, operating and income accounts, schedule of fixed assets, renewals reserve, contingencies and obsolescence reserve, and sinking fund reserve. These schedules are similar in form to the corresponding schedules relating to the co-operative systems.

The Hamilton Street Railway Company

This is a subsidiary of the Southern Ontario system of the Commission. A balance sheet and operating and income account are presented.

Municipal Utilities

All municipal "Hydro" utilities have current expenses to meet similar to the expenses of the Commission and have adopted the same financial procedure with respect to their operations. In other words, concurrently with the creation of funds to liquidate their debt to the Commission and to provide the necessary reserves to protect generating, transforming and transmission systems, the municipalities are taking similar action with respect to their local "Hydro" utility systems.

The balance sheets, operating reports and statistical data appearing in Section X, under the heading of "Municipal Accounts", relate to the operation of local distribution systems by individual municipalities which have contracted with the Commission for their supply of electrical energy. To this section there is an explanatory introduction to which the reader is specially referred.

Auditing of Accounts

The accounts of The Hydro-Electric Power Commission of Ontario are verified by auditors specially appointed by the Provincial Government. The accounts of the "Hydro" utility of each individual municipality are prepared according to approved and standard practice and The Public Utilities Act requires that they shall be audited by the auditors of the municipal corporation.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

FINANCIAL ACCOUNTS

For the Year ended October 31, 1943

Relating to Properties operated on a "Cost Basis" for the Co-operating Municipalities and Rural Power Districts which are supplied with Electrical Power and Services from the following Properties:

Southern Ontario System
(Embracing Niagara, Georgian Bay
and Eastern Ontario Divisions)

Thunder Bay System

Service and Administrative
Buildings and Equipment

STATEMENTS

Balance Sheet as at October 31, 1943

Statements of Operations and Cost of Power for the Year ended October 31, 1943

Schedules supporting the Balance Sheet as at October 31, 1943:

- Fixed Assets—By Systems and Properties
- Capital Expenditures and Grants—Rural Power Districts
- Account with the Provincial Treasurer of the Province of Ontario
- Funded Debt Issued or Assumed
- Power Accounts Receivable
- Renewals Reserves
- Contingencies and Obsolescence Reserves
- Stabilization of Rates Reserves
- Sinking Fund Reserves

Statements for Municipalities Receiving Power under Cost Contracts

Auditors' Certificate

We have examined the accounts of The Hydro-Electric Power Commission of Ontario for the year ended the 31st October, 1943, and report that, in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Commission's affairs at the 31st October, 1943, according to the best of our information and the explanations given to us, and as shown by the books and records of the Commission. We have obtained all the information and explanations we have required.

OSCAR HUDSON AND COY.,
Chartered Accountants,
Auditors

Dated at Toronto, Ontario,
12 May, 1944.

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

CAPITAL EXPENDITURES AND GRANTS—RURAL POWER DISTRICTS

Summary at October 31, 1943

Statement showing the Total Capital Expenditures to October 31, 1943, on the construction of Primary and Secondary lines in Rural Power Districts; the investment in lines in operation; also the amounts of the Grants (fifty per cent of both Primary and Secondary lines) paid or payable to the Commission by the Province of Ontario up to October 31, 1943

System	Total capital expenditure	In operation	Grants (50% of Primary and Secondary lines, paid or payable by the Province as authorized by Orders-in-Council*
	$ c.	$ c.	$ c.
Southern Ontario system	38,194,067.05	38,194,067.05	18,933,371.31
Thunder Bay system	500,832 89	500,832.89	250,416.44
Sub-total	38,694,899.94	38,694,899.94	19,183,787.75
Northern Ontario Properties	799,738.18	799,738.18	396,788.19
Totals	39,494,638.12	39,494,638.12	19,580,575.94

*Grants not made by Province in respect of a summer resort, street lighting systems, service buildings, amounts paid for business already established and one transformer station.

NOTE:

The Grants paid over by the Province to the Commission up to October 31, 1943, on account of authorized grants to rural power districts—amount to	$19,585,108.10	
The Grants payable by the Province—as above set out—in respect of rural power districts as at October 31, 1943, amount in the aggregate to	19,580,575.94	
A balance of		$ 4,532.16

Which balance represents:

Grant funds in the hands of the Commission at October 31, 1943, not allocated, but to apply against the construction of authorized rural power districts and extension to existing districts	$ 4,532.16

Auditors' Certificate

We have examined the Accounts of The Hamilton Street Railway Company for the year ended the 31st October, 1943, and report that, in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs at the 31st October, 1943, according to the best of our information and the explanations given to us, and as shown by the books of the Company. We have obtained all the information and explanations we have required.

OSCAR HUDSON AND COY.,
Chartered Accountants,
Auditors

Dated at Toronto, Ontario,
12 May, 1944.

THE HAMILTON STREET RAILWAY COMPANY

(A Subsidiary of The Hydro-Electric Power Commission of Ontario—
Southern Ontario System

Operating Statement for the Year Ended October 31, 1943

REVENUES:	
Transportation	$ 2,231,544.26
Other operations	15,211.36
	$ 2,246,755.62
EXPENSES:	
Maintenance of way and structures	$ 80,478.90
Maintenance of equipment	212,531.89
Electric power and motor fuel	205,677.83
Transportation expenses	498,985.06
General and miscellaneous expenses	165,673.52
Taxes (municipal and franchise)	113,161.99
Depreciation provision	258,795.19
Amortization instalment on Commission's investment	150,000.00
Interest on Commission's investment	123,737.66
	$ 1,809,042.04

		$ 472,958.65	$ 472,958.65

SECTION X

MUNICIPAL ACCOUNTS

and

Statistical Data Relating to Hydro-Electric Distribution Systems Operated by Individual Municipalities Served by The Hydro-Electric Power Commission of Ontario

The Municipal Accounts section of this report presents in summary, and individually, the results of the operation of the local electrical utilities in municipalities owning their own distributing systems and operating with energy supplied by or through The Hydro-Electric Power Commission.

Financial statements prepared from the books of these "Hydro" utilities are submitted herein to show how each has operated during the past year, and its financial status at the present time. Other tables give useful statistical information respecting average costs for the various classes of service and the rates in force.

The books of account of the electrical utilities in all municipalities which have contracted with The Hydro-Electric Power Commission of Ontario for a supply of power are kept in accordance with an accounting system designed by the Commission. During the year 1943 this standard method of accounting was installed in Aurora.

Periodical inspections are made of the books of all "Hydro" electrical utilities and local officials are assisted in the improvement of their office routine with a view to standardizing, as far as possible, the methods employed. In the majority of the smaller municipalities much of the book-keeping for the electrical utilities is performed by representatives of the municipal accounting department of the Commission as a measure of economy. This arrangement insures the correct application of the standard accounting system, with resultant uniformity in classification of revenues and expenditures; secures true reflections of the actual operating results for the year, and greatly enhances the comparative values of the reports.

The first financial statement in this section presents consolidated balance sheets for each year since 1913, and thus shows the march of progress. It combines the balance sheets of the local municipal utilities of all the systems. It is worth noting that the total plant value has increased from $10,081,469.16

in 1913 to $102,272,852.40 in 1943, and the total assets from $11,907,826.86 to $194,347,747.00. The liabilities have not increased in the same proportion as the assets, rising from $10,468,351.79 to a maximum of $52,685,316.86 in 1932, and receding to $19,094,240.62 in 1943. The reasons for this are the regular fulfilment of debt retirement schedules under serial debenture provisions or by maturity of sinking funds, and also the fact that much of the cost of the increasing plant value has been financed out of reserves and surplus without increasing the capital liabilities of the respective utilities. By this procedure the funds of the systems are used to best advantage. Examination of the results will also show that there is a steady decline in the percentage of net liabilities to total assets; being from 88.0 per cent in 1913 to 10.0 per cent in 1943. The equities in The Hydro-Electric Power Commission's systems automatically acquired through the inclusion of sinking funds as part of the cost of power are not taken into account in arriving at these percentages.

The second financial statement presents consolidated operating reports for each year since "Hydro" service was inaugurated and combines the results from the local municipal utilities of all the systems. After providing for every cost of operation and fixed charges, including the standard provision for depreciation, the combined operating reports show a net surplus of $1,950,627.61 for 1943. (See also diagrams in Foreword to Report.)

The five statements, "A" to "E", following the two consolidated reports show the financial status of each municipal utility and the results of operations, giving classified information respecting revenue, operating costs, number of consumers and consumption, cost of power to municipalities, power and lighting rates charged to consumers, etc. In statements "A" and "B", the municipalities are arranged alphabetically under each system or division; in statement "D" the municipalities are arranged in three groups—cities, towns and small municipalities; in statements "C" and "E" all municipalities are arranged alphabetically. (Statement "C" suspended, see below.)

Statement "A" presents the balance sheet of each electrical utility. The plant values are shown under the general subdivisions specified in the standard accounting system and the other items on the positive side of the ledger which are included in total assets are self-explanatory.

In conformity with a policy of service at cost to the customer, refunds by cash or credit are made during the year in many municipalities from surplus funds accrued to the credit of municipal services, such as street lighting, water works, sewage disposal, etc., and to individual customers. The total thus returned to customers during the year 1943 amounted in round figures to $544,000.00.

The reserves for depreciation, and the acquired equity in The Hydro-Electric Power Commission's systems, are listed individually and totalled; and under the heading "surplus" are included not only the operating surplus but the accumulation of sinking fund applicable to debenture debt and also the amount of debentures already retired out of revenue.

The depreciation reserve now amounts to 33.4 per cent of the total depreciable plant, while the depreciation reserve and surplus combined have already reached the sum of $107,772,434.29, being equal to 105.4 per cent of the total plant cost.

Statement "B" shows the detailed operating report for each municipal electrical utility. It gives annual revenues from the various classes of consumers; the items of expenditure which make up the total annual expenditure and the sums set aside for depreciation. The population served by each local utility and the number of consumers of each class are also shown.

The item "cost of power supplied by H-E.P.C." in this statement includes the debit or credit balances ascertained by the annual adjustment of the cost of power supplied to the municipalities by the Commission.*

Of the 298 municipal electrical utilities included in this statement, 272 received from consumers revenue sufficient to meet in full all operating expenses, interest, debt retirement instalments, and standard depreciation reserve allocation and to yield an aggregate net surplus of $1,975,145.05 for the year; 21 were able to defray out of revenue all such charges except a portion of the standard depreciation allocation aggregating $15,111.01, in the case of 5 utilities the revenue was less than the total operating expenses, interest and debt requirement instalments by $9,406.43.

Statement "C". Due to street lighting restrictions by the Power Controller since 1942 this statement has been omitted as it could not be used for comparative purposes.

Statement "D" presents statistics relating to the supply of electrical energy to consumers in Ontario municipalities served by the Commission. It shows the revenue, kilowatt-hour consumption, number of consumers, average monthly consumption, average monthly bill and the net average cost per kilowatt-hour both for domestic and for commercial light service in each municipality. For power service this statement shows the revenue, the number of consumers and the average horsepower supplied by the municipal utility.† For further reference to this informative statement, consult the special introduction to it on page 296.

Statement "E" presents the cost per horsepower of the power provided for and delivered to the municipalities by the Commission, and the local rates to consumers in force in the respective municipalities, during the year 1943, for domestic service, for commercial light service and for power service.

---

*In 1939 and 1940 a number of municipalities asked permission to take power cost adjustments into the following year, to facilitate the earlier closing of their books. This led to a lack of uniformity in operating statements, and in 1941 it was decided to put all municipalities' accounts on the same basis. On this account, from 1941 on, the Balance Sheet shows the previous year's equity in Hydro Commission properties; and the Cost of Power in the Operating Statement from 1941 on, includes the previous year's adjustments.

†The statistics include retail power only. Wholesale industrial power as supplied by the Commission direct, is reported in Section IX.

STATEMENT "C"

Street Lighting Installation in Hydro Municipalities

Due to restrictions and changes resulting from orders of the Dominion Power Controller and economies effected by municipal co-operative action, statistics relating to Street Lighting are not presented in this year's Annual Report

STATEMENT "D"

(pages 296 to 313)

Statistics relating to the Supply of Electrical Energy to Consumers
in Ontario Urban Municipalities Served by
The Hydro-Electric Power Commission
for the year 1943

STATEMENT "E"

(pages 314 to 331)

Cost of Power to Municipalities and Rates to Consumers for
Domestic Service—Commercial Light Service—Power Service
in Ontario Urban Municipalities Served by
The Hydro-Electric Power Commission
for the year 1943

STATEMENT "D"

Statistics Relating to the Supply of Electrical Energy to Consumers in Urban Municipalities Served by The Hydro-Electric Power Commission

Regarding the results of Hydro operation from the standpoint of the consumers, the following tabulation gives much useful and interesting information. For each main class of service in each urban municipal utility receiving power at cost from the Commission, Statement "D" lists the revenue, the consumption and the number of consumers, together with unit average costs and consumptions and other pertinent data.

The policy and practice of the Commission has been, and is, to make as widespread and beneficial a distribution of electrical energy as possible, and to extend to every community that can economically be reached by transmission lines, the benefit of electrical service. Even where, in certain localities, by reason of the distance from a source of supply or on account of the small quantity of power required by the municipality, the cost per horsepower to the municipality—and, consequently, the cost of service to the consumer—must unavoidably be higher than in more favourably situated communities, service has not been withheld when the consumers were able and willing to pay the cost.

The accompanying diagram summarizes graphically certain data of Statement "D" respecting the average cost to the consumer. It will be observed that the total amount of energy sold in municipalities where circumstances necessitate rates which result in the higher average costs to the consumer is relatively insignificant. With respect to power service, it should be noted that the statistics of Statement "D", and of the diagram, cover mainly retail power service supplied to the smaller industrial consumers. The average amount of power taken by the industrial consumers served by the municipalities is about 45 horsepower. The Commission serves certain large power consumers direct on behalf of the systems of municipalities.

It should be kept in mind that the revenues reported in Statement "D", and used for purposes of calculating the net unit costs to the consumer, are the total revenues contributed by the consumers, and provide, in addition to the cost of power, sums specifically applicable to the retirement of capital, and also operating surplus which is in part applied to retirement of capital or extension of plant and is in part returned in cash to the consumers.

It should also be noted that average costs per kilowatt-hour or per horsepower if employed indiscriminately as a criterion by means of which to compare the rates or prices for electrical service in various municipalities, will give misleading results. The average cost per kilowatt-hour, as given in Statement "D" for respective classes of service in each municipality, are statistical results obtained by dividing the respective revenues by the aggregate kilowatt-hours sold. As such, the data reflect the combined influence of a number of factors, of which the rates or prices to consumers are but one factor. Owing to the varying influence of factors other than the rates, it is seldom found that in any two municipalities the average cost per kilowatt-hour to the consumers, even of the same classification, is in proportion to the respective rates for service. Instances even occur where for a class of consumers in one municipality, the average costs per kilowatt-hour are substantially lower than for the same class in another municipality, even though the rates are higher.

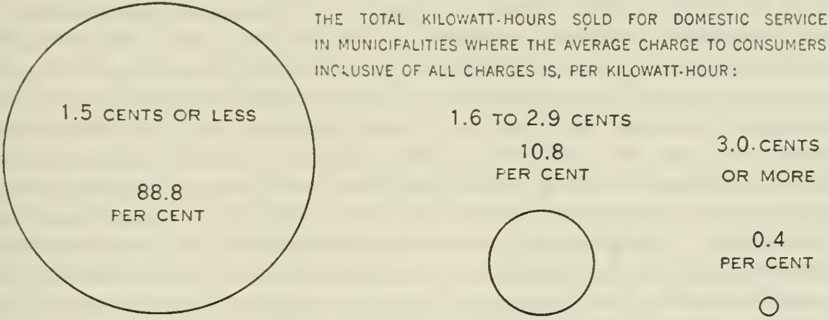
COST OF ELECTRICAL SERVICE

IN MUNICIPALITIES SERVED BY

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

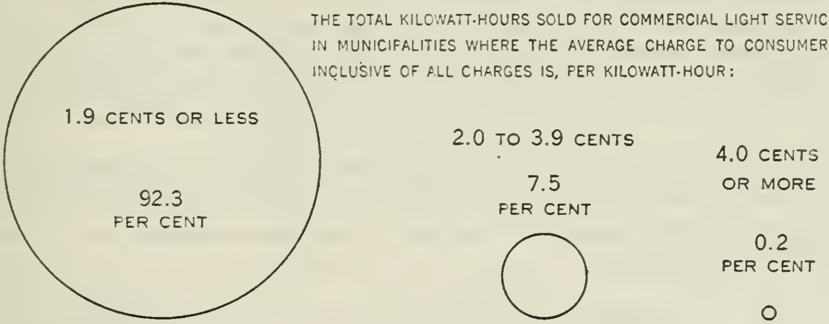
DOMESTIC SERVICE

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE TOTAL KILOWATT-HOURS SOLD FOR DOMESTIC SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER KILOWATT-HOUR:



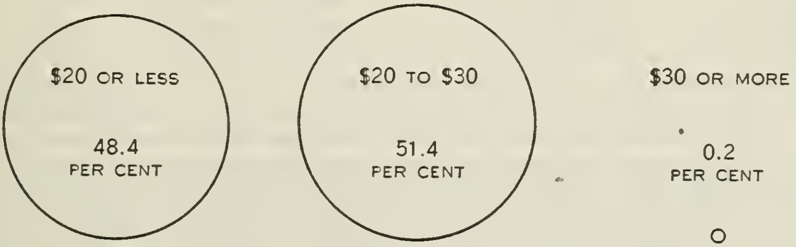
COMMERCIAL LIGHT SERVICE

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE TOTAL KILOWATT-HOURS SOLD FOR COMMERCIAL LIGHT SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER KILOWATT-HOUR:



POWER SERVICE SUPPLIED BY MUNICIPALITIES

THE AREAS OF THE CIRCLES REPRESENT PROPORTIONATELY THE AGGREGATE HORSEPOWER SOLD FOR POWER SERVICE IN MUNICIPALITIES WHERE THE AVERAGE CHARGE TO CONSUMERS INCLUSIVE OF ALL CHARGES IS, PER HORSEPOWER PER YEAR:



With respect to domestic service, for example, instances may be observed where two municipalities have identical prices or rates for domestic service, but the average cost per kilowatt-hour to the consumer varies by as much as 50 per cent or more. Such variations are due principally to differences in the extent of utilization of the service for the operation of electric ranges, water heaters and other appliances, an indication of which is afforded by the statistics of average monthly consumption.

In the case of power service, average unit costs are still less reliable as an indication of the relative rates for service in different municipalities. In the case of hydro-electric power supplied to industries at cost, the rate schedules incorporate charges both for demand and for energy consumption, and thus, although the quantity of power taken by a consumer—that is, the demand as measured in horsepower—is the most important factor affecting costs and revenues, it is not the only one. The number of hours the power is used in the month or year—which, in conjunction with the power, determines the energy consumption, as measured in kilowatt-hours—also affects the costs and revenues. Consequently, in two municipalities charging the same rates for power service, the average cost per horsepower to the consumer will vary in accordance with the consumers' average number of hours use of the power per month. A greater average energy consumption per horsepower increases the average cost per horsepower and decreases the average cost per kilowatt-hour to the consumer, and *vice versa.**

---

*In view of the fact that the data of Statement "D" have been misinterpreted in the making of certain comparisons as to the cost of electricity in various territories, it is desirable to add a word of caution respecting their significance. Essentially, the average cost or revenue per kilowatt-hour is *not a criterion of rates* even with similar forms of rate schedules and for the same class of service. Particularly is this true when revenues and consumptions of all classes of service and of all kinds of rate schedules, are indiscriminately lumped together in order to deduce a so-called "average cost or rate per kilowatt-hour" for all services.

In one community rates for each class of service, and the cost to every consumer in each class for any given service and consumption, may be substantially higher than in another community, and yet there may be in the former community a lower "average revenue per kilowatt-hour."

Example.—Assume sales of electrical energy by two electric utilities, A and B, in each case 10,000,000 kilowatt-hours.

Class of service	Case A Higher rates and lower revenues per kilowatt-hour			Case B Lower rates and higher revenues per kilowatt-hour		
	Energy sales	Rate per kw-hr.	Revenue	Energy sales	Rate per kw-hr.	Revenue
	kw-hr.	cents	$	kw-hr.	cents	$
Residence	1,000,000	4	40,000	3,000,000	3	90,000
Power	9,000,000	1	90,000	7,000,000	0.75	52,500
Total	10,000,000	....	130,000	10,000,000	....	142,500
Average revenue	1.3 cents per kw-hr.			1.425 cents per kw-hr.		

It will be observed that in Case A *the rates* both for residence and for power service are 33 per cent *higher* than in Case B, but the *average revenue* per kilowatt-hour is nearly 9 per cent less.

In this instance, the explanation lies in the *relative quantities* of energy sold to each class. Service to large power consumers entails a smaller capital investment in distribution lines and equipment and lower operating costs per kilowatt-hour delivered, than does service to domestic and to commercial light consumers, and even where the rates for all classes of service are low, produces a smaller average revenue per kilowatt-hour. Consequently, if one electrical utility as compared with another sells a larger proportion of its energy for power purposes, its "average revenue per kilowatt-hour" may easily be lower than that of the other utility even though its rates for every class of service are substantially higher.

Although the derived statistics of Statement "D" are valueless as a means of comparing the *rates* in one municipality with those in another, they nevertheless fulfil a function in affording a general measure of the *economy of service* to consumers in the co-operating Ontario municipalities—an economy that has resulted primarily from the low rates themselves, and secondarily from the extensive use of the service that has been made possible by the low rates.

Actual bills rendered to typical consumers for similar service under closely comparable circumstances constitute the best basis for making comparisons. In researches respecting rates to consumers therefore the actual *rate schedules* of Statement "E" should be employed and not statistics of average revenues per kilowatt-hour, as these are valueless for rate comparisons—and particularly so when all classifications of service are combined.

In any consideration of the relative economies of electrical service in the various municipalities—whether based on the actual rates for service as set forth in Statement "E", or on the derived statistics resulting from the rates and other factors as presented in Statement "D"—full account should be taken respectively of the influence upon costs of such factors as the size of the municipality, the distance from the source of power, the features of the power developments, the sizes and concentrations of adjacent markets for electricity, and the sizes and characters of the loads supplied under the various classifications by the local electrical utility to the consumers.

In Statement "D" account has been taken of the sizes of municipalities by grouping them according to whether they are (i) cities—over 10,000 population; (ii) towns of 2,000 to 10,000 population; or (iii) small towns less than 2,000 population, villages, and suburban areas in townships (which are comparable in respect of conditions of supply to the smaller towns and villages). The populations are also given, and the situation of any municipality with respect to transmission lines and power supplies may be ascertained by consulting the maps at the end of the Report.

A feature of the electrical service in Ontario municipalities served by The Hydro-Electric Power Commission is the strikingly large average annual consumption per domestic consumer. Of the 90 cities and towns with populations of 2,000 or more—in which over 85 per cent of the domestic consumers of the undertaking are served—no less than 83 have an average annual consumption per domestic consumer in excess of 1,000 kilowatt-hours; of these, 61 have an average annual consumption per domestic consumer in excess of 1,500 kilowatt-hours, 32 in excess of 2,000 kilowatt-hours, and 8 in excess of 3,000 kilowatt-hours. In addition 95 smaller urban municipalities have an average annual consumption per domestic consumer exceeding 1,000 kilowatt-hours, including 19 in excess of 2,000 killowatt-hours.

The high average consumption for domestic service results essentially from the policy of the undertaking in providing service "at cost"; the rate schedules designed according to this principle automatically encourage liberal use of the service. Under the standard rate schedules employed by Ontario municipalities, follow-up rates of 0.8 to 1.3 cents (less 10 per cent) are in common use, and as a rule even where the higher initial rates per kilowatt-hour obtain, it is only necessary for the domestic consumer to reach a monthly charge of from $2.00 to $3.00 to obtain the benefit of a follow-up rate of 1.8 cents net. The cost of electric cooking is thus within reach of most of the domestic consumers in Ontario. Electric water heating is also encouraged by low flat rates for continuous heaters and by installation of equipment without capital cost to the consumer. In 1941, war conditions made necessary the suspension of new installations for water heating.

STATEMENT

Statistics Relating to the Supply of Electrical Energy to Consumers For Domestic Service, for Commercial Light Service

Group III—SMALL TOWNS (less than 2,000 population),

NOTE—The power used in the smaller places and rural districts is, and possibly must always be, a relatively small proportion of the power distributed by the Commission. Thus, the power used by the small municipalities in the following group which includes small towns, villages and certain suburban areas in townships, is less than 10 per cent of the power distributed by the Commission to Ontario Municipalities. This relatively small proportion of the total power

"D"—Continued

in Ontario Municipalities Served by the Commission and for Power Service during the year 1943

VILLAGES AND SUBURBAN AREAS

however, exerts upon the economic life of the Province a most beneficial influence. It should further be appreciated that about 35 per cent of these municipalities obtain their power, not from Niagara, but from relatively small water-power developments throughout the Province, or from purchased power. The net cost per kilowatt-hour given in the table is the cost inclusive of all charges. Consult also introduction to Statement "D", page 296.

STATEMENT "E"

Cost of Power to Municipalities and Rates to Consumers for Domestic Service—Commercial Light Service—Power Service in Ontario Urban Municipalities Served by The Hydro-Electric Power Commission for the year 1943

In Statement "E" are presented the rate schedules applicable to consumers for domestic service, for commercial light service and for power service in each of the co-operating municipalities receiving service at cost through The Hydro-Electric Power Commission.* The cost per horsepower of the power supplied at wholesale by the Commission to the municipality, an important factor in determining rates to consumers, is also stated.

Cost of Power to Municipalities

The figures in the first column represent the total cost for the year of the power supplied by the Commission to the municipality, divided by the number of horsepower supplied. Details respecting these costs are given in the "Cost of Power" tables relating to the systems, as presented in Section IX, and an explanation of the items making up the cost of power is given in the introduction to that Section.

Rates to Consumers

The Power Commission Act stipulates that "The rates chargeable by any municipal corporation generating or receiving and distributing electrical power or energy shall at all times be subject to the approval and control of the Commission,"†. In accordance with the Act and in pursuance of its fundamental principle of providing service at cost, the Commission requires that accurate cost records be kept in each municipality, and exercises a continuous supervision over the rates charged to consumers.

At the commencement of its operations, the Commission introduced scientifically-designed rate schedules for each of the three main classes into which the electrical service is usually divided, namely: residential or domestic service, commercial light service, and power service, and the schedules in use during the past year are presented in the tables of this statement.

---

*Except townships served as parts of rural power districts, for which consult latter part of Section IV.

†R.S.O. 1937, Ch. 62, Sec. 89.

Domestic Service: Domestic rates apply to electrical service in residences, for all household purposes, including lighting, cooking and the operation of all domestic appliances.

During the past few years most of the urban municipal utilities have further simplified the domestic rate structure by abolishing the service charge, and making a suitable adjustment in the first consumption rate. Where the service charge is retained at 33 and 66 cents gross per month the charge of 33 cents per month per service is made when the permanently installed appliance load is under 2,000 watts, and the charge of 66 cents per month when 2,000 watts or more.

Commercial Light Service: Electrical energy used in stores, offices, churches schools, public halls and institutions, hotels, public boarding-houses, and in all other premises for commercial purposes, including sign and display lighting, is billed at commercial lighting rates.

Water-Heater Service: For all consumers using continuous electric water heaters, low flat rates are available consisting of a fixed charge per month dependent on the capacity of the heating element and the cost of power to the municipal utility. Such heaters are so connected that the electrical energy they consume is not metered. For new installations the necessary equipment, including heater, thermostat, efficient insulation for water-storage tank, and wiring, is installed by a large number of municipal Hydro utilities, without capital cost to the consumer.† The installation of new water-heating services is suspended for the duration of the war.

Power Service: The rate schedules given for power service in Statement "E" are those governing the supply of power at retail by each of the local municipal utilities. The Commission serves direct, certain large power consumers under special contracts, on behalf of the systems of municipalities.

The rates for power service, as given in the tables, are the rates for 24-hour unrestricted power at secondary distribution voltage. For service at primary distribution voltage the rates are usually five per cent lower than those stated. In municipalities where load conditions and other circumstances permit, lower rates are available for "restricted power", discounts additional to those listed in the table being applicable.

The service charge relates to the connected load or to the maximum demand, as measured by a 10-minute average peak, where a demand meter is installed. The prompt payment discount of 10 per cent on the total monthly bill is given for settlement within 10 days.

Under the tabulation of rates for power service there is a column headed "Basis of rate 130 hours' monthly use of demand." This column shows approximately the net annual amount payable for a demand of one horsepower, assuming a monthly use of 130 hours, which includes 30 hours' use each month at the third energy rate. Broadly, the figures in this column serve to indicate approximately the relative cost of power service in the different municipalities listed.

---

†In addition, the municipal Hydro utilities supply booster water-heating equipment to furnish extra requirements beyond the capacity of the continuous heater; current for the booster heater is measured and charged for at the regular rates.

STATEMENT

APPENDIX I

ACTS

CHAPTER 21

An Act respecting the Water Powers of the River Ottawa.

Assented to February 19th, 1943.

Session Prorogued April 14th, 1943.

Preamble

WHEREAS the Legislature of the Province of Quebec has passed an Act entitled *An Act respecting the waterpowers of the river Ottawa*, being Chapter 33 of the Statutes of Quebec, 6 George VI (1942); and whereas His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario and the Quebec Streams Commission have entered into an agreement relating to water powers on the Ottawa River, a copy of which is set out in Appendix A to this Act, and it is expedient that such agreement be ratified and confirmed;

Therefore, His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Interpretation.

1. In this Act,—

"land", Rev. Stat., c. 62.

(*a*) "land" and "lands" shall have the same meaning as "land" in *The Power Commission Act;*

"Ontario Commission".

(*b*) "Ontario Commission" shall mean The Hydro-Electric Power Commission of Ontario and any other corporation created to succeed it;

"Quebec Commission".

(*c*) "Quebec Commission" shall mean The Quebec Streams Commission and any other corporation created to succeed it.

Agreement ratified.

2.—(1) The agreement set out in Appendix A hereto as executed by the parties thereto is hereby ratified and confirmed insofar as it is within the jurisdiction of this Legislature and made binding upon His Majesty the King in the right of the Province of Ontario and upon the Ontario Commission, and the Minister of Lands and Forests and the Ontario Commission and each of them is authorized to do all acts and things necessary to carry out the terms thereof.

(2) The order of the Governor-General in Council, set out in Appendix B hereto, is hereby ratified and confirmed insofar as it is within the jurisdiction of this Legislature.

Ontario Commission, power of.

3.—(1) The Ontario Commission shall have and may exercise in its own name for and on behalf of His Majesty the King in right of the Province of Ontario, without the authority of the Lieutenant-Governor in Council, for the purposes of the said agreement, all the powers conferred upon it under *The Power Commission Act* and all the provisions of *The Public Works Act* which are incorporated in *The Power Commission Act* by section 21 thereof shall apply to any act done or proceeding taken by the Ontario Commission under this section.

Rev. Stat., cc. 62, 54.

Deposit of plan.

(2) When any land or rights are expropriated by the Ontario Commission for and on behalf of His Majesty the King in right of the Province of Ontario the plan and description shall indicate that they are so acquired, and shall be deposited in the proper registry or land titles office, and thereupon, such land or rights shall become and be vested in His Majesty the King in right of the Province of Ontario.

Expenditure of funds of Commission.

4. The Ontario Commission is authorized to expend the funds of the Ontario Commission for the purpose of paying compensation for land and rights however acquired under this Act whether in the name of the Ontario Commission or in the name of the Ontario Commission for and on behalf of His Majesty the King in right of the Province of Ontario and as and to the extent that funds of the Ontario Commission are so used the Ontario Commission shall be entitled to receive from the Quebec Commission the amounts of money which the Quebec Commission is required to pay under the said agreement for such lands and rights, and when any land or rights are so acquired by the Ontario Commission in its own name the Ontario Commission shall convey or assign such land or rights to His Majesty the King in right of the Province of Ontario.

Purchase of Carillon lands.

5.—(1) The Ontario Commission shall be entitled to receive from the Quebec Commission the sum of $2,462,933, specified in clause 3 of the said agreement and is authorized to pay out of its own funds the actual price to be paid by His Majesty the King in right of the Province of Ontario under the provisions of the said clause 3 for the lands and rights in Schedule C to the said agreement, and may acquire any such lands and rights in anticipation of a request therefor by the Quebec Commission.

(2) If the amount so paid by the Ontario Commission is less than the said sum of $2,462,933, the difference arising therefrom shall either be applied by the Ontario Commission towards payment of the capital cost of developing the Cave & Fourneaux, Des Joachims and Chenaux water powers referred to in the said agreement or any of them or may be retained and set apart as a reserve pursuant to section 11 of *The Power Commission Act*, or may be used by the Ontario Commission at such time or times and in such manner as it may see fit to reduce the price payable to it for electrical power or energy by any of the municipal corporations which at such time or times it is supplying with electrical power or energy, except such municipal corporations as are supplied by it with electrical power or energy at a price fixed by contract and the said reduction in price shall be apportioned amongst such of the said municipal corporations and in such manner as the Ontario Commission may see fit. Application of excess funds.

(3) If the said actual price so paid is in excess of the said sum of $2,462,933, the amount of such excess shall either be charged by the Ontario Commission against the said capital cost of developing the said water powers or any of them, or shall at such time or times and in such manner as the Ontario Commission may see fit be charged in the price payable to the Ontario Commission for electrical power or energy by any of the municipal corporations which at such time or times the Ontario Commission is supplying with electrical power or energy and which in the opinion of the Commission may benefit from the development of the said water powers, except where under the terms of its contract with the Ontario Commission a municipal corporation is to be supplied with electrical power or energy at a fixed price and such charge shall be apportioned among such of the said municipalities and in such manner as the Ontario Commission may see fit. Charging of deficit.

(4) If it shall be necessary to acquire lands or rights or secure releases of claims or demands for which the Quebec Commission is not required to pay under the terms of the said agreement but which are necessary to enable His Majesty in right of the Province of Ontario to perform or fulfil His covenant for quiet enjoyment as contained in clause 19 of the said agreement or for such purpose to pay compensation pursuant to the Order of the Governor-General in Council referred to in subsection 2 of section 2 or if the Ontario Commission shall reimburse any municipality pursuant to section 13 the Ontario Commission is authorized to expend the funds of the Commission for such purpose and to charge such expenditure in the manner authorized in subsection 3 where the actual price paid under the provisions of clause 3 of the said agreement for lands and rights in Schedule C to the said agreement is in excess of the said sum of $2,462,933, specified in the said clause 3. Idem.

6. The Quebec Commission is authorized to divert water in the Ottawa River from its natural channel subject to returning the said water to the natural channel of the Ottawa River in accordance with the terms of the said agreement. Diversion of water.

Rights of Quebec Commission.
Rev. Stat., c. 62.

7. Notwithstanding anything contained in *The Power Commission Act*, no lands, rights or works, nor any essential part of the development of the said water powers, leased or licensed to the Quebec Commission under the said agreement shall be subject to the control of the Ontario Commission save as regards electrical power or energy distributed or sold in Ontario.

Idem.

8. Notwithstanding anything in any other Act to the contrary no lands, rights or works, nor any essential part of the development of the water powers leased or licensed to the Quebec Commission, shall be expropriated, taken or acquired without the consent of the Quebec Commission.

Idem.
Rev. Stat., cc. 252, 253.

9. *The Extra Provincial Corporations Act*, and *The Company's Information Act*, shall not apply to the Quebec Commission.

Idem.
Rev. Stat., c. 147.

10. Notwithstanding the provisions of *The Mortmain and Charitable Uses Act*, the Quebec Commission shall have the right to acquire and hold land in Ontario for the purposes of this agreement without obtaining a license under that Act.

Remedy in damages.

11. No person claiming that he has been or may be injured by reason of any development contemplated by the said agreement shall have any remedy by way of injunction or other process but by way of damages only.

Taxation.

12. Notwithstanding anything in any other Act contained, all lands leased or licensed under the said agreement to the Quebec Commission and all rights, works and improvements required for their full utilization and the production of power shall be exempt from all provincial taxes and fees and from all municipal and school taxes and fees, and the Quebec Commission shall be wholly exempt from all provincial, municipal and school taxes and fees which might be imposed or assessed against it by reason of anything done under the said agreement or arising therefrom.

Loss of municipal revenue.

13.—(1) Any municipality which sustains loss of revenue from taxation upon lands acquired by or on behalf of His Majesty in right of Ontario for the development of water power at the Carillon site at the Rocher Fendu site or for the utilization of the lower half of the fall at the site known as Paquette in conjunction with the water power development at Rocher Fendu as provided in the agreement set out in Appendix A to this Act shall be entitled to compsensation by the Ontario Commission for the amount of such loss.

Determination of amount.

(2) The Ontario Municipal Board shall determine the amount of such loss on an annual basis and shall take into account all savings, benefits and advantages accruing to the municipality as a result of the acquisition of such lands or the development of such water power or such utilization of the lower half of the fall at the site known as Paquette including any payments made by the

Ontario Commission for capital assets lost or destroyed, and the amount determined in respect of any year shall be paid by the Ontario Commission to the municipality on or before the 30th day of June of such year.

(3) Every determination made by the Ontario Municipal Board shall be final and binding subject only to review and adjustment by the Ontario Municipal Board upon the application of the municipality or of the Ontario Commission at the end of each five-year period. Review.

(4) Every amount paid to a municipality under this section in any year shall be distributed in the same proportion and to the same bodies as the taxes levied by the municipality in such year. Distribution.

(5) All liability of the Ontario Commission under this section shall cease and terminate at the end of fifty years from the date of the said agreement. Cessation of liability.

(6) In this section "taxes" shall mean taxes levied for all municipal and school purposes and shall include local improvement charges and the portion of water rates charged for debenture purposes, and "taxation" shall have a corresponding meaning' "Taxes,"—defined.

14. Any amount paid by the Ontario Commission to a municipality under this Act shall be placed in a special account and no portion thereof shall be paid out or disbursed without the approval of the Minister of Municipal Affairs. Special account.

15.—(1) Any and all disputes arising between the parties to the said agreement, or any of them in relation to the said agreement, or the fulfillment of any of the terms, provisions or conditions thereof shall be decided, in accordance with the terms of the said agreement, by an arbitral tribunal composed of three members, appointed or chosen in accordance with the terms of the said agreement. Arbitration of disputes.

(2) The findings of any two members of the arbitral tribunal who are of the same opinion shall be the findings of the tribunal, and if more than one item is submitted to the tribunal at the same time, this rule shall apply to each item. Findings of tribunal.

(3) The arbitral tribunal shall have power to adjudicate upon the costs of the arbitration, but such costs shall not include the remuneration of the two members appointed by the Lieutenant-Governor in Council of the Province of Ontario and the Lieutenant-Governor in Council of the Province of Quebec respectively, each of whom shall be paid by the government appointing him. Costs.

(4) The remuneration of a member chosen by the Chief Justice of Canada in lieu of the Lieutenant-Governor in Council of a Province shall be paid by the government of such Province. Idem.

Fees of member.

(5) The Lieutenant-Governor in Council may direct, in any case, that the remuneration of the member appointed by him shall be paid by the Ontario Commission.

Idem.

(6) The remuneration of a member chosen by the Chief Justice of Canada in lieu of the Lieutenant-Governor of Ontario shall be paid by the Ontario Commission.

Approval of Works.

(7) In the event of refusal of approval by the Lieutenant-Governor in Council under *The Lakes and Rivers Improvement Act* of works to be constructed for the purposes of the said agreement, the Quebec Commission may appeal to the arbitral tribunal and an approval by the arbitral tribunal of such works shall have the same force and effect as if given by the Lieutenant-Governor in Council under the said Act.

High water mark.

Rev. Stat. c. 44.

(8) Notwithstanding the provisions of subsection 3 of section 1*a* of *The Bed of Navigable Waters Act*, the Quebec Commission may appeal to the arbitral tribunal from a decision of the Minister of Lands and Forests made thereunder and the arbitral tribunal may, for the purposes of the said agreement, fix the high water mark with respect to any part of the Ottawa River.

Appeal.

Rev. Stat., c. 109.

(9) Notwithstanding the provisions of *The Arbitration Act*, an appeal shall lie from the finding or decision of the arbitral tribunal direct to the Court of Appeal for Ontario as from a final judgment of the High Court of Justice for Ontario in all matters to which, by the terms of the said agreement, the laws of Ontario are made to apply.

Application of Rev. Stat., c. 109.

(10) The provisions of *The Arbitration Act* which are not inconsistent with this Act or with the said agreement, shall apply to disputes arising from matters to which, by the terms of the said agreement, the laws of Ontario are made to apply.

Deposit of copy of Act in registry offices.

16.—(1) A copy of this Act shall be deposited by the Ontario Commission in the Registry Office for the Registry Division of the County of Prescott, and in the Registry Office for the Registry Division of the County of Renfrew and the agreement shall thereupon be entered by the registrars of deeds for the said registry divisions in the abstract index of such lands described in Schedule A to the said agreement as are within the respective registry divisions and such deposit shall be deemed to be registration of the agreement for all the purposes of *The Registry Act*.

Rev. Stat , c. 170.

Deposit of Orders-in-Council.

(2) A copy of every Order-in-Council made pursuant to clause 3 or clause 4 of the agreement shall be deposited by the Ontario Commission in the registry office or registry offices in which is registered the title to any lands affected by such Order-in-Council, and the registrar of deeds shall thereupon enter the Order-in-Council and the agreement in the abstract index of such lands as are affected by the Order-in-Council and are within his

registry division and such deposit shall be deemed to be registration of the Order-in-Council and of the agreement for all the purposes of *The Registry Act*. Rev. Stat., c. 170.

Deposit of plan. (3) The Ontario Commission shall deposit in the Registry Office for the Registry Division of the County of Prescott the plan referred to in Schedule C to the agreement, and the Registrar of Deeds for such registry division shall at the request of the Ontario Commission enter in the abstract index of each parcel or tract of land within the area shown coloured red or the area shown coloured green on the said plan the following—"These lands are subject to *The Ottawa River Water Powers Act, 1943*." 1943, c. 21.

Fees of Registrars of Deeds. (4) Every registrar of deeds who makes any entry pursuant to subsection 1, 2 or 3 shall be entitled to collect from the Ontario Commission his proper fees therefor and the Ontario Commission is authorized to pay the said fees out of its funds.

Sufficiency of descriptions. **17.** Every description contained in this Act, in the Agreement forming Appendix A hereto, in any schedule to or any document executed pursuant to such agreement or in any Order-in-Council passed hereunder shall be deemed a sufficient description for all purposes.

Commencement of Act. **18.** This Act shall come into force on the day upon which it receives the Royal Assent.

Short title. **19.** This Act may be cited as *The Ottawa River Water Powers Act, 1943*.

APPENDIX A

to An Act respecting the Waters Powers of the River Ottawa.

THIS AGREEMENT made in quadruplicate the 2nd day of January, A.D. 1943;

BETWEEN:

HIS MAJESTY THE KING IN RIGHT OF THE PROVINCE OF ONTARIO, (herein represented by the Honourable Norman O. Hipel, Minister of Lands and Forests), hereinafter called "Ontario"

OF THE FIRST PART,

HIS MAJESTY THE KING IN RIGHT OF THE PROVINCE OF QUEBEC, (herein represented by the Honourable Wilfrid Hamel, Minister of Lands and Forests), hereinafter called "Quebec"

OF THE SECOND PART,

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO, hereinafter called the "Ontario Commission"

OF THE THIRD PART,

—and—

THE QUEBEC STREAMS COMMISSION, hereinafter called the "Quebec Commission"

OF THE FOURTH PART,

WHEREAS by an Act of the Legislature of the Province of Quebec entitled "An Act respecting the waterpowers of the River Ottawa", 6 George VI, 1942, Chapter 33, it is enacted that the Lieutenant-Governor in Council may authorize the Minister of Lands and Forests to lease to the

Ontario Commission, or to any other corporation formed by the Province of Ontario to succeed such Commission, that portion situated in the Province of Quebec of the waterpowers of the River Ottawa known as Cave & Fourneaux, Des Joachims and Chenaux, including the land required for the sites of the necessary works for the development of such waterpowers, and all the rights, within the legislative authority of the Province of Quebec, required to utilize such waterpowers by raising the water in the river to the following head-water levels (feet above mean sea-level), namely:

Cave & Fourneaux	575
Des Joachims	500
Chenaux	285

And Whereas the said legislation provides that such lease may include the right to utilize, in conjunction with the Des Joachims waterpower, one-half of the fall at the site known as Paquette;

And Whereas the said legislation enacts that the said lease may be granted only in return for a lease by Ontario to the Quebec Commission, or to any other corporation formed by the Province of Quebec to succeed it, of that portion, situated in the Province of Ontario, of the waterpowers of the River Ottawa known as Rocher Fendu and Carillon, including the land required for the sites of the necessary works for the development of such waterpowers, and all the rights within the legislative authority of the said province, required to utilize such waterpowers by raising the water in the river to the following head-water levels (feet above mean sea-level), namely:

Rocher Fendu	350
Carillon	135

And Whereas the said legislation provides that the said lease may include the right to utilize, in conjunction with the Rocher Fendu waterpowers, one-half of the fall at the site known as Paquette;

And Whereas the Ontario Commission is agreeable to entering into these presents so that a lease to it may be granted by Quebec pursuant to the said legislation;

And Whereas Ontario is agreeable to entering into these presents for the purpose of granting to the Quebec Commission the lease from Ontario contemplated by such legislation;

And Whereas the Quebec Commission is willing to enter into these presents to receive such lease from Ontario;

Now Therefore this Indenture Witnesseth that in consideration of the premises and the other considerations herein appearing the parties hereto agree as hereinafter appears.

1. Wherever "Quebec Commission" appears herein it shall be deemed to include the Quebec Commission and any other Corporation formed by Quebec to succeed the said Quebec Commission, wherever "Ontario Commission" appears herein it shall be deemed to include the Ontario Commission and any other Corporation formed by Ontario to succeed the said Ontario Commission and wherever "level" appears herein it shall mean elevation above mean sea level according to geodetic survey of Canada datum.

2. (a) For the development of the waterpower at Carillon, Ontario hereby demises and leases unto the Quebec Commission those certain parcels or tracts of land and land under the waters of the Ottawa River, situated in the townships of Hawkesbury East and Hawkesbury West, in the County of Prescott, in the Province of Ontario, containing by admeasurement an area of 1900 acres, more or less, being the lands described in paragraph 1 of Schedule A hereto, together with such lands owned by Ontario, not exceeding in area two hundred acres, as shall be reasonably required for the site of the works necessary for the development of the said water power (including access to the said works) and which are of such nature that they cannot be conveniently and economically constructed on the lands described in the said paragraph 1 of Schedule A, or on lands in the Province of Quebec; and

2. (b) Ontario also hereby gives leave and license and due and full permission to the Quebec Commission to enter upon, possess, occupy, use and enjoy for flooding purposes only, such additional lands owned by Ontario as are necessary to enable the head-water level of the Carillon waterpower to be raised to a level of 135 feet, and to enable water to be diverted pursuant to clause 7; provided, however, that the Quebec Commission shall give Ontario not less than twelve months' written notice before flooding the said lands or any part thereof and that during the first three months of the said period of notice Ontario shall have the privilege of licensing or authorizing any person to enter upon the said lands or any part thereof and carry on lumbering operations thereon until the expiration of the said period of notice. If during the said three months Ontario shall not have licensed or authorized any person to enter upon the said lands or any part thereof to carry on lumbering operations thereon, the Quebec Commission may enter upon the said lands or any part thereof and carry on lumbering operations thereon. The Quebec Commission shall within three months after the expiration of the said period of notice pay Ontario for all timber cut by it on the said lands, and also for all timber remaining uncut on the said lands at the expiration of the said period of notice, all according to the rates shown in Schedule B thereto.

2. (c) For the development of the waterpower at Rocher Fendu and the utilization in conjunction therewith of the lower half of the fall at the site known as Paquette, Ontario hereby demises and leases unto the Quebec Commission those certain parcels or tracts of lands and lands under the waters of the Ottawa River, situate in the Townships of Ross, Westmeath and Pembroke, in the County of Renfrew, in the Province of Ontario, containing by admeasurement an area of 10,000 acres, more or less, being the lands described in paragraph 2 of Schedule A hereto, together with such lands owned by Ontario, not exceeding in area two hundred acres, as shall be reasonably required for the site of the works necessary for the development of the said waterpower (including access to the said works) and which are of such nature that they cannot be conveniently and economically constructed on the lands described in the said paragraph 2 of Schedule A, or on lands in the Province of Quebec; and

2. (d) Ontario also hereby gives leave and license and due and full permission to the Quebec Commission to enter upon, possess, occupy, use and enjoy, for flooding purposes only, such additional lands owned by Ontario as are necessary to enable the head-water level of the Rocher Fendu waterpowers to be raised to a level of 350 feet and also to enable the lower half of the fall at the site known as Paquette to be utilized in conjunction therewith, and to enable water to be diverted pursuant to clause 7; provided, however, that the Quebec Commission shall give Ontario not less than twelve months' written notice before flooding the said lands or any part thereof, and that during the first three months of the said period of notice Ontario shall have the privilege of licensing or authorizing any person to enter on the said lands or any part thereof and carry on lumbering operations thereon until the expiration of the said period of notice. If during the said three months Ontario shall not have licensed or authorized any person to enter upon the said lands or any part thereof to carry on lumbering operations thereon, the Quebec Commission may enter upon the said lands or any part thereof and carry on lumbering operations thereon. The Quebec Commission shall within three months after the expiration of the said period of notice pay Ontario for all timber cut by it on the said lands, and also for all timber remaining uncut on the said lands at the expiration of the said period of notice, all according to the rates shown in Schedule B hereto.

SAVING, EXCEPTING AND RESERVING nevertheless unto Ontario in respect of lands referred to in this clause (2), all the ores, mines and minerals (including sand and gravel) which are or shall hereafter be found on or under the said lands, and access thereto; provided that nothing done in respect of or under or pursuant to such reservation shall interfere with or restrict or imperil the full development and use of the said waterpowers to the extent contemplated by this agreement, and provided further that the Quebec Commission may utilize free of charge in the construction of the works referred to in clause 6 any and all sand and gravel on or under the said lands, not otherwise disposed of by Ontario, and also any and all rock which does not contain ore or minerals.

TO HAVE AND TO HOLD the same with the appurtenances thereto unto the Quebec Commission for the full end and term of nine hundred and ninety-nine (999) years to be computed from the date hereof, yielding and paying as rental therefor, unto His Majesty and His Heirs and Successors in right of the Province of Ontario at the Treasury Department, Toronto, yearly and every year during the said term hereby created after the commencement date for rental hereinafter specified in this clause, in lawful money of Canada, at the rate of One Dollar ($1.00) for each and every average yearly horsepower of energy produced by the said Quebec Commission from Ontario's share of the water.

For the purpose of calculating the amount of such horsepower produced from Ontario's share of the water, under and by virtue of these presents, one-half of all the power produced in any lease year at each site, shall be deemed to have been developed from Ontario's share of the water at each respective site.

For the purpose of so calculating the power produced at the Rocher Fendu site all the power produced in the Grand Calumet Channel shall be included; provided that the power produced at the Rocher Fendu site in any lease year from Ontario's share of the water shall be deemed to be not greater than the quantity produced in excess of fifty thousand average yearly horsepower.

In the event that Ontario's share of the water or any portion thereof is utilized to produce electrical power or energy, then the amount of such electrical power or energy so produced shall be determined by suitable measurements at the generator terminals at the site of the development. In the event that Ontario's share of the water or any portion thereof is utilized to produce forms or types of power or energy other than electrical power or energy, then the amount thereof shall be determined by appropriate methods of measurement.

For the purposes of this lease, one horsepower shall be taken to be .746 kilowatts or 550 foot pounds of work per second.

Suitable measuring instruments shall be provided and records kept by the Quebec Commission which shall at all times allow access thereto and supply reports therefrom to Ontario.

Separate bills for rental shall be rendered for each and every site.

The said rentals shall commence on the first day the development of the said waterpowers or either of them is in operation and produces power or energy. The first payment of such rental shall be for the period from the said first day of operation and production to the 31st day of March next following, inclusive, and shall be paid on or before the 1st day of May immediately succeeding. Lease years after the said period for which the first payment is to be so made shall terminate on the 31st day of March in each and every year, and rental for each such lease year shall be paid on or before the 1st day of May next following.

The said rentals payable by the Quebec Commission hereunder shall be subject to review at the end of twenty-five (25) years from the date hereof, and thereafter at the end of each and every twenty-five (25) years until the expiry or earlier determination of this lease. If at the end of such twenty-five (25) year periods or any of them, it shall appear necessary or desirable that the amounts to be paid hereunder should be adjusted, then such adjustments may be made by agreement between the parties hereto, and failing such agreement shall be submitted to the arbitral tribunal as provided in Clause 46.

3. Ontario further covenants and agrees that it will as and when requested by the Quebec Commission acquire all lands and rights in the Province of Ontario not owned by Ontario, and which are necessary to enable the head-water level of the Carillon waterpower to be raised to a level of 135 feet, and to enable water to be diverted pursuant to Clause 7, in respect of the Carillon waterpower, and to provide the site and access referred to in Clause 2(a). The Quebec Commission before or at the time of making such request shall furnish Ontario with a complete detailed description of all such lands and rights. Upon such acquisition the said lands and rights shall by Order of the Lieutenant-Governor of Ontario-in-Council be added to the properties leased to the Quebec Commission by Clause 2, and shall be subject to the provisions of the said Clause 2.

The Quebec Commission shall when making request for the said lands and rights as aforesaid pay to Ontario, or such person or corporation as Ontario may direct, $2,462,933 for such portion thereof as is described in Schedule C hereto, regardless of the actual price paid by Ontario for the said lands and rights, and Ontario shall not be obliged or required to account for any difference between the said sum of $2,462,933 and the actual price paid for the said portion of the said lands and rights by Ontario. The said lands and rights in respect of which the Quebec Commission is to pay Ontario the said sum of $2,462,933, shall comprise only the lands and rights described in Schedule C hereto, and if the Quebec Commission requests Ontario to acquire other lands or rights pertaining to the Carillon waterpower the Quebec Commission shall pay Ontario the price paid by Ontario therefor, together with the cost of such acquisition. Subject to the provisions of Clause 9 damage to or encroachment upon any waterpower not within the limits of the lands described in paragraph 1 of Schedule A shall not be deemed to be included in lands and rights in respect of which the said sum of $2,462,933 is to be paid. The said sum of $2,462,933 shall be deemed to include compensation for the relocation or alteration of highways owned by Ontario within the limits described in Schedule C, the Quebec Commission undertaking to cause to be constructed in the Province of Quebec a highway connecting the Quebec provincial highway system with the relocated Ontario highway which shall extend to the interprovincial boundary line. If Ontario fails to acquire lands and rights in respect of the Carillon waterpower in accordance with the said complete detailed description referred to hereinabove in this clause, when so requested by the Quebec Commission, and if the Quebec Commission has fully complied with the provisions of this Clause 3, Ontario shall pay for all damage resulting therefrom in the Province of Ontario, but if the Quebec Commission fails to furnish Ontario with the complete detailed description of lands and rights hereinabove referred to in this Clause 3, or has otherwise failed to comply with such provisions, the Quebec Commission shall be liable for any additional expense resulting therefrom.

True copies of the plan referred to in Schedule C shall be verified by the signature of the Minister of Lands and Forests for the Province of Ontario, the Minister of Lands and Forests for the Province of Quebec and the Corporate seals of the Ontario Commission and the Quebec Commission, and shall be delivered to each of the parties hereto.

The "High Water Mark" shown on the said plan shall be deemed to be indicative only, and the lands shown as extending to the said "High Water Mark" shall be deemed to extend to the actual high water mark of the Ottawa River.

The inclusion of Periwig Island in the lands shown coloured red on the said plan shall not constitute an admission by Quebec or the Quebec Commission that the island lies within the Province of Ontario.

4. Ontario further covenants and agrees that it will as and when requested by the Quebec Commission acquire all lands and rights in the Province of Ontario not owned by Ontario, and which are necessary to enable the head-water level of the Rocher Fendu waterpower to be raised to 350 feet and to enable water to be diverted pursuant to Clause 7, in respect of the Rocher Fendu waterpower, and to enable the lower half of the fall at the site known as Paquette to be utilized in conjunction with the waterpower development at Rocher Fendu, and to provide the site and access referred to in Clause 2 (c). The Quebec Commission shall before or at the time of making such request furnish Ontario with a complete detailed description of all such lands and rights. Upon such acquisition the said lands and rights acquired pursuant to this Clause 4 shall by Order of the Lieutenant-Governor of Ontario-in-Council be added to the properties leased to the Quebec Commission by Clause 2, and shall be subject to the provisions of the said Clause 2. If Ontario fails to acquire lands and rights in accordance with the said complete detailed description referred to hereinabove in this clause, when so requested by the Quebec Commission, and if the

Quebec Commission has fully complied with the provisions of this Clause 4, Ontario shall pay for all the damage resulting therefrom in the Province of Ontario, but if the Quebec Commission fails to furnish Ontario with the complete detailed description of lands and rights hereinbefore referred to in this Clause 4, or has otherwise failed to comply with such provisions, the Quebec Commission shall be liable for any additional expense resulting therefrom.

For all lands and rights acquired by Ontario for the Quebec Commission either pursuant to the foregoing provisions of this Clause 4, or otherwise for the purposes of this agreement, being other than the lands and rights relative to the Carillon waterpower, described in Schedule C, the Quebec Commission shall pay to Ontario, or such person or corporation as Ontario may direct, the purchase price paid by or on behalf of Ontario to acquire such lands and rights together with the cost of acquiring them as and when the same are so acquired. For lands or rights, other than those described in Schedule C, Ontario shall not pay a higher price than such price as shall be approved by the Quebec Commission, provided, however, that if the owner or owners of such lands or rights shall be unwilling to accept the purchase price which the Quebec Commission is willing to approve, the said lands or rights shall be expropriated by or on behalf of Ontario, and Ontario shall pay as the purchase price thereof, the proper amount as determined in such expropriation proceedings. The Quebec Commission shall thereupon reimburse Ontario accordingly, and the costs of such expropriation shall be deemed to be included in the cost of acquiring the said lands or rights.

5. Whenever under the provisions of clauses 3 or 4 the Quebec Commission makes a proper request that Ontario acquire lands or rights, and complies fully with the provisions of the clause or clauses hereof relating to such request, Ontario shall do everything within the legislative authority of the Province of Ontario to put the Quebec Commission in possession of such lands or rights for the purposes of this agreement within three (3) months from the receipt of such request.

6. Upon the said properties hereby leased to the Quebec Commission the said Quebec Commission may construct buildings, dams, weirs, tunnels, races, flumes, sluices, pits and such other structures and works as it may deem necessary or desirable to develop the said Carillon and Rocher Fendu waterpowers and to utilize the lower half of the fall at the site known as Paquette subject to the provisions of The Lakes and Rivers Improvement Act, R.S.O. 1937, Chapter 45, provided, however, that should approval thereof, or of any part thereof, under the said The Lakes and Rivers Improvement Act or similar legislation of the Province of Ontario be refused, the Quebec Commission may appeal therefrom to the arbitral tribunal provided for in Clause 46 hereof. The Quebec Commission may appeal to the said arbitral tribunal from any decision of the Minister of Lands and Forests fixing the high water mark of the Ottawa River under the provisions of sub-section 3 of section 1a of The Bed of Navigable Waters Act, as re-numbered and amended by section 3 of The Statute Law Amendment Act, 1940, or similar legislation of the Province of Ontario.

7. The Quebec Commission may divert water in the Ottawa River from its natural channel as part of or pertaining to the development of waterpowers at Carillon and Rocher Fendu authorized hereby at or above the sites of the said respective waterpowers subject to returning the said water to the natural channel of the Ottawa River below the said respective sites.

8. The Quebec Commission shall and will indemnify and save harmless Ontario and the Ontario Commission from any loss, costs, damage, damages or expenses Ontario or the Ontario Commission may sustain, suffer or be put to by reason of or on account of the Quebec Commission exceeding the rights or powers hereby granted to it or exercising the same in a negligent manner.

9. Ontario and the Ontario Commission respectively release and discharge the Quebec Commission from all claims and demands for or in respect of damage or loss sustained by Ontario or the Ontario Commission in respect of any waterpower upon waters tributary to the Ottawa River owned or operated by Ontario or the Ontario Commission, occasioned by or on account of the Quebec Commission exercising in a proper manner the rights, powers and privileges hereby granted to it in accordance with the terms hereof.

10. Subject to the provisions of Clause 9 the Quebec Commission assumes any and all liability in respect to damage to or encroachment upon any waterpower not within the limits of the lands described in Schedule A occasioned by anything done or purported to be done under or pursuant to these presents by the Quebec Commission or anyone on its behalf, and the Quebec Commission agrees to indemnify and save harmless Ontario therefrom.

11. The Quebec Commission shall whenever so required by or on behalf of Ontario erect and maintain durable and efficient fishways for the free passage of fish.

12. Upon the expiry of the term of the lease of the properties hereby leased to the Quebec Commission or upon its earlier termination the said properties and all works constructed thereon shall revert to Ontario.

13. If and whenever the rentals hereby reserved or any part thereof shall be unpaid for ninety (90) days after any of the days on which same ought to be paid, the Lieutenant-Governor in Council of Ontario may upon five (5) years' notice to the Quebec Commission of its intention so

to do, and provided that default in payment continues, cancel the lease or license of that portion of the properties hereby leased or licensed to the Quebec Commission in respect of which default so continues, but such cancellation shall not affect the rights of any of the parties in respect of the remaining portion of any properties leased or licensed under these presents.

If at any time or times when any rentals hereby reserved or any part thereof payable by the Quebec Commission to Ontario shall remain unpaid after the same shall have become due and payable, there shall be any rentals due by the Ontario Commission to Quebec under later provisions of these presents the Ontario Commission may pay the said rentals due as aforesaid to Ontario instead of to Quebec in the amount in which the Quebec Commission is in default, or on account thereof, whereupon the Ontario Commission shall be credited accordingly.

14. No lands, rights or works erected thereon nor any essential part of the development of the said waterpowers shall be expropriated from the Quebec Commission by Ontario or under the authority of any present or future Act of the Legislature of the Province of Ontario. The Quebec Commission shall not be subject to the control by the Ontario Commission contemplated by The Power Commission Act, R.S.O. 1937, Chapter 62, and amendments thereto, or by any similar Act, save as regards electric power or energy distributed or sold in Ontario.

The Quebec Commission shall not be required to obtain a license or to file a prospectus or returns under The Extra Provincial Corporations Act, R.S.O. 1937, chapter 252 or The Companies Information Act, R.S.O. 1937, chapter 253, or any similar legislation.

15. The Quebec Commission shall pay to Ontario or to the Ontario Commission at the same times as the rentals under Clause 2 are payable a fair annual charge to recompense Ontario or the Ontario Commission for expenses incurred for works heretofore or hereafter constructed or executed to increase or regulate the flow of the Ottawa River at the said Carillon and Rocher Fendu waterpower sites or either of them, the amount of such annual charge to be based upon the benefit derived by the Quebec Commission from such works as compared with the benefit derived therefrom by the waterpower developments in the Provinces of Ontario and Quebec directly affected thereby. Provided, however, that nothing in these presents shall be deemed to authorize the construction of such works in the interprovincial section of the Ottawa River.

No such works shall be constructed until the Quebec Commission shall have been given three months' notice thereof in writing and if the Quebec Commission objects thereto an issue in respect of the construction or non-construction of such works shall be submitted to the arbitral tribunal provided for in Clause 46. The amount of such annual charges from time to time if not agreed upon by the Quebec Commission with the party constructing the said works shall be submitted to the said arbitral tribunal.

16. The Quebec Commission shall establish and collect an adequate general tariff (subject to the approval of the Lieutenant-Governor in Council of the Province of Quebec) of fees or charges to be paid by all persons and corporations in the Province of Quebec other than the parties to these presents who use the waters of the Ottawa River to recompense Ontario or the Ontario Commission for expenses incurred for works heretofore or hereafter constructed or executed to increase or regulate the flow of the Ottawa River, the said tariff to be based on a comparison between the benefit derived by each of the said persons or corporations and the benefit derived therefrom by the waterpower developments in the Provinces of Ontario and Quebec directly affected thereby, and subject to submission to the said arbitral tribunal in respect to the amount of such fees and charges. Waterpower developments of the Quebec Commission on the Ottawa River, other than at the said Carillon and Rocher Fendu sites, shall for the purposes of this Clause 16 be deemed to be waterpower developments of a corporation using the waters of the Ottawa River other than the parties to these presents, and the Quebec Commission shall be bound by the said general tariff in respect thereof and pay thereunder. All sums so collected and all amounts otherwise payable under this Clause 16 by the Quebec Commission shall be paid by the Quebec Commission to Ontario or the Ontario Commission whichever has or shall have incurred the expenses.

17. Ontario covenants and agrees that in so far as it may be within its legislative jurisdiction the legal remedies within the Province of Ontario of any person or corporation not a party to these presents, who shall claim that he has been or may be injured by reason of the development of the said Carillon or Rocher Fendu waterpower sites or the utilization of the lower half of the fall at the said site known as Paquette, shall be restricted to claims for damages only, and a claim for an injunction by the Courts of the Province of Ontario in respect of any such injury as may be alleged, shall be prohibited.

18. Notwithstanding The Mortain and Charitable Uses Act, R.S.O. 1937, Chapter 147, or any amendment thereto or substitution therefor, the Quebec Commission shall have the right to hold in the Province of Ontario the lands and rights hereby leased or licensed to it, and all works and improvements required for their full utilization and the production of power. Notwithstanding any general law or special Act such leased or licensed lands and such rights, works and improvements shall be exempt from all provincial taxes and fees payable to the Province of Ontario and from all municipal and school taxes and fees, and the Quebec Commission shall be wholly exempt from all provincial, municipal and school taxes and fees which might be imposed or assessed against it by reason of anything done under this agreement or arising herefrom.

19. Ontario covenants and agrees with the Quebec Commission that if and so long as the Quebec Commission pays the rental to be paid byi t, and performs its covenants, promises and agreements hereunder, the Quebec Commission shall and may peaceably possess and enjoy the lands leased and licensed to it hereby for the term hereby granted for the purposes of this agreement, without any interruption or disturbance from Ontario, or any other person or persons lawfully claiming by or under Ontario, or its predecessors in right and title. Notwithstanding anything contained in Clause 20 hereof, Ontario does, in particular, so covenant and agree with the Quebec Commission that the latter shall and may so possess and enjoy the lands leased or licensed to it in the townships of East Hawkesbury and West Hawkesbury in the County of Prescott without interruption or disturbance arising out of any lease heretofore granted by His Majesty in right of Canada of any portion thereof or of any rights therein for the development of water power, subject to the retention by His Majesty in right of Canada of such rights in the lands covered by any such lease as His Majesty in right of Canada may deem necessary for the requirements of navigation.

20. Any right, title or interest taken by the Quebec Commission hereunder shall be taken subject to the legislative authority or any prior right, title or interest of the Dominion of Canada thereover or therein to the extent, if any, of such legislative authority or prior right, title or interest.

21. Ontario covenants, promises and agrees to and with the Quebec Commission that it will from time to time and at all times, hereafter, upon every reasonable request execute or cause to be made, done or executed all such further and other lawful acts, deeds, things, devices and assurances in the law whatsoever, for the better, more perfectly and absolutely giving effect to the intention of these presents.

22. In so far as these presents relate to properties and rights in the Province of Ontario they shall be deemed to have been executed in the Province of Ontario and the law of Ontario shall apply.

23. (a) For the development of the Chenaux waterpower Quebec hereby leases unto the Ontario Commission those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Litchfield and Grand Calumet, in the County of Pontiac, in the Province of Quebec; containing by admeasurement an area of 1775 acres, more or less, being the lands described in paragraph 1 of Schedule D hereto, together with such lands owned by Quebec, not exceeding in area two hundred acres, as shall be reasonably required for the site of the works necessary for the development of the said waterpowers (including access to the said works) and which are of such nature that they cannot be conveniently and economically constructed on the lands described in the said paragraph 1 of Schedule D or on lands in the Province of Ontario.

23. (b) Quebec also hereby gives leave and license and due and full permission to the Ontario Commission to enter upon, possess, occupy, use and enjoy for flooding purposes only, such additional lands owned by Quebec as are necessary to enable the head-water level of the Chenaux waterpower to be raised to a level of 285 feet, and also to enable water to be diverted pursuant to Clause 28, provided, however, that the Ontario Commission shall give Quebec not less than twelve months' written notice before flooding the said lands or any part thereof, and that during the first three months of the said period of notice Quebec shall have the privilege of licensing or authorizing any person to enter upon the said lands or any part thereof and carry on lumbering operations thereon until the expiration of the said period of notice. If during the said three months Quebec shall not have licensed or authorized any person to enter upon the said lands or any part thereof to carry on lumbering operations thereon, the Ontario Commission may enter upon the said lands, or any part thereof and carry on lumbering operations thereon. The Ontario Commission shall within three months after the expiration of the said period of notice pay Quebec for all timber cut by it on the said lands, and also for all timber remaining uncut on the said lands at the expiration of the said period of notice, all according to the rates shown in Schedule E hereto.

23. (c) For the development of the waterpower at Des Joachims and the utilization in conjunction therewith of the upper half of the fall at the site known as Paquette, Quebec hereby leases unto the Ontario Commission those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Aberdeen, Aberford, Eddy, Edwards and Boisclerc, in the Counties of Pontiac and Temiscamingue, in the Province of Quebec, containing by admeasurement an area of 4,800 acres, more or less, being the lands described in paragraph 2 of Schedule D hereto, together with such lands owned by Quebec, not exceeding in area three hundred acres, as shall be reasonably required for the site of the works necessary for the development of the said waterpowers (including access to the said Works) and which are of such nature that they cannot be conveniently and economically constructed on the lands described in the said paragraph 2 of Schedule D or on lands in the Province of Ontario.

23. (d) Quebec also hereby gives leave and license and due and full permission to the Ontario Commission to enter upon, possess, occupy, use and enjoy for deepening purposes only, such other portions of the bed of the river Ottawa owned by Quebec as are necessary to enable the Ontario Commission to utilize in conjunction with the development of the waterpower of Des Joachims the upper half of the fall at the site known as Paquette; and

23. (e) Quebec also hereby gives leave and license and due and full permission to the Ontario Commission to enter upon, possess, occupy, use and enjoy for flooding purposes only, such additional lands owned by Quebec as are necessary to enable the head-water level of the Des Joachims waterpower to be raised to a level of 500 feet; and also to enable water to be diverted pursuant to Clause 28; provided, however, that the Ontario Commission shall give Quebec not less than twelve months' written notice before flooding the said lands or any part thereof, and that during the first three months of the said period of notice Quebec shall have the privilege of licensing or authorizing any person to enter upon the said lands or any part thereof and carry on lumbering operations thereon until the expiration of the said period of notice. If during the said three months Quebec shall not have licensed or authorized any person to enter upon the said lands or any part thereof to carry on lumber operations thereon, the Ontario Commission may enter upon the said lands or any part thereof and carry on lumbering operations thereon. The Ontario Commission shall within three months after the expiration of the said period of notice pay Quebec for all timber cut by it on the said lands, and also for all timber remaining uncut on the said lands at the expiration of the said period of notice, all according to the rates shown in Schedule E hereto.

23. (f) For the development of the Cave & Fourneaux waterpowers Quebec hereby leases unto the Ontario Commission those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Boisclerc, Campeau and Gendreau, in the County of Temiscamingue, in the Province of Quebec, containing by admeasurement an area of 2700 acres, more or less, being the lands described in paragraph 3 of Schedule D hereto, together with such lands owned by Quebec, not exceeding in area two hundred acres as shall be reasonably required for the site of the works necessary for the development of the said waterpowers (including access to the said works) and which are of such nature that they cannot be conveniently and economically constructed on the lands described in said Schedule D or on lands in the Province of Ontario; and

23. (g) Quebec also hereby gives leave and license and due and full permission to the Ontario Commission to enter upon, possess, occupy, use and enjoy for flooding purposes only, such additional lands owned by Quebec as are necessary to enable the head-water level of the Cave & Fourneaux waterpowers to be raised to a level of 575 feet, and also to enable water to be diverted pursuant to clause 28; provided, however, that the Ontario Commission shall give Quebec not less than twelve months' written notice before flooding the said lands or any part thereof, and that during the first three months of the said period of notice Quebec shall have the privilege of licensing or authorizing any person to enter upon the said lands or any part thereof and carry on lumbering operations thereon until the expiration of the said period of notice. If during the said three months Quebec shall not have licensed or authorized any person to enter upon the said lands or any part thereof to carry on lumbering operations thereon, the Ontario Commission may enter upon the said lands or any part thereof and carry on lumbering operations thereon. The Ontario Commission shall within three months after the expiration of the said period of notice pay Quebec for all timber cut by it on the said lands, and also for all timber remaining uncut on the said lands at the expiration of the said period of notice all according to the rates shown in Schedule E hereto.

Saving, Excepting and Reserving nevertheless unto Quebec in respect of lands referred to in paragraph (a) of this clause (23) the right to raise the head water level of the waterpowers known as Les Chats to elevation 247 and in respect of all lands referred to in this clause (23), all the ores, mines and minerals (including sand and gravel) which are or shall hereafter be found on or under the said lands, and access thereto, provided that nothing done in respect of or under or pursuant to such reservation shall interfere with or restrict or imperil the full development and use of the said waterpowers to the extent contemplated by this agreement, and provided further that the Ontario Commission may utilize free of charge in the construction of the works referred to in clause 27 any and all sand and gravel on or under the said lands, not otherwise disposed of by Quebec, and also any and all rock which does not contain ore or minerals.

To Have and to Hold the same with the appurtenances thereto unto the Ontario Commission for the full end and term of nine hundred and ninety-nine (999) years to be computed from the date hereof, yielding and paying as rental therefor unto His Majesty and His Heirs and Successors in right of the Province of Quebec at the Department of Lands and Forests, Quebec, yearly and every year during the said term hereby created, after the commencement date for rental hereinafter specified in this Clause, in lawful money of Canada, at the rate of One Dollar for each and every average yearly horsepower of energy produced by the said Ontario Commision from Quebec's share of the water.

For the purpose of calculating the amount of such horsepower produced from Quebec's share of the water, under and by virtue of these presents, one-half of all the power produced in any lease year at each site shall be deemed to have been developed from Quebec's share of the water at each respective site.

In the event that Quebec's share of the water or any portion thereof is utilized to produce electrical power or energy, then the amount of such electrical power or energy so produced shall be determined by suitable measurements at the generator terminals at the site of the development.

In the event that Quebec's share of the water or any portion thereof is utilized to produce forms or types of power or energy other than electrical power or energy, then the amount thereof shall be determined by appropriate methods of measurement.

For the purpose of this lease, one horsepower shall be taken to be .746 kilowatts or 550 foot pounds of work per second.

Suitable measuring instruments shall be provided and records kept by the Ontario Commission which shall at all times allow access thereto and supply reports therefrom to Quebec.

Separate bills for rental shall be rendered for each and every site.

The said rental shall commence on the first day the development of the said waterpowers at Cave & Fourneaux, Des Joachims and Chenaux or any of them is in operation and produces power or energy. The first payment of such rental shall be for the period from the said first day of operation and production to the said 31st day of March next following, inclusive, and shall be paid on or before the 1st day of May immediately succeeding. Lease years after the said period for which the first payment is to be made shall terminate on the 31st day of March, in each and every year, and rental for each such lease year shall be paid on or before the 1st day of May next following.

The said rentals payable by the Ontario Commission hereunder shall be subject to review at the end of twenty-five (25) years from the date hereof, and thereafter at the end of each and every twenty-five (25) years until the expiry or earlier determination of this lease. If at the end of such twenty-five (25) year periods or any of them, it shall appear necessary or desirable that the amounts to be paid hereunder should be adjusted, then such adjustments may be made by agreement between the parties hereto, and failing such agreement shall be submitted to the arbitral tribunal as provided for in Clause 46.

24. Notwithstanding the provisions of Clause 23 hereinabove written, until such time as the Quebec Commission shall pay Ontario the said sum of $2,462,933 specified in Clause 3, the Ontario Commission shall not be obliged to pay any rentals under and pursuant to the said provisions of Clause 23 in respect of the Des Joachims waterpower regardless of whether or not power or energy is developed therefrom; but in respect of the period after payment of the said sum of $2,462,933 to Ontario by the Quebec Commission the Ontario Commission shall pay according to the said provisions of Clause 23.

25. Quebec further covenants and agrees that it will as and when requested by the Ontario Commission acquire all lands and rights in the Province of Quebec not owned by Quebec, and which are necessary to enable the head-water level of the Cave & Fourneaux waterpower to be raised to 575 feet, and to enable the head-water level of the Des Joachims waterpower to be raised to 500 feet, and the head-water level of the Chenaux waterpower to be raised to 285 feet, and to enable water to be diverted pursuant to Clause 28, and the upper half of the fall at the site known as Paquette to be utilized in conjunction with the waterpower development at Des Joachims and to provide the sites and access referred to in Clauses 23 (a), 23 (c) and 23 (f).

The Ontario Commission shall before or at the time of making such request furnish Quebec with a complete detailed description of all such lands and rights. Upon such acquisition the said lands and rights acquired pursuant to this Clause 25 shall by order of the Lieutenant-Governor of Quebec-in-Council be added to the properties leased to the Ontario Commission by Clause 23, and shall be subject to the provisions of the said Clause 23. If Quebec fails to acquire lands and rights in accordance with the said complete detailed description referred to hereinabove in this Clause when so requested by the Ontario Commission, and if the Ontario Commission has fully complied with the provisions of this Clause 25, Quebec shall pay for all damage resulting therefrom in the Province of Quebec, but if the Ontario Commission fails to furnish Quebec with the complete detailed description of lands and rights hereinbefore referred to in this Clause 25, or has otherwise failed to comply with such provisions, the Ontario Commission shall be liable for any additional expense resulting therefrom.

For all lands and rights acquired by Quebec for the Ontario Commission pursuant to the foregoing provisions of this Clause 25, and for the purposes of this agreement, the Ontario Commission shall pay to Quebec, or such person or corporation as Quebec may direct, the purchase price paid by or on behalf of Quebec to acquire such lands and rights together with the cost of acquiring them as and when the same are so acquired. For such lands acquired under the provisions of this Clause 25, Quebec shall not pay a higher purchase price than such price as shall be approved by the Ontario Commission, provided however that if the owner or owners of such lands or rights shall be unwilling to accept the purchase price which the Ontario Commission is willing to approve, the said lands or rights shall be expropriated by or on behalf of Quebec, and Quebec shall pay as the purchase price thereof the proper amount as determined in such expropriation proceedings. The Ontario Commission shall thereupon reimburse Quebec accordingly, and the cost of such expropriation shall be deemed to be included in the cost of acquiring the said lands or rights.

26. Whenever under the provisions of Clause 25 the Ontario Commission makes a proper request that Quebec acquire lands or rights, and complies fully with the provisions of Clause 25, Quebec shall do everything within the legislative authority of the Province of Quebec to put the

Ontario Commission in possession of such lands or rights for the purposes of this agreement within three months from receipt of such request.

27. Upon the said properties hereby leased to the Ontario Commission the said Ontario Commission may construct buildings, dams, weirs, tunnels, races, flumes, sluices, pits and such other structures and works as it may deem necessary or desirable to develop the said Cave & Fourneaux, Des Joachims and Chenaux waterpowers, and to utilize the upper half of the fall at the site known as Paquette, subject to the provisions of The Water-Course Act, R.S.Q. 1941, Chapter 98, provided, however, that should approval thereof, or of any part thereof, under the said Water-Course Act or similar legislation of the Province of Quebec be refused, the Ontario Commission may appeal therefrom to the arbitral tribunal provided for in Clause 46 hereof.

28. The Ontario Commission may divert water in the Ottawa River from its natural channel as part of or pertaining to the development of waterpowers at Cave & Fourneaux, Des Joachims and Chenaux authorized hereby at or above the sites of the said respective waterpowers subject to returning the said water to the natural channel of the Ottawa River below the said respective sites.

29. The Ontario Commission shall and will indemnify and save harmless Quebec and the Quebec Commission from any loss, costs, damage, damages or expenses Quebec or the Quebec Commission may sustain suffer or be put to by reason of or on account of the Ontario Commission exceeding the rights or powers hereby granted to it or exercising the same in a negligent manner.

30. Quebec and the Quebec Commission respectively release and discharge the Ontario Commission from all claims and demands for or in respect of damage or loss sustained by Quebec or the Quebec Commission in respect of any waterpower upon waters tributary to the Ottawa River, owned or operated by Quebec or the Quebec Commission, occasioned by or on account of the Ontario Commission exercising in a proper manner the rights, powers and privileges hereby granted to it in accordance with the terms hereof.

31. Subject to the provisions of Clause 30 the Ontario Commission assumes any and all liability in respect of damage to or encroachment upon any waterpower not within the limits of the lands described in Schedule D occasioned by anything done or purported to be done under or pursuant to these presents by the Ontario Commission or anyone on its behalf, and the Ontario Commission agrees to indemnify and save harmless Quebec therefrom.

32. The Ontario Commission shall whenever so required by or on behalf of Quebec erect and maintain durable and efficient fishways for the free passage of fish.

33. Upon the expiry of the term of the lease of the properties hereby leased to the Ontario Commission, or upon its earlier termination the said properties and all works constructed thereon shall revert to Quebec.

34. If and whenever the rentals hereby reserved or any part thereof shall be unpaid for ninety (90) days after any of the days on which same ought to be paid, the Lieutenant-Governor in Council of Quebec, may upon five years' notice to the Ontario Commission of its intention so to do and provided that default in payment continues, cancel the lease of that portion of the properties hereby demised to the Ontario Commission in respect of which default continues but such cancellation shall not affect the rights of any of the parties in respect of the remaining portion of any properties leased or licensed under these presents.

If at any time or times when any rentals hereby reserved or any part thereof payable by the Ontario Commision to Quebec shall remain unpaid after the same shall have become due and payable, there shall be any rentals due by the Quebec Commission to Ontario under foregoing provisions of this presents the Quebec Commission may pay the said rentals due as aforesaid to Quebec instead of to Ontario in the amount in which the Ontario Commission is in default or on account thereof, whereupon the Quebec Commission shall be credited accordingly.

35. No lands, rights or works erected thereon nor any essential part of the development of the said waterpowers shall be expropriated from the Ontario Commission by Quebec or under the authority of any present or future Act of the Legislature of the Province of Quebec. The Ontario Commission shall not be subject to the control contemplated by the Electricity Act, R.S.Q. 1941, Chapter 99 and amendments thereto, or by any similar Act, save as regards electric power distributed or sold in Quebec. The provisions of An Act respecting the Exportation of Hydro-Electric Power, R.S.Q. 1941, Chapter 100, shall not apply to this agreement. The Ontario Commission shall not be required to obtain a license or to file a prospectus or returns under The Extra Provincial Companies Act, R.S.Q. 1941, Chapter 279, or The Companies Information Act, R.S.Q. 1941, Chapter 281 or any similar legislation.

36. The Ontario Commission shall pay to Quebec or to the Quebec Commission at the same times as the rentals under Clause 23 are payable a fair annual charge to recompense Quebec or the Quebec Commission for expenses incurred for works heretofore or hereafter constructed or executed to increase or regulate the flow of the Ottawa River at the said Cave & Fourneaux, Des Joachims and Chenaux waterpower sites or any of them, the amount of such annual charge to be based upon the benefit derived by the Ontario Commission from such works as compared with the benefit derived therefrom by the waterpower developments in the Provinces of Ontario and

Quebec directly affected thereby. Provided, however, that nothing in these presents shall be deemed to authorize the construction of such works in the inter-provincial section of the Ottawa River.

No such works shall be constructed until the Ontario Commission shall have been given three months' notice thereof in writing and if the Ontario Commission objects thereto an issue in respect of the construction or non-construction of such works shall be submitted to the arbitral tribunal provided for in Clause 46. The amount of such annual charges from time to time if not agreed upon by the Ontario Commission with the party constructing the said works shall be submitted to the said arbitral tribunal.

37. The Ontario Commission shall establish and collect an adequate general tariff (subject to the approval of the Lieutenant-Governor in Council of the Province of Ontario) of fees or charges to be paid by all persons and corporations in the Province of Ontario other than the parties to these presents who use the waters of the Ottawa River to recompense Quebec or the Quebec Commission for expenses incurred for works constructed or executed to increase or regulate the flow of the Ottawa River, the said tariff to be based on a comparison between the benefit derived by each of the said persons or corporations and the benefit derived therefrom by the waterpower developments in the Provinces of Ontario and Quebec directly affected thereby, and subject to submission to the said arbitral tribunal in respect to the amount of such fees and charges. Water power developments of the Ontario Commission on the Ottawa River, other than at the said Cave & Fourneaux, Des Joachims and Chenaux sites, shall for the purposes of this Clause 37 be deemed to be waterpower developments of a corporation using the waters of the Ottawa River other than the parties to these presents, and the Ontario Commission shall be bound by the said general tariff in respect thereof and pay thereunder. All sums so collected and all amounts otherwise payable under this Clause 37 by the Ontario Commission shall be paid by the Ontario Commission to Quebec or the Quebec Commission whichever has or shall have incurred the expense.

38. Quebec covenants and agrees that in so far as it may be within its legislative jurisdiction the legal remedies within the Province of Quebec of any person or corporation not a party to these presents, who shall claim that he has been or may be injured by reason of the development of the said Cave & Fourneaux, Des Joachims or Chenaux waterpower sites or the utilization of the upper half of the fall at the said site known as Paquette shall be restricted to claims for damages only, and a claim for an injunction by the Courts of the Province of Quebec in respect of any such injury as may be alleged shall be prohibited.

39. Notwithstanding The Mortmain Act, R.S.Q. 1941, c. 283, or any amendment thereto or substitution therefor, the Ontario Commission shall have the right to hold in the Province of Quebec, the lands and rights hereby leased or licensed to it and all works and improvements required for their full utilization and the production of power. Notwithstanding any general law or special Act such leased or licensed lands and such rights, works and improvements shall be exempt from all provincial taxes and fees payable to the Province of Quebec, and from all municipal and school taxes and fees and the Ontario Commission shall be wholly exempt from all provincial, municipal and school taxes and fees which might be imposed or assessed against it by reason of anything done under this agreement or arising therefrom.

40. Quebec covenants and agrees with the Ontario Commission that if and so long as the Ontario Commission pays the rental to be paid by it, and performs its covenants, promises and agreements hereunder, the Ontario Commission shall and may peaceably possess and enjoy the lands leased and licensed to it hereby for the term hereby granted for the purposes of this agreement, without any interruption or disturbance from Quebec, or any other person or persons lawfully claiming by or under Quebec or its predecessors in right and title.

41. Any right, title or interest taken by the Ontario Commission hereunder shall be taken subject to the legislative authority or any prior right, title or interest of the Dominion of Canada thereover or therein to the extent, if any, of such legislative authority or prior right, title or interest.

42. Quebec covenants, promises and agrees to and with the Ontario Commission that it will from time to time and at all times hereafter upon every reasonable request execute or cause to be made, done or executed all such further and other lawful acts, deeds, things, devices and assurances in the law whatsoever, for the better, more perfectly and absolutely giving effect to the intention of these presents.

43. In so far as these presents relate to properties and rights in the Province of Quebec they shall be deemed to have been executed in the Province of Quebec and the law of Quebec shall apply.

44. The granting of these presents shall not take away the lawful rights of timber owners or others to drive their logs or timber down the Ottawa River, not only within but also beyond the limits of the lands comprised in these presents.

45. In ascertaining, for the purposes of Clauses 15, 16, 36 and 37 hereof, the amount of expenses incurred for works to increase or regulate the flow of the Ottawa River, adequate compensation shall be included for all lands flooded whether Crown property or private property.

46. Any and all disputes arising between the parties hereto, or any of them, relative to these presents, or the fulfilment of any of the terms, provisions or conditions hereof shall be decided by an arbitral tribunal composed of three members, one of whom shall be chosen by the Lieutenant-Governor in Council of the Province of Ontario, another by the Lieutenant-Governor in Council of the Province of Quebec, and the third by the other two. In the event that either Lieutenant-Governor in Council does not choose a member or that the two members chosen do not agree upon the choice of the third member, the choice shall be made by the Chief Justice of Canada.

The findings of any two members of the arbitral tribunal who are of the same opinion shall be the findings of the tribunal, and if more than one item be submitted to the tribunal at the same time, this rule shall apply to each item.

The findings of the arbitral tribunal shall be final and binding upon the parties hereto, subject to the right of appeal hereinafter contained. Upon an appeal to the arbitral tribunal under Clause 6 or Clause 27 the arbitral tribunal may give such approval as in its opinion should be given and such approval shall be sufficient under the Acts concerned.

The arbitral tribunal shall have power to adjudicate upon the costs of arbitration, but such costs shall not include the remuneration of the two members of the tribunal appointed by the Lieutenant-Governor in Council of the Province of Ontario, and the Lieutenant-Governor in Council of the Province of Quebec respectively, each of whom shall be paid by the party appointing him. The remuneration of a member chosen by the Chief Justice of Canada in lieu of the Lieutenant-Governor in Council of a Province shall be paid by the Government of such Province.

The provisions of The Arbitration Act of Ontario, which are not inconsistent with this agreement, shall apply to the determination of disputes arising from matters to which the law of Ontario is made applicable by Clause 22 hereof. From the award on such disputes an appeal shall lie to the Court of Appeal for Ontario as from a final judgment of the Hight Court of Justice for Ontario.

The provisions of the Code of Civil Procedure of the Province of Quebec relating to arbitrations shall apply to the determination of disputes arising from matters to which the law of Quebec is made applicable by Clause 43 hereof except insofar as inconsistent with the provisions of this agreement. From the award on such disputes an appeal shall lie to the Court of King's Bench of the Province of Quebec as from a final judgment of the Superior Court of the Province of Quebec.

In the case of death, refusal, withdrawal or inability to act of one or more of the arbitrators each such arbitrator shall be replaced by another appointed in the same manner as the arbitrator whom he replaces.

47. This agreement shall not become binding upon the parties unless and until the Legislature of the Province of Ontario at its next session shall have confirmed and validated it to the extent of its legislative authority.

IN WITNESS WHEREOF the parties hereto have executed these presents as of the day and year first above written.

Schedule A

to an Agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario, and the Quebec Streams Commission.

Paragraph 1

All those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Hawkesbury East and Hawkesbury West, in the County of Prescott, in the Province of Ontario, containing by admeasurement an area of 1900 acres, more or less, which certain parcels or tracts of land and land under the waters of the Ottawa River may be more particularly described as follows:

All those portions of land and land covered by the waters of the Ottawa River lying below the high water mark, more particularly described as follows:

FIRSTLY: Commencing at the intersection of the said high water mark with the boundary line between the Province of Ontario and the Province of Quebec, and between the Township of Hawkesbury East in the Province of Ontario and the Seigniory of Rigaud in the Province of Quebec; thence in and along the said boundary line between the Province of Quebec and the Province of Ontario to its intersection with the production northerly of the boundary line between the Townships of Hawkesbury West and Longueil, in the County of Prescott, Province of Ontario; thence southerly following the said production to the high water mark of the Ottawa River; thence easterly following the said high water mark to the point of commencement.

SECONDLY: All islands and lands within the boundaries above described, not already disposed of by the Province, together with the appurtenances thereto.

Paragraph 2

All those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Ross, Westmeath and Pembroke, in the County of Renfrew, in the Province of Ontario, containing by admeasurement an area of 10,000 acres, more or less, which said certain parcels or tracts of land and land under the waters of the Ottawa River may be more particularly described as follows:

FIRSTLY: All those portions of the land and the lands covered by the waters of the Ottawa River lying below the high water mark, which may be more particularly described as follows:

COMMENCING at the intersection of the said high water mark with the boundary line between lots 8 and 9, concession 13, in the Township of Ross; thence following the production of the said boundary line north-easterly to the boundary between the Province of Ontario and the Province of Quebec; thence northwesterly, southerly and westerly along the said boundary to its intersection with the production north-easterly of a line midway between the boundary lines between lots 6 and 7 and lots 7 and 8, concession 2, Township of Pembroke; thence following the said production south-westerly to the high water mark of the Ottawa River; thence easterly, northerly and south-easterly following the said high water mark to the point of commencement.

SECONDLY: All islands and lands within the boundaries above described, not already disposed of by the Crown, together with the appurtenances thereto.

Schedule B

to an Agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario, and the Quebec Streams Commission.

CROWN DUES (SIMPLE DUES)

Black Walnut and Oak, per cubic foot	$ .06
Elm, Ash, Tamarac and Maple, per cubic foot	.06
Birch, Basswood, Cedar, Poplar, per cubic foot	.05
Red and White Pine, and Jackpine, per cubic foot	.07½
All other woods, per cubic foot	.03
Poplar sawlogs, per thousand feet, B.M.	2.00
Red and White Pine sawlogs, per thousand feet, B.M.	2.50

Basswood, Ash, Birch, Elm, Maple, Beech and Oak sawlogs, per thousand feet, B.M.	2.50
Hemlock, Tamarac, Jackpine and Cedar, per thousand feet, B.M.	1.50
Spruce and Balsam, per thousand feet, B.M.	2.00
Cordwood (hard), per cord	.50
Cordwood (soft), per cord	.25
Tan Bark, per cord	.60
Spruce Pulpwood, per cord	1.40
Balsam, per cord	.70
Other Pulpwood, per cord	.40
Railway Ties, per tie	.10
Boom Timber (all kinds), per thousand feet, B.M.	2.50
Cedar Poles, 30 feet and less, each	.25
Cedar Poles, 31 to 40 feet, each	.50
Cedar Poles, 41 to 50 feet, each	.75
Cedar Poles, 51 feet and over, each	1.00
Cedar Posts, each	.02
Jack Pine, per M. ft. B.M.	1.50

Schedule C

to an Agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario, and the Quebec Streams Commission.

The lands shown coloured red on the plan entitled "Plan of Lands at the Carillon Waterpower, in respect of which the Quebec Streams Commission is to pay Ontario the sum of $2,462,933 pursuant to clause 3 of the agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario and The Quebec Streams Commission" which said plan is identified by the signatures of the Minister of Lands and Forests for the Province of Ontario, the Minister of Lands and Forests of the Province of Quebec and by the corporate seals of the Ontario Commission and the Quebec Commission, and is to be deposited in the Registry Office for the Registry Division of the County of Prescott pursuant to legislation in that behalf.

(2) Subject to easements, reservations, right of access or of enjoyment not inconsistent with the use thereof for flooding purposes by the Quebec Commission, the lands shown coloured green on the said plan.

(3) The highways shown coloured purple on the said plan.

(4) The right to affect, by raising the head water level of the Carillon water power to a level of 135 feet, the waterworks and sewage systems for the Town of Hawkesbury subject to the obligation of permitting the said town to enter upon any of the lands described in paragraphs 1 and 2 of this schedule, and situated in the said town, for the purpose of laying, repairing and replacing all necessary pipes, and for the maintenance and improvement, if necessary, of the water intake, pumping station, sewage discharge outlet and pumping station and to do any of the said things.

Schedule D

to an Agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario, and the Quebec Streams Commission.

Paragraph 1

All those certain parcels or tracts of land and land under the waters of the Ottawa River situate in the Townships of Grand Calumet, and Litchfield, in the County of Pontiac, in the Province of Quebec, containing by admeasurement an area of 1,775 acres, more or less, which parcels or tracts of land and land under the waters of the Ottawa River may be more particularly described as follows:

All those portions of land and land covered by the waters of the Ottawa River lying below the ordinary high water mark, more particularly described as follows:

FIRSTLY: Commencing at the intersection of the said ordinary high water mark with the dividing line between the Townships of Litchfield and Clarendon, in the County of Pontiac, in the Province of Quebec; thence following in an upstream direction the said ordinary high water mark of the Ottawa River to the lower confluence of the two channels of the said river, namely:—the Grand Calumet Channel and the Rocher Fendu Channel; thence following the said ordinary high water mark on the left bank of the said Grand Calumet Channel to the intersection of the said ordinary high water mark with the division line between lots numbers 18 and 19, Range 1, Township of Litchfield, County of Pontiac, in the Province of Quebec; thence westerly following the production of the dividing line between lots numbers 18 and 19, Range 1, Township of Litchfield, to its intersection with the ordinary high water mark on the right bank of the said Grand Calumet Channel; thence in a downstream direction following the said ordinary high water mark on the right bank of Grand Calumet Channel to the above mentioned confluence of the said two Channels; thence following in an upstream direction the ordinary high water mark on the left bank of the Rocher Fendu Channel to its intersection with the dividing line between lots numbers 5 and 6, Range IX, Township of Grand Calumet, County of Pontiac, in the Province of Quebec thence following the production of said dividing line into the Rocher Fendu Channel to the boundary between the Province of Ontario and the Province of Quebec; thence following in a downstream direction the said interprovincial boundary to its intersection with the production into the Ottawa River of the dividing line between the Township of Litchfield and the Township of Clarendon, in the County of Pontiac, in the Province of Quebec; thence following north-easterly the said production to its intersection with the ordinary high water mark of the Ottawa River, this intersection being the point of commencement.

SECONDLY: All islands and lands within the boundaries above described, not already disposed of by the Province, together with the appurtenances thereto.

Paragraph 2

All those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Aberdeen, in the County of Pontiac, Aberford, Eddy, Edwards, Boisclerc in the County of Temiscamingue, in the Province of Quebec, containing by admeasurement an area of 4,800 acres, more or less, which parcels or tracts of land and land under the waters of the Ottawa River may be more particularly described as follows:

All those portions of land and land covered by the waters of the Ottawa River lying below ordinary high water mark, more particularly described as follows:

FIRSTLY: Commencing at the intersection of the said ordinary high water mark with the dividing line of lots numbers 45 and 46, Range IV, Township of Aberdeen, in the County of Pontiac, in the Province of Quebec; thence following the production of said dividing line into the Ottawa River to the boundary between the Province of Ontario and the Province of Quebec; thence in a general direction west, then north-west along the said interprovincial boundary to its intersection with the production southerly of the line of division between lots 31 and 32, Range V, Township of Boisclerc, County of Temiscamingue; thence following northerly the said production to its intersection with the ordinary high water mark of the Ottawa River: thence in a general direction south-east, then east following the said ordinary high water mark to the point of commencement.

SECONDLY: All islands and lands within the boundaries above described, not already disposed of by the Province, together with the appurtenances thereto.

Paragraph 3

All those certain parcels or tracts of land and land under the waters of the Ottawa River, situate in the Townships of Boisclerc, Campeau and Gendreau, in the County of Temiscamingue, in the Province of Quebec, containing by admeasurement an area of 2,700 acres, more or less, which parcels or tracts of land and land under the waters of the Ottawa River may be more particularly described as follows:

All those portions of land and land covered by the waters of the Ottawa River lying below the ordinary high water mark, more particularly described as follows:

FIRSTLY: Commencing at the intersection of the said ordinary high water mark with the division line of lots numbers 31 and 32, Range V, Township of Boisclerc, County of Temiscamingue, in the Province of Quebec; thence following the production of said dividing line into the Ottawa River to the boundary between the Province of Ontario and the Province of Quebec; thence in a general direction northwest along the said interprovincial boundary to its intersection with the production southwesterly of the line of division between lots 1 and 2, Range 1, Township of Gendreau, County of Temiscamingue; thence following said production in a northeast direction to its intersection with the ordinary high water mark of the Ottawa River; thence along this ordinary high water mark, in a general direction southeast, to the point of commencement.

SECONDLY: All islands and lands within the boundaries above described, not already disposed of by the Province, together with the appurtenances thereto.

Schedule E

to an Agreement dated the 2nd day of January, 1943, between His Majesty the King in right of the Province of Ontario, His Majesty the King in right of the Province of Quebec, The Hydro-Electric Power Commission of Ontario, and the Quebec Streams Commission.

CROWN DUES (SIMPLE DUES)

APPENDIX B

to An Act respecting the Water Powers of the River Ottawa.

P. C. 651

AT THE GOVERNMENT HOUSE AT OTTAWA

Tuesday, the 26th day of January, 1943.

PRESENT:

HIS EXCELLENCY
THE GOVERNOR GENERAL IN COUNCIL:

WHEREAS the governments of the provinces of Ontario and Quebec and the Hydro-Electric Power Commission of Ontario and the Quebec Streams Commission have negotiated an agreement for the purpose of developing water power at sites on the Ottawa River known as Cave & Fourneaux, Des Joachims, Chenaux, Rocher Fendu and Carillon, copy of which agreement is annexed hereto;

AND WHEREAS the Minister of Munitions and Supply reports that the respective parties to the agreement aforesaid have made application to him for co-operation by the Government of Canada to facilitate the development of the water powers aforesaid.

AND WHEREAS the Minister is of opinion that the development of additional power on the Ottawa River with the least possible delay is necessary for the operation of war industries;

THEREFORE, His Excellency the Governor General in Council, on the recommendation of the Minister of Munitions and Supply, concurred in by the Minister of Public Works, the Minister of Transport and the Minister of Mines and Resources, and pursuant to the powers vested in the Governor in Council by the War Measures Act, Chapter 206, R.S.C. 1927, is pleased thereby, to order that, notwithstanding anything contained in any other statute or law, and subject to the reservations hereinafter stated, lands belonging to His Majesty in right of Canada adjacent, contiguous or comprising any part of the bed of the Ottawa River required for the purposes of the agreement aforesaid, to the extent necessary to carry out the said agreement, be and they are hereby transferred as follows, namely:

Lands aforesaid in the Province of Ontario to His Majesty in right of the Province of Ontario, and lands aforesaid in the Province of Quebec to His Majesty in right of the Province of Quebec; the transfer aforesaid to have effect in the case of lands required for the purposes of each of the developments contemplated in the said agreement at the date of the approval of the site and plans of the works for such development pursuant to the Navigable Waters Protection Act, R.S.C. 1927, Chapter 140.

His Excellency in Council, on the same recommendation, with the concurrence aforesaid, and under the above cited authority is further pleased to order and doth hereby order,—

That there shall be excepted from the operation of the transfers effected hereby all lands required for navigation purposes, which said lands shall be described in the Order-in Council granting approval aforesaid under the Navigable Waters Protection Act; Provided, nevertheless, that with respect to the lands so excepted the transferee shall enjoy such rights as are not inconsistent with the requirements of navigation as determined in the said Order and are required for the purposes of the said agreement;

That from time to time hereafter there shall, upon every reasonable request made on behalf of His Majesty in right of the Province of Ontario or His Majesty in right of the Province of Quebec, be executed or done all such further lawful acts or things as may be necessary to give effect to the foregoing;

The Minister of Public Works or the Minister of Transport or the Minister of Mines and Resources, each in respect of matters under his departmental authority, be and he is hereby authorized and directed, on request of any party to the aforesaid agreement, to cancel and terminate, and if in his opinion it is necessary, expropriate any lease or privilege granted by His Majesty in right of Canada in respect of the Ottawa River and its tributaries or the use of the water thereof, save in respect of Chaudiere Falls, if the Minister concerned is satisfied that the continuation of the enjoyment of such lease or privilege would in any way interfere with the development of a water power as provided for in the said agreement: Provided that payment of any compensation required by law to be paid upon the cancellation, termination or expropriation of any such lease or privilege heretofore granted shall be assumed by the party making the request to such extent and upon such terms as may be arranged between the party aforesaid and the Minister concerned;

And further that nothing herein contained shall be deemed to authorize the construction of any work in, upon, over, under, through or across the Ottawa River otherwise than in accordance with the provisions of the Navigable Waters Protection Act aforesaid.

Certified to be a true copy.

(Seal)

A. D. P. HEENEY,
Clerk of the Privy Council.

CHAPTER 22

An Act to amend The Power Commission Act.

Assented to April 14th, 1943.

Session Prorogued April 14th, 1943.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Rev. Stat., c. 62, s. 13, subs. 1, amended.

1. Subsection 1 of section 13 of *The Power Commission Act*, as amended by section 27 of *The Statute Law Amendment Act, 1942*, is further amended by inserting after the word "securities" in the third line the words "of the Dominion of Canada or", so that the said subsection shall now read as follows:

Investment of funds.

(1) The Commission may, in its discretion, invest any funds, not required in carrying out the objects of the Commission, in the debentures or other securities of the Dominion of Canada or of the Province of Ontario, or in securities guaranteed by the Province of Ontario.

Rev. Stat., c. 62, s. 21, subs. 2, cl. *f*, re-enacted.

2.—(1) Clause *f* of subsection 2 of section 21 of *The Power Commission Act* is repealed and the following substituted therefor:

Acquisition of plant for transmitting and transforming power.

(*f*) construct, maintain and operate, and acquire by purchase, lease or otherwise, or without the consent of the owner thereof or of any person interested therein, enter upon, take possession of, expropriate and use all erections, machinery, plant and other works and appliances for the transmission, transformation, supply and distribution of electrical power or energy; and conduct, store, transmit, transform and supply electrical power or energy and steam for the purposes of this Act, and with lines of wires, poles, conduits, pipes, motors, transformers or other conductors, equipment or devices, receive, conduct, convey, transmit, transform, distribute, supply or furnish such electrical power or energy and steam to or from or for any person at any place, through, over, under, along, upon or across any land, public highway or public place, stream, water, watercourse, bridge, viaduct or railway, and through, over, upon or under the land of any person.

Rev. Stat., c. 62, s. 21, subs. 2, cl. *n*, repealed.

(2) Clause *n* of subsection 2 of the said section 21 is repealed.

Rev. Stat., c. 62, s. 26, re-enacted.

3. Section 26 of *The Power Commission Act* is repealed and the following substituted therefor:

Powers of Commission as to lines on highways.

26. In the exercise of the powers conferred and in carrying out any work authorized by this Act or any other general or special Act, the Commission has and always has had authority to put down, carry, construct, erect and maintain such conduits, wires, poles, towers and other equipment and works used in the transmission and distribution of electrical power and energy as it deems necessary or desirable, under, along, across or upon any public street or highway and to remove or replace them without taking any of the proceedings prescribed by this Act for the taking of land without the consent of the owner thereof, and the provisions of this Act with regard to compensation for lands so taken shall not apply, but the location of any such conduits, wires, poles, towers, equipment or works to be hereafter put down, carried, constructed or erected under, along, across or upon a public street or highway shall be agreed upon by the Commission and the municipal corporation or other authority having control of the public street or highway, and in case of disagreement shall be determined by the Ontario Municipal Board.

Rev. Stat., c. 62, s. 39, subs. 1, amended.

4. Subsection 1 of section 39 of *The Power Commission Act* is amended by adding at the end thereof the words "and the Commission shall have power and shall be deemed always to have had power to make such securities bear such rate or rates of interest and make such securities payable as to principal and interest at such time or times and in such manner and at such place or places in Canada or elsewhere and in the currency or currencies of such country or countries as the Commission with the approval of the Lieutenant-Governor in Council may determine", so that the said subsection shall now read as follows:

General borrowing powers.

(1) Subject to the approval of the Lieutenant-Governor in Council, the Commission may borrow money and issue notes, bonds, debentures and other securities or do any of these things for any of the purposes of the Commission, and the Commission shall have power and shall be deemed always to have had power to make such securities bear such rate or rates of interest and make such securities payable as to principal and interest at such time or times and in such manner and at such place or places in Canada or elsewhere and in the currency or currencies of such country or countries as the Commission with the approval of the Lieutenant-Governor in Council may determine.

Rev. Stat., c. 62, s. 47, subs. 5, amended.

5.—(1) Subsection 5 of section 47 of *The Power Commission Act* is amended by inserting after the word "works" in the third line the words "or procured pursuant to subsection 8 or 9", so that the said subsection shall now read as follows:

Municipal Contracts.

(5) The Commission may contract with any municipal corporation or person for the supply of electrical power or energy from such works or procured pursuant to subsection 8 or 9 at such rates and upon such terms and conditions as the Commission may deem proper.

Rev. Stat., c. 62, s. 47, subs. 7 amended.

(2) Subsection 7 of the said section 47 is amended by inserting after the figure "2" in the third line the words "or procured pursuant to subsection 8 or 9", so that the said subsection shall now read as follows:

Subs. 6 retroactive.

(7) Subsection 6 shall apply to municipal corporations supplied with power from works covered by an agreement authorized under subsection 2 or procured pursuant to subsection 8 or 9, and shall be deemed so to have applied since the 18th day of April, 1933.

Rev. Stat., c. 62, s. 47, amended.

(3) The said section 47 is further amended by adding thereto the following subsections:

Diversion of power.

(8) The Commission may divert electrical power or energy from any system as defined in section 65 for use in any of the territorial districts of the Province paying to the system supplying such power such price as shall be determined by the Commission and including such price in the annual costs and charges referred to in subsection 2 in such manner as the Commission may determine.

Purchase of power.

(9) The Commission may purchase electrical power or energy for use in any of the territorial districts of the Province at

such price and upon such terms as it may see fit including such price in the annual costs and charges referred to in subsection 2 in such manner as the Commission may determine.

Effect of section.

(4) This section shall be deemed to have effect from the 18th day of April, 1933, and every diversion or purchase of power by the Commission in the manner provided by subsections 8 and 9 of section 47 of *The Power Commission Act* as enacted by this section is confirmed and any agreement between His Majesty and the Commission made pursuant to subsection 2 of section 47 of *The Power Commission Act* since the 18th day of April, 1933, shall be deemed to have contained a provision permitting and authorizing the Commission at such time or times as it may see fit during the term of the agreement to procure power from any of the said systems or purchase it elsewhere for distribution in any of the said territorial districts, and to charge therefore as authorized by subsection 8.

Rev. Stat., c. 62, s. 53, subs. 3, amended.

6. Subsection 3 of section 53 of *The Power Commission Act* is amended by inserting after the word "interest" in the fifth line the words "and principal", so that the said subsection shall now read as follows:

Security.

(3) The secretary-treasurer shall give security for the due accounting of all sums of money coming to his hands and for the payment over to the township treasurer of the sums required from time to time to meet payments coming due for interest and principal and to provide a sinking fund for the payment of any debentures issued for the works undertaken by the trustees under any contract with the Commission.

Rev. Stat., c. 62, s. 58 amended.

7. Section 58 of *The Power Commission Act* is amended by inserting after the word "energy" in the third line the words "by or to the Commission", so that the said section shall now read as follows:

Effect of approval of agreements by Lieutenant-Governor in Council.

58. Where the Commission has heretofore entered or shall hereafter enter into an agreement for the supplying of electrical power or energy by or to the Commission or for any other work or service to be done or supplied by or to the Commission, and such agreement has been or shall hereafter be submitted to and approved by the Lieutenant-Governor in Council, such agreement shall thereupon be valid and binding upon the parties thereto and shall not be open to question upon any grounds whatsoever, anything in this Act or in any other Act to the contrary notwithstanding.

Rev. Stat., c. 62, s. 71, subs. 4, (1939, c. 35, s. 3), amended.

8. Subsection 4 of section 71 of *The Power Commission Act*, as enacted by section 3 of *The Power Commission Amendment Act, 1939*, is amended by adding thereto the words "and may thereupon utilize for the supply and distribution of electrical power or energy in any rural power district so formed or reconstituted or altered or which may have been so formed, or reconstituted or altered all or any portion of the revenue which may be derived or may have been derived from any contract for the distribution of electrical power or energy made between the Commission and the corporation of any township forming such rural power district or any part thereof", so that the said subsection shall now read as follows:

Alterations of boundaries.

(4) The Commission may unite any two or more rural power districts in one rural power district and may join into a rural power district or may include in a rural power district one or more townships or any part or parts thereof whether already part of any rural power district or not and may alter the boundaries of any rural power district, and may thereupon utilize for the supply and distribution of electrical power or energy in any rural power district so formed or reconstituted or altered or which may have been so formed, or reconstituted or altered all or any portion of the revenue which may be derived or may have been derived from any contract for the distribution of electrical power or energy made between the Commission and the corporation of any township forming such rural power district or any part thereof.

Rev. Stat., c. 62, s. 78, amended.

9. Section 78 of *The Power Commission Act* as amended by section 6 of *The Power Commission Amendment Act, 1939* is, further amended by inserting after the word "district" in the third line the words "or any section thereof", so that the said section shall now read as follows:

Rates to be fixed by Commission.

78. The rates to be charged to customers receiving electrical power or energy from the Commission in a rural power district or any section thereof shall be fixed by the Commission under this Act.

Short title.

10. This Act may be cited as *The Power Commission Amendment Act, 1943.*

CHAPTER 23

An Act to amend The Power Commission Insurance Act.

Assented to April 14th, 1943.

Session Prorogued April 14th, 1943.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Rev. Stat., c. 67, s. 2, subs. 1, amended.

1.—(1) Subsection 1 of section 2 of *The Power Commission Insurance Act* is amended by inserting after the word "corporation" in the fourth line the words "or with His Majesty pursuant to the

Government Annuities Act (Canada)", so that the said subsection shall now read as follows:

Agreement between Commission and municipal authority.

(1) The Commission may enter into an agreement with any municipal authority or group of municipal authorities authorizing the Commission to contract with an insurance corporation or with His Majesty pursuant to the *Government Annuities Act* (Canada) for insurance for the employees of such municipal authority or municipal authorities by way of service annuities, income annuities or death or disability benefits or such other benefits as may by the Commission be deemed expedient and for payment by the municipal authority or authorities of the cost of such insurance and the cost of or incidental to the administration and operation of the contract, and any other expenses incurred or for which the Commission may be liable in connection therewith.

Rev. Stat., c. 67, s. 2, subs. 2, amended.

(2) Subsection 2 of the said section 2 is amended by inserting after the word "corporation" in the fourth line the words "or with His Majesty pursuant to the *Government Annuities Act* (Canada)", so that the said subsection shall now read as follows:

Agreement with insurance corporation or His Majesty.

(2) The Commission on behalf of any such municipal authority or group may, with the approval of the Lieutenant-Governor in Council, enter into an agreement with an insurance corporation or with His Majesty pursuant to the *Government Annuities Act* (Canada) for providing insurance for the employees of such municipal authority or group by way of service annuities, income annuities or death or disability benefits, or such other benefits as may by the Commission be deemed expedient, and for the enforcement of any such contract and for the administration of its operation by the Commission or by any other person or corporation on behalf of such municipal authority or group.

Rev. Stat., c. 67, s. 2, subs. 3, (1941, c. 43, s. 1) amended.

(3) Subsection 3 of the said section 2, as enacted by section 1 of *The Power Commission Insurance Amendment Act, 1941*, is amended by inserting after the word "corporation" in the fifth line the words "or with His Majesty pursuant to the *Government Annuities Act* (Canada)", so that the said subsection shall now read as follows:

Power to amend.

(3) Notwithstanding anything contained in subsection 1 or in any agreement made thereunder, the Commission, with the approval of the Lieutenant-Governor in Council, may enter into further agreements with any such insurance corporation or with His Majesty pursuant to the *Government Annuities Act* (Canada), varying, adding to or modifying as the Commission may deem necessary or advisable any agreement entered into under subsection 2 or

this subsection and each such further agreement shall be legal, valid and binding upon each municipal authority on behalf of which it is entered into and upon the successors assigns of such municipal authority.

Rev. Stat., c. 67, amended.

2. *The Power Commission Insurance Act* is amended by adding thereto the following section:

Agreement between municipal authority and His Majesty.

4. Upon the recommendation of the Commission and with the approval of the Lieutenant-Governor in Council, a municipal authority may enter into an agreement with His Majesty pursuant to the *Government Annuities Act* (Canada) for providing insurance for the employees of such municipal authority by way of service annuities, income annuities or death or disability benefits, or such other benefits as may by the Commission be deemed expedient.

Commencement of Act.

3. This Act shall come into force on the day upon which it receives the Royal Assent.

Short title.

4. This Act may be cited as *The Power Commission Insurance Amendment Act, 1943*.

CHAPTER 29

An Act respecting The Hydro-Electric Power Commission of Ontario, Steep Rock Iron Mines Limited and The Ontario-Minnesota Pulp and Paper Company Limited.

Assented to February 19th, 1943.

Session Prorogued April 14th, 1943.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Certain contracts declared legal and valid.

1.—(1) Notwithstanding anything contained in *The Power Commission Act*, *The Steep Rock Iron Ore Development Act, 1942*, or any other Act of this Legislature, the contract between Steep

Rock Iron Mines Limited and The Hydro-Electric Power Commission of Ontario dated the 8th day of February, 1943, set out in Schedule A hereto, is hereby ratified and confirmed and declared to be legal, valid and binding upon the parties thereto, their successors and assigns, and Rev. Stat., c. 62 1942, c. 35.

(*a*) the contract between The Hydro-Electric Power Commission of Ontario and Steep Rock Iron Mines Limited, dated the 10th day of April, 1942, set out in Schedule B to *The Steep Rock Iron Ore Development Act, 1942*, relating to the supply of power to Steep Rock Iron Mines Limited and other matters as therein provided; and

(*b*) the contract between The Hydro-Electric Power Commission of Ontario and Steep Rock Iron Mines Limited, dated the 10th day of April, 1942, set out in Schedule C to *The Steep Rock Iron Ore Development Act, 1942*, relating to the construction of a power transmission line, the furnishing of security by Steep Rock Irons Mines Limited to The Hydro-Electric Power Commission of Ontario and other matters as therein provided,

as amended, shall continue in full force and effect.

Idem.

(2) Notwithstanding the provisions of subsection 1,

(*a*) the contract between The Hydro-Electric Power Commission of Ontario and The Ontario-Minnesota Pulp and Paper Company Limited and The Seine River Improvement Company Limited, dated the 10th day of April, 1942, set out in Schedule A to *The Steep Rock Iron Ore Development Act, 1942*, relating to the supply of power to The Ontario-Minnesota Pulp and Paper Company Limited and other matters as therein provided; and

(*b*) the contract between The Ontario-Minnesota Pulp and Paper Company Limited, Steep Rock Iron Mines Limited and The Seine River Improvement Company Limited, dated the 10th day of April, 1942, set out in Schedule D to *The Steep Rock Iron Ore Development Act, 1942*, relating to certain obligations undertaken by Steep Rock Iron Mines Limited and to certain other matters as therein provided,

shall continue in full force and effect.

2. This Act shall come into force on the day upon which it receives the Royal Assent. Commencement of Act.

3. This Act may be cited as *The Steep Rock Iron Ore Development Act, 1943*. Short title.

SCHEDULE A

to An Act respecting The Hydro-Electric Power Commission of Ontario, Steep Rock Iron Mines Limited and The Ontario-Minnesota Pulp and Paper Company Limited.

THIS AGREEMENT made in duplicate the 8th day of February, A.D. 1943;

BETWEEN:

STEEP ROCK IRON MINES, LIMITED, hereinafter called the "Company"

OF THE FIRST PART,

—and—

THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO, hereinafter called the "Commission"

OF THE SECOND PART.

WHEREAS by an Indenture dated the 10th day of April, 1942, the parties hereto agreed for a supply of electrical power and energy by the Commission to the Company at the Company's plant at its mining properties in the vicinity of Steep Rock Lake in the District of Rainy River, which said agreement is designated "the Steep Rock Power Agreement";

AND WHEREAS the said Steep Rock Power Agreement provides that the point of delivery for power supplied thereunder shall be the one hundred and ten thousand (110,000) volt bus in the Commission's Port Arthur Transformer Station at or near the City of Port Arthur in the Province of Ontario;

AND WHEREAS the said Steep Rock Power Agreement provides that the point of measurement for power supplied thereunder shall be at the terminus of the Company's one hundred and ten thousand (110,000) volt transmission line in or immediately adjacent to the existing Moose Lake Plant of The Seine River Improvement Company, Limited;

AND WHEREAS the said Steep Rock Power Agreement provides that the Company shall pay for power delivered thereunder according to a horsepower rate and a kilowatt-hour rate specified in Clause 5 (*c*) thereof;

AND WHEREAS by an Indenture also dated the 10th of April, 1942, the parties hereto entered into an agreement which is designated "the Supplementary Agreement", whereby amongst other things it is agreed that the Company shall pay all power bills properly rendered to it by the Commission for all the electrical power and energy supplied by the Commission to The Ontario-Minnesota Pulp and Paper Company, Limited, under a certain Indenture dated the 10th day of April, 1942, made between the Commission, The Ontario-Minnesota Pulp and Paper Company, Limited and The Seine River Improvement Company, Limited, which is called "Replacement Power" in the said latter agreement;

AND WHEREAS it is also agreed in the Supplementary Agreement that the Commission shall construct for the Company a certain transmission line, provide a right of way therefor from the Commission's Port Arthur Transformer Station to the Moose Lake plant of The Seine River Improvement Company, Limited, and install certain terminal equipment, all at the expense of the Company, and with ownership to be vested in the Company; and it is further provided in the said agreement that the said transmission line and equipment shall be operated and maintained by the Commission or its nominee, and the Company shall reimburse the Commission therefor;

AND WHEREAS the said Supplementary Agreement provides that the Company shall pay the Commission for Replacement Power supplied by the Commission to The Ontario-Minnesota Pulp and Paper Company, Limited at a horsepower rate specified in Clause 1 thereof;

AND WHEREAS the said Supplementary Agreement provides that the Company shall furnish and deposit with the Commission certain security;

AND WHEREAS the Commission and the Company are desirous of changing the terms of the said Steep Rock Power Agreement, and of the said Supplementary Agreement, relating to the above recited matters, and amending the said agreements accordingly;

AND WHEREAS the said Steep Rock Power Agreement, and the said Supplementary Agreement were confirmed, validated and made binding upon the parties by an Act of the Legislature of the Province of Ontario, being The Steep Rock Iron Ore Development Act, 1942;

Now Therefore this Indenture Witnesseth that in consideration of the premises and other considerations herein appearing, the Parties agree each with the other, subject to ratification by legislation as hereinafter specified, as follows:—

1. Subclause 2 (a) of the Steep Rock Power Agreement is struck out and the following substituted therefor,—

2. The Commission Agrees:

(a) To deliver power at the point of delivery herein defined as the terminus of the Commission's one hundred and ten thousand (110,000) volt transmission line in or immediately adjacent to the existing Moose Lake plant of The Ontario-Minnesota Pulp and Paper Company, Limited;

2. Subclause 5 (c) of the Steep Rock Power Agreement is struck out and the following substituted therefor,—

5. (c) To pay to the Commission in monthly payments according to the following schedule of horsepower rates, namely:

For Development Power, Thirty Dollars ($30.00) per horsepower per annum;

For all Operation Power for the period of two years from the Commencement Date, Thirty Dollars ($30.00) per horsepower per annum;

For Operation Power thereafter up to and including two thousand five hundred horsepower (2,500 H.P.), Thirty Dollars ($30.00) per horsepower per annum;

For all Operation Power thereafter in excess of two thousand five hundred horsepower (2,500 H.P.), Nineteen Dollars ($19.00) per horsepower per annum;

All based on the maximum ten (10) minute integrated demand and eighty-five percent (85%) minimum power factor provided in this agreement, being the horsepower demand for the month as defined in subclause 7 (b) at a maximum monthly load factor of eight-five percent (85%);

In addition to payment at the said horsepower rates to pay to the Commission in monthly payments at the rate of three decimal five (3.5) mills which is seven-twentieths (7/20th) of a cent per kilowatt-hour for all energy taken in excess of the energy equivalent to the amount of power for which the customer is paying at a monthly load factor of eight-five percent (85%);

3. Subclause 7 (c) of the Steep Rock Power Agreement is struck out and the following substituted therefor,—

7. (c) The point of measurement of the power covered by this agreement shall be at the terminus of the Commission's one hundred and ten thousand (110,000) volt transmission line in or immediately adjacent to the existing Moose Lake plant of The Ontario-Minnesota Pulp and Paper Company, Limited;

4. Subclause 7 (d) of the Steep Rock Power Agreement is struck out and the following substituted therefor,—

7. (d) Whenever the said measuring equipment is connected at other than the point of delivery the readings shall be subject to correction and shall be corrected to give results such as would be obtained by instruments connected at the point of delivery; such corrections shall be based upon tests or calculations by the Commission;

5. The fifth and sixth recitals of the Supplementary Agreement are struck out;

6. The seventh recital of the Supplementary Agreement is struck out and the following substituted therefor,—

AND WHEREAS the Company has agreed to pay to the Commission from time to time and at all times during the continuance of these presents all power bills properly rendered to it by the Commission for replacement power under the said Replacement Power Agreement at the rate of Thirty Dollars ($30.00) per horsepower per annum up to and including Ten Thousand Five Hundred Horespower (10,500 H.P.) and for all replacement power in excess of Ten Thousand Fiver Hundred Horsepower (10,500 H.P.) at the rate of Nineteen Dollars ($19.00) per horsepower per annum;

7. Clause 1 of the Supplementary Agreement is struck out and the following substituted therefor,—

1. The Company Agrees:

That it will from time to time and at times during the continuance of these presents whenever bills are properly rendered to it by the Commission and within twenty (20 days from the receipt thereof, pay to the Commission for replacement power supplied to The Ontario-Minnesota Pulp and Paper Company, Limited under the Replacement Power Agreement at the rate of Thirty Dollars ($30.00) per horsepower per annum up to and including Ten Thousand Five Hundred Horsepower (10,500 H.P.), and for all replacement power in excess of Ten Thousand Five Hundred Horsepower (10,500 H.P.) at the rate of $19.00 per horsepower per annum, the amount of replacement power so supplied being calculated according to the provisions of the said Replacement Power Agreement, and also all monies and costs which the Commission shall have been required to pay or incur under Clauses 25, 27 and 30 of the said Replacement Power Agreement;

8. Clause 2 of the Supplementary Agreement is amended by adding as an additional paragraph thereto the following,—

The Company will reimburse the Commission for any and all law costs to which it may be rendered liable by reason of any matter or thing arising from these presents, the said power agreement with the Company, any agreement relating to Replacement Power, and also in respect of all cost and expense which it may incur in respect of restoring the normal waterflow in the said Seine River through Steep Rock Lake;

9. Clause 3 of the Supplementary Agreement is struck out and the following substituted therefor,—

It is agreed that the Commission shall construct, operate and maintain at its own expense a suitable transmission line and provide a right of way therefor from the Commission's Port Arthur Transformer Station to the said Moose Lake plant in order to facilitate the transmission of power from its said transformer station to the Company's mining properties at Steep Rock and the delivery of power under the said Replacement Power Agreement; The ownership of the said transmission line and right of way shall vest in the Commission;

10. Clause 4 of the Supplementary Agreement is struck out and the following substituted therefor,—

It is agreed that the Commission will purchase and install at its own expense all termina equipment such as relays, switching, lightning protection and synchronous condensers necessary or convenient to enable power to be delivered to the Company and under the Replacement Power Agreement to The Ontario-Minnesota Pulp and Paper Company, Limited, and to enable the power plants formerly belonging to The Seine River Improvement Company, Limited and now owned by The Ontario-Minnesota Pulp and Paper Company, Limited at Fort Frances, Calm Lake and Sturgeon Falls to be operated in parallel with the Commission's system and equipment to enable The Ontario-Minnesota Pulp and Paper Company, Limited to receive and control power under the Replacement Power Agreement without interfering with the power operations of The Ontario-Minnesota Pulp and Paper Company, Limited;

Ownership of the said equipment referred to in the immediately preceding paragraph shall vest in the Commission;

It is agreed that if necessary to use the electric generators at present installed in the said Moose Lake plant as synchronous condensers, the Commission will pay the total cost, expense and rentals involved therein;

11. Clause 5 of the Supplementary Agreement is struck out;

12. Clause 7 of the Supplementary Agreement is struck out;

13. Clause 8 of the Supplementary Agreement is struck out;

14. All the other terms and conditions of the Steep Rock Agreement and the Supplementary Agreement shall continue in full force and effect;

15. This Amending Agreement shall not become binding upon the Parties unless and until an Act of the Legislature of the Province of Ontario shall be passed at the next session of the said Legislature confirming and validating it, and is given Royal Assent, and brought into force, whereupon this Amending Agreement shall become binding, and the Steep Rock Agreement and the Supplementary Agreement continue in force as amended hereby;

IN WITNESS WHEREOF the Company and the Commission have caused this agreement to be executed, attested by the affixing of their corporate seals and by the signatures of their proper officers duly authorized thereto.

APPENDIX II

Report by The Hydro-Electric Power Commission of Ontario Relating to Differences in the Cost of Power Supplied Municipalities and Rural Power Districts in Ontario

To His Honour
The Honourable Albert Matthews, LL.D.
Lieutenant-Governor of Ontario

At the 1943 Session of the Legislative Assembly of the Province of Ontario the following motion was passed:

> "That in the opinion of this House, The Hydro-Electric Power Commission of Ontario be required to,—
>
> (a) Examine the causes of differences in the cost of power supplied municipalities and rural power districts in Ontario;
>
> (b) Consider, in conjunction with partner municipalities concerned, ways and means of eliminating or reducing such differences.
>
> (c) Consider the advantages and disadvantages of service charges in connection with rural billing and the advisability of changes in this practice.
>
> And that The Hydro-Electric Power Commission of Ontario be required to report to the Lieutenant-Governor in Council the result of their examination and consideration of such matters, said report to be tabled in this House within 15 days after the opening of the next ensuing Session and copies to be furnished to all Members of the Legislative Assembly as soon as the report is available."

The Hydro-Electric Power Commission of Ontario reports as follows:

(a) Examine the causes of differences in the cost of power supplied municipalities and rural power districts in Ontario;

Differences in the cost of power supplied municipalities—by which is understood the cost per horsepower for the wholesale supplies of power provided for and delivered to the municipalities by the Commission—result from the fact that in accordance with Section 61 of The Power Commission Act, "the price payable for power or energy by any municipal corporation shall be the cost to the Commission" of supplying and delivering such power.

The Commission therefore, **under contract** supplies power to each municipality **at cost.** This is the basis on which Hydro was founded in the Province of Ontario, and on which it has been operated up to the present time.

Originally a group of municipalities entered into a partnership with each other to purchase and/or generate power to supply their requirements, each to pay the same rate per horsepower at the point of supply and to share, on an equitable proportional basis, the costs of transforming and transmitting facilities constructed to deliver this power. As other municipalities came into partnership the groups or systems were enlarged but the same basis governed and is clearly set out in the agreements which each municipal partner executes. It has never been changed. In each case a municipality by vote receives the approval of the municipal electors before entering into partnership, and signing a contract.

In each system the costs of power generated or purchased are pooled, together with the costs appertaining to interconnecting lines and equipment, and the resulting base generating cost per horsepower within the system is the same to all. The transmission cost of power supplied to any municipality under its agreement is dependent upon the distance from source of supply, the quantity of power to be delivered, and the extent to which transmission line facilities are shared by other nearby municipal or rural loads.

Thus the differences in the cost per horsepower supplied municipalities are due to the fact that each municipality pays its proper share of the actual cost to the Commission of delivering its quota of wholesale power from the common generating source to the municipal receiving point.

The causes of differences in the cost of wholesale power supplied to rural power districts in Ontario up to December 31, 1943 were due also to the above mentioned factors and were governed by Section 61 of The Power Commission Act as made applicable by Section 77.

(b) Consider, in conjunction with partner municipalities concerned, ways and means of eliminating or reducing such differences.

So long as the basic conception of **service at cost** continues to govern the Commission's operations, differences in the cost of wholesale power as between partner municipalities cannot be entirely eliminated.

There are, however, natural trends which from year to year reduce the differences in the wholesale cost of power. The position has now been reached where the Commission believes that these differences in cost can be further reduced and it has consulted with the partner municipalities, and has recommended for their approval two suggestions as follows:

1. Amalgamation of Southern Ontario Systems

The Commission has recommended to the municipalities receiving power at cost that it amalgamate the Niagara system, the Georgian Bay system and the Eastern Ontario system into one system to be known as the Southern Ontario system, under Section 65 of The Power Commission Act. It is believed that the integration of the financial and administrative features of these three systems is the logical outcome of the physical interconnection and increased power exchange facilities that have been provided in southern Ontario during recent years.

The amalgamation of these three systems will not only give more dependable service resulting from interconnected systems covering larger areas, but will reduce the total reserve capacity needed and also reduce differences in wholesale costs of power.

2. Assistance to Small Municipalities with Higher Wholesale Unit Costs

For some time the Commission has had under consideration the possibility of giving some assistance to certain small municipalities whose cost of power, due to various circumstances, has been relatively high. Assistance may be given in the following ways:

First, the proposed amalgamation will itself provide some assistance. **Second,** providing the wholesale cost is not too high, some assistance will be provided by the natural growth in consumption. **Third,** the great growth in rural power use has and will result in increases in the amount of power transmitted over the transmission lines supplying the outlying small urban centres, with the result that the transmission costs will be more fully shared by the rural areas and the cost per horsepower to the small municipalities will be progressively reduced.

Finally, the Commission believes that further assistance can be given, and has recommended to the cost contract municipalities that they be charged a small amount in the cost of power and that the sum so secured be applied so as to bring the maximum cost per horsepower in these exceptional cases more in line with the cost obtaining in the majority of smaller municipalities.

The problem is not a serious one as the aggregate horsepower supplied to these small municipalities is not large. For example, with the 1942 revenues and the amounts of power utilized, it would have been possible to set a maximum cost of \$39 per horsepower by levying the small charge of 4½ cents per horsepower supplied to all municipalities. Of course, since the unit cost per horsepower of power supplied by the Commission is greatly affected by the amount of power supplied, a somewhat higher maximum than \$39 might have to be used in subsequent years if the total load decreased.

> (*c*) *Consider the advantages and disadvantages of service charges in connection with rural billing and the advisability of changes in this practice.*

When the rural power district scheme was adopted in 1920, it was decided to supply electrical service to rural consumers at rates consisting of:

1. A service charge intended to cover the fixed charges on the capital invested to supply the service;
2. Plus a meter charge to cover the cost of power and the cost of operation.

This form of rate structure received wide acceptance by power supply authorities the world over. Under this rate structure the service charge was definitely made a part of the cost of service. This service charge, however, was never popular with the customers because they felt they were paying for something for which they received nothing tangible that could be put to use. Possibly the term "service charge" was not well chosen.

In 1921 the Ontario government, in pursuance of its well established policy of assisting agriculture, decided to pay 50 per cent of the cost of primary lines to serve rural consumers and in 1924 extended this grant-in-aid to include all rural secondary construction. This relieved the Commission from paying interest and sinking fund on 50 per cent of all rural distribution capital and enabled the Commission to reduce the service charge for a standard farm from $6.20 to $4.10 per month. Later, in 1930, the maximum rural service charge for a standard farm was further reduced to $2.50 per month, the Province undertaking to pay any losses that might result.

Again, in 1935, the service charge was cut to $2.00 per month for a standard farm and in December 1936 was reduced to $1.00 per month.

These several reductions in service charge, without corresponding adjustments in meter rates in the various rural power districts, placed the entire rural rate structure throughout the Province on a basis that was inequitable as between districts, and resulted in many districts having insufficient revenue to meet the cost to the Commission of the service provided.

On January 1, this year, the Commission, after consultation with and consent of the Government, put into operation a comprehensive revision of its rural service. It amalgamated into one provincial rural power district all the areas formerly served by 120 rural power districts, with a pooling of all revenues and expenses. It has adopted a uniform rate structure with a common rate applying to each class of service and has simplified and revised its classification of consumers.

In the revised rate structure the service charge has been eliminated entirely from the farm rate and to hamlet consumers has been reduced by approximately 50 per cent.

It should be noted that this rural amalgamation and unification of rates to consumers is possible only because of the provincial financial assistance. It does not directly affect the wholesale cost to the Commission of delivering power to the various rural power districts (which still varies in different parts of the province) but its whole effect is reflected in the retail price to the consumer. The new set-up is a means of proportioning the benefits from provincial grants where they are most needed, namely, to the farmer in sparsely settled or less fertile farming districts where, because of these conditions, electrical service is necessarily more costly to provide.

The new rural rate structure will reduce the retail cost of service to 97 per cent of the rural consumers, with quite substantial reductions to consumers in the more remote districts. It should result in a large increase in the total number of rural consumers and in the average monthly consumption, and eventually to higher net revenues leading to further consumer benefits.

There are attached hereto an appendix and a chart which are submitted to show that the elimination of differences in wholesale power costs will not necessarily eliminate differences in retail costs.

Respectfully submitted,
OSBORNE MITCHELL,
Secretary

Toronto, March 6, 1944.

APPENDIX

In considering the foregoing Report it is important to note that clauses (a) and (b) relate to differences in wholesale costs and clause (c) to retail bills for service rendered to consumers. The distinction is important, because many have assumed that the adoption of uniform wholesale costs would bring about uniform rates to consumers. This is not so.

In rural Ontario, notwithstanding differences in the wholesale cost of power as supplied to various rural power districts, uniform rates to consumers have now been secured because of two circumstances: First, the whole rural distribution service is operated as a unit centralized in the administration of The Hydro-Electric Power Commission, with a pooling of all costs and revenues in the several former districts; and second, because government assistance is given by grants-in-aid of capital costs of distribution facilities, and by guarantees against losses resulting from service being given below cost in more recently served or less favourable farming areas. The government assistance now goes where most needed, namely, to assist in establishing new rural line extensions and to help less favoured districts.

In the urban municipalities no government subsidy is given or desired, and although the policy of **service at cost** necessarily results in certain differences in wholesale costs, these are not serious, either in magnitude or in their effect on retail rates to consumers except, perhaps, in the case of a very few of the smaller municipalities dealt with under clause (b) of the Report.

The retail rates to consumers are not governed to a major degree by the difference in wholesale costs but by other factors more closely related to local distribution conditions, character of industrial loads, etc. Many small towns paying a somewhat higher wholesale cost are selling power to industry at rates equal to and below those in larger towns.

Attached is a chart in which the heavy line shows the wholesale cost of power to the 293 urban municipalities served by the Commission in 1942, arranged in order of the cost per horsepower. The black dots show the base power rate at which municipalities sell power to industry. For instance, number 240 is Orangeville which, referring to the heavy line, pays between $40 and $41 per horsepower, wholesale cost to the Commission, but sells power to industry at a retail base of $20 per horsepower.

If uniform rates for service to urban consumers are desired throughout Ontario, they can only be given by a central organization becoming completely responsible for all retail distribution of service to consumers, and by doing away with local administration except as branch offices of the central body. It is not believed the partner municipalities, whose local Hydro utility commissions have done so much to foster and make successful the whole Hydro enterprise, would wish this.

REPORT FOR 1943

OF

The Workmen's Compensation Board

ONTARIO

Offices:
4th Floor, Canada Life Building,
330 University Ave., Toronto.

To His Honour the Lieutenant-Governor:

The Workmen's Compensation Board begs to submit its Report for the year 1943.

GENERAL REVIEW

During the year 1943 there were 131,458 accidents reported to the Board, as compared with 133,513 during 1942, a decrease of 2,055 or 1.5 per cent. The benefits awarded amounted to $11,144,754.21, as compared with $10,936,963.27 awarded during 1942.

Schedule 1 Assessments and Receipts

During 1943 the pay roll covered by Schedule 1 of The Workmen's Compensation Act, that is that part of industry under collective liability, was $1,076,780,000, as compared with $999,769,000 during 1942, an increase of 7.7%. The average rate of assessment was $1.03 for each $100 of pay roll: the corresponding rate for 1942 was $1.10. There were 23,950 employers under Schedule 1 at December 31, 1943, as compared with 25,529 at the end of 1942.

Assessments paid for 1943 amounted to $10,374,329.43, and it is estimated a further $724,875.00 will be received as adjustment. The total assessment for 1943, therefore, on a provisional basis is $11,099,204.43. To this must be added $210,062.92, income from interest, refunds from various sources, application of sections of the Act by way of penalty, and other sources of income. The total receipts for the year were, therefore, $11,309,267.35.

Schedule 1 Benefits and Charges

The compensation and medical aid for Schedule 1 industries, including estimates for what is still to be awarded for accidents happening during the year and for prior years' accidents, amounted to $9,702,307.44. There were other outlays of $1,051,441.13, there being $622,675.08 charged for administration expenses, $18,908.28 for mine rescue work, $304,955.00 grants to accident prevention associations organized under the Act, $86,051.53 for the Board's clinic, and $13,045.76 for the special arrangements with The Toronto General Hospital, and $5,805.48 for outlays under Section 8 of the Act. The total expenditures and charges for the year, including liability for pneumoconiosis of $1,619,017.10 and adjustments of prior years' accidents, were $12,372,765.67.

The provisional deficit for the year, including pneumoconiosis outstanding and the carry-over for prior years' claims, was $1,063,498.32, which, deducted from the excess forward from prior years of $5,282,459.56, makes a net provisional excess of $4,218,961.24 as at December 31, 1943.

The provisional excess of $3,346,827.13 as at December 31, 1942, was replaced by an actual excess of $5,282,459.56, the disparity being largely due to claims (especially for pneumoconiosis) for accidents occurring in 1942 and prior years not being finally disposed of in 1943.

Schedule 2 Industries during 1943

Schedule 2 industries are those in which the employer is individually liable for accidents to his workmen. Dominion Crown cases under the Act by Dominion legislation and Provincial Crown cases referred to the Board for adjustment are included.

The total amount of compensation awarded in Schedule 2 industries and Crown cases during 1943 was $2,264,507.50, as compared with $1,733,376.40 during 1942. Of this $2,264,507.50, $1,389,391.59 was for Dominion Crown cases and $79,097.02 was for Provincial Crown cases.

Employers in Schedule 2 and Crown are assessed their share of the expenses of administration of the Act. For 1943 that share amounted to $129,267.00.

Work Handled during 1943

During 1943 there were 121,237 accidents paid for, that is in which compensation or medical aid, or both, were paid. The 121,237 comprised 343 deaths, 1,692 permanent disability cases, 46,670 temporary disability cases, and 72,532 medical aid only cases. In addition, the Board in 1943 opened for further award 1,031 claims which had been settled previously. In all, 467,044 cheques were issued during 1943, an average of 1,536 daily, and there were 32,832 assessments made, including refunds. About 9,695 pieces of mail were handled daily, and the average number of office callers was 105 a day.

Administration Expenses

The gross administration expenses of the Board for 1943 were $779,461.04. Of this amount, $129,267.00 is chargeable to Schedule 2 and Crown employers, $17,480.78 to Silicosis Account, $900.39 to Mine Rescue Work, $4,653.75 to Special Hospital Account, and $4,484.04 to Clinic. The balance, $622,675.08, is chargeable to Schedule 1.

The Accident Fund

Schedule 1 funds are known and referred to as the "Accident Fund". They comprise, in addition to current funds out of which temporary payments of compensation, medical aid, administration expenses, clinic and special hospital items are paid, the Silicosis Account, Pension Fund, Disaster Reserve, Compensation Deferred, and Reserve for Depreciation of Securities, as well as funds to complete claims (including pneumoconiosis claims) for which final settlement has not been made. The balance, including adjustments to be made of 1943 assessments and other accounts receivable, is not a surplus but is an operating reserve. This totals $4,218,961.24.

The total amount held unexpended or due of $47,883,144.83 is comprised of investments of $46,466,823.52; $537,420.66 cash in banks, and $878,900.65 receivable (including $724,875.00 adjustments on 1943 assessments).

Pension Fund

The purpose of the Pension Fund is to take care of future payments of pensions which have already been awarded. Actuarial tables, embodying the contingencies of death and remarriage, have been compiled to show for each age and kind of pension the average amount (sometimes referred to as capitalized value) necessary to complete pension payments. When a pension is awarded this average amount is transferred from the current funds to the Pension Fund. All payments of pensions are made from the Pension Fund. Since the amount transferred in any one instance is the average amount required, no re-transfer is made should a residue be left at the expiry of the pension, nor is any additional transfer made should the amount be exhausted before expiry of the pension.

The balance in the fund at the commencement of 1943 was $30,828,755.01. During the year $2,851,701.80 was transferred for pension awards; $1,561,881.67 interest was added, and $2,854,536.59 was paid for pensions. The balance in the fund at the end of the year was $32,387,801.89.

Disaster Reserve

The Disaster Reserve is a fund set aside under the provisions of Section 101 (2) of the Act to meet any unforeseen disaster or other circumstance which might unduly burden the employers in any class of industry. The amount held for this purpose as at December 31, 1943, was $246,807.99.

Reserve for Depreciation of Securities

The Reserve for Depreciation of Securities is made up of excess over book values when investments are sold. It amounts to $499,613.41.

Reserve for Compensation Deferred

The funds under "Compensation Deferred" comprise compensation moneys held for claimants, payment being deferred to a future time by reason of the claimant's being a minor or for other reason. The amount so held as at December 31, 1943, was $193,677.57.

Silicosis Account

This reserve is to pay claims for silicosis in Class 5 which have been made but in which payments have not been made in full. The amount held is $4,005,922.14.

Reserve to Complete Claims

All continuing claims were evaluated at the end of the year and the amount calculated to bring them to finality. Allowance was made for unreported and unadjusted claims. The total amount as at December 31, 1943, was $4,711,343.49.

Reserve for Pneumoconiosis

The reserve for pneumoconiosis is to pay incurred losses for pneumoconiosis not already paid. The claims have been reported to the Board. The sum in reserve is $1,619,017.10.

Operating Reserve

At the end of 1943 the Board held $4,218,961.24 for unforeseen contingencies, and for the payment of claims, especially industrial diseases, which though not yet reported to the Board may and likely will be.

GENERAL COMMENT

The Ontario Act has been widely acclaimed as providing the most for the least cost. Its benefits are, on the whole, the highest in the world: its rates are as low as is consistent with sound financing. The Board has adopted a generous, but not too loose, interpretation of its provisions.

Dated at Toronto this 2nd day of May, 1944.

WILLIAM MORRISON, Chairman.
D. J. GALBRAITH, Vice-Chairman.
J. F. CAULEY, Commissioner.

Administration Expenses	7,456,719.29
Safety Associations	3,767,861.96
Rehabilitation	116,320.75
Mine Rescue Work	250,779.38
Clinic Expenses	232,850.45
Pneumoconiosis Examinations	66.14
For Hospitalization	13,045.76
Pneumoconiosis estimated outstanding	1,619,017.10
Compensation and Medical Aid estimated outstanding	4,711,343.49
Transferred to Disaster Reserve	353,259.80
Balance at Credit of Classes	4,218,961.24
	$160,543,385.73

SUMMARY OF PENSION FUND, SCHEDULE 1

From Commencement of Act to End of 1943

Pension Awards	$50,914,763.59
Amount transferred from Disaster Reserve	134,624.26
Amount transferred from Silicosis Account	1,469,300.63
Interest added	22,269,939.25
	74,788,627.73
Pension Payments	41,373,611.22
	33,415,016.51
Amount transferred to Current Fund	1,027,214.62
Balance December 31, 1943	$32,387,801.89

SUMMARY OF COMPENSATION DEFERRED, SCHEDULE 1

From Commencement of Act to End of 1943

Compensation Deferred	$ 1,391,432.52
Interest added	112,411.08
	1,503,843.60
Paid to claimants—principal and interest	1,310,166.03
Balance December 31, 1943	$ 193,677.57

SUMMARY OF DISASTER RESERVE, SCHEDULE 1

From Commencement of Act to End of 1943

Amount set aside	$353,259.80
Interest added	298,450.26
	651,710.06
Transferred to Classes	404,902.07
Balance December 31, 1943	$246,807.99

SUMMARY OF RESERVE FOR DEPRECIATION OF SECURITIES, SCHEDULE 1

From Commencement of Act to End of 1943

Amount received on sale of Investments in Excess of Book Value		$933,294.12
Interest		617,402.14
		1,550,696.26
Transferred to Classes	$322,610.66	
Transferred to Silicosis Account	294,791.48	
Transferred to Investment Account	433,680.71	
		1,051,082.85
Balance December 31, 1943		$499,613.41

SUMMARY OF SILICOSIS ACCOUNT, SCHEDULE 1

From Commencement of Act to End of 1943

Assessments collected		$7,542,230.48
Received from D. P. & N.H.		3,632.62
Interest added		797,082.85
		8,342,945.95
Payments made:		
Compensation	$2,898,385.89	
Medical Aid	278,792.00	
Salaries and Expenses	890,341.27	
Handling Claims and Supervision	209,189.06	
Salaries and Expenses of Referee Board	60,315.59	
		4,337,023.81
Balance December 31, 1943		$4,005,922.14

SUMMARY OF INVESTMENTS, SCHEDULE 1

From Commencement of Act to End of 1943

Invested		$79,183,450.69
Less principal returned	$32,282,946.46	
Less amount written off for depreciation	433,680.71	
		32,716,627.17
Book Value of Investments December 31, 1943		$46,466,823.52

SUMMARY OF SCHEDULE 2 FUNDS

From Commencement of Act to End of 1943

Received from employers		$27,404,729.04
Interest received		4,380,232.43
Amount received from sale of investments in excess of book value		206,663.91
		$31,991,625.38
Payments made	$26,881,794.76	
Deposits returned to employers	1,459,450.64	
		28,341,245.40
Cash in Bank and Invested December 31, 1943		$ 3,650,379.98

SUMMARY OF INVESTMENTS, SCHEDULE 2

From Commencement of Act to End of 1943

Invested	$ 5,940,376.37
Less principal returned	2,424,430.85
Book Value of Investments December 31, 1943	$ 3,515,945.52

SUMMARY OF RESERVE FOR DEPRECIATION OF SECURITIES, SCHEDULE 2

AUDITOR'S CERTIFICATE

29th February, 1944.

THE WORKMEN'S COMPENSATION BOARD OF ONTARIO,
Toronto, Ontario.

Dear Sirs:

I have completed a continuous audit of the books of the Board for the year ended 31st December, 1943, and have obtained all the information and explanations I have required.

In my opinion the attached statements of Receipts and Payments, Schedules No. 1 and No. 2, truly and fairly set forth the cash transactions of the Board for the year ended 31st December, 1943.

Bank balances at the close of the period have been verified by direct communication with the Board's bankers.

The amortized book value of the investments held by the Board at 31st December, 1943, was $49,982,769.04, and I confirmed by a physical examination the securities representing these investments as at that date. Debenture principal and coupons, due and unpaid at 31st December, 1943 amounted to $128,804.12.

Respectfully submitted,

ALEXANDER G. CALDER, F.C.A.
Chartered Accountant.

STATEMENT OF RECEIPTS AND PAYMENTS DURING 1943

Schedule 1

Receipts		
Cash in Banks 1st January, 1943:

Ontario Department of Agriculture

REPORT

OF THE

Ontario Veterinary College

1942

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 29, 1944

ONTARIO

TORONTO

PRINTED AND PUBLISHED BY
T. E. Bowman, Printer to the King's Most Excellent Majesty
1943

REPORT OF THE

Ontario Veterinary College

TO THE HONORABLE P. M. DEWAN,
Minister of Agriculture.

Sir:—

I have the honour to present herewith the following report of the Ontario Veterinary College for the year extending from April 1st, 1942, to March 31st, 1943.

Convocation

At the Convocation of the University of Toronto held on May 8th, 1942, the Chancellor, The Rt. Hon. Sir William Mulock, P.C., K.C.M.G., M.A., LL.D., conferred the degree of Bachelor of Veterinary Science (B.V.Sc.) on fifty-seven graduates.

Commencement

The Annual Commencement and Presentation of Prizes took place on November 18th, 1942, in the Assembly Hall of the College. The Honourable T. B. McQuesten, Minister of Public Works and Highways, was the principal speaker. The prizes were presented to the successful candidates by the Honourable P. M. Dewan, Minister of Agriculture.

Opening of the New Laboratory Building

This new addition to the College was formally opened on November 19th, 1942, by the Hon. T. B. McQuesten, Minister of Public Works, and the Hon. P. M. Dewan, Minister of Agriculture. In the course of their addresses both speakers expressed confidence that the new building was fully justified and would provide the nucleus of a research and extension centre and the beginning of a progressive campaign for the prevention and control of animal diseases.

Student Enrolment

A total of 167 were enrolled. As in former years, students were in attendance from all the Provinces of Canada, also from other parts of the British Empire and from the United States.

The Teaching and Executive Staff

C. D. McGilvray, M.D.V., D.V.Sc., *Principal: Contagious Diseases, Sanitary Science.*
W. J. R. Fowler, V.S., B.V.Sc., D.V.M.: *Surgery, Anatomy.*
R. A. McIntosh, M.D.V., B.V.Sc.: *Diseases of Cattle, Obstetrics, Therapeutics.*
F. W. Schofield, B.V.Sc., D.V.Sc.: *Pathology, Bacteriology.*
L. Stevenson, B.S.A., M.S., B.V.Sc.: *Zoology, Fur-Bearing Animals.*
J. S. Glover, V.S., B.V.Sc.: *Milk and Meat Hygiene, Poultry Diseases.*
*A. A. Kingscote, B.V.Sc., D.V.Sc.: *Pathology, Parasitology.*
F. J. Cote, B.V.Sc.: *Canine and Feline Diseases.*
V. R. Brown, B.V.Sc.: *Anatomy, Hygiene.*

G. Cairns, B.V.Sc., M.R.C.V.S.: *Sporadic Diseases. Hygiene.*
*A. F. Bain, B.V.Sc.: *Bacteriology.*
*R. T. Ingle, B.V.Sc., M.Sc.: *Pathology.*
A. H. Kennedy, B.S.A., B.V.Sc., D.V.Sc.: *Pathology, Parasitology.*
C. E. Phillips, B.V.Sc.: *Pathology, Bacteriology.*
H. T. Batt, B.V.Sc., M.V.Sc., M.S., D.V.Sc., Ph.D.(Cornell), Certificat de l'Ecole d'Alfort (France): *Histology, Physiology.*
R. Connell, B.V.Sc.: *Serology, Poultry Diseases.*
*J. K. Blair: *Jurisprudence.*
C. L. McKinnon: *Jurisprudence.*
A. L. Shepherd: *Executive Clerk.*
Miss A. Walsh: *Secretary.*
Miss L. Nott: *Librarian and Stenoghapher.*
Miss M. Urquhart: Stenographer.
Miss E. Shepherd: *Stenographer.*

**On Military Leave.*

Admission Requirements and Course of Study

The prescribed course of study qualifies for the degree of Bachelor of Veterinary Science (B.V.Sc.) and extends over a period of five years. The requirements for admission come under the jurisdiction of the University of Toronto. In order to gain entrance, applicants must furnish Junior and Senior Matriculation certificates or a Junior Matriculation certificate and a certificate covering the satisfactory completion of the first year in a degree course at a recognized Agricultural College or University. The final examinations for graduation likewise come under the jurisdiction of the Senate of the University, and the examiners are appointed by the University. Graduate courses leading to the advanced degrees of Master of Veterinary Science (M.V.Sc.) and Doctor of Veterinary Science (**D.V.Sc.**) **are** available under the School of Graduate Studies of the University.

A detailed outline of the entrance requirements and the course of studies is contained in the College Calendar, which is available to those interested. In addition to the regular undergraduate course outlined in the calendar, special short courses were provided as follows:

Public Health Course

A special course of study in Public Health work was given Senior students by the Director and Staff of the School of Hygiene and Connaught Laboratories of the University of Toronto. The course included the following subjects:

Public Health Administration.
Principles of Sanitation.
Communicable Diseases.
Food-Borne Infections.
Interpretation of Laboratory Findings.
Bacteriology of Enteric-Infections.
Human Parasitic Infections.
Inspection of Water Supplies.
Inspection of Sewage Disposal.
Inspection of Restaurants and Bottling Plants.
Industrial Hazards in Meat Packing Industry.
Ventilation and Fumigation.
Dairy Sanitation.

Special Course for Fur Breeders

During the month of June a course was provided for those engaged in the rearing of fur-bearing animals. About 200 fur breeders attended. The course was arranged in co-operation with the Ontario Fur Breeders' Association and comprised lectures and demonstrations on the following subjects:

Disease Carriers.
Ingredients of Fox Rations.
Successful Marketing of Pelts.
Facts about Prime and Unprime Pelts.
Silver Fox Breeding Problems.
The Chinchilla Industry.
Diagnosis and Treatment of Distemper in Mink.
Preparing Mink Pelts for Market.
Discussion on the Valuation of Breeding Stock for Taxation Purposes.
True Mink Types and Foundation Stock.
The Use of Hormones in Animal Breeding.
Mink Breeding Problems.

Refresher Course for Veterinarians

During the month of July a special course for graduate veterinarians was provided in co-operation with the Ontario Veterinary Association. and the Canadian Feed Manufacturers' Association. There were approximately 150 in attendance and the programme comprised the following topics.

The Field Diagnosis of Swine Erysipelas and the use of the Rapid Agglutination Test.
Nutritional Requirements for Swine.
The Diagnosis and Control of Common Diseases of Poultry.
Calf Scours and Calf Pneumonia.
Parasitic Diseases of Poultry.
Parasitic Diseases of Swine.
Diagnosis and Control of Fowl-Pox, Laryngotracheitis and Pullorum Diseases.
Methods of post-mortem Examination.
Methods employed in Mastitis Control Work and Intramammary Methods of Treatment.
Examination of Horses for Soundness and the Diagnosis of Lameness.

Clinical Service

This service is available for veterinarians and live stock owners where clinical assistance is desired. The nature and extent of the services rendered are as follows:

Animal Clinics: Animals of all classes were admitted for diagnosis, medical and surgical treatment.

Horses: The cases submitted were largely surgical and included fistulous withers, poll-evil, roaring. hernia, cryptorchidism, lameness, including deformities of the feet and canker. Parasitic and other skin affections are frequently observed. Dental cases and tumor formations are also of common occurrence.

Cattle: Many of the cattle cases were of an unusual character and represented herd conditions. The predominating diseases included sterility, mastitis, calf scours, calf pneumonia, necrotic stomatitis, nutritional deficiencies, pseudo-leukemia, hypocalcemia, acetonemia, photo-sensitization, sweet clover poisoning, and retention of the afterbirth.

Swine: These comprised surgical cases and diseases prevailing in litters and herds. The surgical cases comprised scrotal and umbilical hernia, cryptorchidism and hermaphrodism. Among the diseases affecting herds and litters were gastroenteritis, respiratory affections, anemia of young pigs and other nutritional diseases, parasitic diseases, including lice and mange, erysipelas, hemorrhagic septicemia, necrotic enteritis and infectious rhinitis. An outbreak of tuberculosis was encountered in a large herd of swine. One hundred and thirty pigs were submitted to the tuberculin test of which fifty-seven reacted. The diagnosis was confirmed by post mortem and laboratory examination revealed the infection to be the avian (poultry) type of tuberculosis.

Sheep: Many of the sheep cases were parasitic infestations more especially stomach worm diseases. Other conditions comprised nutritional diseases, pregnancy disease, stiff lamb disease, tetanus following docking and castration.

Small Animals: These comprised dogs and cats mostly submitted for surgical attention such as spaying. A large number of diseased conditions were also treated including digestive disturbances, distemper, renal diseases, respiratory diseases, mange and other skin diseases.

Fur Bearing Animals: The diseases of fur bearing animals and general problems of the fur breeding industry were given the required attention by the Provincial Zoologist. Food toxemia has been the main cause of loss on fox and mink ranches. Out of over one hundred carcasses submitted for laboratory examination, evidence of food toxemia was revealed in thirty-two cases. There has been considerable interest manifested during the past year in the rearing of Angora and Chinchilla rabbits.

Extension Work Relating to Bang's Disease

In co-operation with practising veterinarians and live stock owners the work relating to the control of Bang's disease in cattle (Contagious Abortion) has been further expanded under the following plans.

1. *Testing of Individual Herds:*

   Under this plan 29.755 cattle were tested of which 23.153 were Negative, 5,433 Positive, 1,169 Doubtful.

2. *Testing of Dairy Cattle for Export:*

   These tests were made to facilitate the exporting of dairy cattle to the United States and comprised 5.465 cattle, of which 5.151 were Negative, 186 Positive, 125 Doubtful.

3. *Supervised Calfhood Vaccination:*

   Under this plan, vaccination was undertaken in 1475 herds. A total of 17.500 calves between four and eight months of age were vaccinated and check tested 30 days after being vaccinated.

4. *Testing of Herds in Prescribed Areas:*

   Under this plan 10 areas have been established as follows:
   1. *Schomberg Area:* Includes 277 herds comprising 3.193 cattle.
   2. *Northumberland Area:* Includes 188 herds comprising 2.827 cattle.
   3. *Stormont Area:* Includes 56 herds comprising 1.018 cattle.

4. *Maxville Area:* Includes 49 herds comprising 1,324 cattle.
5. *Vars Area:* Includes 41 herds comprising 1,069 cattle.
6. *Durham Area:* Includes 39 herds comprising 480 cattle.
7. *Carp Area:* Includes 35 herds comprising 731 cattle.
8. *Orono Area:* Includes 18 herds comprising 171 cattle.
9. *Almonte Area:* Includes 14 herds comprising 179 cattle.
10. *Brockville Area:* Includes 10 herds comprising 309 cattle.

Research and Investigation

During the year several unusual outbreaks of disease have been investigated. It is sometimes difficult for a practising veterinarian to come to a definite conclusion as to the exact nature of a disease which may be either a new disease in the locality or an old disease manifesting unusual symptoms. With the aid of the college staff and laboratory facilities such problems can be more readily solved. A few diseases receiving attention are briefly summarized herewith.

Hemorrhagic Enteritis in the Arctic Blue Fox: An investigation was made into a serious outbreak of enteritis occurring among Arctic Blue fox pups. A virus was demonstrated, which appeared to be identical with that of feline enteritis.

Alcaligines (Brucella) *Bronchisepticus as an Etiological Agent in Pig Pneumonia:* Alcaligines bronchisepticus which for many years has been recognized as a cause of pneumonia in several different animal species, has now been isolated from pneumonia in pigs coming from piggeries located in many different parts of the province. Work is being undertaken to determine the exact etiological relationship of this organism to pig pneumonia.

Iron Poisoning in Piglets: During the last ten years we have encountered many cases where piglets have died due to receiving excessive doses of iron given for the prevention of anemia.

Vitamin "A" Deficiency in Pigs: An unusual outbreak of paralysis and incoordination among swine was investigated and found to be due to a deficiency of Vitamin A.

The Treatment of Papillomatosis by Tissue Vaccine: Several cases of malignant papillomatosis (warts) have been successfully treated by the use of autogenous tissue vaccine.

An Unusual Outbreak of Swamp Fever: An outbreak of disease among horses in the vicinity of Niagara Falls with a mortality of 100% was investigated and found to be due to infection with swamp fever.

Stiff Lamb Disease: Further reports of the successful treatment of stiff-lamb disease by the use of phosphoric acid have been received.

Miscellaneous: This includes a note on Trichomonas infection, braxy, blackleg, salmonellosis in foxes, swine diseases, and pathological specimens of interest.

Poultry Laboratory Service

This consists chiefly in the examination of diseased poultry sent or brought to the laboratory. The percentage of cases of coccidiosis and nutritional diseases remained at about the same level as during the previous year. No cases of cholera or of mycotic diseases were received. Pullorum disease of chicks accounted for 1022 or approximately 37 per cent of the cases examined, as compared with 798 or approximately 31 per cent for the previous twelve months. Work commenced two years ago in connection with pullorum disease was continued as time permitted during the past year, and is included in an appendix to this report.

Listed under "Other infections" were several cases of staphylococcic and streptococcic infections (many more than previously observed) and infections with *pseudomonas aeruginosa*. Navel ill was found in a few chicks in both the "wet" form, caused by members of the genus *Clostridium*, and the "dry" form, due to non-specific bacterial infection. Hexamitiasis was found in two turkey flocks.

The number of specimens received during the past year, and the conditions found, are shown in the following list:

Nature of Case	Number of Cases
Adult Pullorum Infection	100
Avian Diphtheria	37
Coccidiosis	351
Coryza and Roup	35
Enteritis	23
Enterohepatitis	65
Fowl Cholera	0
Laryngotracheitis	32
Leucosis	73
Pullorum Diseases of Chicks	1022
Tuberculosis	31
Other Infections	174
Impaction (Crop, Proventriculus, Gizzard or Intestine)	8
Injuries	9
Nutritional Conditions	267
Ruptured Liver	11
" *Oviduct*	4
Tumours	49
Worms (Ascaridia)	54
" *(Capillaria)*	107
" *(Large Tapes)*	68
" *(Minute Tapes)*	105
" *(Round and Tapes)*	54
External Parasitism	19
No Evidence of Disease or Putrid	65
Total	2,763

Biological Laboratory Service

Preparation and Distribution of Antigen: 6,340 test doses of *Brucella abortus* antigen were distributed to veterinarians for the agglutination test for Bang's disease.

Preparation and Distribution of Fowl Pox Vaccine: 17,580 doses of vaccine were prepared and distributed for the vaccination of poultry by the *Johnson stick method* for the prevention of Fowl Pox.

Agglutination Tests: During the year 52,738 blood samples were received to be submitted to the agglutination test for Bang's disease. Included in this number are samples from cattle intended for export or exhibition purposes, from calves in herds under the calfhood vaccination plan, and from cattle in herds in prescribed areas. The results of these tests are shown in the following table:

	Positive	Doubtful	Negative	Broken, Hemolysed or Otherwise Spoiled
Routine Samples	5,433	1,169	23.153	139
Export or Exhibition Samples	186	125	5.154	3
Calfhood Vaccination Samples	8,027	402	1,030	65
Prescribed Area Samples	192	177	7,458	25
Totals	13,838	1,873	36.795	232

Routine Examination of Milk and Cream Samples

Routine tests were made on approximately 600 samples of milk and cream submitted to the laboratory from time to time. These tests included fat and total solids determinations, standard plate counts, coliform, methylene blue and resazurin reductase, phosphatase, and various mastitis tests.

During the year a large volume of correspondence has received attention, together with personal interviews with those seeking advice regarding their animals. The demand for veterinary extension, investigation and research work has noticeably increased. This is particularly evident in connection with the adoption of calf vaccination as an aid in the control of Bang's disease in cattle. With the increased demand for these services the entire staff has been exceedingly busy and have performed their duties faithfully. Efforts have been directed towards maintaining a high standard of efficiency and all expenditures have been carefully checked and kept at a minimum cost.

All of which is respectfully submitted.

C. D. McGILVRAY.
Principal.

Guelph, Ontario.
March 31st, 1943.

THE VALUE AND USEFULNESS OF THE VETERINARY PROFESSION

Brief submitted to the Director of the Wartime Bureau of Technical Personnel.
by C. D. McGilvray.

1. *The Development and Application of Veterinary Science:* The scientific development of veterinary science has been rapidly advancing during the last decade. This has been largely due to the close relationship between the studies pertaining to human and veterinary medicine. Many of the discoveries of value to comparative medicine have been made from research and experimental study in animals. and many of the new advances in human medicine have been of distinct benefit to veterinary medicine. The study of diseases in the comparative fields depends essentially upon the same general prinicples of scientific study and application. The intercommunicability of certain diseases to man and animals has greatly stimulated the comparative study of specific diseases.

2. *Protecting Public Health:* It is becoming more definitely realized and established that many of the infectious and parasitic diseases of animals may be directly transmissible to human beings while others are conveyed through the medium of unwholesome milk and meat food products.

The veterinary profession has therefore to serve a two-fold field in safeguarding the health of livestock and in assisting to safeguard human health.

These services have become of increasing significance in the public estimation through the combined usefulness of the graduate in general practice, in public health work supervising the production and distribution of wholesome milk and other food products, in government service relating to the supervision of abattoirs and meat production, the prevention and control of infectious and contagious diseases, laboratory research, clinical and experimental study of diseases.

Through the Veterinary College, the Department renders a large measure of public service in safeguarding the health of human beings from communicable diseases such as tuberculosis, undulant fever, and many other diseases. This service is extended by means of training men for the inspection of meats and the inspection and supervision of dairies and milk food products.

3. *Safeguarding the Livestock Industry:* The real need and value of a profession to society at large can be determined to a great extent by its sustained usefulness and continuity during good times and bad. During the present period the general public, desire the support of the veterinary profession and the demand for veterinary services has increased rather than diminished. It is being more widely appreciated that healthy herds are more profitable than diseased herds and that our entire trade in livestock, milk and meat food products is dependent on the health of the animals. The veterinary profession has stood the test throughout these trying times, as being the essential safeguard for successful livestock development and in maintaining an open door to the world's markets for livestock and their products based on a high standard of animal health.

The successful and profitable practice of agriculture has been and will always be, dependent to a large extent on livestock development. Among the obstacles to successful and profitable livestock development is the increasing danger of severe losses resulting from preventable diseases and the liability of health restrictions being imposed by other countries interfering with the export shipment and marketing of animals. Canada has been particularly fortunate as yet in having escaped the ravages of many of the so-called animal plagues. This reduction and freedom from disease affecting animals has not been accidental, but has been due largely to the well directed efforts of the veterinary profession in safeguarding the health of farm animals.

4. *Maintaining Our Reputation for Healthy Livestock:* The reputation which we have gained for healthy livestock is a national asset and every available agency is deserving of encouragement for the further preservation of the health of farm animals.

In safeguarding the health of livestock "*eternal vigilance is the price of safety*", and necessitates the maintenance of an efficient veterinary service. If any of the so-called animal plagues should gain a foothold in Canada, one can readily appreciate the enormous losses which would accrue to agriculture and allied industries by depleting farm herds, the dislocation of livestock traffic, the interference and restrictions with the marketing of animals and the large expenditure of public funds necessary to suppress such diseases. The maintenance of veterinary services to prevent and cope with diseases of animals must therefore primarily benefit agriculture and the public at large by preserving the economic production and maintenance of livestock interests so as to insure a sufficiently abundant and wholesome supply of meats and other food products for the use and benefit of the consuming public. It is now becoming more apparent that the entire export trade in livestock is based on the fundamental essential of freedom from animal diseases and that the export dressed meat and bacon trade is based on the same requirement.

5. *Protecting Our Export Markets for Live Stock:* Great Britain and the United States form the best outlet for our live stock and dressed meats and both of these countries have imposed as the essential requirement for the admission and acceptance of livestock from other countries that such animals shall be free from contagious disease and that no serious contagious disease exists in the districts from which they originate. In the case of meats and meat food products not a single pound can enter Great Britain or the United States unless derived from healthy animals, killed, dressed and processed under the direct supervision of veterinarians properly trained and qualified for such work.

In order to maintain our export trade in dressed meats and meat food products with Great Britain and the United States the large abattoirs and packing plants throughout Canada are operated under Government supervision by means of a large staff of trained veterinarians whose duties are to see that all animals are carefully inspected before and after slaughter and that the meats are properly stamped and certified as healthy. wholesome food which enables their export and acceptance by other countries and helps in keeping open, trade channels and overcoming barriers to trade between Canada and other countries.

6. *Preventing Serious Diseases from Attacking Live Stock:* Diseases of animals must also be prevented from gaining a foothold in Canada requiring the maintenance of animal quarantine inspection stations being maintained at suitable points through which all animals must enter coming from other countries and be subject to careful examination by trained veterinarians to determine their freedom from disease. This precaution has prevented the entrance into Canada of many serious animal plagues such as rinderpest, foot and mouth disease and pleuro-pneumonia of cattle. Moreover in order to control and eradicate animal plagues within a country trained veterinarians must be available for the purpose of detecting disease among animals and to intelligently control and suppress diseases which are preventable or communicable.

Services Which Veterinarians Can Render the Armed Forces

To supplement the veterinary student's knowledge of the basic principles of Public Health the graduate is required to take a special course of instruction provided under the supervision of the Director of the School of Hygiene in the following subjects:

1. Public Health Administration
2. Principles of Sanitation
3. Communicable Diseases
4. Food-borne Infections
5. Interpretation of Laboratory Findings
6. Bacteriology of Enteric Infections
7. Human Parasitic Infections
8. Inspection of Water Supplies
9. Inspection of Sewage Disposal
10. Inspection of Food Depots and Bottling Plants
11. Industrial Hazards in Meat Packing Industry
12. Ventilation and Fumigation
13. Dairy Sanitation

This qualifies veterinarians to give special service as Technical Officers both in Canada and abroad. Here in Canada the veterinarian through the channels of meat and milk inspection safeguards the health of the troops against meat and milk borne infections transmissible to man, such as tuberculosis, undulant fever, septic sore throat and many parasitic infestations.

Systematic meat and milk inspection is not properly provided for in all parts of Canada, Great Britain or elsewhere, where troops may be stationed. For this reason a veterinary officer should be attached to each military depot or camp to inspect all meat, meat-food products, milk and all other food provided for the troops. The troops deserve this protection of their food supplies.

One does not have to greatly stretch their imagination to visualize the disease hazards to which troops may be exposed in the actual theatres of war where disease germs and filth-borne parasites prevail during actual combat and especially when Medical Officers are overtaxed in looking after casualties. Veterinarians are a valuable professional unit as their training fits them for services of immense value under war time conditions.

VETERINARY SCIENCE CURRICULUM

Brief submitted to the Director of the Wartime Bureau of Technical Personnel relating to Veterinary Education.

By C. D. McGilvray.

Qualifications for Admission and Graduation in Veterinary Science

The requirements and qualifications for admission and graduation come entirely under the jurisdiction of the University of Toronto. In order to gain entrance, applicants must furnish a Grade XIII certificate of Senior Matriculation, or a Grade XII Junior Matriculation certificate and a certificate covering one year's attendance in a degree course at a recognized Agricultural College or University. This is regarded as a preprofessional year's training and in order to graduate the student must then complete four years' professional study and training at the Ontario Veterinary

College. This is essentially a five year course based on Junior Matriculation, or four years based on Senior Matriculation. The final examinations for graduation come under the jurisdiction of the Senate of the University of Toronto, the examiners are appointed by the University. The diploma: Degree of Bachelor of Veterinary Science (B.V.Sc.) is conferred by the University. Graduate courses leading to the advanced degrees of Master of Veterinary Science (M.V.Sc.) and Doctor of Veterinary Science (D.V.Sc.) are available under the School of Graduate Studies of the University of Toronto.

Course of Studies and Instruction

The course of studies in general are graded along similar lines to that of the Medical Course. These are fully outlined in the Calendar of the Ontario Veterinary College and comprise the following subjects:

First Year (Preprofessional). This covers the prescribed subjects of the first year in a degree course at a recognized Agricultural College or University. It is regarded as a preprofessional year and is an adaptation of the procedure followed in the pre-medical course.

SECOND YEAR

Subject	*Lecture Periods	†Laboratory Periods
Anatomy	100	45
Zoology	26	38
Embryology Histology	52	26
Chemistry	63	52
Physiology	78	
Animal Husbandry	22	52
Poultry Husbandry	26	
Dairy Husbandry	26	

THIRD YEAR

Subject	*Lecture Periods	†Laboratory Periods
Anatomy	78	50
Zoology	10	10
Histology	38	40
Biochemistry	11	22
Physiology	78	7
Materia Medica	100	
Parasitology	52	30
Hygiene and Physical Diagnostics	30	30
Diseases of Fur Animals	30	
Poultry Diseases	26	26
Toxicology	15	

FOURTH YEAR

Subject	Lecture Periods	Laboratory Periods
Obstetrics	52	26
Infectious Diseases	78	
Pathology	26	26
Bacteriology	52	38
Canine Diseases	35	55
Surgery	52	52
Diseases of the Horse	52	11
Diseases of Cattle Sheep and Swine	52	52
Parasitology	37	30
Jurisprudence	26	

FIFTH YEAR

Subject	Lecture Periods	Laboratory Periods
Diseases of the Horse	78	26
Surgery	78	78
Infectious Diseases	63	
Sanitary Science	30	
Special Therapeutics Breeding Hygiene	93	50
Milk Hygiene	30	30
Meat Inspection	37	10
Pathology	32	52
Bacteriology	52	37
Public Health	30	15

†Laboratory Periods—1½ to 2 hours duration.

*Lecture Periods—1 hour duration.

FIELDS OF SCIENCE AND APPLICATION

The live stock industry is the corner-stone of agricultural development and Veterinary Science and its application furnishes its greatest safeguard through the prevention and treatment of diseases.

A. *Chemistry, Zoology, Embryology, Histology, Comparative Anatomy and Physiology*

The course of studies in Chemistry, Zoology, Embryology, Histology, Comparative Anatomy and Physiology embrace the same basic sciences in the study of Veterinary Medicine as in Human Medicine and are regarded as being of similar value and application in the general field of both Medical and Veterinary Science.

B. *Materia Medica and Therapeutics*

The course of studies in Materia Medica and Therapeutics furnishes a knowledge of the actions and uses of drugs and their therapeutic derivatives used to prevent and rationally treat diseases affecting animals and to relieve pain as in Human Medicine.

C. *Animal Hygiene*

The course of studies in Animal Hygiene recognizes the importance to the livestock industry of ensuring the highest possible standards of animal health through preventive measures against disease. Instruction is also provided relating to diseases and abnormalities affecting breeding animals and their young likely to interfere with or lessen the profitable production and raising of farm live stock.

D. *Sporadic Diseases of Livestock*

The course of studies relates to the prevailing diseases affecting horses, cattle, sheep and swine. The different diseases are studied as to their nature, causes, symptoms, diagnosis, together with their treatment.

E. *Diseases of Poultry*

The course of studies deals with the various diseases of poultry, particular attention is given to preventive and control measures for the eradication of parasitic and infectious diseases, thus safeguarding the poultry industry.

F. *Disease of Fur Bearing Animals*

The course embraces a study of fur bearing animals in health and disease relating to prevention and treatment of nutritional diseases, infectious diseases, sporadic diseases, parasitic diseases, and reproductive diseases.

G. *Diseases of Dogs and other Pet Animals*

This course relates to the general principles and practices followed in relation to the treatment of all the essential diseases to which dogs and other pet animals are subject.

H. *Surgery*

The course in surgery is conducted by a series of lectures and clinical demonstrations along similar lines to that followed in Medical Surgery, embracing the general principles of surgical technique. Daily clinics are held to which animals may be brought for surgical treatment.

I. *Infectious and Contagious Diseases*

This course deals comprehensively with all the Infectious and Contagious Diseases of livestock. Special consideration is given to the so-called animal plagues as to their nature, prevalence, causes, dissemination, diagnosis, prevention, and control. Attention is given also to diseases of animals transmissible to human beings.

J. *Sanitary Science*

The course in Sanitary Science deals with the official inspection of livestock and of meats and meat-food products under the Animal Diseases Act and Regulations and the Meat and Canned Foods Act and Regulations. This course prepares students for positions as Inspectors in the Health of Animals Branch of the Dominion Government through a study of the Health of Animals Branch regulations pertaining to the detection, prevention, control and eradication of contagious diseases as well as those governing the importation and exportation of live stock between Canada, Great Britain and the United States. The Regulations respecting the inspection of meats and canned foods at abattoirs are carefully studied to prepare students for positions as Veterinary Inspectors in the Meat Inspection Service of the Dominion Government.

K. *Meat Inspection*

This course is designed to provide the graduate with a training and knowledge relating to the production of clean, wholesome disease-free meats, thus safeguarding public health against disease through the consumption of diseasesd or unsound meat and meat-food products. The Dominion Government maintains a large number of trained veterinarians to supervise the hygienic production of meat and meat-food products at all the large abattoirs and packing plants. This service is indispensable for the establishment and maintenance of our domestic and export trade in beef and bacon.

L. *Milk Hygiene*

This course furnishes instruction in the general control of milk supplies through Provincial and Municipal Boards of Health, in relation to the production of clean, wholesome milk. This is essentially public health work and is largely responsible for safeguarding public health against milk borne disease such as Tuberculosis, Undulant Fever, Typhoid Fever, Scarlet Fever, Septic Sore Throat, etc. The course is given by a series of lectures, practical work and laboratory instruction.

M. *Entomology, Protozoology and Parasitology*

This course provides a knowledge of all internal and external parasites which cause disease in animals, many of which are transmissible to human beings. It is a scientific study of parasites and parasitism as to their manifestations, life history, and development, the diseases they cause, and methods of prevention and control.

N. *Bacteriology and Patholoy*

The course provided in Bacteriology is equivalent in all respects to that received by students in Medical Science relating to the development, scope, and application of Bacteriology in the scientific study of infectious diseases of both animals and man. Instruction is given the undergraduate by lectures and laboratory work to an extent that will enable him to become proficient as a laboratory and research worker. The course in Pathology is likewise equivalent in all respects to that provided students in the faculties of Human Medicine and embraces a complete course of lectures and laboratory work in General and Special Pathology sufficient to enable the graduate to become a proficient Pathologist.

O. *Plant Toxicology*

This consists of a general course on the principles of Botany relating in particular to the classification of plants sufficient to enable the student to identify poisonous plants that are injurious to live stock.

P. *Public Health*

A special course in Public Health Work is given the graduating class under the direction of the Chief Medical Officer of the Ontario Department of Health and the Director of the School of Hygiene, University of Toronto.

PROGRESS REPORT ON PLANS FOR THE CONTROL OF BANG'S DISEASE

C. D. McGilvray and J. S. Glover

The following plans were inaugurated during the year 1938 in co-operation with live stock breeders and practising veterinarians to assist in the detection and control of Bang's disease.

Plan A.—Routine testing of individual Herds.

Plan B.—Supervised testing of herds in prescribed areas.

Plan C.—Supervised calfhood vaccination.

Plan A. — Routine Testing of Individual Herds

This plan is available for the blood testing of individual herds by practising veterinarians. The blood samples are submitted by the veterinarian to be tested by the College laboratory staff. Provision is also made for the official testing of cattle for export to the United States. The tests made under this plan since 1938 are as follows:

	Negative	Positive	Doubtful	Total
Routine Tests	114,677 (81%)	20,538 (14%)	6,674 (5%) =	141,887
Export Tests	18,179 (94%)	916 (4%)	550 (2%) =	19,334
Totals	132,856 (82%)	21,454 (13%)	7,224 (5%) =	161,221

Plan B. — Supervised Testing of Herds in Prescribed Areas.

This plan is available where a group of ten or more owners occupying contiguous premises in a prescribed area submit a petition to have their herds tested under the supervision of a registered veterinarian. The Department pays the veterinarian for taking and submitting the blood samples at the rate of twenty cents for each animal tested and in addition provides the test charts and sterilized vials and makes the required agglutination tests free of charge.

All cattle over twelve months of age are required to be tested at intervals of from sixty to ninety days. Reactors must be earmarked and segregated or removed to an abattoir for slaughter, and the premises cleaned and disinfected. When a herd passes three negative tests within a year the owner is then expected to take the necessary steps to have the herd check tested for listing under the regulations of the Health of Animals Branch.

Under the foregoing arrangement ten prescribed areas have been established as follows:

1. *Schomberg Area:* Includes 277 herds comprising 3.193 cattle.
2. *Northumberland Area:* Includes 188 herds comprising 2.827 cattle.
3. *Stormont Area:* Includes 56 herds comprising 1.018 cattle.
4. *Maxville Area:* Includes 49 herds comprising 1.324 cattle.
5. *Vars Area:* Includes 41 herds comprising 1.069 cattle.
6. *Durham Area:* Includes 39 herds comprising 480 cattle.
7. *Carp Area:* Includes 35 herds comprising 731 cattle.
8. *Orono Area:* Includes 18 herds comprising 171 cattle.
9. *Almonte Area:* Includes 14 herds comprising 179 cattle.
10. *Brockville Area:* Includes 10 herds comprising 309 cattle.

RESULTS OF TESTS IN PRESCRIBED AREAS

						Total
1. *Schomberg Area:*						
1st Test—Negative	2778 (87%)	Positive	202 (6%)	Doubtful	213 (7%) =	3,193

3rd Test — Negative	98 (94%)	Positive	2 (2%)	Doubtful	4 (4%) =	104
4th Test — Negative	33 (99%)	Positive	— (—)	Doubtful	4 (1%) —	37
7. *Carp Area:*						
1st Test — Negative	678 (93%)	Positive	31 (4%)	Doubtful	22 (3%) =	731
2nd Test — Negative	492 (96%)	Positive	7 (1%)	Doubtful	14 (3%) =	513
3rd Test — Negative	355 (97%)	Positive	6 (2%)	Doubtful	5 (1%) =	366
4th Test — Negative	178 (96%)	Positive	2 (1%)	Doubtful	6 (3%) =	186
5th Test — Negative	99 (99%)	Positive	1 (1%)	Doubtful	— (—) =	100
6th Test — Negative	103 (91%)	Positive	5 (4½%)	Doubtful	5 (4½%) =	113
7th Test — Negative	21 (100%)	Positive	— (—)	Doubtful	— (—) =	21

8. *Orono Area:*

1st Test — Negative	148 (87%)	Positive	18(10%)	Doubtful	5 (3%) =	171
2nd Test — Negative	87(100%)	Positive	— (—)	Doubtful	— (—) =	87

9. *Almonte Area:*

1st Test — Negative	173 (97%)	Positive	4 (2%)	Doubtful	2 (1%) =	179
2nd Test — Negative	137 (96%)	Positive	2 (1%)	Doubtful	1 (1%) =	140
3rd Test — Negative	153 (96%)	Positive	4 (3%)	Doubtful	2 (1%) =	159
4th Test — Negative	102 (98%)	Positive	2 (2%)	Doubtful	— (—) =	104
5th Test — Negative	91 (98%)	Positive	— (—)	Doubtful	2 (2%) =	93
6th Test — Negative	71 (94%)	Positive	1 (1%)	Doubtful	4 (5%) =	76
7th Test — Negative	58(100%)	Positive	— (—)	Doubtful	— (—) =	58

10. *Brockville Area:*

1st Test — Negative	269 (87%)	Positive	21 (7%)	Doubtful	19 (6%) =	309
2nd Test — Negative	163(100%)	Positive	— (—)	Doubtful	— (—) =	163

GRAND TOTAL 26,767

RECAPITULATION

Number of cattle tested	26,767	
" " " Negative	24,885	— 93%
" " " Positive	883	— 3%
" " " Doubtful	999	— 4%

Plan C. — Supervised Calfhood Vaccination

Under this plan calf vaccination is being practised in 1,475 herds under College supervision. A total of 17,500 calves have been treated with a live vaccine prepared from Cotton's No. 19 strain *Brucella abortus*. The vaccine is supplied only to registered veterinarians for the treatment of calves between four and eight months of age. The vaccinated calves have to be recorded and identified on a form supplied for that purpose. The vaccinated calves are required to be check tested in thirty days following vaccination to determine if the vaccine has produced positive results. Slightly over 95% of the vaccinated calves show a positive reaction to the thirty day check test and less than 5% remain negative or doubtful to this test. The calves remaining negative or doubtful to the thirty day check test are revaccinated.

It would appear from the reports received that calf vaccination is of some value in building up some resistance against natural infection during the first pregnancy and to a lesser extent during the second and subsequent pregnancies. This may indicate that to provide further resistance against infection, heifers should be revaccinated again after their first period of gestation.

STUDIES IN PULLORUM DISEASE

By J. S. Glover and R. Connell

Prompted by the increasing number of chicks received for examination and the increased percentage of such birds found to be infected with *Salmonella pullorum*, some work along definite lines was commenced during the summer of 1941.

This work was continued during the past year as time permitted, and the results of our studies to date indicate that:—

1. Pullorum disease in chicks is on the increase.
2. The disease is widespread.
3. The mortality rate is often very high.
4. That some strains of the causative organism are very much more virulent than others.
5. That some strains would be unsuitable for the preparation of antigen for testing purposes.

Below is shown the apparent increase in pullorum disease this year over 1941. Not only were more chicks received at this laboratory found to be affected with this disease, but the percentage of affected chicks was greater. Diagnosis is made entirely on isolation and identification of *Salmonella pullorum*.

Sources of Cultures used in these Studies. The following table shows that the cultures used were obtained from birds received from many parts of Ontario. We also employed in our studies the three strains that were selected several years ago by the antigen committee of the Eastern States Pullorum Conference, and which have been, and are being used by laboratories in the U.S.A. and Canada who are members of the Conference. A culture of *S. typhi-murium*, var. Copenhagen, was also included. As indicated cultures 14 and 25 were isolated from the same flock. This flock had been shown to be comparatively clean to the regular test, but we isolated *S. pullorum* from over sixty per cent of the ninety adults we received from this flock for our studies. All cultures were identified here, and then forwarded to P. R. Edwards, Bacteriologist, Department of Animal Pathology, Lexington, Kentucky, who agreed with our identifications. Several had expressed their belief that we were not dealing with pullorum disease, but with one that was similar.

Comparative Pathogenicity of Cultures Under Study. Three brooders were specially constructed according to our specifications. Each of these was divided into eight compartments which were completely separated from each other. Heat was supplied by a 200 watt electric light bulb. The brooders were each placed on a revolving stand to facilitate feeding and watering. Five hundred and forty-eight day-old chicks were kindly donated by a well known Ontario hatchery. These were received on two different occasions, and placed in the compartments in lots of from ten to fourteen.

The chicks were hatched from stock that had been free from pullorum disease as far as was known, and all appeared to be in perfect health after being in the brooders twenty-four hours. Twenty-three lots of the first half were injected intra-abdominally with suitable doses of different cultures suspended in sterile normal saline. The chicks in the other lot were left as controls. Frequent observations were made daily for nine days, and on each occasion the dead chicks were removed from the compartments. All dead chicks during this period were plated on brilliant green liver infusion agar, and *S. pullorum* was recovered from each. On the first occasion one of the controls died, and *S. pullorum* was recovered from it, although at the end of the test period the others in this compartment were thriving. A large percentage of the survivors in the other compartments were droopy, stunted and pasted behind. All the surviving chicks were at this time destroyed and their carcasses burned. The brooders were thoroughly cleaned and disinfected.

Four days later the second half of the chicks was received and treated as the first half, with the exception that besides one lot being kept as controls, another lot was injected with sterile normal saline. *S. pullorum* was recovered from all that died during the nine day period. Instead of destroying the survivors of the controls and those receiving the saline injections, they were kept, and twenty-eight days later they were all alive and apparently healthy. The greater number of the survivors of the other compartments showed typical pullorum symptoms. Several from the various lots were plated and *S. pullorum* was recovered from them.

The accompanying chart indicates the mortality rate. It will be noted that only forty-seven lots were recorded. The forty-eighth lot was injected with a suspension of culture 1056 which was a sucrose fermenter and not *S. pullorum*, although it is shown elsewhere that it agglutinates with *S. pullorum* anti-sera. The deaths in this group amounted to sixty per cent.

† Salmonella typhi-murium isolated from lung of pigeon.

A questionnaire was sent out to persons who had forwarded chicks to us this year from which we had isolated *Salmonella pullorum*. This was done in order to get some idea of the extent of the infection, and to find out how many hatcheries and poultry farms were involved.

One hundred and forty-five replies were received, although some were not complete.

This tabulation of the replies indicates that chicks from many hatcheries were affected, and that the mortality rate of chicks is extremely high.

Cross Agglutination Tests. Tests were conducted using the forty-seven cultures, and sera from birds that had been injected with these cultures. The birds were bled from the heart ten days after they had been given an intravenous injection of culture suspensions. An antigen prepared from each culture was checked with each serum, using dilutions of 1:25, 1:50, 1:100, 1:250, 1:500 and 1:1000. This was time consuming work, as we prepared the antigens, set up the dilutions and read the results ourselves. Although we consider this the most important and informative part of our studies, too much space would be required in order to show in tabular form the results of the tests. A serum with a satisfactory titre could not be obtained from birds injected with culture 17. Cultures 1080 and 1101 were of low antigenicity, being unsatisfactory as antigens and yielding sera with low titres. (These two strains were only moderately pathogenic). Beneath are shown in brief the results of the tests. For our purpose we considered that a culture suspension to be classed as satisfactory was one that showed complete agglutination in a 1:50 dilution or higher. Any tests showing a cloudy or partial reaction are not considered as satisfactory. In a large number of cases we obtained complete agglutination in the 1:1000 dilutions.

Despite the fact that cross agglutination tests are so time consuming they are the only practical solution to the problem of selecting strains to use as antigen for testing for the disease.

Three antigens, 1035, 1036 and 1039 were not set up with serum 1073, and antigens 1035 and 1039 were not set up with serum 1075 on account of insufficient serum.

Agglutinin-absorption. One of us (Connell) has conducted numerous agglutinin-absorption tests using cultures 2, 12, 25, 26, 789, 1083, 17, 19 and 20. The results of these tests are not fully complete.

All sera were absorbed with the same amount of the respective organism without trying to grade the amount to the titre of the serum being absorbed, and without trying to completely absorb the sera. Tables of these agglutinin-absorption studies are too space consuming to include here. However 2, 1083, 17, 19, and 20 fell into one distinct group, and 12, 25, 26 and 789 fell into a different group. The last four strains appear antigenically similar to the "variant" strains so commonly isolated from Ontario chicks in recent years. The standard antigen, it will be noted, does not contain "variant" strains.

Number 2 serum absorbed with 12 antigen will agglutinate "normal" *S. pullorum*, but not "variant" *S. pullorum*. Number 2 serum proved the best for making a specific normal serum.

In like manner by absorbing any "variant" strain with a "normal" strain, specific "variant" sera were obtained. The absorption of 12 serum with either 2 or 20 *S. pullorum* gave the best specific sera.

"Normal" or "variant sera" can be completely absorbed out with the opposite type if a sufficiently large amount of absorbing organism is used. Therefore, the difference between "normal" *S. pullorum* and "variant" *S. pullorum* is probably not one of different antigen structure, but apparently one of relative difference in amount of component somatic antigens.

It was decided to type the *S. pullorum* isolated from chicks consigned to this institution. Agglutinin-absorption was too time consuming. Absorbed sera were found to be satisfactory. Later both "normal" specific and "variant" specific sera from naturally infected birds were obtained from A. R. Younie. Of 161 isolations of *S. pullorum* typed, 110 were "variant" and 49 were "normal", and two agglutinated with both sera equally well.

Practically any high titre pullorum serum will agglutinate standard antigen made from conference antigen strains satisfactorily. Low titre sera from experimently affected birds will agglutinate antigen from birds carrying the corresponding type of infection, but will not cross agglutinate with the opposite type. Consequently low titre "variant" infected birds are in many instances not detected by the standard agglutination test.

The terms "normal" and "variant" as used here, are merely convenient terminology. *Both are S. pullorum.* The standardized pullorum agglutination test appears to be holding "normal" pullorum disease in check while the "variant" form of the disease has become dominant due to the fact that "normal" antigen is not detecting "variant" infected birds.

The results point conclusively to the fact that selections must be made among "variant" trains to use as an antigen for testing for pullorum disease, or to include in an antigen along with "normal" strains. Work of this nature is now in progress.

Since commencing this work we have had the opportunity to discuss the problem with various hatcherymen and poultrymen, and have been able to learn some of the reasons for the increasing mortality rate in chicks from pullorum disease. One of the most important steps to be taken in controlling the disease is, in our opinion, the use of a test antigen prepared from a mixture of the "standard" strains and what some term "variant" strains. It has been shown that in chicks received here during the past month the so-called variant strains have been isolated nearly three times as often as those we have considered regular or standard strains. The fumigation of incubators and hatchers will have to be more thoroughly and consistently carried out. Also, our observations lead us to believe that at times chick sexing has been the cause of introducing the disease on to premises that were previously free from infection due to the sexer going from infected to non-infected premises and neglecting to take the necessary precautions.

SUMMARY

The apparent increase in pullorum disease in 1942 over 1941 is indicated by the fact that 74.2% of chicks received at this laboratory over a five months period in 1941 were found to be affected, and 88.6% during the corresponding period in 1942.

Cultures used in these studies were obtained from birds in widely scattered parts of Ontario as well as the three Conference strains. A culture of *S. typhimurium* and a sucrose fermenter were also used.

The comparative pathogenicity of forty-five of the cultures was studied using two day old chicks kept in specially constructed brooders. With the exception of the controls each chick was given a suitable dose of culture suspension intra-abdominally. Observations were made daily for nine days following the injections, and dead chicks were cultured on brilliant green liver infusion agar. *S. pullorum* was recovered from all chicks that died. The mortality rate ranged from 23% to 100% in the different lots.

One hundred and forty-five replies to a questionnaire were received and tabulated. These covered sixty-three hatcheries, one hundred and thirty-seven purchasers, forty-five thousand two hundred and ninety-two chicks purchased, and thirteen thousand nine hundred and fourteen deaths in chicks under three weeks of age.

Cross agglutination tests were conducted using forty-seven cultures and forty-seven sera. It was found that several strains were unsatisfactory for antigens.

The results of some agglutinin-absorption tests show that the strains fell into at least two groups—"normal" and "variant". The Conference antigen in use does not contain any of the "variant" strains.

ACKNOWLEDGMENTS

We wish to thank the leading hatcherymen in the province for supplying us with suitable birds. Also V. R. Brown and D. L. T. Smith of the Ontario Veterinary College for their valuable assistance in various phases of the work, A. R. Younie of St. Catharines who supplied us with several cultures and samples of sera and discussed the various aspects of the problem with us from time to time, and P. R. Edwards of Lexington, Kentucky, who kindly identified cultures for us on several occasions.

AN UNUSUAL OUTBREAK OF SWAMP FEVER

Frank W. Schofield

The outbreak occurred on a farm located between Niagara Falls and Welland, in a territory which had always been free from "swamp fever". Due to the recent erection of a large chemical plant, it was believed that the deaths were due to the fumes emanating from this plant.

History of the Outbreak. During the previous six weeks, ten horses out of eleven which had been grazing over the pasture land had died and the eleventh was about to die at the time of the visit. This brought the mortality up to 100%. These horses had been grazing on the land all summer, and with them on the pasture were approximately one hundred sheep and forty cattle. The pasture had been used for more than twenty years for grazing, and this was the first occasion in which there had been a serious loss of stock. A stream which ran through the farm had recently been fenced off, so that all of the stock had to drink from ponds and surface water. This in all probability had an important bearing on the suddenness and severity of the outbreak.

Clinical History. Of the eleven animals which died, only three came under clinical observation, and two of these were seen only once by a veterinarian, which accounts for the meagre clinical data. The third animal was under constant observation. All showed rapid loss of condition, with progressive lassitude and weakness. The temperature was elevated 103F. - 105F. Small ecchymoses could be seen in the conjuctiva. Incoordination of movement was present for several days before death. The duration of the illness can only be approximated and was from three to four weeks. The eleventh case, a two year old filly, died during my visit and a post-mortem was made.

Postmortem. The *peritoneum*: this was covered with petechiae and small ecchymoses. *Lymph nodes*: all of the body lymph nodes were enlarged, edematous and many were slightly hemorrhagic. Those attached to the liver, spleen and kidney were markedly enlarged. *Spleen:* enlarged, the pulp, dark and soft, weight 3½ lbs. *Kidneys*: enlarged, with hemorrhage under the capsule. *Heart*: ecchymoses were present in the epicardium and endocardium. *Lungs*: congested.

Based on the clinical history and post-morten findings, a tentative diagnosis of "swamp fever" was made.

Diagnosis Confirmed by Inoculation of a Horse. A healthy horse was inoculated with a 5.0 cc of serum from the filly which died. The serum was not filtered as had to be stored for two weeks and had proven on culture to be free from bacteria. The following is a brief summary of the data from the experimental horse:

Oct. 10, 1942—Intravenous inoculation with serum from filly, temperature 100F.

Oct. 21 & 22—Initial rise in temperature to 103F.

Oct. 23—Temperature 100F.

Oct. 27—Temperature 104.5F. Blood count—W.B.C.

Oct. 29—13,000; R.B.C. 7,600,000; Hemoglobin 75%. Temperature 100F.

Nov. 10—Died; Blood count: W.B.C. 14,000; R.B.C. 7,000,000; Hemoglobin 75%.

Postmortem. The lesions were almost identical with those described above as present with the filly. The spleen was very much larger weighing 7½ lbs. The kidneys were slightly enlarged and were odematous. The mucous membrane of the large intestine was definitely congested.

NOTE—There was no appreciable reduction of the red blood cells in either the filly or the experimental horse.

Origin of the Infection. An interesting fact came to light some weeks later, in that, five horses had died on an adjacent farm during the last two years, with symptoms very suggestive to "swamp fever". These horses with one other were brought from the West when the owner moved to Niagara two years previously.

VITAMIN A DEFICIENCY IN SWINE

History. A dead pig weighing about 125 pounds was brought to the College for a post-mortem examination. The history as given by the owner was briefly as follows: "A peculiar disease had occurred among a group of fifty fat pigs which were being finished for the market. The pigs weighed from 125 - 150 pounds. They had done well, were thrifty and until three or four weeks ago were quite healthy. During the last few weeks a number of the pigs had shown difficulty in walking. They would sway, stagger, and in walking over an object or up on to the bed they frequently stumbled and fell. A few had become partially paralyzed and were quite unable to get up and walk, although they would make many vain attempts. Fifteen pigs had died during the last few weeks."

Enquiring into the feed, they were getting broken ice cream cones, and rye middlings which had been used in some industrial process of polishing tin. A liberal supply of skim milk was used.

Post-mortem. The only noteworthy lesion was congestion of the lungs with early consolidation of the anterior lobes. Cultures made from the affected lung gave a heavy and pure growth of P. suiseptica.

Diagnosis and Treatment. Not being satisfied with the post-mortem findings, the piggery was visited and the animals examined. The description of the sick pigs as given by the owner was substantially correct. The affected pigs showed no increase in temperature, and manifested no symptoms of acute disease. The white cell count was normal. The appetite was only partially impaired. One pig was down and unable to rise, although it could get up on its knees and drag the body over the ground to some extent. This pig looked bright and ate all the food carried to her.

After a careful examination of the sick animals and a consideration of the diet a diagnosis of a-vitaminosis was made, and cod liver oil prescribed. The owner stated that the improvement in the pigs was almost immediate: all recovered within a week and no further cases occurred.

NOTE—The infection with P. suiseptica was most likely the outcome of the complete depletion of vitamin A. Several small pigs in adjacent pens had died of pneumonia and many which remained were coughing. They may have been the source of infection.

IRON POISONING IN PIGLETS

Due to the constant emphasis, both in print and speech, of the importance of iron in the prevention of anemia in suckling pigs, over-doses are frequently given with fatal results. Some years ago we conducted experiments both with "reduced" iron and iron sulphate, which proved conclusively that large doses of iron given to suckling pigs may cause death in from twenty-four to forty-eight hours. We were unable to determine the exact way in which the toxic or lethal dose killed the pig, but it is most probably related to the injury caused to the gastro-intestinal mucosa. The resistance of the pig to infection is greatly lowered so that death due to septicemia is common.

The Toxic Dose. One cannot state exactly the size of the toxic dose, as this varies with different litters. Farmers have frequently stated that using the same dosage, pigs in one litter would be seriously affected, while the pigs in another litter would be unaffected. In the majority of cases investigated, the dose used has been three, four or even five times the proper dose. Also the iron has frequently been administered too often.

The Safe Dose. Reduced iron may be given in quantities of three grains or 200 mgs. to piglets when twenty-four to forty-eight hours old. This quantity is approximately an amount equal to the size of a five grain aspirin tablet. However we advise the farmer to obtain a sample weighed dose of 200 mgs. from the druggust, so that he has a reliable guide. When the sulphate of iron (copperas) is employed, a safe dose is one-half teaspoonful of a saturated aqueous solution. The dose should be repeated once a week till the pigs are four weeks old and eating a little from the trough. If desired the dose may be increased from week to week corresponding to the increase in the weight of the pigs.

When possible the iron should be supplemented by placing clean earth in the pen once or twice a week. A solution of iron may be liberally sprinkled on the earth.

PHOSPHOROUS IN STIFF LAMB DISEASE

During the past year we have employed phosphorous, as dilute phosphoric acid, in many cases of "stiff lamb disease," with uniformly good results. The exact nature of the disease is not known, so the use of phosphorous is empirical, yet it has an immediate and beneficial effect.

In the Annual Report for the year 1939 we made reference to "stiff calf disease" and reported on the similarity of the lesions in both the calf and lamb. This was, I believe, the first report to be made suggesting a common etiology and treatment for these two diseases.

A paper has been published recently by Dr. Welch, Department of Veterinary Science, Montana State College, in which the relationship between these two diseases is suggested. He believes that the soil and climatic conditions play a part in their incidence in certain fairly well defined areas of the state. No treatment is offered. It will be interesting to see whether the disease as it occurs in Montana responds to the use of phosphoric acid.

Diagnosis. It is very easy to confuse "stiff lamb disease" with infection of either the joints of muscles. We experienced many such cases this spring. Careful clinical examination will usually reveal the presence of pain or swelling in the joints or muscles. At post-mortem the muscles are found to be normal in colour, with no trace of the characteristic striations of "stiff lamb disease". In many cases "stiff lamb disease has been accompanied with pneumonia, the latter causing the death of the lambs and not the deficiency in phosphorous. Pyrexia is absent in "stiff lamb disease".

SALMONELLOSIS IN FOXES

Severe outbreaks of salmonella infection occurred on two fox ranches during the summer months. In both cases the disease was quickly brought under control by the use of autogenous bacterins. (chemically killed cultures). Until the use of the bacterin other methods of treatment including strict sanitation and isolation failed to influence the course of the infection. All of the cases were in pups.

Symptoms. The most characteristic symptoms were: poor appetite: persistent diarrhoea; stairing hair with loss of bloom, and extreme emaciation.

Post-mortem. The most constant finding was an enlarged and dark *spleen.* The *stomach* showed slight gastritis and in some cases a few small ulcers were present. The *small intestine,* well marked catarrhal enteritis was present in most cases, in a few the enteritis was severe, the feces being tinged with blood. Other organs appeared to be normal. Salmonella was isolated readily from the spleen and intestine.

The origin of the infection could not be ascertained.

BRAXY IN SHEEP

During the last few years a few carcasses of sheep have been brought to the College for post-mortem examination showing the lesions characteristic of braxy. One such case is reported for the present year. the diagnosis being braxy.

History. Three full-grown lambs had been lost and with similar symptoms. The onset of the disease had been sudden. The lambs were only sick for about twenty-four hours; pain being the only symptom. All of the affected lambs were in good condition.

Post-mortem. The peritoneal cavity contained a slightly turbid blood-stained fluid. The mucosa of the *abomasum* was actually inflamed. (In one case the sub-mucosa was very odematous.) The *lungs* were congested and slightly hemorrhagic. The *kidneys* were normal. The *liver* was friable. There was a well-marked sero-sanguineous infiltration of the subcutaneous tissue in the sub-maxillary region and over part of the shoulder.

Bacteriological examination. C. septique was isolated in almost pure culture from the peritoneal fluid and from the sub-cutaneous lesion.

AN UNUSUAL CASE OF BLACKLEG

Two acutely sick calves, eight weeks old, were brought to the college for diagnosis with the following history.

History. These calves had never been outside the pen, and had been in perfect health until the morning of the day when they were brought to the college. They had been fed, on milk, grain and a little hay.

Symptoms. Both were markedly depressed. Temperature 103°F; breathing rapid, pulse accelerated, they remained lying down.

Calf "A" showed slight edema in the submaxillary region. No other lesions could be detected by a careful physical examination.

Calf "B" showed well marked swelling of the left hind leg, which was edematous and crepitated on palpation. This calf showed the typical symptoms of black-leg. Both animals died within twenty-four hours after the appearance of the symptoms.

Post-mortem. Calf "A". Interesting and unusual lesions were found in this calf. *Abomasum*, acute congestion of the mucosa. *Small intestine*, many areas of acute inflammation. *Cecum*, the mucosa was acutely inflamed. *Spleen*, normal. *Kidneys*, normal. *Liver*, normal. *Lungs*, the anterior lobes were acutely inflamed, hemorrhagic and consolidated. The *pleura* was inflamed and covered with a hemorrhagic fibrinous exudate. The *heart*, was covered with ecchymoses the sac contained a blood stained fibrinous exudate.

Cultures. Cl. chauvei was obtained, in pure culture from the blood and tissues, but not from the acutely inflamed intestine.

NOTE—The origin of the infection was most likely the hay. In calf "A" death was due to the severe infection of the heart and lungs.

HAEMORRHAGIC ENTERITIS IN THE ARCTIC BLUE FOX

Caused by the Virus of Feline Enteritis

By C. E. Phillips

On Sept. 8th, two fox pups were brought to the Fur Bearing Animal Disease department for diagnosis, and were subsequently submitted to the Department of Bacteriology for bacteriological examination.

Case No. I—Fox pup had been dead for twenty-four hours prior to examination.

Macroscopically it presented a severe haemorrhagic enteritis with eversion of the rectum. The body lymph glands were slightly congested and oedematous, this condition being much more pronouced in the mesenteric group than elsewhere. The spleen was large and congested, suggesting a Salmonella infection. The kidneys were hyperaemic and a slight congestion of the lungs was present.

Case No. II—Fox pup. This animal was alive, but very weak and listless and could be easily handled without restrain. There was extreme emaciation, the coat was rough and the hair lustreless.

Bacteriology—Cultures from the gut, spleen, and lungs were made. A nonlactose fermenting, Gram-negative rod was isolated from McConkey's medium. Further tests for identification, demonstrated that this organism did not belong to the Salmonella group.

On October 27th a visit was made to the ranch and faecal samples were obtained from four sick pups.

History of Outbreak. The history of the outbreak as stated by the owner and confirmed by the local veterinarian, Dr. G. A. Schiedel, was as follows:

Litter No. 1, comprised seven pups which were born in May. At six months of age, five showed signs of an intermittent diarrhoea.

Litter No. 2, the second May litter, of six pups, were all affected similar to Litter No. 1, but all survived.

Litter No. 3, the third May litter, consisted of ten pups plus one adopted (11). These pups were chronically affected and three died at from five to six months of age.

In Litter No. 4, an early June litter, of eleven pups, ten died at from eight to nine weeks of age. They succumbed within a period of seven days. The length of illness according to the owner's observation was from two days to three weeks.

Litter No. 5, the second June litter, consisted of nine pups of which five died at from eight to nine weeks of age and within a few days of each other. The remainder were put into individual pens. However, two more sickened and died within two weeks; the remaining two survived.

In Litter No. 6, the third June litter, of six pups, five died about the middle of August and the sixth remained chronically ill.

All pups evidenced sickness at some stage of their growth. It will be noted that of fifty pups born, twenty-five succumbed to the infection.

Further questioning of the owner revealed the fact that a kitten had died during April with a history that could indicate feline enteritis. The lesions in the foxes coupled with the symptoms suggested a possible relationship with feline enteritis.

Experiment No. 1.—On November 1, kittens about five months of age were fed milk to which had been added a small amount of a composite sample of faeces obtained on the 27th from blue foxes clinically affected.

Kitten No. 1 appeared dull and listless on the eighth day and died on the fourteenth day, manifesting the clinical symptoms and the post-mortem lesions of feline enteritis.

Kitten No. 2 remained lively until the thirteenth day. On the fourteenth day signs of anorexia were present followed by rapid emaciation and death on the eighteenth day. On the seventeenth day the W.B.C. count was 8,200 and the temperature 106.4°F. The kitten died before further tests could be made. The post-mortem lesions were similar to those described in feline enteritis. The litter mates of these kittens which were kept on the farm remained healthy.

The results of this preliminary work appeared sufficiently encouraging to warrant proceeding with further experiments.

On November 26, the ranch was again visited and W.B.C. counts were made on several foxes. Those showing clinical symptoms were uniformly low, whereas the apparently healthy animals were within the normal range for foxes. A recently sickened adult fox showed a count of 5,200 W.B.C. Feline enteritis serum was administered at that time. The W.B.C. count seven days later was 14,400 and the animal presented a normal appearance.

Experiment No. 2.—Six cats were obtained consisting of No. 1, mother, three years old; No. 2, kitten (daughter) six weeks old; No. 3, kitten (daughter) eight months old; No. 4 and No. 5, (littermates) five months old; and No. 6, kitten, four months old.

Experimental cats were: No. 1 cat; No. 2, kitten, six weeks old; No. 4, kitten, five months old; No. 6, kitten, four months old.

The controls were: No. 3, kitten, eight months old; No. 5, kitten, five months old.

The cats in the experimental group were fed a small quantity of a composite faeçal sample from three sick foxes, on two successive days. Daily temperatures, W.B.C. counts, haemoglobin, and in some instances R.B.C. counts were recorded.

Results.—Kittens No. 4 and No. 6 showed an initial rise in W.B.C.'s, followed in two or three days by a rise in the controls, No. 3 and No. 5. The W.B.C. count in No. 1 (cat) and No. 2(kitten) remained uniform throughout the experiment. The temperatures of Nos. 3, 4, 5, and 6 gradually rose to between 106 to 107°F. As the temperatures rose the number of W.B.C.'s slowly declined until at the time of maximum temperature a rapid decline occurred. A level as low as 1,800 W.B.C.'s per ccm. was recorded, the majority being from 2,000 to 3,000 W.B.C.'s per cmm.

Kittens No. 3 and No. 5 declined to 3,000 and 2,400 respectively on December 9, at which time Feline Enteritis homologous serum—20c.c.—was given intraperitoneally to No. 5 kitten. Kitten No. 3 died on December 11, the W.B.C. count on the day previous to death being 1,800. Kitten No. 5 on December 10, the day following the administration of the serum, had a W.B.C. count of 5,800 and the temperature was down to 104.4°F. On December 11, the temperature had dropped to 101.8°F. and the W.B.C. count was up to 10,000.

Due to disease appearing in the controls, No. 3 and No. 5, which possibly occurred through handling for examination, the litter mates of these kittens which had remained on the farm were examined. They were perfectly healthy and showed no increase in temperature or alteration in the W.B.C. count. It is presumed that the mother cat had developed an immunity to feline interitis and had transmitted this immunity to the unwearned kitten.

Immunization of Foxes. A limited amount of work has been done on the immunization and treatment of foxes with feline enteritis vaccine (killed virus) and anti-serum (virus). The results have been encouraging; however, it will be necessary to carry this work through at least one more season before a satisfactory report can be made. The use of the vaccine in the treatment of three severely affected animals proved of value and this procedure may be indicated.

I might add that prior to this finding, the virus causing feline enteritis (Distemper) was considered to be transmissable only to members of the feline family. Laboratory animals including the ferret are not susceptible. An attempt to transmit the disease from fox pups to ferrets and guinea pigs was unsuccessful.

ALCALIGINES BRONCHISEPTICUS

As an Etiological Factor in Porcine Pneumonias

C. E. Phillips

Within the past six months *Alcaligenes bronchisepticus* has been isolated in this laboratory from seventeen piggeries situated in various parts of Ontario. Seventy-five per cent of these isolations were in pure culture and twenty-five per cent were combined with Pasteurella suiseptica. This organism has been demonstrated in approximately 50% of the porcine pneumonias received at this laboratory since its identification on November 13th, 1942.

In each instance the organism was isolated from the thick viscous bronchial exudate of a consolidated lobe of the lung.

Following the isolation and identification of this organism and in view of its possible significance as an etiological factor in pig pneumonias, a review of the literature was undertaken. Dorset, McBryde and Niles refer to an isolation of *B. bronchisepticus* and *B. suisepticus* during the course of their work on Influenza suis; in the Journal of the American Veterinary Medical Association 1922: and W. D. Dougherty in "The North American Veterinarian", March 1941, had established the presence of the organism in two typical cases of "bull nose". These appeared to be the only two available references.

The organism can be demonstrated by gram stain, in smears, as a rod 1.5 to 3u long and also in filaments up to 25u. These chains or filaments are also characteristic in primary isolations and in broth cultures.

Cultural Characteristics.—The growth on either blood or plain tryptose agar is barely visible after twenty-four hours incubation.

Following forty-eight hours incubation at 37°C., tiny dewdrop-like colonies appear scattered over the plate. As the culture ages the colonies increase in size up to 4 mm., either at incubator or room temperatures. On trytose agar they appear as transluscent, raised shiny colonies with a yellowish tinge.

Sub-cultures grow readily in twenty-four hours.

The organism was identified as belonging to the genus *Alcalignes*, by the following reactions in culture media. Abundant, moist, yellowish-brown growth on potato slants.

No fermentation in any of the common sugars.

The alkalizing of litmus milk. This takes place uniformly after from forty-eight hours to seventy-two hours of growth and progresses to a deep blue-black in from seven to ten days.

The growth in tryptose-phosphate broth is very characteristic. It produces a slow uniform growth during the first forty-eight hours, followed by the formation of a thick viscous sediment which increases with age. Upon agitation this sediment appears as mucous strings throughout the broth.

Simmon's Citrate has proved of value in the identification of new isolations, the organism apparently being able to utilize this media for growth.

Animal Inoculation.—The intraperitoneal injection of 0.5 ccs. of a twenty-four-hour broth culture kills a guinea pig in from twenty-four to forty-eight hours. The lesions consistently appear as small haemorrhages on the peritoneum, and a viscid translucent exudate forming a pseudomembrane on the liver. The lung may be involved. The organism is easily recovered from the abdominal or thoracic cavity and the lung substance.

It is the opinion of the writer that this organism should be included in that group of bacteria which appear to be responsible for the chronic pig pneumonia and persistent coughing so common in Ontario piggeries.

Further work is being carried out in an endeavour to establish the importance of this organism.

REPORT OF THE CLINICAL DEPARTMENT

The duties of this department consist chiefly of clinical diagnosis and the application of the practice of animal surgery and veterinary medicine. During the course of the year, and particularly in the academic portion of it, many cases in all species of farm animals and pet stock were submitted to the clinic. Apart from this considerable numbers of postmorten examinations were made and some field and extension work done. Owing to stormy weather and snow-blocked roads during the months of January and February, there was a drop in the numbers of cases brought in for treatment. However, taking the year as a whole, there was but little difference in the amount of clinical material, and there was an increase in the number of sheep and swine cases.

Horse Diseases

In this species the cases submitted were largely surgical in character. Poll evil, fistulous withers and laryngeal hemiplegia were the most numerous cases. Other conditions affecting horses frequently brought in for operation are hernias, cryptorchidism, lameness, and dental disease. Skin affections, both parasitic and otherwise, are often observed in patients brought in for other purposes. These occur because of a lack of grooming, improper care, and management. The same criticism of neglect may be applied to the case of horses' feet for quite often gross deformities of the hoof, canker, and lameness resulting from such negligence were observed. The diagnosis of pregnancy in bred mares using the rat test was demonstrated in nine mares, six of which were positive and three negative.

Cattle Diseases

In cattle the majority of cases submitted are of an unusual character, and in some cases difficult to handle successfully. The predominate cases are those in which some condition interferes with reproduction in both females and males. These cases of sterility are invariably highly-bred animals of exceptional value, and as a rule are submitted by some of the foremost breeders of purebred stock in the Province.

Other clinical demonstrations of diseases which are responsible for serious losses in the bovine species, such as mastitis, calf scours, calf pneumonia, necrotic stomatitis, and nutritional deficiences are made from cases made available through the clinic. Sporadic diseases such as pseudo-leukemia, photo-sensitization, hypocalcemia, acetonemia, sweet clover poisoning, retention of the afterbirth, and many other conditions are also submitted from time to time or made available through the Agricultural

College herds. Acetonemia, a disease due to disturbance in carbohydrate metabolism, has been particularly prevalent in high- milk-producing herds, the latter part of the past year. The increase in the incidence of this condition is probably due to the fact that milk producers have been unable to procure feed molasses with which to supplement the concentrate rations of their cows.

Calf scours infectious in character has also been very prevalent and is responsible for serious losses in many outbreaks.

Swine Diseases

Many swine have been submitted for the correction of congenital aberations, such as scrotal and umbilical hernia and cryptorchidism. Apart from this many others are brought in representing a disease in which usually a number in the herd are affected. Quite often a diagnosis of the trouble is made and the condition corrected by advice as to the manner in which the remainder of the sick animals at home should be treated, cared for and fed. In this regard, a number of letters of appreciation have been received for the services rendered. In connection with swine diseases, an occurrence of an unusual character was encountered in a large herd of Yorkshires where a considerable number of the older pigs had contracted an avian tuberculosis infection. This was determined through the use of the intradermal tuberculin test on the entire herd. The reactors which were slaughtered revealed lesions in the mesenteric chain of lymph glands, indicating that the infection had in all probability occurred through the digestive tract. One hundred and thirty-seven pigs at ages, ranging from eight weeks to aged sows and boars, were tested. Out of the number tested fifty-seven gave positive readings to the test. The test reactions were confirmed by the finding of acid-fast bacilli in stained tissue specimens of lesions found in the mesenteric lymph glands, by Dr. Schofield. Since the application of the test, a considerable number of the reactors have been slaughtered under inspection, and in most instances lesions were found. A few were found to be without visible lesions.

Sheep Diseases

In this species, cases of stomach worm disease and other forms of parasitism were most numerous. Other conditions, such as pregnancy disease, stiff lamb disease, tetanus following docking and castration, nutritional disease and a considerable number of sporadic ailments were presented for examination and diagnosis. There has also been an unusual number of inquiries from various parts of the Province regarding the loss of lambs at birth. In some of these reported outbreaks as many as fifteen lambs had died. During the summer of 1942, stomach worm disease was apparently unusually prevalent as quite a number of individual cases representing disease outbreaks in flocks were brought in for diagnosis.

Dog and Cat Clinic

One afternoon a week is devoted to examination, diagnosis, and treatment of pet animals. Considerable numbers of female dogs and cats are presented for the spaying operation. These make useful operations for the demonstration of anaesthesia and surgical procedure. X-ray demonstrations are held in cases of fracture and other purposes whenever it is felt such examinations will aid in diagnosis.

Other conditions such as digestive disturbances, renal diseases, respiratory affections, distemper, skin diseases, both parasitic and otherwise, are examples of clinical material submitted.

A REPORT OF AN OUTBREAK OF AVIAN TUBERCULOSIS IN SWINE

R. A. McIntosh

Early in December of 1942 a caseous and partly calcified lesion in the mesenteric lymph glands of a six-months-old pig which had been butchered the same day was submitted for diagnosis. As the specimen had the appearance of a tuberculous lesion, a request was made to examine some litter mates of the pig which were being used in a feeding experiment.

It was deemed advisable to subject this group of pigs to a tuberculin test. As no knowledge of the origin or source of the infection was available, it was decided to make a double test at the same time, using bovine tuberculin at one site and avian tuberculin at the other. The injections were made intradermally on the highest point of the ridge on the outer surface of the ear. The bovine tuberculin was injected in each instance nearer to the base of the ear while the avian tuberculin was injected about two inches above the former and about the middle of the ear. Daily observations were made, but the diagnostic reading was taken at the seventy-second hour.

There was no reaction to the bovine tuberculin injections, but in each one of the five pigs tested, there was a reaction to the avian tuberculin injection. Three of them were definitely positive while the other two were listed as doubtful. Subsequently, all of these pigs were slaughtered subject to inspection, and lesions were found in the mesenteric lymph glands of both the positive and the doubtful

SITE OF INTRADERMAL INJECTION

reactors. Acid-fast stains were made of smears obtained from the lesions, but no organisms were observed. Later, however, an acid fast stain of a tissue specimen revealed many acid fast organisms of avian type.

On inquiring into the history of the herd, it was learned that two years previous the entire lot of swine had been slaughtered because of an outbreak of hog cholera on the premises. About a year elapsed before any attempt was made to re-establish the herd. During the interim the stabling quarters had been thoroughly disinfected a number of times and some remodelling of the pens done. Furthermore, the contiguous pasture lots had been cultivated several times and everything possible done to eliminate the hog cholera infection. When it was deemed safe to re-establish the herd a considerable number of brood sows were purchased from a number of hog raisers in different parts of the Province, and in the course of a year a relatively large herd was built up again. Both the piggery and the pasture lots are separated from the cattle barns and poultry houses, and furthermore both the cattle and the poultry were known to have been free from tuberculosis for some years. These features made it difficult to determine the origin and source of the infection, and it was decided to apply an intradermal avian tuberculin test on the entire lot of pigs, except the barrows which were being fattened for market. This was done because it was felt that some one or more of the old brood sows were probably carriers and responsible for the spread of the infection. The following tabulation reveals the results of the test. It includes the first five animals referred to heretofore.

On May 4th. 1943, seventy-two pigs were tested. Two of this group were reacting sows in a former test, but had been kept because they were about to freshen. Of the remainder 90% were retest cases and 10% pigs that were too young at the former test. On this occasion all were negative, except the two sows which again reacted positively.

SUMMARY

Total No. Tests	Positive	Doubtful	Negative
236	55	4	177
Total No. Retests	Positive		Negative
65	2		63

Not all of the abattoir findings were available, but from those which were obtained lesions were found in 34 of the 55 positive reactors. There were nine of this group with no visible lesions and two others were sent to the Animal Diseases Research Institute at Hull, Quebec. Inspection data on the remainder were not available.

Early in the testing procedure some of the readings were placed in a doubtful category, but it was felt advisable to slaughter them and the abattoir findings for the four pigs placed in this group were three with lesions and one with no visible lesions.

It will also be observed that in the majority of the abattoir inspection findings the lesions were found in the mesenteric lymph glands which indicated the infection had been contracted through the consumption of contaminated ingesta.

The sow, 58 R, aged 6 years, and condemned for jaundice, was not given a thorough inspection. This animal was one which showed a very marked reaction, and was also in poor health. In generalized cases of avian tuberculosis in swine, the liver is quite often involved and it is believed she was an advanced case. Furthermore, every one of her progeny reacted positively.

As some of the negative pigs were being fitted for market, they too were subjected to inspection and a few very small lesions were observed in three of these.

Furthermore, as all of the barrow pigs were being fitted for market, they were not tested, but when slaughtered the abattoir findings revealed lesions in about the same percentage as those of similar age groups in the tested pigs.

In reviewing the circumstances surrounding this outbreak, it is significant that practically all of the reactors were found in the older pigs, and these pigs had mingled with each other during the summer of 1942 in the hog pastures. On the other hand only three reactors were observed in the younger groups of pigs that were born in the Fall and after the pigs were stabled for winter.

In one instance a whole litter of about ten, still being nursed by their mother, who was a reactor, were tested and not one of them reacted.

It is apparent, therefore, that the spread of the infection occurred mainly in the summer of 1942 while the pigs were being pastured and mingling together.

A retest of the entire lot is to be made again in September of this year.

M.L.G. — Mesenteric lymph gland.

S.M.L.G. — Submaxillary lymph gland.

REPORT OF THE PROVINCIAL ZOOLOGIST

Lionel Stevenson

Observations and records were made on the animal life of the district. Collections for class laboratory requirements were made when and where opportunity permitted. The diseases of fur-bearing animals and general animal welfare problems of the fur breeding industry were given the required attention. The shortage of labor and the shortage of fur animal food resulted in a reduction in numbers of animals kept on most ranches. Abattoir meats suitable for fox and mink food are now limited to the less valuable parts, as lungs, udders, spleens, lips, and brains, all of low feeding value. Horse meat was not as readily available as during the previous year.

The health of fur-bearing animals was highly satisfactory as very few cases of an infectious nature were reported. Of the 100 animal carcasses sent in for an autopsy report from ranches located in all sections of the Province, evidence of food toxemia in some form was manifest in 32. As in the past years food toxemia has been the main cause of loss on fox and mink ranches. Only one fur animal breeder reported distemper. Two breeders reported infectious feline enteritis in ranches where Arctic blue foxes were kept. Domestic dogs and cats uncontrolled are a menace to the fur breeding industry in that they spread most of the infectious diseases that the fur breeder has to contend with.

Twenty-nine silver fox carcasses, sixty-three mink carcasses, three nutria carcasses, four Angora rabbit carcasses and one chinchilla carcass were sent in by fur breeders for autopsy report.

BULLETINS PREPARED:

DESTRUCTIVE PEST ANIMALS
SWINE PARASITE CONTROL
THE DOMESTIC RABBIT

COLLEGE TEACHING:

Zoology: A lecture course and a laboratory course covering Invertebrate Zoology for Veterinary students was given to the Second Year Class.

Plant Toxicology: A lecture course covering principal poison plants of Canada and the United States was given to the Third Year Class.

Diseases of Fur-bearing Animals: A lecture course covering diseases and treatment, care and management of domestic fur-bearing animals was given to the Third Year Class.

ROUTINE LABORATORY WORK:

Many speciments of fecal matter from silver foxes, mink, rabbits, sheep and swine were received and examined for the presence or absence of parasitic pests or their ova. Specimens of food, principally meat and fish, were received for examination as to wholesomeness and suitability for fur animal food. Due to meat food shortages much inquiry regarding possible substitutes, principally for horse meat, have reached this office.

GONADOGEN:

Sixteen female mink that did not show any sign of oestrum and failed to mate previous to March 25th were injected with an ovarian preparation, "Antex". Five of the sixteen injected on March 25th mated within seven days, eleven were apparently not influenced by the treatment and failed to mate or show any evidence of oestrum at any time.

THE FUR BREEDERS' CONFERENCE:

The Ontario Fur Breeders' Association held its Annual Conference at the Ontario Veterinary College on June 10th and 11th, 1942. Full assistance in the organization of the Conference, aid with the educational program and the use of all College facilities was given to the directors and members of the Ontario Fur Breeders' Association. This Conference relating to the Fur industry was largely attended by breeders of silver foxes, mink, nutria, and chinchilla. Representatives from the fur trade, supply houses, and government departments were present also. Numerous Ontario fur breeders visited the College seeking information on ranch problems. There was a greatly increased interest shown in Angora rabbit breeding during the year. There were 300 Angora rabbit keepers producing the highly-valued Angora wool for shipment to Canadian mills.

DRAFTING POSTWAR HIGHWAYS.

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:—

The undersigned has the honour to transmit the Annual Report of the Department of Highways, Ontario, for the fiscal year ending March 31st, 1943.

Respectfully submitted,

T. B. MCQUESTEN,
Minister.

Department of Highways, Ontario,
Toronto, May 28th, 1943.

To The Honourable T. B. McQuesten, K.C., B.A., LL.B.,
Minister of Highways, Ontario.

Sir:—

I have the honour to present herewith Report on the activities of the Department of Highways for the Fiscal Year ended 31st March, 1943.

The Report covers operations and functions performed by the various branches, including King's Highways, Municipal Roads, Bridge Construction, Accounting, Gasoline Tax and Motor Vehicles.

I have the honour to be, Sir,

Your obedient servant,

R. M. Smith,
Deputy Minister.

Department of Highways, Ontario,
Toronto, May 28th, 1943.

HIGHWAYS OF ONTARIO

By R. M. Smith, Deputy Minister

During the period covered by this report for the fiscal year ending March 31st, 1943, the total revenue collected by the Department was as follows: Gasoline Tax, $25,001,102.55; Motor Licenses, $7,327,019.23; Miscellaneous, $164,181.70, making a total of $32,492,303.48, a decrease of $5,465,764.98 from the revenue of the preceding twelve months. Of this decrease, $2,645,593.16 was in gasoline tax and $2,817,419.82 in motor vehicle revenue, reflecting wartime restrictions under which vehicles, tires and gasoline were rationed.

The expenditures of the Department were confined to essential maintenance and the completion of construction projects lending direct assistance to the war effort. The following comparative figures indicate the excess of revenue over expenditure in the period since the outbreak of war:

	Approximate Revenue	Approximate Expenditure
1939–40	$ 34,000,000	$ 32,000,000
1940–41	36,000,000	26,300,000
1941–42	38,000,000	35,500,000
1942–43	32,500,000	19,800,000
Four-Year Totals	$140,500,000	$113,600,000

As will be noted from the following reports, the Department encountered considerable difficulty in carrying out the year's programme due to the shortage of labour, materials and equipment. In addition, the weather conditions during the winter of 1942–43 were the most severe in the history of the Department and, coupled with the shortage of repair parts, made snow-plowing operations very difficult.

The records of the Motor Vehicles Branch indicate a slight increase in commercial vehicle registration over the previous year and with all commercial vehicles loaded to capacity, the wear and tear on road surfaces was increased notwithstanding the reduction in passenger car travel due to wartime rationing.

The major construction project was the completion of the last link of a Trans-continental Highway, the 153-mile section between Hearst and Geraldton in Northern Ontario. This work, carried out under adverse geographical and weather conditions, has been one of the major achievements of the Department in recent years.

In Southern Ontario work was completed on the Niagara Falls entrance to the Queen Elizabeth Way, and a 16-mile relocation project on Highway 60 between Barry's Bay and Madawaska, the latter in conjunction with Hydro-Electric developments at Bark Lake.

During the year the total assistance given to counties, townships and other municipalities amounted to $3,589,480.73. The usual close co-operation between the municipal officials and the Department was maintained.

The engineering staff of the Department was actively engaged in drafting plans for post war construction. Although the survey staff was considerably depleted by enlistments and loan of key personnel to other organizations engaged in war work, considerable progress was made in collecting engineering data for post war projects.

Wartime restrictions on motoring were reflected in the decreased number of traffic accidents, particularly in the rural areas. The death rate, however, is still alarmingly high in the urban areas and attention is particularly directed to the Report of the Registrar of Motor Vehicles outlining the efforts made by the Department to eliminate unsafe driving practices.

REPORT OF THE HIGHWAYS ACCOUNTANT

By John Smith, Acting Accountant

To R. M. Smith, Esq.,
Deputy Minister of Highways.

The following is a summary of the Disbursements and Receipts of the Department of Highways for the fiscal year, April 1st, 1942, to March 31st, 1943:

Disbursements	
King's Highways and Development Roads, etc.	$ 15,027,706.54
Subsidies in Aid of County Roads	1,610,752.54
Subsidies in Aid of Township Roads and Indian Reserves	1,978,728.19
Administration, etc.	1,163,197.99
	$ 19,780,385.26

Receipts	
Gasoline Tax	$ 25,001,102.55
Motor Vehicles	7,327,019.23
Permits: Garages, Gasoline Pumps, etc.	110,568.57
Miscellaneous and Sundries	53,613.13
	$ 32,492,303.48

REPORT OF GASOLINE TAX REVENUE

By D. E. Strong, Chief Inspector Gasoline Tax

To R. M. Smith, Esq.,
Deputy Minister of Highways.

Gross collections of Gasoline Tax for the fiscal year ended March 31, 1943, amounted to $24,100,027.85; and refunds to farmers, manufacturers, operators of stationary engines, etc., were $3,103,975.30, resulting in a net revenue of $20,996,052.55.

An interim remittance under the Dominion-Provincial Tax Agreement, in the amount of $4,000,000.00, was received and is not included in the above figures.

Net revenue from gasoline handling licenses for the same fiscal period amounted to $5,050.00.

The rationing provisions inaugurated by the Dominion Government on April 1, 1942, are considered to be responsible for the decrease in gasoline tax revenue. Under the provisions of the Dominion-Provincial Tax Agreement, the amount of net revenue received for the fiscal year ended March 31, 1941, which amounted to $26,608,290.59, was guaranteed. The final remittance of $1,612,238.04 under this agreement for the fiscal period under review was received in May, 1943.

D. E. Strong,
Chief Inspector Gasoline Tax.

REPORT OF MISCELLANEOUS PERMITS BRANCH

By C. G. Fairs, Supervisor

To R. M. Smith, Esq.,
Deputy Minister of Highways.

I have the pleasure to submit for your perusal the following 1942–43 Fiscal Year Report:

Building Permits

Number of Permits Issued		465
Approximate Value of Buildings	$	836,842.00

Public Garage Licenses

Number of Licenses Issued — Class "A"		3,880
Number of Licenses Issued — Class "B"		3,353
Total	$	53,311.46

Gasoline Pumps — King's Highway Outlets Only

Permits $25.00 (Curb)		A621
" 5.00 (8 ft. to 25 ft. from Highway Boundary)		4,384
Total	$	41,486.38

Signs

Permits $1.00		814
" 5.00		2,028
" 10.00		508
Total	$	15 770.73

Permit fees received, as mentioned above, will coincide with the Treasury Department receipts for the Fiscal Year.

Garage, Gasoline Pump and Sign Permits are issued as of the Calendar Year, January 1st, to December 31st, 1942.

Kingston Traffic Circle at the Junction of Highways Nos. 2 and 33

ANNUAL REPORT FOR 1942

KING'S HIGHWAYS OPERATIONS

A. A. Smith, Chief Engineer

Operations during the past year followed the pattern, adopted after the outbreak of war, of confining all construction work to those projects directly associated with the war effort. The engineering staff was, however, actively engaged in drafting the post-war program. Surveys were made of proposed routes and plans and detailed estimates prepared. This work, to which much study is being devoted, is still continuing.

The prosecution of all work, both construction and maintenance, was badly handicapped by the difficulty of securing adequate labour, materials and equipment. Contractors also experienced the same difficulty and, as a result, their work was slowed down considerably. In addition to these difficulties in supply, the winter experienced was one of the worst, both in severity and duration, in the history of the Department and taxed the snow-plowing and sanding equipment to its limit.

General maintenance, surface treatment and dust-laying operations were carried out on a somewhat reduced scale. All King's Highways in southern Ontario and all main highways and secondary roads in northern Ontario were plowed and sanded for winter traffic.

Summary of Construction Projects

In November, just when winter prohibited its use, the last link in the trans-continental highway, the 153-mile section between Hearst and Geraldton, was virtually completed. Some minor work will be required to be done after the spring break-up, but it is expected that this highway will be opened to traffic early in the coming summer. The construction of this section of highway through virgin bushland and during abnormally wet weather ranks as one of the major achievements of the Department in recent years. In every respect it conforms to modern design. The roadbed, of gravel surface, is thirty feet wide and, in the muskeg sections, the parallel ditches are screened by rows of existing trees. All muskeg material was dug from the roadbed and replaced with suitable fill materials. No curve exceeds 2° and no grade 5 per cent and, in general, these maximum limits were seldom required. Tangents are long and the minimum sight distance of 1,000 feet was freely extended up to 1,800 feet to fit the gently rolling nature of most of the terrain.

With the paving of the Rainbow Bridge Entrance from The Queen Elizabeth Way and the paving of the Rainbow Bridge Plaza and the erection of the buildings thereon, the full facilities of this modern border entrance were put into operation.

The grading of the 16 mile revision of Highway No. 60, between Barry's Bay and Madawaska, made necessary because of the Hydro development at Bark Lake, was completed and ten miles of the 16 miles of new highway between Apsley and Bancroft were likewise graded. Resurfacing was carried on between Barriefield and Joyceville on Highway No. 15 and a traffic circle built and paved at the intersection of Highways Nos. 2 and 33 at the west limits of Kingston. In the west, a concrete pavement was partially completed on Highway No. 40

between Sombra and Courtright, leaving an unpaved gap between Windsor and Sarnia of only three miles. The old pavement between Jarvis and Nelle's corners on Highway No. 3 was resurfaced with asphalt. On the divided highway between Toronto and Oshawa the north bridge of the twin bridges at Rouge River was completed and a subway under the C. N. R. at Oshawa built. A mulch pavement was laid between Boshkung Beach and Wren Lake on Highway No. 35.

At the end of the 1942 fiscal year ending March 31, 1943, the total mileage of the different types of surfaces comprising the King's Highway System was as follows:

Concrete	1,784.8	Miles
Asphalt	388.4	"
Mixed Macadam	817.7	"
Penetration Macadam	359.3	"
Retread	534.5	"
Macadam	155.7	"
Gravel	3,563.7	"
Total	7,603.7	"

Mileage constructed during the fiscal year ending March 31, 1943, was as follows:

Concrete Pavement (Dual Lane)	2.6	Miles
Concrete Pavement (Single Lane)	8.9	"
Mixed Macadam Pavement	9.1	"
Asphalt Pavement	0.4	"
Gravel Mulch	22.8	"
Grading	65.0	"

The details of the various bridges, grading and paving work follow later in this report.

Roadside Maintenance

In recent years considerable planting of trees and shrubs has been undertaken by the Department, principally along divided highways. These trees and shrubs are grown from seed in the Department's planting area at Midhurst, where, with the co-operation of the Department of Lands and Forests, hundreds of thousands of seedlings are being raised and shipped to points 150 miles, and more, distant for planting. Much of the planting along The Queen Elizabeth Way and between Toronto and Oshawa has been done from this source and it is estimated that, after the war, the Department will be in a position to distribute at least 100,000 trees and shrubs annually.

Highway planting is the hardest of all planting, as the stock has a terrific fight for survival, having to contend with such unnatural agents as drought caused by drainage, the wasting of top-soil, sanding and snowplowing operations, grass fires, weed cutting and careless driving. Nevertheless the results from the planting to date have been extremely satisfying.

SURVEYS BRANCH

Land Surveys

Enlistments and resignations from the Surveys Branch greatly depleted the staff and, as a result, the mileage of highways surveyed during the year was reduced to 266 miles affecting 532 owners, exclusive of Crown Lands. However, the area surveyed was increased to 6,320 acres. This was resultant, in part, to the wider right of ways in the bush areas of Northern Ontario which were taken to maintain the scenic values and facilitate snow removal.

In addition to the above, 4,820 acres of land was acquired as additional widening on 142 miles of highways which had been surveyed in previous years and on which the information obtained in the first surveys was sufficient to obviate the necessity of additional field work. The majority of this area was Crown Lands and only 225 owners were affected.

During the year, surveys were made for 16 park sites, comprising 4,110 acres, in Northern Ontario, and the intention is to develop these sites for tourist purposes.

Miscellaneous surveys were also made for gravel pits, borrow pits, weight scales, storage yards, etc., containing 61.5 acres.

Location and Engineering Surveys

Highway work was considerably curtailed this year due to assistance given to the Dominion Government in making Airport Surveys in Ontario, Alberta and Saskatchewan. Some key men were loaned to the American Army and Government, also the Canadian Contractors to assist on the location, design and construction of the Alaska Highway. Detail surveys were completed on Highway No. 11 between Hearst and Geraldton, Highway No. 62 between Combermere and Barry's Bay and portions of other highways.

The field work was completed to prepare 400 feet to 1 inch study plans in the Toronto area and continued westerly to London.

Complete plans, profiles and cross-sections were made for proposed divided highways across several townships between Toronto and the Quebec Border.

Numerous small surveys were made for proposed diversions, investigations, arbitration and accidents.

DIVISION No. 1 — CHATHAM

Concrete pavement was laid for a distance of 5.3 miles from Courtright to Sombra on Highway No. 40 to connect with the existing pavement at either end. Grading and gravelling was carried out for five miles south from Grand Bend on Highway No. 21. A flasher light was installed in the village of Merlin.

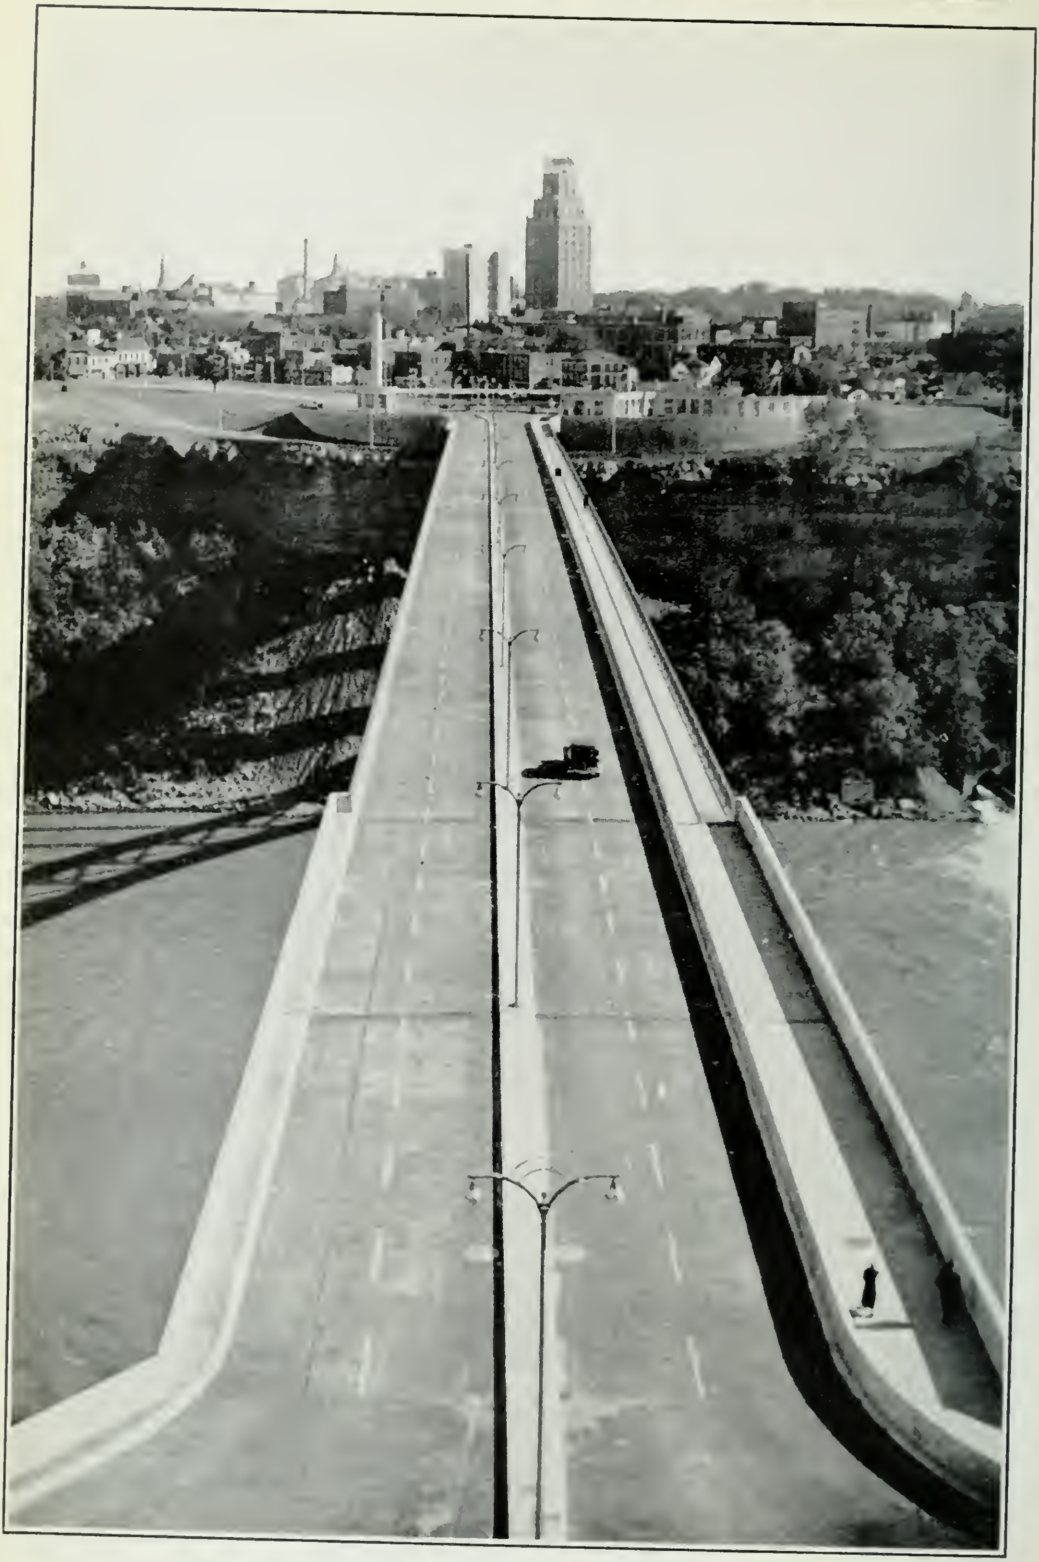
Division No. 2 — London

A prime coat was applied to the gravel surface of Highway No. 59 from Woodstock to Norwich. Previous to this application the high shoulders were cut down to effect widening and better drainage. Two miles of fence was erected.

Division No. 3 — Stratford

On Highway No. 21 a hot mix asphalt surface course was laid between Dunlop and Port Albert. Some heavy grading on hills north and south of Port Albert and shouldering from Sheppardton to Port Albert was carried out. In addition repairs were made to several culverts between Grand Bend and Goderich.

Highway No. 8 was resurfaced with asphalt mix from Dublin east for 1.35 miles, also short sections of Highway No. 9 east of Harriston. The abutments of a bridge just south of Wingham were refaced and several miles of fence erected on Highways Nos. 7, 8 and 23. A cold storage building was erected at Stratford. Repairs were made on the West Montrose Bridge.



LOOKING DOWN ON THE RAINBOW BRIDGE FROM THE PLAZA TOWER.

Division No. 4 — Grimsby

The Rainbow Bridge Entrance from The Queen Elizabeth Way was paved as were certain service roads in Stamford Township and the traffic legs at the Drummond Street overpass. A stone retaining wall was erected on both sides of Newman Hill. The grading of the Canadian Approach Plaza was completed, an asphalt pavement laid, and the construction of the buildings thereon completed. The service roads, totalling one mile in length, paralleling The Queen Elizabeth Way at St. Catharines were surfaced with asphalt. Most of the required fence was erected between Stoney Creek and Lundy's Lane Cloverleaf on The Queen Elizabeth Way. Some sodding and tree planting was also done on this highway.

The old macadam pavement between Jarvis and Nelle's Corners on Highway No. 3 was resurfaced with a three-inch asphalt course. Grading was done on Highway No. 57 from Wellandport to Bickett's Bridge.

Work was started, but not completed, on the renovation of the building at Hamilton to be used as the Division Offices, and on the grading of the access road. The Cainsville Bridge on Highway No. 2 was repaired.

Division No. 5 — Owen Sound

Only general maintenance, surface treatment and sundry construction was undertaken.

Division No. 6 — Toronto

Heavy grading operations were carried out at Oshawa on the new divided highway. On this same highway the north bridge of the twin bridges at Rouge River was completed as was, with the exception of the handrail panels, the C. N. R. subway at Oshawa. Sewers were installed at the east approach to the Rouge River Bridge and at Oshawa and a considerable amount of sodding was also done, between Highland Creek and Oshawa. At Clarkson, on Highway No. 2, a steel railway bridge was erected over the highway, the highway lowered and a new pavement laid. On Highway No. 11 two culverts, at Thornhill and Aurora, were rebuilt.

Division No. 7 — Port Hope

A prime coat was applied to the gravel surfaces of Highway No. 28 from Lakefield to Apsley, Highway No. 30 from Brighton to seven miles south of Campbellford and from Campbellford to Trent River, Highway No. 36 from Bobcaygeon to Burleigh Falls and Highway No. 41 from Picton to Coles Ferry.

Division No. 8 — Kingston

The grading between Barriefield and Joyceville on Highway No. 15 was completed and a bituminous penetration base laid. Diversions were also completed and a base course laid at Joyceville corner and at Washburn. Four culverts were built between Smith's Falls and Carleton Place. On Highway No. 38 a cold mix pavement was laid in Verona Village.

A traffic circle was built and paved with concrete at the intersection of Highways Nos. 2 and 33 at the west limits of Kingston and several culverts constructed in the vicinity of Cataraqui and Barriefield on Highway No. 2. On the St. Lawrence River Road a considerable amount of sundry construction, including the completion of the fencing, was carried out.

Two views of the new highway between Hearst and Geraldton, the final link in Canada's first Coast-to-Coast Highway.

DIVISION NO. 9 — OTTAWA

Only general maintenance, surface treatment and sundry construction was undertaken.

DIVISION NO. 10 — BANCROFT

The 16 mile revision of Highway No. 60 between Barry's Bay and Madawaska, including the erection of the Madawaska River Bridge, made necessary because of the Hydro development at Bark Lake, was completed and the remaining two miles of narrow road on this highway, east of Barry's Bay, was reconstructed. Ten miles of the 16 miles of new highway between Apsley and Bancroft was graded. On Highway No. 41 the bridge over the Madawaska River at Griffith and the diversion at Denbeigh were completed and the diversion at Mazinaw Lake almost completed. One and one half miles of Highway No. 62 between Combermere and Maynooth were regraded. A new brick garage and paint shop was constructed at Bancroft.

DIVISION NO. 11 — HUNTSVILLE

On Highway No. 35, 14¾ miles of mulch pavement was laid from Boshkung Beach to Wren Lake and sufficient crushed material to complete paving to Dwight stockpiled. Three miles of Highway No. 60 in the vicinity of Opeongo Lake were regraded and gravelled, the Opeongo River Bridge erected, and the bridges at Oxtongue Lake and Smoke Lake redecked. Sections of damaged pavement on Highway No. 11 were repaved. On Highway No. 69 the Bala Bridge was redecked and three culverts replaced. A log scale house was erected at the junction of Highways Nos. 11 and 60 and an extension made to the Huntsville equipment storage building.

DIVISION NO. 12 — PARRY SOUND

On Highway No. 11 sections of pavement were resurfaced with a hot mix. On Highway No. 69 the concrete approaches to the overhead bridge in Harrison Township were laid and one-half mile of sidewalk constructed at Nobel. Otherwise only general maintenance, surface treatment and sundry construction was undertaken.

DIVISION NO. 13 — NORTH BAY

A prime coat was applied to the nine miles of gravel surface between North Bay and Laronde Creek on Highway No. 17. Close to one-half mile of sidewalk was laid from Petawawa to the Military Camp. Four timber bridges were replaced and thirteen others repaired on various mining roads.

DIVISION NO. 14 — NEW LISKEARD

Construction was begun of a new steel and concrete bridge over the Mattagami River at Timmins and the grading completed between Round Lake and Kenogami Lake on Highway No. 11. Eight miles of mulch pavement were laid on the Back Road from South Porcupine to Timmins.

DIVISION NO. 16 — COCHRANE

The Meadow Creek and Driftwood River Bridges, and approaches, were completed. Piles were driven and some grading of the approaches was done at the sites of the Wicklow River and Departure Creek Bridges. Six additional wooden bridges were erected on Highway No. 11 and nine others on township roads.

Two further views of the fine new highway between Hearst and Geraldton.

DIVISION NO. 17 — SUDBURY

Two mining roads, from Missanabie into the Renabie Mine and from Ramsey into the Jerome Mine were constructed. On Highway No. 17 east of Sudbury, a long stretch of grade, which gave trouble every spring, was regraded by day labour. A similar condition on the Sudbury-Levack Road was also rectified. The three miles of grading north of Sudbury, to avoid interference with mining operations at the Stobie Mine, was completed.

DIVISION NO. 18 — BLIND RIVER

Grading operations were carried out for two miles on the extension of Highway No. 17 north of Montreal River and on Highway No. 68 between its junction with Highway No. 17 and Espanola. A large reinforced culvert was constructed at Snooks Creek on Highway No. 17 north of Sault Ste. Marie.

DIVISION NO. 19 — FORT WILLIAM

Three miles of resurfacing was done on Highway No. 61. Otherwise only general maintenance, surface treatment and sundry construction was carried out.

DIVISION NO. 20 — KENORA

Bridges at Revell River and Gull River on Highway No. 17 were under construction and a number of timber culverts were replaced by concrete culverts. On Highway No. 72 the Moose Creek Bridge was completed. A number of bridges and culverts were also built on secondary and township roads.

DIVISION NO. 21 — FORT FRANCES

The grading of a diversion of Highway No. 71 in the vicinity of Emo was completed. Otherwise only general maintenance and sundry construction was carried out.

DIVISION NO. 25 — HEARST TO GERALDTON

The grading and the construction of the structures on this highway were virtually completed in November, at a time when winter weather prohibited traffic using the highway. At that time 90 per cent of the grading had been completed and three quarters of the gravelling of this completed section done. The erection of the steel and concrete overhead at Longlac and the steel and concrete bridge over the Pagwachuan River were finished and the piers and abutments of the bridge over the Kabinakagami River built. Very little grading remains to be done on the uncompleted section and it is expected the highway will be opened to traffic shortly after the spring break-up.

The building of this final link in Canada's first coast-to-coast highway was shared by the following fifteen contractors: Rayner Construction Ltd., Emil Anderson, Campbell Construction Co. Ltd., Tomlinson Construction Co. Ltd., Standard Paving Ltd., Hadley-McHaffie Construction Co. Ltd., Dufferin Paving Co. Ltd., Curran & Briggs Ltd., Dominion Construction Corp. Ltd., Angus & Taylor Ltd., J. N. Pitts, Sterling Construction Co. Ltd., Storms Contracting Co. Ltd., McNamara Construction Co. Ltd., W. A. Mackey Ltd.

INCEPIT FIDELIS

Looking down on the Rainbow Bridge entrance from the Plaza Tower.

Underpass and stone walls, the Rainbow Bridge entrance, from The Queen Elizabeth Way.

BRIDGES COMPLETED DURING THE YEAR 1942

Arthur Sedgwick, Chief Bridge Engineer

During the year a total of 6,506 lineal feet of bridges were completed, including several important structures listed below:

Clarkson Subway

A plate girder span of 85 feet 6 inches, over the Toronto-Hamilton Highway No. 2 to afford railroad connections to the new British American Oil Refinery at Clarkson. A new concrete pavement was laid over the lowered highway grade.

Driftwood River Bridge

A multiple span concrete beam bridge on sheet steel pile foundations. This bridge on Highway No. 11, west of Cochrane, consists of three 60-foot spans and two 40-foot spans on concrete pier bents and open abutments.

Griffith Bridge

This bridge spans the Madawaska River on Highway No. 41. It consists of five 60-foot concrete rigid frame spans. The foundations were constructed successfully but with some difficulty in swift deep water and sand bottom.

Gull River Bridge

This bridge is on Highway No. 17, west of English River in the Kenora District, and consists of eight 20-foot steel beam spans with concrete floor on creosoted pile bent foundations.

Kabinakagami River Bridge

The steel sheet pile foundations and concrete bents for this bridge were completed but the shortage of structural steel has delayed the construction of the superstructure. A temporary timber pile trestle bridge 245 feet long is at present taking care of traffic. This bridge is on Highway No. 11, west of Hearst.

Long Lac Overhead

This structure is on Highway No. 11 over the Canadian National Railway and outlet to the Kenogami River from Long Lac in the District of Thunder Bay. It consists of a double span continuous steel structure over the railway tracks and eight 50-foot concrete rigid frame spans. The foundations consist of steel pile caissons and reinforced concrete frame bents. Rock fill approaches complete the structure.

Madawaska and Opeongo River Bridges

These structures are over the Madawaska River at Madawaska Village and the Opeongo River on Highway No. 60. They each consist of two 50-foot and one 60-foot concrete rigid frame spans on sheet steel pile caisson foundations and reinforced concrete frame bents with rock and earth fill approaches.

Mattagami River Bridge

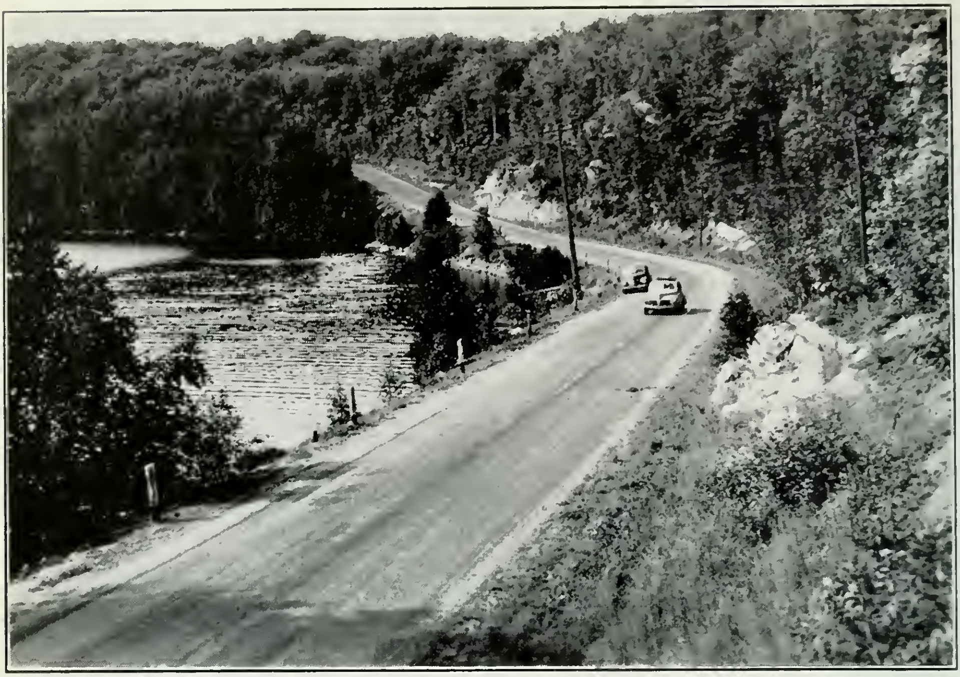
This structure is at the westerly limits of the town of Timmins leading westerly to Kamiskotia. It consists of five steel girder spans varying from 57 feet long at each end to 70 and 72 feet long in the middle. It rests on steel sheet pile caisson foundations driven in deep water and forming reinforced concrete frame bent piers. The bridge has a 40 foot clear roadway and two 5-foot sidewalks.

Pagwachuan River Bridge

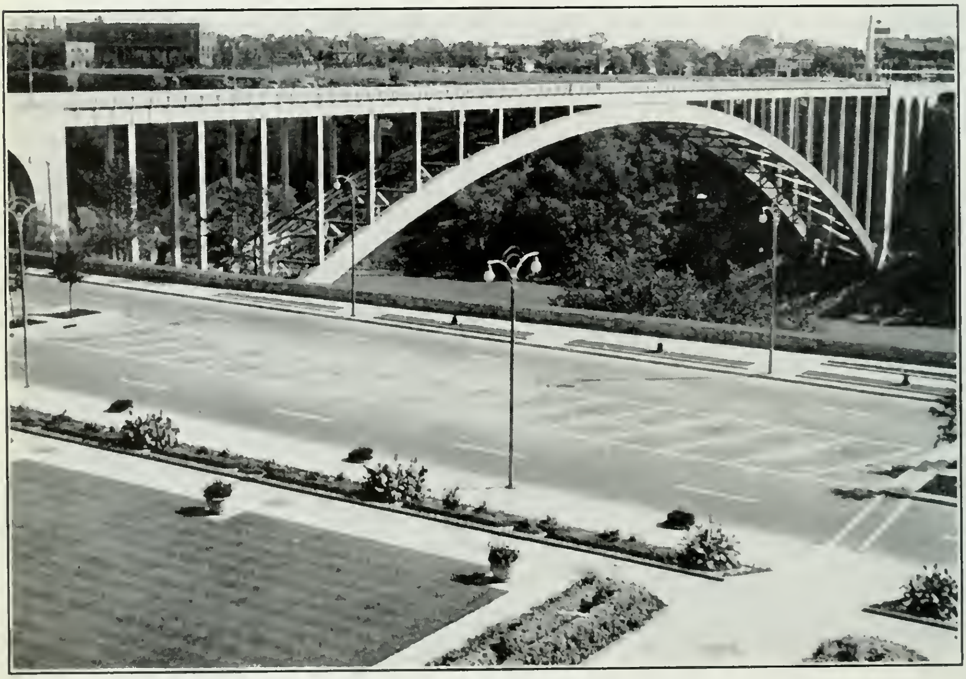
This is on Highway No. 11 between Long Lac and Hearst. It consists of a main steel truss span of 150 feet and two 50-foot steel beam approach spans with open concrete abutments. The ground beneath the main piers is extremely soft down to bed-rock 80 feet below. The expense of driving piles to bed-rock was avoided by spreading the concrete footings an additional two feet in width. No settlement of foundations has occurred.

A complete list of bridges constructed by the Province is found in Appendix No. 4.

A small amount of bridge replacement was carried out by the Counties and Townships of Southern Ontario.



New mulch pavement, Highway No. 35 at Boshkung Lake.



The Rainbow Bridge across the Niagara River.

REPORT ON THE WORK OF THE MUNICIPAL ROADS BRANCH FOR THE YEAR 1942

J. A. P. Marshall, Chief Municipal Engineer

Since the passing of The Highway Improvement Act in 1901 and to the end of 1942 a total of $156,815,416.31 has been expended on construction and maintenance of county roads, of which the Province has contributed $74,646,528.59. This includes the county expenditure during 1942 on which the provincial subsidy was paid in 1943.

At the end of 1942 the Province was paying subsidies to the counties on 8,495 miles of county roads — approximately 15 per cent. of the total road mileage in the area covered by the County Road System.

Expenditure on county roads in 1942 was as follows:

	Total Expenditure	Provincial Subsidy
Construction:		
County Roads	$ 34,090.51	$ 17,045.26
Maintenance:		
County Roads	$ 3,187,414.51	$ 1,593,707.28
Total Expenditure	$ 3,221,505.02	$ 1,610,752.54

Construction Work

The work on which the above expenditure was made included the following:

Gravel or Stone	3.25	Miles
Low-Cost Bituminous Surfaces	1.25	"
Mixed Macadam and Asphaltic Concrete	Nil	
Cement Concrete	Nil	
Total	4.50	"
Bridges Over 10-Foot Span	9	
Pipe and Tile Culverts	259	
Other Culverts	39	

Maintenance Work

Bituminous Surface Treatment	402	Miles
Dust-Prevention Treatment (Oil)	Nil	
Dust-Prevention Treatment (Calcium)	1,115	Miles
Clay-Gravel Stabilization (Calcium and Salt)	532	"
GRAVEL AND CRUSHED STONE RESURFACING:		
(a) Pitrun Gravel Applied	116,347	Cu. Yds.
(b) Crushed Gravel Applied	366,725	" "
(c) Crushed Stone Applied	42,230	" "
SNOW REMOVAL:		
(a) Mileage of Road Kept Open with Mechanical Equipment	6,476	Miles
(b) Snow Fence Erected	469	"

County Suburban Roads

The mileage of suburban roads is 828.4 miles. The expenditure at the end of 1942 amounted to $29,965,240.50 of which the cities and separated towns have contributed $7,841,216.04 or five per cent. of the total expenditure made on the County Road Systems.

In 1942 the expenditure on county suburban roads was $519,411.12, of which the province contributed $259,705.56 and the cities $129,852.78.

Snowplow opening blocked highway after severe storm.

Snowbanks such as these were familiar sights along the highways throughout a good part of the province.

EXPENDITURES ON SUBURBAN ROADS — 1942

Name of County	Mileage	Approved Expenditure	Government Grant 50%
Brant	26.4	$ 22,165.91	$ 11,082.97
Carleton	90.0	80,630.66	40,315.33
Elgin	18.3	4,589.89	2,294.94
Essex	41.0	19,592.31	9,796.16
Frontenac	33.2	34,084.46	17,042.23
Grey	32.5	14,608.78	7,304.39
Hastings	4.0	2,286.29	1,143.14
Kent	9.5	2,476.24	1,238.12
Lambton	14.5	3,279.15	1,639.57
Lanark	6.0	6,255.91	3,127.96
Leeds and Grenville:			
Smith's Falls	5.1	559.95	279.98
Brockville	7.6	1,933.08	966.54
Lincoln	12.3	4,017.43	2,008.72
Middlesex	54.1	20,874.35	10,437.17
Ontario	16.2	7,985.13	3,992.57
Oxford	3.9	361.57	180.78
Perth	7.5	6,841.82	3,420.91
Peterborough	71.8	37,126.80	18,563.40
Waterloo:			
Galt	10.0	5,462.97	2,731.48
Kitchener	11.0	3,782.63	1,891.32
Welland:			
Niagara Falls	9.9	3,790.14	1,895.07
Welland	7.0	3,107.18	1,553.59
Wellington	23.5	6,600.67	3,300.33
Wentworth	56.0	46,608.10	23,304.05
York	257.1	180,389.67	90,194.84
TOTALS	828.4	$ 519,411.12	$ 259,705.56

Township Roads

For the year 1942 the government subsidized road expenditures in 564 townships, 2 provincial parks and 18 Indian reserves.

Expenditure on these roads in 1942 was as follows:

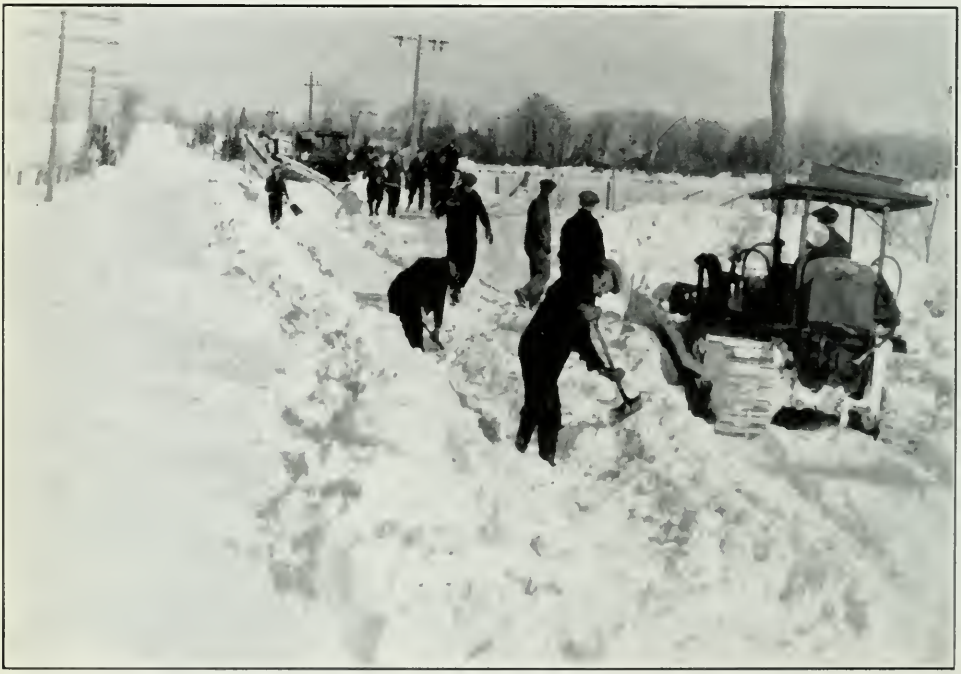
Construction:		
Roads	$ Nil	
Bridges	19,214.88	
Miscellaneous	350.00	
Total Construction		$ 19,564.88
Maintenance:		
Roads	$ 3,409,070.32	
Bridges	155,531.09	
Miscellaneous	114,135.06	
Total Maintenance		$ 3,678,736.47
Total Approved Expenditure		3,698,301.35
Provincial Subsidy		1,978,368.31

Construction Work

The work on which the above expenditure was made included the following:

Gravel or Stone	15.11 Miles
Low-Cost Bituminous Surfaces	Nil "
Mixed Macadam and Asphaltic Concrete	Nil "
Total	15.11 "
Bridges Over 10-Foot Span	31
Pipe and Tile Culverts	607
Other Culverts	342

Traffic in difficulties during a blizzard.



Snowplows, bulldozers and shovellers unite to clear heavy drifts after blizzard.

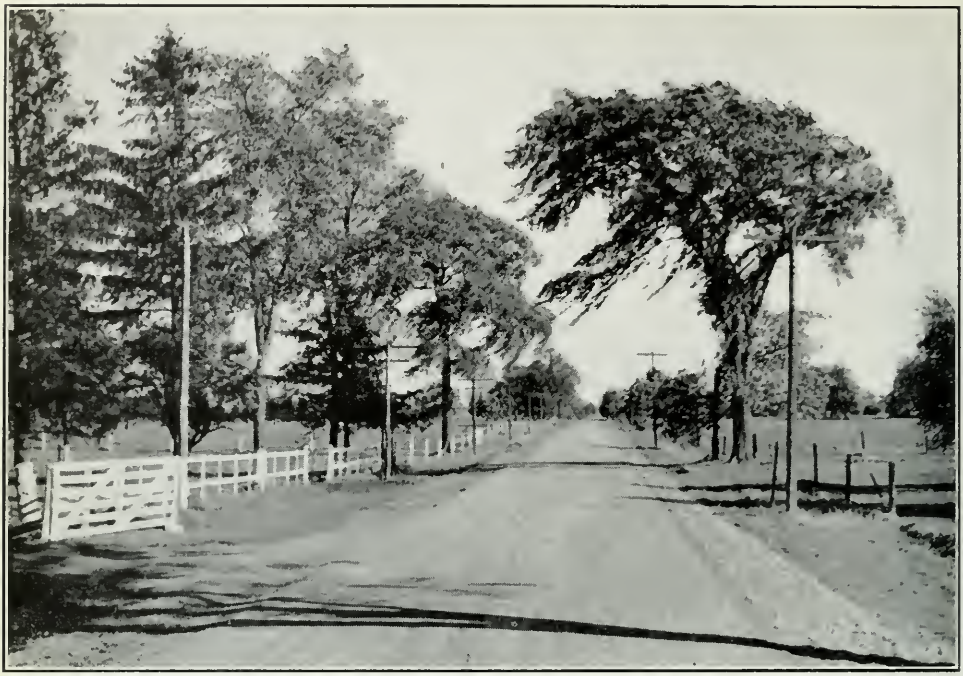
Maintenance Work

Bituminous Surface Treatment	40 Miles
Dust-Prevention Treatment (Oil)	55 "
Dust-Prevention Treatment (Calcium)	438 "
Clay-Gravel Stabilization (Calcium)	17 "
GRAVEL AND CRUSHED STONE RESURFACING:	
(a) Pitrun Gravel Applied	719,504 Cu. Yds.
(b) Crushed Gravel Applied	668,001 " "
(c) Crushed Stone Applied	121,555 " "
SNOW REMOVAL:	
(a) Mileage of Road Kept Open with Mechanical Equipment	12,350 Miles
(b) Snow Fence Erected	748 "
Weed Spraying	350 "

Indian Reserves

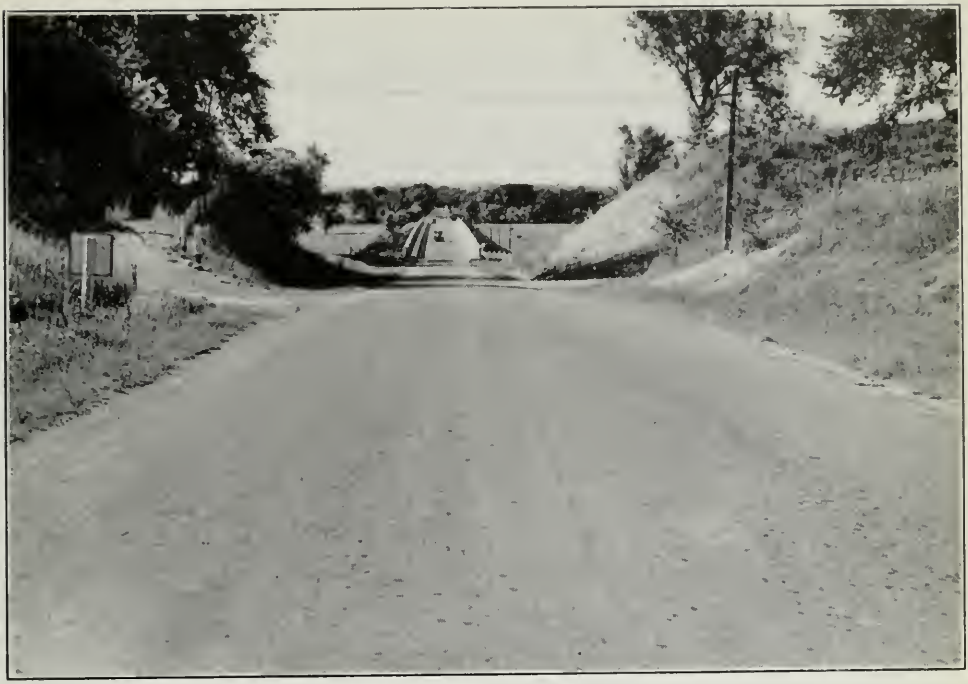
Of the 20 Reserves eligible, 18 reported expenditures totalling $26,999.32 on which the subsidy paid was $14,177.45.

Indian Reserve	Expenditure
Alnwick	No Aid Taken
Cape Croker	$ 1,820.00
Caradoc	851.76
Christian Island	No Aid Taken
Gibson	88.00
Kettle Point	462.80
Moravian	191.12
Mud Lake	200.00
New Credit	2,299.91
Parry Island	200.00
Rama	88.00
Rice Lake	227.49
Sarnia	413.40
Saugeen	591.10
Shawanaga	100.00
Sheguiandah	200.00
Six Nations	15,997.74
Tyendinaga	1,748.00
Walpole Island	1,100.00
West Bay	420.00
Total	$ 26,999.32

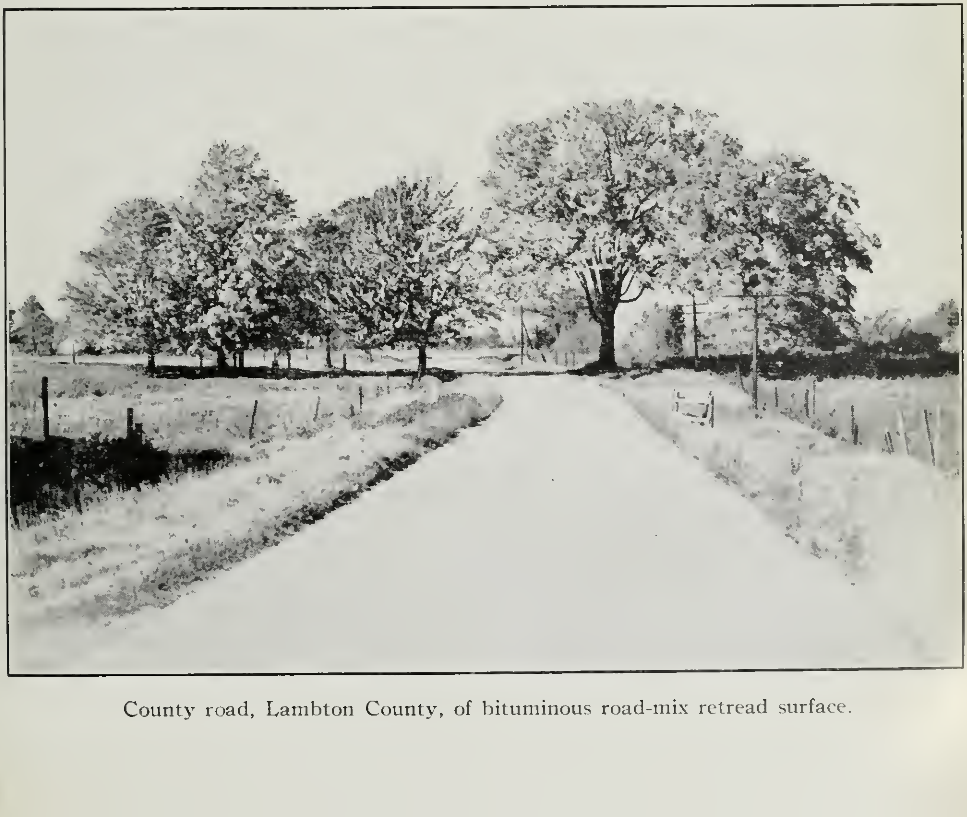


County road, Middlesex County, with three-inch premix bituminous surface.

County road, Stormont County, with three-inch premix bituminous top.



The Cockshutt Road, Brantford Suburban Commission, carries heavy traffic near city.



County road, Lambton County, of bituminous road-mix retread surface.

APPENDIX No. 3

SCHEDULE OF ASSUMPTIONS AND REVERSIONS OF SECTIONS OF THE KING'S HIGHWAY SYSTEM FOR THE FISCAL YEAR ENDING MARCH 31st, 1943.

During the year the system was extended by assuming 154.30 miles, less 10.62 miles reverted, making a total assumed of 7603.93 miles. A list of the roads added to the system, together with the mileage and date of designation, also a list of roads and mileages reverted from the system is as follows:

The King's Highways—Assumptions—(Fiscal Year Ending March 31, 1943)

District or County	Location of Road	Date Assumed	Miles
Welland	Niagara Falls City	May 27, 1942	0.02
Welland	Niagara Falls City	Feb. 17, 1943	0.43

Assumed by Land Plan

District or County	Location of Road	Date Assumed	Miles
Cochrane	Kendall, Way, Hanlan, Stoddart, Studholme, Gill, McMillan, McCoig, Kohler and Clavet Twps		76.85
Nipissing	Springer Twp		2.50
Ontario	Oshawa City		1.35
Ontario	Uxbridge Twp		1.00
Thunder Bay	Errington, Ashmore, Croll, Abrey, Oakes and Unsurveyed Territory		71.15
York	Etobicoke and Vaughan Twps		1.00
			154.30

Reversions

District or County	Location of Road	Date Reverted	Miles
Huron	Ashfield and Colborne Twps	Sept. 11, 1942	1.16
Nipissing	Springer and Caldwell Twps	June 25, 1942	5.00
Ontario	Uxbridge Twp	Sept. 11, 1942	1.15
Stormont	Cornwall Town	May 22, 1942	0.51
Waterloo	N. Dumfries Twp	Feb. 6, 1943	0.10
Wentworth	Hamilton City	Jan. 2, 1943	0.38
York	Leaside Town	Dec. 3, 1942	1.04
York	Etobicoke and Vaughan Twps	Sept. 11, 1942	1.25
York	Scarborough and N. York	Jan. 15, 1942	0.03
			10.62

Report of the Motor Vehicles Branch, 1942

To The Honourable T. B. McQuesten, K.C., B.A., L.L.B.,
Minister of Highways,

Sir:

I have the honour to submit herewith a report of the activities of the Motor Vehicles Branch for the year 1942.

This report includes:

(a) A detailed summary of the motor vehicle permits and drivers' licenses issued for the 1942 license year ending March 31st, 1943.

(b) A statement, duly certified by the Provincial Auditor, showing the revenue derived from all sources during the fiscal year ending March 31st, 1943.

(c) Reports dealing with the Accident Recording, Financial Responsibility and Public Vehicle Divisions of the Branch during the calendar year.

Motor Vehicle Registrations

Wartime restrictions under which vehicles, tires and gasoline are rationed are reflected in a surprisingly small reduction in the registration of motor vehicles, such registrations being approximately 3 per cent. less than for the year 1941. The absence of new cars from the market is reflected in a reduction of 30 per cent. in the number of vehicles which changed ownership during the year.

Drivers' Licenses

The number of chauffeur and operators' licenses issued during the year shows a reduction of 24,890 or 2.5 per cent. less than in 1941.

Revenue

A reduction of 27.8 per cent. in the net revenue of the Branch is accounted for by reason of the reduced number of motor vehicles registered, drivers licensed, transfers recorded and the unusually large number of vehicles registered in March 1942. Ordinarily a large percentage of the vehicles registered in that month would have been registered in April 1942, the first month of the present fiscal year. The announcement of the coming into effect of gasoline rationing on the 1st of April, 1942, apparently led many motor vehicle owners to believe that the registration of their vehicles was compulsory before that date in order for them to secure gasoline ration coupon books. Such, of course, was not the case but the effect of this rumour or misunderstanding on the part of motorists resulted in an abnormal increase in our revenue for the fiscal year ending March 31st, 1942, and an unnatural decrease for the present fiscal year.

Accidents

Wartime restrictions on motoring obviously were largely responsible for the decrease in accidental deaths and injuries. The urban accident total was lower than in either of the past two years (1940 and 1941), while rural accidents were fewer in number than in any year since 1936. The death total showed a decrease from 801 in 1941 to 567 in 1942. The reduction was, however, not general throughout the Province. Certain areas where industrial and business activity have been greatly accelerated, experienced an increase in motor vehicle accidents, deaths and injuries.

General

In considering the work of the Motor Vehicles Branch in general, there is a common misconception that the Branch exists primarily as an agency to issue licenses and permits and to collect revenue. As important as such functions are, an even more important duty lies in the promotion of safer travel conditions on our streets and highways and this broad conception of our duties is reflected in the activities of all divisions of the Branch. Thus, the knowledge that a driver has sufficient understanding and skill and is physically capable of operating a car is a necessary condition to the original issuance of a driver's license. In the Public Vehicle Division insurance on public vehicles and public commercial vehicles is a prerequisite to the issuance of a license, and if as the result of failure to maintain vehicles in proper condition or take proper care in the selection and training of drivers the insurance is cancelled, the privilege of operating on the highway is automatically withdrawn. The inspection staff of the same division also devotes a large share of its time to the examination of vehicles and to the investigation of complaints relating to unsafe or improper operating conditions.

The work of the Financial Responsibility Division is directly designed to discourage unsafe driving practices by penalizing the driver who shows dangerous tendencies. The work of the Accident Recording Division is directed to the solution of the accident problem through the collection and analysis of information pertaining to accidents. A further duty lies in making the information available to the public and private agencies more directly concerned with accident prevention in order that such efforts may be carried out effectively.

While it is difficult to assess the savings in life, health and property which have resulted from these efforts it is known that our accident record has improved over the years in relation to the mileage driven, and in view of the responsibility to provide safe transportation facilities it would seem desirable to continue and extend the various safety efforts which are now in operation.

Further details relating to the work of the various divisions of the Motor Vehicles Branch are contained in the following pages of the report.

Respectfully submitted,

J. P. Bickell,
Registrar of Motor Vehicles.

NUMBER OF PERMITS AND LICENSES ISSUED

The following table shows the number of permits and licenses issued during the five years 1938 to 1942, and the percentage change between the totals for 1941 and 1942:

Class of License or Permit	1938	1939	1940	1941	1942	% Change
Passenger Car Permits	580,364	593,693	610,576	636,624	611,897	3.9 D.
Commercial Vehicle Permits	80,758	81,246	84,980	93,754	94,318	0.6 I.
Bus Permits	884	960	1,058	1,268	1,518	19.7 I.
Two-Purpose Vehicle Permits	1,876	1,893	1,855	1,654	1,543	6.7 D.
Motorcycle Permits	5,206	5,099	5,403	5,894	6,104	3.6 I.
Total	669,088	682,891	703,872	739,194	715,380	3.2 D.
Trailer Permits	39,059	41,586	44,650	48,739	48,795	0.1 I.
Operators' Licenses	615,861	635,143	661,203	690,582	664,455	3.8 D.
Chauffeurs' Licenses	250,868	264,429	276,348	296,191	297,428	0.4 I.
Total	866,729	899,572	937,551	986,773	961,883	2.5 D.
Temporary Instruction Permits	108,993	99,360	116,349	122,002	76,390	37.4 D.

'MC' Dealers	10	11	10	3	2	—

Revenue

Gross revenue collected by the Branch during the fiscal year (1942) ending March 31st, 1943, amounted to $7,517,851.42* as compared with $10,432,217.01 for the previous fiscal year and representing a decrease in gross revenue of 27.9 per cent.

After deductions covering commissions, refunds and adjustments, the net revenue amounted to $7,327,019.23 or $2,817,449.82 (27.8%) less than the corresponding revenue figure for the fiscal year 1941–1942.

REPORT OF FINANCIAL RESPONSIBILITY DIVISION FOR THE YEAR 1942

Since the Financial Responsibility Law became effective in September, 1930, more than fifty-six thousand drivers have been affected by its provisions, but despite the length of time which has elapsed since its inception and despite the large number of persons who have come within its provisions there are many motorists who are ignorant of the law and the possible consequences of its violation. In view of this fact, and inasmuch as the law is somewhat complicated in form, it is felt desirable that some effort should be made here to present the requirements of this law and the benefits derived from their imposition.

Under the Ontario law, proof of financial responsibility, such as liability insurance, is not a prerequisite to the issuance of a driver's license, but the license — which is a conveyed privilege or a 'right to drive right' — may be withdrawn if the driver is uninsured or unbonded and becomes subject to the provisions of the Financial Responsibility Law. Under this law if the uninsured motorist fails to satisfy a judgment on account of injury to any person, or for property damage in excess of twenty-five dollars, he is required to make a satisfactory settlement of the judgment and file proof of financial responsibility (by means of liability insurance, bond or securities) with the alternative of losing his motor vehicle permit and driver's license.

If the motorist in other ways comes within the terms of this part of the Act and is convicted of any offence under the Criminal Code involving the use of a motor vehicle, or is convicted for failing to remain at the scene of an accident, or if he is involved in an accident and subsequently convicted for driving without a license, or for speeding or careless driving, he becomes subject to the same provisions and must file proof of financial responsibility.

In each case, the order of suspension is sent to the motorist following receipt of the notice of conviction from the Court and, if he fails to comply with the order, the police are asked to confiscate the driving license and registration plates and unless proof of financial responsibility is filed, license and registration privileges are withheld for at least two years. At the expiration of the two-year period — from the date of conviction — authority is given under the Act to rescind the order of suspension.

In the vast majority of cases (99 per cent. in 1942) proof of financial responsibility is filed in the form of a driver's-policy certificate or a vehicle-policy certificate, the issuance of which depends upon the good-will of the insurance company, and inasmuch as the economic stability of the insurance company depends upon the number of claims it has to settle, it becomes obvious that the driver's ability to retain the good-will of his insurance company and to secure and keep proof of financial responsibility in effect, is to a large degree dependent upon his driving behaviour and his avoidance of accident. A large share of the suspensions applied following notice that the insurance policy has been cancelled, are the result of this failure to recognize that the insurance companies are not interested in retaining the dangerous driver's business. The Financial Responsibility Law must therefore be considered a useful and effective statute in that it provides an incentive to safe driving by placing a premium on good driving.

Since September 1st, 1930, when this law became operative, 56,263 Financial Responsibility suspensions have been applied. Of these, 33,243 have been rescinded or have expired, leaving 23,020 such suspensions in effect at the end of December, 1942.

During 1942 there were 6,754 suspensions applied, comprising 6,058 Financial Responsibility suspensions and 696 suspensions or revocations not requiring proof of financial responsibility. Of the total (6,754) suspensions, 2,446 followed convictions for Careless Driving; 1,202 resulted from cancelled insurance policies; and 902 were the outcome of convictions for drunken driving.

More detailed data pertaining to 1942 suspensions are given in the following tables:

* A minus B gives number of suspensions effective as of December 31, 1942.

† Total number of Rescinded Suspensions plus suspensions which have expired. Total number of suspensions which have expired have been subsracted to show number of suspensions in effect (33,619).

REPORT OF THE ACCIDENT RECORDING DIVISION, 1942

During 1942 there were 13,490 motor vehicle traffic accidents reported, comprising 511 fatal accidents, 7,676 personal injury accidents, and 5,303 accidents resulting in property damage only. For purposes of comparison, figures relating to nature of injury are shown for the five years, 1938-1942:

Nature of Accident	1938 No.	1939 No.	1940 No.	1941 No.	1942 No.	%	Total No.	%
Fatal Accidents	580	573	642	747	511	3.8	3,053	4.1
Personal Injury Accidents	8,547	8,506	9,868	10,294	7,676	56.9	44,891	59.0
Property Damage Only Accidents	4,588	4,631	6,411	7,126	5,303	39.3	28,059	36.9
Total Accidents Reported	13,715	13,710	16,921	18,167	13,490	100.0	76,003	100.0

Largely the result of the restrictions* which have been applied to the use of motor vehicles, there was a considerable reduction (25.7%) in the number of accidents reported during 1942 as compared with the previous year's total.

The number of fatal accidents reported, 511, was lower than in any year since 1936 and 31.6 per cent. below the corresponding total for last year, and 16.4 per cent. less than the average (611) for the past five years.

There were 7,676 accidents resulting in non-fatal injury reported during 1942, representing a decrease of 25.4 per cent. from the total for 1941 and a decrease of 14.5 per cent. from the average number reported in each year since 1937.

Accidents involving property damage (in excess of $50) only, totalled 5,303 or 25.6 per cent. less than the corresponding total for 1941.

Deaths, Injuries and Property Damage

There were 567 persons fatally injured during 1942 as compared with 801 for 1941, representing a reduction of 29.2 per cent. The non-fatal injury total, 10,205, was 4,070 or 28.5 per cent. below the total for the previous year, while the amount of property damage reported, $2,007,514, was 27.4 per cent. less than the corresponding loss for 1941.

Type of Accident

All types of accidents, with the exception of collision between motor vehicles and street cars, showed reductions from 1941 totals, although collisions with pedestrians, with railroad trains and with fixed objects were relatively higher than during the previous year. Pedestrian accidents made up 24.3 per cent. of the total as compared with 21.1 per cent. in 1941.

Age of Persons Killed and Injured

As regards the age of persons fatally injured, the most significant change was in the preschool age group, 0-4 years, which accounted for 41 deaths as compared with 24 in 1941. About one third (32.5%) of the persons killed were between 15 and 35 years of age.

The reduction in non-fatal injuries was general throughout all age classes, though the number of children (0-14 years) injured was higher in relation to the total than in 1941.

Light Conditions, Location of Accidents, etc.

More than half (52.5%) of all accidents and 44.2 per cent. of the fatal accidents occurred during daylight. Night accidents (43.4% of all accidents, and 51.5% of the fatal accidents) were relatively more frequent than in 1941.

Of the total (13,490) accidents, 7,688 or 57.0 per cent. occurred in the cities of the Province, and 21.9 per cent. happened on the King's Highways. Corresponding percentages for 1941 were 50.7 and 30.7, respectively.

Two hundred and six (206 or 36.3%) of the 567 deaths reported during 1942 resulted from accidents on the King's Highways, as compared with 352 deaths (43.9% of the 1941 total) for the previous year. City accidents resulted in 161 deaths (28.4% of the total) as contrasted with 226 for 1941.

The death rates for the years 1938 to 1942 on the bases of mileage, vehicle registrations and population, are shown in the following table:

Death Rates	1938	1939	1940	1941	1942
Per 100,000,000 Miles Travelled	13.2	13.4	13.9	14.7	12.8
Per 10,000 Vehicles Registered	9.6	9.6	10.2	10.8	7.9
Per 100,000 Population	17.1	17.4	19.0	21.2	14.8

---

* Gasoline rationing became effective on April 1st, 1942, while the change in the speed limit on rural highways (from 50 M.P.H. to 40 M.P.H.) under the War Measures Act, became effective on May 1st, 1942.

The death rate on the basis of miles travelled (gasoline consumption) provides the most satisfactory measure for comparing motor vehicle accident experience from year to year. This rate in 1942 (12.8) was lower than in any previous year on record, with the exception of 1933, when the rate was 12.2. The highest rate, 18.5, was recorded in 1929. Improvement in experience, insofar as fatalities are concerned, is indicated by the fact that if the 1929 rate had applied in 1942 there would have been 252 more deaths than there actually were recorded; and the total for 1941 would have been 209 above the actual total for that year.

In considering the improvement thus indicated by the statistics there is perhaps some reason for satisfaction, if not for pride, in the fact that the various efforts that have been made to improve travel conditions on our highways have shown beneficial results. Undoubtedly a large share of the improvement has been brought about by the improvement in vehicles and increased attention to safety factors in highway construction and the extended use of highway signs and markings and the removal of physical hazards. But inasmuch as accidents involve the human element to such a large degree, it is believed that greatly increased attention to the behaviour of the individual driver, which has resulted from the operations of the Accident Reporting and Financial Responsibility Laws, has also had a definite and beneficial effect in discouraging flagrant and continual disregard of the traffic regulations and improving driving conditions generally. Increased attention to the driver who, because of age or physical or mental condition, is unfitted for the operation of a motor vehicle, has also been given over the years. At the same time an effort has been made to bring our methods of driver examination and selection to a higher standard and the instructions issued to examiners throughout the Province have been designed with this in mind. There is a common misconception as to the results which can be accomplished by the driving examination due to the failure to realize that the majority of accidents are not so much due to lack of driving knowledge as to the driver's failure to apply his knowledge, and to his failure to recognize not only his own limitations but the human limitations of other users of the roads. The driving test serves to show how well an operator can drive and how effectively he can meet a limited number of situations close at hand but the present form of examination does not provide satisfactory information relating to the driver's ability under all the varied situations likely to be encountered in driving. The large share of accidents which involves drivers who have had no previous accident suggests that experience and practice do not, alone, develop a proper knowledge of individual limitations. In these circumstances it would seem desirable to continue and extend the various educational efforts to promote a clearer knowledge and understanding of good driving practice in the interests of public safety.

In continuation of a policy which has been in operation since 1936, sixteen hundred drivers were required to submit to driving and vision tests during 1942. Of this total, 506 were drivers who had been driving for one year or less and who were involved in an accident; 276 tests involved drivers in fatal accidents; and 342 were drivers who were required to demonstrate their fitness to drive because of advanced age.

Over the years, this Division has been called upon to deal with an increasing number of complaints from the police and the courts, from insurance companies and from private persons, and relating to drivers whose ability or physical or mental fitness to operate a motor vehicle has been questioned. A number of cases involving drivers with visual defects or physical ailments have also been referred to this Branch by the medical examining boards of the Armed Forces for investigation. This form of co-operation as well as the co-operation given by the Department of Health in providing reports of persons who have been probated from the institutions within the jurisdiction of that Department, is greatly appreciated by the Motor Vehicles Branch. The facilities of the Department of Health have also been willingly and generously provided for purposes of examination and investigation and this help is gratefully acknowledged.

REPORT OF PUBLIC VEHICLE DIVISION 1942

During the operating year 1942, 8,817 Public Commercial Vehicles were licensed. This decrease from the record figure of the previous year (9,136) was largely due to the fact that under Order A-314 of The Wartime Prices and Trade Board, Public Commercial Vehicles were 'pegged' as at August 1st, 1942, and no additional vehicles were licensed after that date without proving exceptional public necessity and convenience. There were 3,671 Public Commercial Vehicle operators licensed during the operating year 1942–43.

The system of Transportation of 'Freight in Bond' was inaugurated during the operating year of 1942. Under arrangements completed between the Canadian and United States authorities, permission was granted to United States transport companies to use the highways of Ontario for the transportation of war materials in bond, entering at Niagara Falls or Fort Erie, and leaving Windsor or Sarnia, when properly licensed to do so by the Interstate Commerce Commission at Washington and by this Department. The first such license was issued in September, 1942, and more than 1,500 (1,513) one-way trips were made by United States motor vehicles under this arrangement by the close of the operating year.

There were 1,436 Public Vehicles registered during 1942, an increase of 314 from the 1941 total (1,122). The number of licensed Public Vehicle operators was 128.

The 306 School buses licensed during 1942 showed a large increase (118) over the previous year which is partly explained by the fact that a number of 'pool' arrangements were made to transport neighbours' children, in districts where there was no regular service; it was then necessary to secure school bus licenses in order to obtain gasoline from the Oil Controller's department. There were 300 school bus operators licensed in the 1942 operating year, representing an increase from the previous year of 108.

The total revenue collected by this Division during the operating year 1942–43 amounted to $438,208.15.

All complaints relating to unlawful transportation of passengers and freight were carefully investigated by a trained staff of inspectors maintained by the Department, and the co-operation of operators with the Department and its officials has resulted in a noticeable decrease in the number of unlawful operations reported.

In Memoriam

Provincial Constable Earl Bond, Waterdown Detachment, Highway Patrol. Appointed August 28th, 1928. Died suddenly at his residence, Waterdown, March 29th, 1943, from a heart attack.

Provincial Constable Norman E. Cain, No. 11 District Headquarters, Sudbury. Appointed December 4th, 1941. Died suddenly at his residence, July 11th, 1943, from a heart attack.

Corporal A. J. Oliver, Oshawa Detachment. Appointed June 27th, 1928. Died in the General Hospital, Oshawa, on October 18th, 1943, following a serious operation.

Inspector A. F. Grant, C. I. B., Toronto. Appointed February 3rd, 1930. Died as a result of having been hit by a train on the Canadian National Railway near Scarboro Junction, on November 22nd, 1943.

Special Constable J. Powell, Hydro Guard, Sarnia. Appointed August 6th, 1940. Died in the General Hospital, Sarnia, November 23rd, 1943, following an operation.

William Farquhar McRae, K.C., Crown Attorney, Manitoulin District, who died at Gore Bay, Manitoulin, January 28th, 1943, after a brief illness. He will be greatly missed as he was a real friend to all members of this Force.

Report of the Commissioner of Police for Ontario

From January 1st, 1943, to December 31st, 1943

ONTARIO PROVINCIAL POLICE,
Headquarters, Toronto.

THE HONOURABLE THE ATTORNEY-GENERAL,
Parliament Buildings, Toronto, Ontario.

SIR:

I have the honour to submit, herewith, my Annual Report covering the work of the Ontario Provincial Police, together with statistical data for the period January 1st, 1943, to December 31st, 1943.

I am pleased to report that, notwithstanding the continued strain of war, and the many additional duties entailed thereby, law and order have been well maintained.

There have been no proven acts of sabotage or other subversive actions to interfere with or delay the war effort. On the contrary, the citizens of the Province, by their generous support of war loans, voluntary enlistments, general industriousness, and interest in civilian defence, have shown that they are whole-heartedly behind the men and women of the Active Service Forces.

I am also thankful that no casualties have been reported amongst the members of the Force serving overseas.

Assistance to Other Forces and Departments

At the request of the Town Council of Cornwall, Ontario, an Inspector of the Criminal Investigation Branch was directed by the Attorney-General to investigate, enquire into and report upon the administration of the police force, the system of policing and the police needs of the Town of Cornwall.

We have continued to render assistance to the Departments of the Federal Government, in the enforcement of the numerous war measures and regulations, particularly with regard to the regulations issued under the War Time Prices and Trade Board.

As a result of a conference held at the Parliament Buildings in January, 1943, betweeen representatives of the Attorney-General's Department, the Director of National Selective Service, the Royal Canadian Mounted Police and senior officers of this Force, it was decided that the Ontario Provincial Police would co-operate with the Federal and Military Authorities in locating and apprehending those within the Province who had failed to respond or had defaulted in answering to their call for military service.

In September, 1943, similar co-operation and services were sought and granted by the Director of National Selective Service, to assist in locating defaulters in civilian regulations of the Selective Service.

Special Duties

The continuation of the war has made it necessary to retain the services of Special Constables and Veteran Guards for emergency duties, particularly in guarding Ontario Hydro-Electric Power hydraulic plants. It is hoped that during the coming year these supernumeraries may be materially reduced.

With numerous training camps scattered throughout the Province, problems are continually arising which affect both the military and civil authorities. It is, therefore, necessary that the police, in addition to knowing their own role, know also that of the Services with which they come into daily contact.

It is found that the police officer, whose duties bring him into close contact with the Active Service Commands, needs to possess qualities of intelligence and resourcefulness that will enable him to bring about the closest co-operation between the Services and the Police.

Many hundreds of enquiries have been made at the request of the Military, Air Force and Naval Commands to locate deserters and absentees from the many units in training, and I am pleased to place on record the splendid co-operation existing between the Provost Corps, the Service Police and members of this Force when working together on matters of this nature.

Criminal Occurrences

With the exception of murder and manslaughter, both of which show a decrease, there was an increase in the more serious crimes reported during the year.

Entering and theft from unoccupied summer homes was again most prevalent, the perpetrators in many cases being deserters from the Services, who are hiding out in an endeavour to escape apprehension and military service.

The following table gives a comparative statement for the years 1942-1943:

	1943	1942
Murder	8	12
Manslaughter	16	25
Rape	25	19
Burglary	171	90
Shopbreaking	754	473
Housebreaking	996	913
Robbery with Violence	72	43
Robbery	46	31
Automobile Thefts	538	374
Other Thefts	3,196	2,707

PROSECUTIONS

Criminal Code and Relating Statutes

There were 5,804 cases under this heading before the courts during the year, an increase of 503 over 1942, this being accounted for by increased prosecutions for gaming house offences and thefts.

Highway Traffic Act

5,208 prosecutions were entered for violations of the Highway Traffic Act, a decrease of 4,131 from 1942. This reduction in prosecutions can be accounted for by reason of the decreased number of automobiles using the highways due to the gasoline and rubber restrictions.

Liquor Control Act

Prosecutions under this Act totalled 2,569, a reduction of 446 from 1942. This decrease can be ascribed to the rationing and curtailment of the supply of intoxicating liquors.

Wartime Regulations.

There was also a noticeable decrease of cases entered for violations of the various Wartime Regulations. The number of prosecutions have decreased from 3,221 in 1942 to 1,558 for the year under review.

The principal item of decrease is under the 40-mile speed limit of the War Measures Act, which dropped from 2,965 in 1942 to 1,292 for 1943.

This can be attributed to the reduction in the use of motor vehicles, due to gasoline and rubber restrictions, also to the fact that drivers are becoming reconciled to the 40-mile speed limit.

Juvenile Delinquency

Our records show that during the year there was an increase of 69 per cent in the number of juvenile offenders between the ages of ten and sixteen years, who appeared before the courts, there being 597 this year as against 353 in 1942.

Much has been said and volumes have been written regarding the present seriousness of this problem, but until parents are made to realize that the first responsibility in training their children is theirs and not that of the State, the Church or the School, there is little hope of improvement.

The matter is one for serious thought when we consider these youthful offenders are the fathers and mothers of our next generation.

Deaths from Accident, Misadventure, etc.

Returns show a decrease in the number of deaths occurring from accidents or misadventure:

	1943	1942
Automobile Fatalities	285	305
Drownings	208	233
Suicides	96	126
Other Causes, including Air Crashes, Railway Collisions, Fires, etc.	407	433

I refer herewith, briefly, to some of the more serious fatalities investigated:

In 26 Crashes of Royal Canadian Air Force Planes—Persons Killed	57
Bus and Train Collision, Aldershot	12
Drowning in Lake St. Clair	3
Automobile Crash, Queen Elizabeth Way	4
Fishing Party Drowned, Trent River	4

Traffic Control and Supervision

Accidents arising from the operation of motor vehicles again show a decrease both in the actual number of accidents and fatalities arising therefrom.

	1943	1942
Total Accidents Reported	4,142	4,622
Persons Killed	287	305
Persons Injured	2,965	3,275
Causing Property Damage	4,057	....

Prosecutions for offences under the Highway Traffic Act, Section 285, Criminal Code (traffic offences) and the War Measures Act (40-mile speed limit amendment) show an overall decrease of 5,848 from the corresponding period 1942. This is accounted for by the reduction of motor vehicle traffic on the highways.

Prosecutions	1943	1942
Highway Traffic Act	5,208	9,339
War Measures Act	1,400	2,965
Criminal Code, Section 285	967	1,119

The good record built up by the Highway Motor Patrol in 1942 has been maintained. There has been no fatality or serious accident to any member of the Patrol during the year. By reason of the motor vehicle traffic reductions, restrictions have been placed on useless and unnecessary patrol and the members of the Highway Patrol have consolidated their work with the men doing regular detachment duty, thereby performing general police duty in addition to checking Highway Traffic Act violations.

Gambling

During the year under review, some exceptionally good work has been carried out by the Anti-Gambling Branch of this Force.

377 gambling devices have been seized. A conservative value of these devices would be at least $100,000.00.

298 slot machines have been confiscated, of which 225 machines have been destroyed. The remaining machines are awaiting either the result of appeals or the period pending appeal to elapse.

$29,810.00 has been imposed in fines. $5,024.00 seized in gambling house raids and from slot machines has been forwarded to the convicting magistrates for transmission to the Receiver-General of Canada.

Many well known resorts have, by reason of continual police observation, been unable to resume business. One, the Combine Club, has been converted into a factory, another has been turned into a restaurant, and the remainder of the better known resorts are unoccupied or not operating.

Industrial Disturbances—Strikes, etc.

Two strikes of serious proportions, affecting this Force, took place during the year.

On January 30th, 1943, a strike was called at the Dominion Glass Company, Wallaceburg, affecting eight hundred employees.

Members of this Force were sent at the request of the Mayor, who stated the situation was out of hand, to assist the local Wallaceburg Police in maintaining order. The strike lasted fifty-nine days and was finally called off March 30th, 1943.

On May 31st, 1943, a strike was called by the United Steel Workers of America at eight metal working plants in Galt, which affected approximately 2,200 employees.

An appeal was made by the Mayor of Galt for assistance as the Galt Police Force was inadequate to give the necessary protection. Members of this Force were sent to assist the Galt Police in maintaining order. The strike lasted thirty-five days and was finally settled July 5th, 1943.

During the progress of both these strikes, outside elements and influences were present, and there can be no doubt that but for the presence of an adequate police force serious disorder would have developed.

The only other strike of importance was called in January, 1943, at the Algoma Steel Plant, Sault Ste. Marie. This strike lasted thirteen days, but did not affect this Force.

Civilian Defence Committee

The Ontario Provincial Police was active during the year in co-operating with Civilian Committees in the Province to perfect the organization and administration of the various Civilian Defence Services, also in distributing the necessary fire and anti-gas equipment.

On November 4th, 1943, an announcement was made by the Prime Minister of Canada, as Chairman of the Cabinet War Committee regarding Air Raid Precautions, as follows:

> "Under the re-assessment, the degree of risk in the Province of Quebec west of the confluence of the Ottawa and St. Lawrence Rivers and in Ontario is no longer such that the Government would be justified in asking the citizens of these areas to maintain their organizations in a state of constant readiness. It is felt that volunteers in these areas may now be excused with the knowledge that they have served their country well through the period of danger."

After this announcement, the activities of the various Defence Committees in the province were curtailed and eventually cancelled.

Air Raid Detection

Since the formation of the Air Raid Detection Corps, this Force has been linked up with it to assist in such detection as far as this Province is concerned. On December 17th, 1943, a notice was received from the Chief of the Air Staff, Ottawa, relieving us from further duties in this connection.:

> "A careful review of all factors has indicated that air raids on Central Canada are unlikely since we have the offensive and our enemy is fully engaged elsewhere.
>
> You are, therefore, officially released from your duties in the Aircraft Detection Corps. Please accept the sincere thanks of the Royal Canadian Air Force for your assistance and co-operation in the organization of the Corps."

Blackouts

Blackouts were held in the early part of the year as follows:

January 6th—Toronto, Hamilton, St. Catharines, Niagara Falls, Welland, Port Colborne and Humberstone areas.

January 20th—Welland and Crowland area and Port Colborne and Humberstone area.

February 25th—City and County of Peterborough area.

March 3rd—County of Welland and City of St. Catharines area.

April 13th—Welland and Crowland area and Port Colborne and Humberstone area.

Sabotage, Subversion, etc.

A number of fires and explosions in industrial plants engaged on war work, in which lives were lost, were investigated by the members of the Criminal Investigation Branch, in conjunction with officials of the Fire Marshal's office, and I am pleased to report that in each case, after a thorough enquiry, no evidence of sabotage was found. The fires and explosions were ascribed to accidental causes.

What first appeared from reports to be a genuine case of attempted sabotage, but was proven later, after police investigation, to be a subterfuge, occurred in the Thunder Bay District when Andrew Kosluk, a section hand on the Canadian Pacific Railway at Pawtek, reported that some person had removed a number of spikes from the rails of the track in an attempt to wreck trains. Kosluk stated that when he was attempting to replace the spikes he had been shot at from some nearby bush and was wounded in two places.

It was later established by evidence, through careful police investigation, that Kosluk's wounds were self-inflicted and that he had himself removed the spikes.

A charge of Committing Public Mischief under the Common Law was laid against Kosluk and he was convicted and sentenced to a term of imprisonment.

Visit of Dionne Quintuplets to United States

On May 7th, 1943, Ontario's "famous girls" left North Bay via C.P.R. on their first visit to the United States for the occasion of the launching of five naval craft at the Walter Butler Shipbuilding Yards, Superior, Wisconsin.

The party included the Quintuplets, their parents, official guardians and a picked guard of Ontario Provincial Police.

W. H. Stringer, Commissioner, travelled on the special coach and was personally responsible in conjunction with the Federal Bureau of Investigation and the State Police of Michigan and Wisconsin, for the comfort and safety of the party during their stay at Superior, the christening ceremony and the return railway journey.

The christening of the ships took place at 3.00 p.m., Sunday, May 9th, 1943, with each Quintuplet sponsoring a vessel.

Motor Escorts

Motor Patrol escorts were provided for many distinguished persons visiting the Province, among the most noteworthy being:

January 21st, 1943—Colonel the Honourable J. L. Ralston, Minister of National Defence, during his visit of inspection to Military District No. 2.

February 5th, 1943—Their Royal Highnesses the Crown Prince and Princess of Norway, whilst proceeding Toronto to Gravenhurst and return by road.

June 30th, 1943—Queen Wilhelmina of the Netherlands during her visit to Guelph and return by road to Toronto.

August 12th, 1943—The Right Honourable Winston Churchill and daughter, Lieutenant Mary Churchill, during their visit to Niagara Falls and district.

August 27th, 1943—Her Royal Highness the Crown Princess Martha of Norway from the Royal Norwegian Airport, Muskoka, to Toronto by road.

In addition to the above, escorts were provided for troop movements, convoys, transportation of ammunition, visiting industrial commissions, the Empire Parliamentary Association and funerals of distinguished personages.

District Inspection

During the year under review I have visited all Districts, and many separate Detachments, reviewing personnel and inspecting equipment. I found law enforcement generally satisfactory and the members of the Force held in high esteem.

The completion of the one hundred and thirty mile stretch of Highway No. 11 between Hearst and Geraldton will be of great benefit to this Force, as it will enable officials to visit and inspect the Thunder Bay, Rainy River and Kenora districts by road without leaving the Province.

Already Staff Inspectors and the Inspector of Transport have travelled over the new section of this Highway, west of Lake Superior, making inspection of automobile equipment and personnel and by this means reduced time and expenditure.

Reports

The work of the personnel under their District Inspectors and Officers in Charge of Branches has been cheerfully and efficiently carried out, and will be found in greater detail in District and Branch reports submitted and filed at this office.

Departmental Motor Transport

On December 31st, 1943, the Force was in possession of the following motor transport:

Patrol Cars	106
Passenger Cars	71
Station Wagons	2
Service Trucks	1
Motorcycles (owned by members of Motorcycle Patrol)	9

This shows an increase of fifteen patrol cars and one pasenger car over the number of motor vehicles in operation December 31st, 1942.

The increase in patrol cars is in conformance with the policy of replacing motorcycles with patrol cars for highway patrol purposes.

Fifteen motorcycles have been taken out of operation by reason of the increase of a corresponding number of patrol cars.

Personnel (Strength)

At midnight, December 31st, 1943, the total strength of all ranks of the Force, including temporary and civilian personnel, was 739, as follows:

Regular Force	459
Special Constables	96
Veteran Guards	184
	739
Less 44 Members Regular Force on Active Service with C.A.S.F.	44
Duty Strength	695

Duty strength on December 31st, 1942, was 715, thus showing a decrease of 20, accounted for in the decrease of Special Constables now employed.

For the purposes of administration the Province is divided into twelve Districts numbered consecutively one to twelve, as follows:

No. 1 District, Headquarters Windsor—
comprising the Counties of Essex and Kent.

No. 2 District, Headquarters London—
comprising the Counties of Lambton, Middlesex, Elgin and Oxford.

No. 3 District, Headquarters Hamilton—
comprising the Counties of Wentworth, Halton, Brant and Norfolk.

No. 4 District, Headquarters Niagara Falls—
comprising the Counties of Haldimand, Lincoln and Welland.

No. 5 District, Headquarters Toronto—
comprising the Counties of York, Peel and Ontario.

No. 6 District, Headquarters Kitchener—
comprising the Counties of Bruce, Perth, Grey, Wellington, Waterloo and Huron.

No. 7 District, Headquarters Barrie—
comprising the Counties of Simcoe and Dufferin, and the Districts of Muskoka and Parry Sound.

No. 8 District, Headquarters Belleville—
comprising the Counties of Victoria, Haliburton, Peterborough, Northumberland and Durham, Hastings, Lennox and Addington, Prince Edward and Frontenac.

No. 9 District, Headquarters Perth—
comprising the Counties of Renfrew, Lanark, Dundas, Carleton, Grenville, Russell, Prescott, Stormont, Glengarry and Leeds.

No. 10 District, Headquarters Haileybury—
comprising the Districts of Temiskaming, Cochrane, Nipissing and a portion of Algoma.

No. 11 District, Headquarters Sudbury—
comprising the Districts of Sudbury, Manitoulin Island and a portion of Algoma.

No. 12 District, Headquarters Port Arthur—
comprising the Districts of Kenora, Rainy River, Thunder Bay and Patricia.

Returned from Active Service

Inspector A. H. Palmer, C.I.B., December 1st, 1943.
Provincial Constable M. J. Scanlan, Perth, September 15th, 1943.
Provincial Constable J. B. Driscoll, Belleville, June 14th, 1943.
Provincial Constable P. J. Poland, Barrie, January 15th, 1943.

Transfers

The policy put into effect of not permitting members of the Force to remain too long at one Detachment has been continued and a number of transfers from one part of the Province to another have been made.

It has also become necessary to make transfers to fill vacancies caused by dismissals, resignations and enlistments.

ENLISTMENTS

The following members of the Force have been granted Leave of Absence for War Services:

Barker, F. L.	Prov. Constable	July 15, 1942	Lieut. 2nd 10th Dragoons, C.A.S.F.
Boyd, W. H.	Insp. of Autos.	Nov. 6, 1939	Fl. Lt. Service Police, R.C.A.F.
Callaghan, E. S.	Prov. Constable	Oct. 14, 1941	Lieut. C.A.S.F.
Callander, J. W.	Prov. Constable	Oct. 11, 1940	11th Provost Co., C.A.S.F.
Campbell, A.	Prov. Constable	July 15, 1942	W.A.G., R.C.A.F.
Campbell, D. G.	Prov. Constable	Mar. 3, 1941	Lieut. C.A.S.F.
Carr, L. C.	Prov. Constable	May 6, 1940	Fl. Officer (A.P.M.), R.C.A.F.
Clubbe, G. V.	Prov. Constable	Aug. 7, 1940	Lieut. 4th Div. Prov. Coy., C.A.S.F.
Coffey, V. P.	Prov. Constable	Nov. 30, 1942	A.C. 2, R.C.A.F.
Creasy, F. B.	Dist. Inspector	Mar. 19, 1940	Capt. 2nd Div. Prov. Coy., C.A.S.F.
Crosson, J. D.	Prov. Constable	Aug. 27, 1940	3rd. Div Prov. Coy., C.A.S.F.
Davis, R.	Clerk	Nov. 10, 1941	A.C.1, R.C.A.F.
Ervine, S.	Prov. Con., M.C.P.	July 3, 1940	Capt. Hastings & P.E. Reg., C.A.S.F.
France, R. G.	Prov. Con., M.C.P.	May 11, 1940	Fl. Officer (A.P.M.), R.C.A.F.
Gilling, W.	Prov. Constable	May 30, 1940	2nd Div. Prov. Coy., C.A.S.F.
Grant, P. J.	Prov. Con., M.C.P.	May 24, 1941	Sgt. Instructor, R.C.A.F.
Hanson, J.	Prov. Constable	Nov. 17, 1941	A.C. 2, R.C.A.F.
Houldscroft, T. A.	Prov. Constable	Aug. 18, 1941	A.C. 2, R.C.A.F.
Johnson, R. E.	Prov. Constable	June 20, 1940	Corp. 3rd Div. Prov. Coy., C.A.S.F.
Kennedy, W. A.	Prov. Con., M.C.P.	June 1, 1940	48th Highlanders, C.A.S.F.
Long, G.	Clerk	May 15, 1942	A.C. 1, R.C.A.F.

Wright, E. F.	Prov. Constable	Mar. 5, 1943	C.A.S.F. (Tanks).

Commendations

The following members of the Force were commended in Police Orders for outstanding service:

Sergeant C. N. Smaill, Sudbury.
Provincial Constable D. Porter, North Bay.
Provincial Constable J. L. M. Needham, North Bay.
Provincial Constable L. G. A. Walker, Englehart.
Provincial Constable H. I. McDonald, Kirkland Lake.
Provincial Constable J. J. Ansley, Kirkland Lake.
Inspector T. W. Cousans, Perth.
Provincial Constable R. McKie, Carleton Place.
Provincial Constable J. M. Hinchliffe, Brittania Heights.
Provincial Constable H. Barker (2), Ottawa, Ontario.
Provincial Constable R. Crozier, Sturgeon Falls.
Provincial Constable C. B. Milbank, Sturgeon Falls.
Provincial Constable F. W. Barrett, Niagara Falls.
Provincial Constable F. Bromfield, Niagara Falls.
Inspector W. J. Franks, C.I.B., Toronto.
Provincial Constable O. McClevis, Walkerton (2).
Provincial Constable N. A. McLeod, Sudbury.
Provincial Constable T. S. Crawford, Sudbury.
Provincial Constable J. K. Brennan, Gogoma.
Provincial Constable J. S. McBain, Sudbury.
Provincial Constable J. J. Beaudoin, Sudbury.
Provincial Constable G. B. Carmichael, Blind River.
Provincial Constable J. W. Harris, Brockville (2).
Provincial Constable H. Hunter, Gananoque.
Provincial Constable A. E. Reilly, Grimsby.
Provincial Constable N. P. Fach, Niagara Falls (2).
Provincial Constable J. L. Whitty, Cornwall.
Provincial Constable J. M. Douglas, Stratford.
Provincial Constable J. E. Soubliere, Perth.
Provincial Constable A. MacLeod, Cornwall.
Provincial Constable J. Clark, Woodstock.
Provincial Constable A. Lawrence, Ingersoll.
Provincial Constable J. B. Driscoll, Belleville.
Corporal W. M. Durnford, Sault Ste. Marie.
Provincial Constable J. H. Hanlan, Sault Ste. Marie.
Provincial Constable T. M. Richardson, Sault Ste. Marie.
Provincial Constable W. H. Coles, Burlington.
Corporal C. W. Wood, St. Catharines.
Provincial Constable C. Wildfang, Windsor.
Provincial Constable R. O. Stromberg, Timmins.
Provincial Constable J. G. Fulton, Timmins.
Provincial Constable G. E. White, Iroquois Falls.
Provincial Constable T. R. Wright, Port Arthur.
Provincial Constable J. K. Smith, Hagersville.
Provincial Constable F. C. Thurston, Leamington.
Provincial Constable J. S. Bennett, Kingsville.
Provincial Constable H. Yule, Windsor.
Provincial Constable J. G. Tappenden, Matheson.
Provincial Constable E. D. Erickson, Nipigon.
Special Constable D. J. Brennan, Gananoque (2).
Special Constable J. S. Ellison, Ottawa.
Special Constable J. S. McDonald, Windsor.
Special Constable R. McConnell, Windsor.
Special Constable A. J. MacLachlan, Sudbury.
Special Constable E. Ring, Chats Falls.
Special Constable E. Hart, Niagara Falls.
Veteran Guard D. Campbell, Chats Falls.
Veteran Guard J. H. Frappier, Chats Falls.
Veteran Guard J. Meek, Chats Falls.
Veteran Guard E. McIlquham, Chats Falls.
Veteran Guard J. Beattie, Chats Falls.
Veteran Guard G. Mosley, Chats Falls.
Veteran Guard E. Farrell, Chats Falls.
Veteran Guard W. Donnelly, Chats Falls.

Death of Chief Constable T. Epsey, Pembroke, Ontario, And Serious Injury to Provincial Constable E. Renaud

On September 16th, 1943, Provincial Constable E. Renaud, stationed at Pembroke Detachment, received information from Sergeant A. Harland of the 47th Provost Company, Petawawa, to the effect that civilian automobiles were dispensing liquor to soldiers at Chalk River. The information was relayed to Provincial Constable Renaud through the Pembroke Town Police.

Corporal McNeill, in charge of the Pembroke Detachment, with Provincial Constable Etmanski were at Renfrew on duty with the Government auto and as Provincial Constable Renaud had no auto of his own, he hired a taxi to proceed to Chalk River, accompanied by Thomas D. Epsey, the Chief Constable of Pembroke.

At 9.45 p.m., when about four and a half miles west of Petawawa Village on No. 17 Highway, the taxi driven by Provincial Constable Renaud met a military convoy consisting of twelve vehicles, proceeding to the School of Instruction, Petawawa. The convoy was preceded by a military motorcycle with headlights on. All other vehicles were travelling with blackout lights. The first part of the convoy, which consisted of eight vehicles, was travelling with a distance of about twenty-five to fifty yards between each vehicle.

Ahead of Provincial Constable Renaud and preceding him on the same mission was a military station wagon, which Provincial Constable Renaud (thinking all the vehicles in the convoy had passed) attempted to pass and in so doing collided head on with a gun tractor, number nine vehicle in the convoy, which was approximately six hundred and ninety yards behind the eighth vehicle.

Chief Constable T. Epsey was killed instantly and Provincial Constable Renaud received terrible injuries, but fortunately survived. He was admitted to the Petawawa Military Hospital and upon examination showed the following injuries:

1. Compound fracture of right jaw.
2. Eight-inch lacerated wound, left patella.
3. Head injuries—extent undetermined.
4. Fracture of left forearm at old fracture.
5. Fracture of the pelvis (comminuted in character).

An inquest was held at Pembroke October 27th concerning the death of Chief Constable T. Epsey, Coroner Dr. J. D. Bradley presiding, with Crown Attorney H. B. Johnson, K.C., appearing for the Crown.

After hearing the police and military witnesses, the jury returned the following verdict:

"We find that Thomas Epsey came to his death on the night of September 16th, 1943, on Highway No. 17, in the Township of Petawawa, as a result of injuries received, when a vehicle driven by Provincial Constable E. P. Renaud, in which he was a passenger, was in collision with an Army Gun Tractor, D.N.D. No. 67-130, Ontario License No. 7328-F, which was part of a convoy proceeding easterly and travelling with black-out lights. From the evidence, we find that there was a distance of several hundred yards between the eighth and ninth units of the convoy, and this with the black-out lights was the cause, in our opinion, of the accident. We recommend that in future no vehicles be permitted on the Highway in this district with black-out lights."

REVOLVER COMPETITIONS

The Ontario Provincial Police Team, consisting of Sergeant D. H. Darby and Provincial Constables J. Fulton and J. Rowe, captured first place honours at matches held at St. Catharines on August 18th, 1943; at Hamilton on September 6th, 1943, and also at Guelph, Ontario, sponsored by the Guelph Police Association, on September 9th, 1943, compiling scores as follows:

St. Catharines Police Revolver Club

	Score	Possible
Sergeant D. H. Darby	229	240
Provincial Constable J. Fulton	219	240
Provincial Constable J. A. Rowe	177	240

Hamilton Revolver Club

Sergeant D. H. Darby	289	300
Provincial Constable J. A. Rowe	268	300
Provincial Constable J. Fulton	255	300

Guelph Police Association

Sergeant D. H. Darby	226	240
Provincial Constable J. Fulton	225	240
Provincial Constable J. A. Rowe	210	240

Sergeant Darby, No. 3 District Headquarters, Hamilton, again retained his title as individual champion police revolver shot of Ontario.

TRAINING SCHOOL

Two sessions of the Ontario Provincial and Municipal Training School were held at Toronto from February 8th, 1943, to March 20th, 1943, and from October 25th, 1943, to December 4th, 1943.

Preliminary arrangements were made for members of this Force to attend the Spring term but, owing to unforeseen difficulties, it was found necessary to cancel all arrangements for such attendance.

Thirty-five police officers attended the Fall term, twelve being from this Force, and twenty-two from Toronto and other municipal forces.

The results of the examinations held at the close of the session found members of the Ontario Provincial Police Force in first and second positions, and four members of the Force occupying places in the first six of the class. This was a most creditable showing.

The curriculum of study was divided into five parts, namely, Police Duties and Procedure, Evidence and Court Procedure, Criminal Law, General Statutes, Highway Traffic and Educational Tuition. There were also lectures on identification of firearms and medico-legal procedure.

COUNTY CONSTABULARIES

Members of this Force continue to perform the duties of Acting High Constables in the following Counties:

Essex
Brant
Oxford
Norfolk
Elgin
Kent
Lambton
Hastings
Glengarry
Halton
Lincoln
Welland
Haldimand
Ontario
Peel
Stormont
Dundas
Huron
Lanark
Waterloo
Bruce
Grey
Wellington
Perth
Simcoe
Renfrew
Leeds
Dufferin
Wentworth
Prince Edward
Victoria and Haliburton
Peterborough
Northumberland and Durham
Lennox and Addington
Frontenac
Grenville
Prescott and Russell
Middlesex
Carleton

The County of York is now the only County in the Province that does not come under the supervision of this Force in police matters.

With the exception of a limited number of salaried County and Township Constables, law enforcement, except in cities and towns, has become the responsibility of this Force.

ONTARIO VOLUNTEER CONSTABULARY

Officer Commanding—Superintendent, J. Hunter.

The present strength of the Ontario Volunteer Constabulary is 621, all ranks, a reduction of 54 over the year. Their general headquarters are located at Room 520, Parliament Buildings, Toronto, and District Headquarters, with the number of members attached to each District, as given in the following table:

No. 1 District, Windsor	68
No. 2 District, London	215
No. 3 District, Hamilton	56
No. 5 District, Toronto	112
No. 6 District, Kitchener	48
No. 8 District, Belleville	87
No. 9 District, Gananoque	19
No. 10 District, Timmins	16
	621

During the year the Constabulary have continued their training in police duties, drill, first-aid, firearms and anti-gas instruction. On many occasions they have rendered aid to municipal police forces in connection with civilian defence duties, blackouts, etc., and good work has been done by members of the Constabulary on the occasion of the escape of prisoners of war, etc.

Particularly good work was done on the occasion of the break-away of nineteen German prisoners of war from Fort Henry, Kingston, August 26th, 1943. On this occasion the Belleville and Gananoque units rendered signal services.

VETERAN GUARDS

Protection of Public Utilities

The policy of employing Veteran Guards to protect public utilities has been continued during the year, 184 guards being on duty at the following twenty-four Generating and Transmission Stations.

Essex Transformer Station	Windsor	4
St. Clair Transformer Station	Sarnia	2
Beach Road Transformer Station	Hamilton	2
Stirton Road Transformer Station	Hamilton	2
Gage Avenue Transformer Station	Hamilton	5
Burlington Transformer Station	Burlington	12
Leaside Transformer Station	Leaside	38
Strachan Transformer Station	Toronto	5
Bridgeman Transformer Station	Toronto	4
New Toronto Transformer Station	New Toronto	2
Oshawa No. 1 Transformer Station	Oshawa	4
Oshawa No. 2 Transformer Station	Oshawa	2
Eugenia Falls Generating Station (Power Dam)	Eugenia	3
Chats Falls Generating Station	Fitzroy Harbour	6
River Crossing Towers	Cornwall	30
Barrett's Chute Generating Station	Calabogie	15
Abitibi Canyon Generating Station	Fraserdale	10
Abitibi Dam Generating Station	Twin Falls	10
Coniston Generating Station	Coniston	4
Stinson Generating Station	District of Sudbury	4
Wahnapitae Dam	District of Sudbury	2
Virgin Falls Control Dam	On Nipigon River, District of Thunder Bay	
Alexander Landing Generating Station		16
Cameron Falls		2
Total		184

The Guards employed on this duty have performed excellent service, often under the most adverse weather conditions, and I quote hereunder extract from report received from the District Inspector in charge of the area comprising Chats Falls Generating Station, which is expressive of all Guards generally:

"I have the honour to advise you of the names of Veteran Guards who during last winter walked a distance of three and one-half miles each day, without losing one day, for any cause whatsoever. These Guards, besides walking this distance each day during the season, had eleven miles to travel by bus before they start duty. On many occasions the temperature during the past winter months dropped to forty degrees below zero.

"The worst occasion, I believe, during last winter and which is deserving of special mention, commenced on March 6th when the Guards were snowbound for six days and nights. Knowing that we would be shorthanded, the following Special Constable and Guards volunteered for duty: Special Constable E. Ring, Veteran Guards Campbell, Meek, McIlquham and Frappier.

"Several of these Veteran Guards walked from Braeside to Chats Falls down the Ottawa River, a distance of nine and one-half miles, and the remaining Guards walked from Arnprior down the same river, a distance of seven miles. This was done when the temperature was thirty-five degrees below zero.

"These instances I have above mentioned occurred last Winter, and although no record has been kept of previous Winters, I know that several instances have occurred where similar hardships were undertaken by the Guards as all in a day's work."

I am very proud of these men, not only for the loyal manner in which they are performing their duties, but also that they are willing to undertake any extra duty which might be given them.

COMMUNICATIONS

Telephone Facilities—Queen Elizabeth Way

Prior to the restrictions brought into effect by the Oil Controller regarding the sale of gasoline, which resulted in the closing of service stations from 7.00 p.m. on Saturdays to 7.00 a.m. Mondays, members of the Highway Patrol invariably used the facilities of service stations, conveniently placed along the Highway, to telephone for assistance in connection with accidents, etc., or to communicate with fellow patrolmen or District Headquarters in matters of urgency in connection with their duties.

After the restrictive orders went into effect there was no communication facilities on many of the Highways and the officers on patrol found it almost impossible to establish contact with each other or their District Headquarters on matters of urgency. This condition was most apparent on the Queen Elizabeth Highway between Toronto and Hamilton and Hamilton and Niagara Falls.

The Department of Highways found themselves in a similar predicament regarding their maintenance men and emergency sanding patrols.

With a view to remedying this situation, a conference was held between Senior Officers of this Force and Department of Highway officials with a view to the installation of a system of communication, particularly in localities where, owing to lack of residences, etc., telephone communication was practically non-existent As a result of the conference, it was decided to instal a limited number of telephones as a trial experiment on the Queen Elizabeth Way. Satisfactory locations were selected, some on telephone poles and others in the weigh scale houses, where standard telephone equipment was installed. At the present time four telephones are in operation, the service being supplied by the Bell Telephone Company at the reasonable rental of $21.50 per month, plus service connection charge.

Arrangements were made whereby the Ontario Provincial Police and the Department of Highways pay equal shares for the installation and service expenses in connection with this utility.

Members of the Highway Patrol and maintenance men of the Department of Highways are supplied with keys to the telephone boxes and this service has already proven its worth on a number of occasions, particularly in connection with fatal accidents and persons escaping from the scene of a crime. It is hoped that eventually this service may be extended.

REGISTRATION OF FIREARMS AND PERMITS FOR OFFENSIVE WEAPONS

This Branch continues to function at Headquarters in charge of a Staff Inspector and is constantly being called upon by members of other Forces for advice in connection with registration of firearms.

A great deal of the detailed work necessary in an office of this kind does not show in statistics, but there is a constant stream of visiting public and telephone calls, all asking for information.

An endeavour is made at all times to assist the public to keep out of trouble rather than a rigid strict enforcement to the exact letter of the law. In this connection the Staff Inspector in charge has addressed many service clubs and other organizations throughout the Province, explaining the law regarding firearms, etc., and its enforcement.

During the calendar year, 635 new individual permits to carry revolvers or pistols were issued, a great number of these being to members of the staff of banks and employees of large corporations for protection of payrolls and to members of approved revolver clubs for target practice.

1,124 individual permits for the transfer of revolvers and pistols were issued during the year, many of them to members of the Armed Forces. No new vendors permits were issued during the year but many of the old ones were renewed.

Under the law, permits are only valid for the calendar year and in the early months of the year a lot of work is involved in the reviewing and renewing or otherwise of permits.

During the 12 months under review, 3,936 letters were despatched from this Branch, all dealing with questions relating to firearms.

As heretofore, permits for the transfer or carrying of revolvers or pistols are not issued without the closest scrutiny of the applicant and his reasons for requesting the permit.

Formidable records have accumulated at this office since the centralization of the issuing of permits for offensive weapons. These records on many occasions have been extremely useful for reference in law enforcement.

The registration of rifles and shotguns and the issuing of permits for the transfer of same (under the Defence of Canada Regulations) in the Province of Ontario is under the supervision of the Staff Inspector in charge of this Branch and copies of all permits issued are filed here.

Since the commencement of this particular phase (September, 1940), 160,000 permit forms have been sent out from this office to the various issuers and the greater percentage of these have been issued.

Since the inception of the D.O.C.R. re rifles and shotguns, all permits to resident and non-resident aliens to possess firearms in Canada have been issued by the Commissioner, Royal Canadian Mounted Police, Ottawa, who sends us copies of such permits issued to aliens residing in Ontario and of permits issued to non-resident aliens visiting this Province, mainly for hunting. The filing, recording and checking of these permits here again involves a large amount of routine office work. Just to quote an example—during the months of October and November 4,413 copies of alien permits issued at Ottawa were received here and recorded.

INDUSTRIAL UNREST—STRIKES, ETC.

Dominion Glass Company, Wallaceburg, Ont.

On January 30th, 1943, a strike was called at the plant of the Dominion Glass Company, Wallaceburg, Ontario, by Local 25 of the United Automobile Workers of America, an affiliate of the C.I.O.

The plant employs approximately eight hundred workers, of whom six hundred and fifty answered the call to strike.

The strike was called by the union officials in an endeavour to compel the Company to recognize their union.

On February 1st, the Mayor of Wallaceburg telegraphed the Attorney-General of Ontario as follows: "Situation at Dominion Glass Company now out of hand. Substantial number of employees have advised me that they endeavoured to go to work this morning, and were refused admittance by strikers, and they have taken full control of streets leading to the plant. Town police admit situation beyond their control and have asked me to obtain aid. In my opinion breach of peace is imminent and only substantial police protection can prevent it."

To verify conditions as set forth in the Mayor's telegram, an investigation was made by a member of this Force and it was found that the strikers had taken complete control of streets leading to the plant, blocking same by automobiles, timbers, etc., and refused admittance to any person.

Assault had also been committed on some workers and there was a possibility that the strike might spread to other plants.

Further communications passed between the Attorney-General and the Mayor of Wallaceburg, and it was decided to send members of this Force to assist the local police in maintaining order.

A representative detail from this Force was ordered to report for duty at Wallaceburg under a District Inspector. On arrival only peaceful picketing was permitted. Those wishing to work were permitted to go into the plant.

On February 9th there was a distinct improvement in the situation, and half of the emergency Force were returned to their respective posts.

The number doing strike duty was continually reduced until February 17th, when there were only twelve (all ranks) on duty.

Owing to reliable information received to the effect that the strikers would be augmented by a large body of men organized and recruited at Windsor and other border points, with the intention of over-powering the reduced Force on duty in the strike area, fifty additional Officers were immediately dispatched to Wallaceburg. At this time there was a massed picket on the picket line determined to prevent workers entering the plant.

The threatened invasions from outside points failed to materialize, and the strikers, realizing there were sufficient police to prevent disorder, abandoned their strong-arm methods.

The Force was gradually reduced until the strike was finally called off on March 30th, 1943, after lasting fifty-nine days.

Some minor injuries were caused to both police and strikers. There can be no doubt that but for the presence of adequate police protection, property damage and personal injury would have occurred.

Galt Steel Industries

On May 31st, 1943, a strike was called by the United Steel Workers of America at the following metal working industries in Galt, Ontario. The purpose of the strike was to obtain recognition of the Steel Worker's Union, which is an affiliate of the C.I.O.

Babcock-Wilcox & Goldie McCulloch, Ltd.
Canadian Machinery Corporation.
Galt Malleable Iron Company, Limited.
Galt Metal Industries, Limited.
Galt Brass Company, Limited.
R. McDougall Company.
Shurly Dietrich Atkins Company, Limited.
Whitehall Machine and Tool Company.

The number of workers employed at the above plants was approximately twenty-two hundred, of whom one thousand answered the strike call.

The industries concerned were situated at points far apart, making it impossible for the local police to give attention to all at the same time.

An appeal was made by the Mayor of Galt to the Attorney-General for the assistance of the Provincial Police, as the Galt Police Force were unable to provide protection and maintain order. Before assistance was sent, a survey was made by a member of this Force, which showed that strikers, by means of massed picketing, had prevented access to workers of the plants, also shipment of raw materials and finished products.

On June 2nd a force of seventy of all ranks from this Force reported for duty at Galt, to assist local authorities in maintaining order.

Orders were issued to the strikers that mass picketing would not be permitted and free ingress or egress to all plants would be maintained.

On June 5th mass picketers formed before the plant of the Galt Malleable Industrial Company, Limited, obstructing the sidewalk and access to the plant, defying the police to disperse them. In breaking up the gathering two arrests were made on charges of obstructing the police. From then on, the situation improved and the strength of the Force was decreased daily, as conditions permitted until July 5th when the strike was finally settled.

ALLEGED SABOTAGE

On May 30th, 1943, District Headquarters, Port Arthur, were advised that a section man on the Canadian Pacific Railway at Pawetek named Andrew Kozluk had been shot and wounded whilst repairing a section of the track near Pawetek from which a number of spikes had been removed, supposedly by saboteurs shortly before a westbound passenger train was due to pass.

The injured man was taken to McKellar Hospital, Port Arthur, where he was interviewed by members of this Force and representatives of the R.C.M.P. He stated briefly that it was his duty to patrol the tracks on Sunday mornings and that on Sunday morning, May 30th, he left his shack around 8.00 a.m. and walked westerly on the eastbound track. After walking some time he noticed a man ahead of him, who started walking west and disappeared around a curve. He later noticed two men standing in the ditch on the north side of the track. As he got closer, the two men disappeared into the bush. He could give no satisfactory description of them. Coming close to the spot from which the men had disappeared, Kozluk said he noticed some loose spikes on the ties between the westbound track and on investigation found that a number of spikes had been pulled from the outside rail of the westbound track. He commenced to replace the spikes and whilst driving the second one, some person started to shoot at him from the north side of the track. He said the reports of the gun were fast, like a machine gun. Kozluk claimed that he knew he was hit in the shoulder by one bullet and immediately jumped over the the south shoulder of the tracks and headed back to report to other section men.

After investigation, Kozluk's story could not be substantiated and there was reason to believe that he had inflicted the wounds himself. A close examination was made of his clothing, particularly his hat and it was found from the position of the bullet hole that a bullet could not have gone through the hat whilst he was wearing it without severely wounding or killing him.

Continued investigation proved his story to be false and as a result he was charged under the Common Law as follows:

"That the said Andrew Kosluk, on or about the 30th day of May, 1943, at the City of Fort William, in the District of Thunder Bay, by means of certain false statements to wit: That on that day while engaged in replacing spikes removed by a person or persons unknown on the tracks of the Canadian Pacific Railway at a point on the said Canadian Pacific Railway property near Pawetek, in the Township of Oliver and District of Thunder Bay, within Canada, he was shot at and hit by a person or persons unknown, which shots came from the bush on the north side of the tracks, did thereby cause constables of the Ontario Provincial Police Force and of the Royal Canadian Mounted Police Force, maintained at the public expense for the public benefit, to devote their time and services to the investigation of false allegations, thereby temporarily depriving the public of the services of the said constables, and rendering liege subjects of the King liable to suspicion, accusation and arrest, and in so doing did unlawfully effect a public mischief."

Kozluk was arraigned at the Port Arthur District Criminal Court on Monday, October 25th, 1943, before Judge A. H. Dowler, was found guilty and sentenced to serve three months in the common gaol.

No definite motive for the action on the part of Kozluk was ascertained, but investigation showed that over a period of years the wife of the accused had been continually over-friendly with other men, this leading to considerable ill feeling between husband and wife. At the time of the above occurrence a man, who had for a number of years resided at the Kozluk home, had returned and was a regular visitor. Kozluk, having spoken to him before leaving him at his home in Fort William about 6.00 a.m. the same day, was fully aware that the said man would be a passenger on the Canadian Pacific Train No. 1, westbound that morning, and there is a strong suspicion that Kozluk intended to wreck the flyer with a view to injuring or possibly killing the unwelcome visitor.

VISIT OF DIONNE QUINTUPLETS TO U.S.A.

An interesting chapter was opened in the lives of the Dionne Quintuplets on Friday, May 7th, 1943, when they left North Bay on the first leg of their journey to Superior, Wisconsin, to participate in the launching of five naval craft from the Walter Butler Ship Building Yards.

The famous girls, accompanied by their parents, official guardians and a guard of Ontario Provincial Police, travelled in private railway cars attached to the regular Canadian Pacific Railway train, via Sault Ste. Marie, Ontario. After crossing into Michigan, their cars were attached to the regular train on the Duluth South Shore and Atlantic Railway, which arrived at Superior at 7.30 a.m., Saturday, May 8th.

The launching of the ships took place Sunday, May 9th, commencing at 3.00 p.m., with each of the Quintuplets sponsoring a ship.

Commissioner W. H. Stringer took personal charge of the party on their journey and made all police arrangements for their safety.

As the Quintuplets were the guests of the United States Government during their visit in the United States, special arrangements were made for their safety en route and at their destination. The Director of the Federal Bureau of Investigation assigned special agents to accompany the train from Sault Ste. Marie, Michigan, to Superior, Wisconsin. The Commissioner of the Michigan State police assigned two officers for a like purpose.

Police arrangements at the Butler Ship Yards before and during the ceremony were capably handled by the Chief of Police of Superior, whose Force for the occasion was augmented by Officers of the State Traffic Patrol, the City of Duluth, Investigators from the Minneapolis Bureau of Criminal Apprehension, Railway Police from the Great Northern Railroad, Auxiliary Police from the State Civilian Council and Members of the Military Marines.

As a result of this splendid co-operation between United States, Federal, State, Municipal, Railway and Ontario Police Authorities, the whole trip, including the policing at the launching ceremony, was a complete success, passing off without an accident of any description.

MISSING PERSONS

Many requests for assistance from this Force to locate missing persons have been received, especially during the hunting season when it is a yearly occurrence for this Force to have to *hunt* for people lost in the bush.

Almost without exception the missing persons return to camp within a day or two very little the worse for their experiences.

There was one exception, however, which requires special mention. On November 11th, 1943, it was reported to our Parry Sound Detachment that Samuel McIlroy, age 70, of Toronto, had not returned from a hunting trip in the bush in the vicinity of Pickerel, Ontario.

McIlroy, with other members of his party, went hunting on November 9th and failed to show up when the party returned to camp. His disappearance was reported two days later to the members of the Parry Sound Detachment, who assisted his friends and relatives in arranging search parties and carrying out a most intensive search.

The country over which the search was made was particularly rough and ice and snow hampered the searchers. Rivers were dragged, an area of many miles was closely searched, and everything possible done in an endeavour to locate the missing man, but without success. The search had to be abandoned owing to heavy snowfalls and the rivers being frozen.

It is presumed that the missing man either stumbled into a quicksand swamp or fell into the Pickerel River, which is at the point near where he disappeared, wide and has a very swift current.

FOREST FIRES

A minor epidemic of forest fires broke out at widely divergent points in Northern Ontario during the month of October, the most dangerous being in the Thunder Bay District, around Port Arthur and Fort William.

Six separate fires were burning at one time, which made it difficult to obtain sufficient manpower and equipment to fight them.

Approximately 20,000 feet of lumber, in addition to a number of unoccupied houses and barns, were destroyed in Blake Township.

The fire crossed the International Highway, from Port Arthur to Duluth, in a number of places, making it necessary to cancel the bus service between the two cities temporarily.

The general opinion was that the fires were caused by careless partridge hunters, who were particularly numerous, and the fact that all swamps and creeks were dry made it particularly difficult for the Forestry officials to obtain water for their pumps.

It is a tribute to the vigilance of the officials of the Department of Lands and Forests that no lives were lost or settlers' cattle or effects destroyed.

The members of the Port Arthur and Fort William Detachments of the Force, with their motor transports, placed themselves at the service of the Forestry officials to render any assistance required.

PRISONERS OF WAR AND INTERNEES

During the past year a number of prisoners of war and internees had been used on various projects in the Province, principally in agriculture and lumbering. Their conduct generally has been good.

There have been occasions, however, where small parties of these prisoners have wandered away without the knowledge of the officials in charge of the camp.

Members of this Force have picked up such enemy subjects many miles from where they were employed and, when returned to their camps, the officials did not know they had been absent.

In one case, a party of ten were apprehended by a Provincial Constable many miles from their place of employment and definitely refused to return to their work. They were taken to the North Bay Gaol and later escorted to an internment camp.

There appears to be a lack of supervision in some of the work camps.

On August 26th, 1943, our Detachment at Kingston was notified that nineteen German prisoners of war had escaped from Fort Henry prison camp. A general alarm was sent out, and all available personnel in the area searched the surrounding country. Within twenty-four hours sixteen of the escaped prisoners had been rounded up in a twenty mile area. The remaining three were apprehended four days later in the United States and returned to camp.

GAME AND FISHERIES ACT

Some fifty-nine prosecutions were entered for violations of the provisions of the Game and Fisheries Act during the year.

Members of the Force co-operated with officials of the Game and Fisheries Department in investigating complaints regarding violations of the Act, and special patrols have been arranged, when necessary, regarding complaints of taking furs out of season, etc.

Special attention was paid during the open season for pheasants. Hunters and automobiles were closely scrutinized to make sure the provisions of the Act were observed.

Firearms and other articles of equipment seized have been confiscated and forwarded to the Game and Fisheries Department, Toronto.

During the year monies collected in connection with activities under the

Game and Fisheries Act totalled $1,476.40, which was forwarded to the Accountant, Game and Fisheries Department, Toronto.

235 Gun Licenses	$199.75
130 Ground Hog Licenses	130.00
26 Trappers Licenses	117.00
4 Dog Licenses	7.40
66 Deer Licenses	231.00
3 Non-Resident Angling Licenses	15.00
1 Non-Resident Deer License	25.00
Royalties Collected on Furs	751.00
Total	$1,476.40

A number of fur farmers and fur dealers have been checked and advised regarding Tanners' and Export Permits.

CRUELTY TO ANIMALS

Many communications have been received from the Ontario Society for the Prevention of Cruelty to Animals, soliciting the services of this Force regarding complaints received by them of cruelty to animals in outlying districts.

As far as practicable, all complaints have received attention, and the following extract from letter received from the Managing Director is evidence that such assistance was appreciated:

"On the occasion of our Annual Meeting at the King Edward Hotel, June 19th, 1943, a resolution was unanimously passed by delegates and members present expressing our sincere gratitude for the outstanding assistance rendered to our society by your organization. There is no doubt that if it were not for your assistance, many complaints regarding cruelty to animals in outlying districts would have to remain without being investigated."

SPECIAL PATROLS RE SAFE-BREAKING, ETC.

During the Summer and Fall, a minor epidemic of safe-breaking and theft was prevalent, particularly in the western and central districts, numerous safes being stolen or rifled, from creameries, grist mills, general stores and post offices.

The method of procedure was similar in each case, which led to the belief that these depredations were the work of organized gangs.

Usually an auto would be stolen in Toronto or other city or town. The bandits would then proceed to the designated place, break into a railway tool shed and obtain crowbars, sledge hammers, etc., then proceed to the selected place where the safe would either be smashed on the premises or taken to a secluded place and opened. The stolen auto would later be found abandoned near where it was stolen.

In an endeavour to deal with this type of crime, special night patrols were authorized in the Districts affected and results were soon apparent.

A particularly vigilant patrol challenged the occupants of an auto who were acting in a suspicious manner near Walkerton, Ontario, and who refused to halt and tried to make good their escape. They were followed and eventually crashed into the ditch.

The driver, one Hubert Chappell, Toronto, was arrested; his companions, Leonard Elnor and George Dobbie, who escapted at the time, were later arrested and all linked up with numerous criminal occurrences by night.

At their trial, all three were convicted and sentenced to terms in Kingston Penitentiary, Chappell, three years on three charges, Elnor two years on three charges and Dobbie two years on three charges.

On November 1st, 1943, another occurrence of safe-breaking was reported from Pinkerton, Ontario. In this case the special patrol was responsible for the arrest and conviction of Gordon Hunter and Stewart Rowe on a charge of shop-breaking and theft, Rowe being sentenced to three and one-half years and Hunter to two years in the Kingston Peniteniary.

During the night of October 26th, 1943, whilst a patrol was on duty on No. 2 Highway a parked car was observed near a service station at Campbell's Corners, Aldershot. Inside the station the patrol found one James Silver of Toronto with stolen property in his possession. He admitted the auto used by him had been stolen from Brantford.

The Brantford Police were contacted and they advised that W. A. Lowe, a half brother of Silver, had just previously been arrested in Brantford while breaking into a service station. Rowe and Silver had broken into the service station at Brantford and were in the act of stealing the safe when disturbed.

On November 1st, 1943, Silver was sentended to three years in the Kingston Penitentiary for the Aldershot offence and then taken to Brantford to answer further charges.

In the early morning of August 28th, 1943, it was found that the garage of E. Jinkinson, of Ashton, Ontario, had been entered, the office rifled, a sum of money and other articles, including a Waltham wrist watch, stolen therefrom.

An automobile with the engine still warm was found abandoned on the side of the road and, from enquiries made, it was found to be registered in the name of Burno Brunette, Sudbury, Ontario.

The automobile in question had been reported to the Ottawa City Police as stolen, and had recently been seen driven by Constance Thivierge.

Thivierge, who had recently been released from the Kingston Penitentiary and had a long criminal record, was arrested. He was found to be in possession of the Waltham wrist watch, which was stolen from the Jinkinson garage office, and as a result was sentenced to two years in the Kingston Penitentiary on charges of breaking, entering and theft.

The above are only a few instances of the good work performed by the special night patrol.

BREAKING JAIL

Referring to page fifty-one, paragraph two of the Annual Report of 1942, regarding the escape of prisoners from the Essex County Gaol, the six prisoners who had escaped appeared before Magistrates M. D. Brodie and J. A. Hanrahan and the charge of breaking jail was tried with a number of other charges for offences committed after they had broken jail. They were found guilty and sentenced as follows: Louis Rainone, 12 years; Thomas Brice, 10 years; James Browning, 8 years; Archie Scott, 8 years; Leo Piche, 6 years; and T. Turgeon, 5 years, all in the Kingston Penitentiary.

On April 27th, 1943, Walter B. Johnson escaped from the Lincoln County Jail after having assaulted and locked the turnkey in a cell. Johnson was later arrested by the St. Catharines Police and charged with being in possession of burglary tools and firearms, two loaded revolvers being found in his possession. He was committed for trial and released on bail. He was later arrested at Espanola for being in possession of jewelry stolen from a jewelry store in Sudbury. He appeared before the Magistrate at Sudbury and was sentenced to five years, four years and three years respectively, all sentences to run concurrently.

On August 29th, 1943, three prisoners, Charles Reynolds, Isadore Huard and Germaine Leduc overpowered and assaulted a turnkey and escaped from the Nipissing District Jail, North Bay. Members of this Force, assisted by a posse of soldiers from the North Bay Military Camp, were successful in apprehending the three prisoners after they had been at large for thirty-six hours. They appeared before His Worship Magistrate M. G. Goule at North Bay on September 3rd and were sentenced to two years each in Kingston Penitentiary.

On November 6th, 1942, William Rose was sentenced to three years in the Kingston Penitentiary on charges of breaking, entering and theft. On September 12th, 1943, he escaped from the Kingston Penitentiary and later appeared in the Counties of Essex and Kent, where he committed a series of crimes covering the period September 29th to December 30th. On December 31st, 1943, members of this Force, assisted by the Chief Constable of Alvinston, Ontario, were successful in arresting Rose in a dense bushland where he had been making a hide-out. He is now awaiting trial on twenty-four criminal charges.

ACCIDENTAL DEATHS OR DEATHS FROM MISADVENTURE

Accidental Drowning—Dr. Harold Welsh, M.L.A.

A most regrettable accident occurred on May 20th, 1943, when a boat driven by an outboard motor, containing Dr. Harold Welsh, M.L.A., of Roslin, Ontario, and a friend, Daniel Goodwin, of Maynooth, Ontario, who were on a fishing trip to Algonquin Park, was carried over the dam at Opeongo Lake into the spillway and thence into the river below.

Dr. Welsh was carried by the current into the turbulent waters of the river and disappeared. Goodwin, who was cast into an eddy, was successful in reaching shore.

A detachment of this Force, under the supervision of a District Inspector, was immediately dispatched to the scene of the accident with dragging equipment.

Dragging operations were extremely difficult by reason of the strong current, and the river-bed being strewn with rocks and logs.

The search was kept up day and night by dragging in relays, and after three and a half days' continuous effort the body was recovered and escorted to Belleville.

Train-Bus Collision, Aldershot—Twelve Persons Killed

What was perhaps the worst railway-bus collision ever recorded in Ontario occurred at about 7.00 p.m., September 10th, 1943, when a Special Canadian National Railway passenger train, Toronto-London, crashed into the side of a Canada Coach Lines bus at a level crossing on the Waterdown Road about a half a mile north of Aldershot, whereby twelve persons, including the driver were killed. Only two of the bus passengers survived.

The cause of the accident has never been clearly ascertained, but there was some evidence to the effect that the bus stalled on the crossing and the train speeding through a downpour of rain, practically cut it in two, scattering the bodies of the passengers several hundred yards along the roadway.

An inquest was held at the Court House, Hamilton, on September 25th, 1943, the Coroner, Dr. J. H. Mullin, presiding, with Crown Attorney H. McCulloch present. After hearing approximately twenty witnesses, the jury impanelled to enquire into the death of Marion Woodworth and eleven others returned the following verdict:

"We, the jury empanelled to inquire into the death of Marion Dorothy Woodworth and eleven others whose death occurred as a result of an accident, September 10th, 1943, at a level crossing on the Waterdown Road at Aldershot Station, deceased all being passengers on Canada Coach Lines bus, travelling from Waterdown to Hamilton, which was struck by a C.N.R. express train.

"We find, from the evidence submitted, that the driver of the said bus did not take the proper precaution on approaching the said railway crossing.

"We strongly recommend to the Board of Transport Commissioners that more adequate protection be placed at the crossing owing to the fact that a large number of high school students pass over the crossing by bus twice daily.

"We further recommend to the above Commission that all trees and shrubs obstructing the view be removed."

Mrs. Russell McDonald, Toronto

On January 3rd, 1943, Mrs. Russell McDonald, 432 Perth Street, Toronto, died as the result of a fractured skull received when she allegedly jumped from an automobile (in motion) driven by her husband, Russell McDonald.

McDonald made a statement that at about 10.30 p.m., January 2nd, 1943, he and his wife, Bernice, were travelling east on No. 7 Highway towards Guelph. They had been quarrelling and his wife suddenly opened the door of the automobile and attempted to jump out.

In restraining her, McDonald slowed down the automobile, but while changing gears his wife made a second and successful attempt to jump from the car, striking her head on the roadway. He picked her up and took her to his parents' home at Rockwood, where a doctor was called, but she died early the next morning, January 3rd, 1943.

As the result of the parents of Mrs. McDonald accusing the husband with killing his wife, by pushing her from the automobile while in motion, a supplementary investigation was made and an inquest held. After the evidence had been taken the jury returned a verdict as follows:

"We, the members of the jury, are agreed that Bernice McDonald came to her death accidentally, at Rockwood, on January 3rd, 1943, death being caused by injuries resulting from a fall from an automobile which was in motion."

J. A. Gaudet, C. V. Ward and F. Hollyday, R.C.A.F., Guelph

At about 11.15 p.m., June 2nd, 1943, while an automobile driven by Arthur Tompkins, attached to the Wireless School, Guelph, containing three other persons was proceeding on No. 7 Highway easterly towards Guelph, it failed to make the curve at the junction of Factory Road, Breslau, and went over the dam into the Grand River. The automobile landed on its side in about three feet of water.

All occupants, who were members of the wireless School, Guelph, were trapped therein, and the following, J. A. Gaudet, C. V. Ward and F. Hollyday, either died from injuries received or were drowned. The driver, Alfred Tompkins, escaped serious injury.

CRIMINAL INVESTIGATION BRANCH

During the year this Branch of the Force has investigated many important cases, requiring exceptional ability and application on the part of the officers concerned.

A number of fugitives from justice were located and apprehended in the United States and extradited to Canada for trial by members of the Criminal Investigation Branch.

Many confidential Departmental and Inter-Departmental investigations have been made with excellent results, the records of which are not contained in this report.

Attention is called to two particularly important occurrences in which well-known and hardened criminals were arrested and convicted owing to exceptionally effective work on the part of officers of this Branch.

1. The arrest of five hardened criminals in the armed robbery of the Wheatley Branch of the Royal Bank of Canada, which robbery was one of the most daring and carefully prepared that has been perpetrated in the Province for a number of years. Five men were arrested, convicted and sentenced to long terms in the Penitentiary for this hold-up.

During the time these men were in the Kent County Jail, Chatham, awaiting trial, a daring attempt was made to release them, and it was found necessary to transfer the ringleaders to a jail in another part of the Province, pending the date of their trial.

2. The second case refers to the successful conclusion of the investigation into the murder of Joseph Borg, Windsor.

In this case, after a long and painstaking enquiry, two men were arrested convicted and sentenced to the extreme penalty for Borg's murder. Special reference should be made to the close co-operation of the Detroit and Windsor Police with the members of this Force in bringing this investigation to a successful conclusion.

RETURN OF IMPORTANT OCCURRENCES REPORTED AND INVESTIGATED

A summary of important occurrences reported and investigated during the year shows there were 7,570 such occurrences investigated in 1943, against 6,562 in 1942—an increase of 1,008.

	1943	1942
Murder	8	12
Attempted Murder	3	3
Manslaughter	16	25
Rape	25	19
Robbery with Violence	46	31
Robbery	72	74
Wounding	22	35
Attempted Rape	17	23
Carnal Knowledge	71	54
Burglary	171	90
Forgery	65	85

	1943	1942
Fraud	121	148
Housebreaking	996	913
Shopbreaking	754	473
Theft	3,196	2,707
Automobile Thefts	538	374
Receiving	145	86
Criminal Negligence	13	38
Drunk in Charge of Auto (285 C.C.)	319	369
Reckless Driving	528	586
Insane Persons	209	251
Bicycle Thefts	235	166

Investigations regarding deaths from violence and other causes show a decrease of 101 over the same period last year.

	1943	1942
Suicides	96	126
Auto Fatalities	285	305
Drownings	208	233
Railway and Air Crashes, Fires, etc.	407	433

A summary of some of the most outstanding cases investigated are hereunder submitted.

MURDERS

Mrs. Mae Semple and Betty Semple, Brighton, Ontario (Previously Reported)

Referring to paragraph two, page forty of the Annual Report for 1942, where on November 22nd, 1942, Mrs. Mae Semple and grand-daughter Betty were both shot and killed by John Semple, who after the shooting escaped in a boat across Brighton Bay. The boat was later found upside down near the shore, the oars floating in the water about twenty-five yards from the boat.

No trace of Semple has since been found, although a thorough search was made of the woods in the vicinity and dragging operations were carried out in the lake, his body has not been recovered.

Owing to rumours that Semple had been seen in the vicinity of Brighton months after the shooting, special officers were assigned to the case, but the rumours could not be substantiated and it is the consensus of opinion of all officers concerned in the investigation that he was drowned in the bay on the night of the shooting.

William Cunningham and Mrs. Anthony Fardella, Cobourg, Ontario (Previously Reported)

Referring to paragraph three, page thirty-nine of the Annual Report for 1942, in which report reference was made to the shot riddled bodies of Cunningham and Mrs. Fardella being found on the morning of November 25th, 1942, in the ditch on Highway No. 2 about four miles west of Cobourg, both bodies bearing evidence of having been shot at close range by a shotgun.

Although the investigation into this case has been vigorously pursued and a relentless hunt continued throughout the Province and some parts of the United States and Quebec, sufficient evidence to warrant an arrest has not yet been obtained.

John Borg, Windsor, Ontario (Previously Reported)

Referring to paragraph two, page thirty-nine of the Annual Report of 1942, reporting the murder of John Borg, restaurant keeper of 714 Wyandotte Street, Windsor, Ontario, who was shot in his restaurant by an unknown person, dying the following day.

Members of this Force were detailed to assist the Windsor Police in the investigation, which was continued into the year 1943. The investigation was pursued with increased vigilance and, as a result, Bruno Kisielawski and Stefan Ogrodowski were arrested on February 19th, 1943, in Detroit on suspicion of having been concerned in Borg's murder.

The two suspects waived extradition and were returned to Windsor, where they appeared before the Magistrate and were committed for trial. They appeared before Mr. Justice McFarland and Jury at the Sittings of the Supreme Court, Windsor, on May 4th, 1943, when after a trial lasting nine days they were both found guilty and sentenced to death.

The sentences of the Court were duly carried out at the Essex County Gaol in the early morning of August 24th, 1943.

Herbert Silversmith, Six Nations Reserve, Caledonia, Ontario

On December 25th, 1942, the dead body of Herbert Silversmith, Indian, was found at the foot of a bridge crossing the Canadian National Railway on the River Road about one-half mile from Caledonia.

Three Indians who had been in the company of Silversmith the previous night were detained for questioning in connection with the death. Charges of vagrancy were preferred against them.

An inquest was held and a most extensive investigation carried out, but sufficient evidence could not be obtained to place anyone on trial for the death, which was no doubt the result of a drunken brawl.

William Howard, Lindsay, Ontario

On February 6th, 1943, William Howard, of Lindsay, was shot and killed by a shotgun in the hands of Howard McGinnis at 78 Logie Street, Lindsay. From investigations made by our Lindsay Detachment it appears that Howard and McGinnis had quarrelled over a Mrs. Catharine Coursey, McGinnis' common law wife, and that Howard, who was a powerfully built man, had on occasion severely beaten McGinnis. On the night in question, Howard was standing in the kitchen of 78 Logie Street, Lindsay, when McGinnis discharged a shotgun through the window, Howard receiving the full blast in his side.

McGinnis was later arrested, charged with murder and came up for trial before Mr. Justice Greene and jury on November 2nd, 1943. The jury returned a verdict of "manslaughter," McGinnis being sentenced to twelve years in Kingston Penitentiary.

Gunner F. H. Taylor, Petawawa Camp

In the early morning of April 18th, 1943, Gunner F. H. Taylor, age forty, Canadian Artillery Training Centre, Petawawa Camp, was found in an unconscious condition behind some huts at the junction of Montgomery and Menin Roads, Petawawa Camp. He was removed to the Camp Hospital and died two days later. An autopsy revealed a badly fractured skull.

An investigation into the death was carried out by members of the Pembroke Detachment assisted by a C.I.B. Inspector and members of the Provost Corps.

As a result, Sapper Wilfred J. Bradley, who at the time of Taylor's death was with his unit in Petawawa Camp, but later deserted, was arrested at Charlottetown, P.E.I., and returned to Pembroke for trial on a charge of murder.

On October 19th, Sapper Bradley appeared before Mr. Justice Kelly at Pembroke Assizes for trial and was discharged on the ground that the Grand Jury found "No Bill."

Infant Child of Rita Wager, Township of Hinchinbrooke

On March 4th, 1943, Mrs. Rita Wager, a married woman whose husband is overseas with the Armed Forces, gave birth to a child at her home in the Township of Hinchinbrooke, Frontenac County.

Present at the time of birth were Mrs. Anna McCumber, mother of Rita Wager and Walter Haley, putative father of the Wager child. The child lived for several hours after birth, when it is alleged it was choked to death by placing a piece of cloth in its mouth.

The body was taken away by Haley and buried in a woodchuck hole near the home. The body was later located and a post-mortem held by Dr. W. D. Hay, Professor of Pathology, Queen's University.

As a result of investigations made by Officers from No. 8 District Headquarters, Belleville, Mrs. McCumber was arrested on a charge of murder. Mrs. R. Wager and Walter Haley were also arrested on charges of concealment of birth. All were committed for trial.

On the charges of concealment of birth, Mrs. Wager and Walter Haley were convicted and sentenced to terms in the Ontario Reformatory. Mrs. McCumber appeared before Mr. Justice McFarland and jury at Kingston Assizes on September 15th, 1943, on a charge of murder. The jury disagreed and the trial was put over to the Spring Assizes, 1944. A charge of murder was also preferred against Walter Haley and was likewise traversed to the Spring Assizes, 1944.

David Palmer, Whitney Township, Ontario

On May 14th, 1943, the body of David Palmer, employed at the Gold Ridge Stock Farm, Golden City, District of Cochrane, was found in a deserted outbuilding of the farm. Medical examination showed that he had received very serious head injuries, his skull having been smashed, apparently from blows by a heavy blunt instrument.

Officers from the Timmins Detachment, assisted by members of the Criminal

Investigation Branch, commenced an intensive investigation. A number of suspects were detained for questioning, but at the end of the year insufficient evidence has been obtained to place anyone on trial. The investigation is still continuing.

Mrs. John Baptiste April, Driftwood, Ontario

On July 1st, 1943, Mr. and Mrs. John Baptiste April, farmers of an isolated settlement at Driftwood, Ontario, were shot and grievously wounded by some unknown person while carrying out their daily chores at their barn. The assailant then ransacked the dwelling house and decamped. Although very seriously wounded, Mr. April was able to harness a horse and drove to the nearest residence, where he obtained assistance and notified the police.

When officers from the Timmins Detachment arrived, they found Mr. April at the general store, Driftwood, suffering from bullet wounds in the head. The officers proceeded to his farm where Mrs. April was found lying in the cowshed suffering from similar bullet wounds in the head. Both were removed to the Cochrane General Hospital where Mrs. April died July 2nd, 1943.

An immediate investigation was commenced resulting in the arrest of one, Wilfred Desroches, age twenty-three, of Cochrane, who had formerly lived with and worked for the aged couple.

Desroches was found asleep in an automobile on a sideroad at about 11.00 a.m. the morning of the shooting. He had in his possession a fully loaded .32 calibre revolver, also a number of live cartridges and empty shells.

When arrested he gave a rambling, fictitious story regarding the shooting, but later admitted that he alone had shot the elderly couple.

Desroches was committed for trial on a charge of murder and on September 13th, 1943, came before Mr. Justice Chevrier and jury at the Fall Assizes at Cochrane. He was convicted and sentenced to be hanged. The sentence of the Court was duly carried out on November 30th, 1943.

Martha Omelia, Niagara-on-the-Lake, Ontario

In the early hours of September 23rd, 1943, the body of Miss Martha Omelia, age sixty, of Niagara-on-the-Lake, was found by two sergeants of the Niagara Garrison under a hedge at the junction of Prideau and Regent Streets, Niagara-on-the-Lake.

Medical examination showed that the dead woman had been criminally assaulted in addition to being brutally beaten about the head and face, death resulting from shock and haemorrhage.

The location of this crime was on the edge of the Niagara Military Camp, where many hundreds of soldiers were encamped.

Enquiry showed that the dead woman had been in the habit of entertaining members of the military service at her home, and every indication pointed to the fact that some soldier or soldiers were responsible for her death.

In an endeavour to locate and apprehend the perpetrators of this crime, a most extensive investigation was inaugurated, the members of the Force being assisted by local Police Departments, Royal Canadian Mounted Police, the Provost Corps and officers of the Niagara Garrison. At the present time, although hundreds of soldiers and civilians have been questioned, insufficient evidence has been obtained to place any person on trial.

MURDER AND SUICIDE

R. L. Angell and M. Angell, Otterville, Ontario

On December 30th, 1942, R. L. Angell, age 48, Station Agent, Canadian National Railway, Otterville, Ontario, shot his wife Marion and then shot himself, the weapon used being a .22 calibre revolver. Both were removed to the Soldiers' Memorial Hospital, where they died early the following day.

From enquiries made, it was ascertained Angell had been drinking heavily for some time prior to the tragedy, which had caused domestic disturbances. He was also said to be in financial difficulties.

Sarah Morgan and Gordon Morgan, Plainfield, Ontario

On February 20th, 1943, the dead bodies of Gordon Morgan and his wife, Sarah Morgan, age 29, were found at their home at Plainfield, Ontario.

The body of Mrs. Morgan was found at the rear of the house with her head almost severed, and an old-fashioned razor found close by. Morgan's body was found in the kitchen of their home with the throat badly lacerated, and a blood-stained pocket knife, with which the injuries had apparently been inflicted nearby.

From a reconstruction of the tragedy, it would appear that Sarah Morgan came to her death by a murderous attack by her husband, who cut her throat with a razor, after which she struggled out to the back yard. Morgan then took his own life but cutting his throat with a pocket knife.

Morgan and wife had been separated for some time and it is surmised that the double slaying resulted as the culmination of a quarrel, it being known that for some time Morgan had been endeavouring to have his wife live with him again.

SUSPECTED MURDER

Mrs. Annie C. Coughler

On February 10th the body of Mrs. Annie C. Coughler, widow, age 50, was found in a sugar bush shanty, Edwardsburg Township, Grenville County, by a woodcutter.

First reports stated the woman had been criminally assaulted and murdered, but investigation disclosed no foundation for this theory.

It was found that the dead woman had visited friends in the vicinity and on her way home through deep snow and sub-zero weather had become exhausted and, having sought shelter in the shanty, had died from over exertion, death being attributed to natural causes.

MOTOR MANSLAUGHTER

Three persons were instantly killed and a fourth died on admittance to hospital, in addition to two others being critically injured when an automobile driven by Leddman G. Browne, of Miranda Avenue, Toronto, drove head on into the rear of a stalled transport truck on the Queen Elizabeth Way about two miles west of the Humber in the early morning of March 17th, 1943.

Investigation revealed that Browne was driving an auto load of pleasure seekers, who had spent a social evening visiting a number of resorts. They were returning to the City about 3.00 a.m. via the Queen Elizabeth Way. A tractor-trailer, owned by the Toronto-St. Catharies Transport Limited, had stopped on the pavement owing to motor trouble. All lights were on and flares had been set out. The auto driven by Browne crashed into the rear of the truck with terrific force, hurling the occupants in all directions and reducing the vehicle to scrap iron.

A charge of manslaughter was brought against Browne, who appeared for trial after he had recovered from his injuries. He came up for trial before Mr. Justice McFarland and jury on October 18th, 1943. The jury found him not guilt of Manslaughter, but guilty of Dangerous and Reckless Driving. Browne was sentenced to eighteen months in the Ontario Reformatory.

HIT AND RUN FATALITIES

L. J. Whorwood, R.C.A.F.—Deceased

On May 14th, 1943, whilst L. J. Whorwood, a member of the Royal Canadian Air Force, No. 1 Training Depot, was walking with another airman and two women east on No. 8 Highway near Stoney Creek in Wentworth County, an automobile travelling in the same direction struck Whorwood and his lady companion.

The automobile did not stop or return to the scene of the accident and no description of same could be obtained. Whorwood was instantly killed and his companion admitted to the hospital suffering from serious injuries.

At the time of the accident a headlight was broken off the automobile responsible for the fatality.

Persistent enquiries were set afoot in tracing and examining automobiles suspected of being concerned in the tragedy, and as a result a warrant was issued for the arrest of one, Cyril T. Gilvear, a member of the R.C.N.V.R., attached to H.M.C.S. Cornwallis, Nova Scotia.

Gilvear was at his home near Normanhurst on leave at the time of the fatality, but had returned to Nova Scotia before the investigation was complete. Permission was obtained to return him to Hamilton for trial and on September 29th, 1943, he appeared before Mr. Justice Urquhart and jury at the Assizes Court, Hamilton, on three indictments, to wit, Manslaughter, under Section 268, Criminal Code, Reckless or Dangerous Driving, Section 285 (6) Criminal Code, and Leaving the Scene of an Accident, Section 285 (2) Criminal Code. The jury found him not guilty of Manslaughter, but guilty of the two lesser charges, for which he was sentenced to six and four months respectively and is not permitted to drive in Canada for a period of three years.

L.A.W. Brownlee—Deceased

L.A.W. Hutchings—Injured

No. 5 S.F.T.S., R.C.A.F., is situate on Highway No. 53 about six miles west of Brantford. A short distance from this school on the opposite side of the Highway is a refreshment booth frequented by those attending the Training School. At about 11.00 p.m., Saturday, October 9th, 1943, L.A.W. Brownlee and L.A.W. Hutchings went to the refreshment booth for sandwiches. As they were returning, they were both struck by an automobile travelling in an easterly direction without lights. The automobile did not stop, but accelerated speed and disappeared.

L.A.W. Brownlee was carried on the bumper a distance of 1,214 feet when she fell to the roadway and L.A.W. Hutchings was struck and thrown into the south ditch.

The two injured women were taken to the hospital at the school, where L.A.W. Brownlee died shortly after admittance and L.A.W. Hutchings remained in a critical condition.

An intense and tireless search was commenced in an endeavour to locate the automobile responsible, but a very difficult problem presented itself owing to the fact that it was a dark night and no one had any description of the automobile. However, on October 19th, important information was obtained which led to the arrest of those responsible.

A constable of the Oakville Police Department, on October 19th, observed an automobile travelling in a suspicious manner on No. 2 Highway near Oakville. He gave chase, which ended in the suspected automobile crashing at a sharp curve. The two occupants, Robert Evans and George Wynn, of Brantford, Ontario, were detained for questioning. An examination of the automobile disclosed blood stains, tufts of human hair and shreds of fabric adhering to the front of the vehicle.

The two suspects were returned to Brantford where they were both charged with Manslaughter and committed for trial. This case has not yet been decided.

Nicholas Friesen, Delhi, Ontario

On September 21st, 1943, Nicholas Friesen, age 6, of R.R. No. 1, Delhi, Ontario, died in the General Hospital, Tillsonburg, as the result of injuries received early the same day when he was struck by an automobile travelling on the townline between the Townships of Walsingham and Middleton, County of Norfolk.

The automobile responsible for the fatality failed to stop or return to the scene of the accident, and has not so far been identified.

The Friesen child was with other children returning to school after the noon recess, when an automobile, believed to be a 1936 or 1937 model Dodge or Plymouth, proceeding at a great speed struck the boy, throwing him into the air and leaving him lying in the ditch.

Witnesses stated the autombile slackened speed momentarily, then proceeded west at an increased speed.

Members of this Force, assisted by local Municipal Police and residents of the district, are still actively engaged in the investigation.

Roy Lofthouse, Oshawa, Ontario

On November 8th, 1943, while Roy Lofthouse, age fourteen, residing near Parklawn Cemetery, Oshawa, was riding his bicycle east on No. 2 Highway about one mile west of Oshawa, he was struck and fatally injured by an automobile which did not stop or return to the scene of the accident.

Fortunately, the driver of another automobile witnessed the accident and followed the offending automobile into Oshawa, back past the scene of the accident to the home of one, James Dafoe, 520 Chestnut Street, Whitby.

Dafoe's automobile was found to have a damaged front fender and broken right windshield to which blood and hair were adhering.

Dafoe was found to be considerably under the influence of liquor and was arrested. He admitted he was the driver of the automobile that had struck the boy.

A charge of Manslaughter and other minor charges were preferred against him and the case is still pending.

ROBBERIES, THEFTS, ETC.

Bank of Nova Scotia, Richmond, Ontario (previously reported)

On July 19th, 1938, the Richmond, Ontario, Branch of the Bank of Nova Scotia was robbed by three armed men who escaped with twelve thousand dollars in currency.

Three well-known criminals were later identified as being the men wanted. Oscar and Melville Campbell, brothers, were arrested shortly after the robbery and sentenced to ten years in Kingston Penitentiary.

The third man, Donald Edwards, escaped to the United States where he was later arrested, convicted and sentenced for crimes committed in that country.

In June, 1943, extradition proceedings were commenced for his return to this Province and an order was made for his extradition from Oregon, U.S.A., in September, 1943.

On his return he was arraigned before Magistrate A. H. Lieff, where he pleaded guilty to a charge of armed robbery and was sentenced to seven years in Kingston Penitentiary.

Hold-Up and Robbery, Royal Bank, Wheatley, Ontario

On September 10th, 1943, the Royal Bank of Canada, Wheatley, Ontario, was held up by five masked gunmen and robbed of approximately $35,000.00. The five men locked the manager and his wife in their apartment and stayed overnight. In the morning, they forced them to go to the bank and instruct the employees that the bank was being held up and that no one would be injured providing they did as they were told.

An investigation was immediately commenced by the No. 1 District Headquarters, Windsor, assisted by the Criminal Investigation Branch.

The following five men were arrested: A. Baldwin, Leo Dubroy, Franklin Smith, Peter Devlin and Vernard Gates, $11,040.00 being recovered.

All were committed for trial and came before His Honour Judge H. E. Grosch at the General Sessions, Chatham, on December 6th, 1943, and pleaded not guilty. The jury returned a verdict of guilty in all cases and the following sentences were imposed: Baldwin, 15 years; Devlin, 13 years; Gates, 9 years; Smith, 7 years; and Dubroy, 7 years, all sentences to be served in the Kingston Penitentiary.

Whilst the above prisoners were awaiting trial in the Kent County Gaol, an attempt was made to effect a gaol release. One, Daniel Payne, an associate of Baldwin's, was arrested while attempting to scale the gaol wall. A rope ladder with iron hooks and a revolver and map were recovered. Payne was charged with an attempted gaol break and sentenced to fifteen months in the Ontario Reformatory, Guelph.

Robbery with Violence—J. F. McFarlane, Shannonville, Ontario

On June 4th, 1943, when Mr. J. F. McFarlane, storekeeper, Shannonville, Ontario, entered his store, he was struck on the head from behind by a man armed with a heavy steel instrument. He was able to recognize his assailant as one Private William Clarke.

Clarke locked McFarlane in a room, and then rifled the cash register. He was arrested during the night of June 4th and charged with Robbery with Violence.

During the course of the enquiry, it was found that Clarke had deserted the army at Orillia in March, 1943, re-entered in Kingston, deserted again in May, 1943.

Clarke appeared before the Magistrate at Belleville and pleaded guilty to Robbery with Violence, Forgery and Uttering a Forged Document and was sentenced to two years and six months in the Kingston Penitentiary.

Robbery with Violence—Thomas Nuttall, Taxi Operator, Gananoque, Ontario

On May 17th, 1943, Thomas Nuttall, taxi operator of Gananoque, was assaulted and robbed by three young men who hired him to drive them to Barriefield.

Whilst proceeding on the journey one of the men struck the driver over the head with a bottle, dragged him into the rear seat of the car, where he was again struck on the head, pushed out of the car and left lying on the side of the road. A passing motorist picked up the driver and notified the police.

Our Kingston Detachment were successful in arresting Charles Darling, John Thompson and Garnet Jones. All three appeared before Magistrate J. Garvin, Kingston, and two were convicted. Thompson was sentenced to three years in the Kingston Penitentiary with two applications of ten strokes each of the lash, Darling to eighteen months in the Ontario Reformatory. Jones, who elected trial by a higher court, was dismissed.

Robbery with Violence—Lorne Munroe, Taxi Operator, Belleville, Ontario.

On November 17th, 1943, Lorne Munroe, taxi driver of Belleville, was requested by an airman and a civilian to drive them to a location west of Belleville.

A short distance from Belleville an instrument was stuck into Munroe's back and he was requested to hand over his wallet which contained about $60.00. The driver did as directed, then started to run, but was caught by the two men, who gave him a terrible beating, took his watch and left him. He was able to reach a telephone and notify the police.

As the result of diligent enquiries, L.A.C. McKechnie, R.C.A.F., Belleville, and Elden Huff, a civilian employee of the R.C.A.F., Trenton, were arrested and charged with Robbery with Violence.

Both appeared before Magistrate J. L. Lloyd, Belleville, and on November 4th were convicted. McKechnie was sentenced to seven years and Huff to six years in the Kinston Penitentiary.

Robbery with Violence—Sam Chew, Victoria Cafe, Sturgeon Falls, Ontario

Referring to item in the Annual Report of 1942, page 49, paragraph two, in connection with the robbery of the proprietor of the Victoria Cafe, Sturgeon Falls, December 24th, 1942, by two unknown men, this investigation was continued, and Victor Bigrass and Gerard Gareau, of Sudbury, were arrested and charged with the offence.

They appeared before the Magistrate at North Bay, January 8th, 1943, when Bigrass was sentenced to four years and Gareau to six years in the Kingston Penitentiary.

Robbery with Violence—Patrick Bigras, Taxi Driver, Timmins, Ontario

On October 10th, 1943, it was reported to our Timmins Detachment that a taxi driver Patrick Bigras had been beaten and robbed by two men, who had then stolen the taxi.

Following investigation, Alvin Richards and Gilbert La Tendresse were caught driving the stolen car, in which was found a fully loaded rifle. Both men were charged with Robbery with Violence.

They appeared before the Magistrate at Timmins, when Richards was sentenced to three years in Kingston Penitentiary. He was also a deserter from the Canadian Active Service Force.

La Tendresse was found to be a juvenile and was dealt with in a juvenile court.

Breaking, Entering and Theft, Carleton County

Harold E. Reeves, Ottawa, was convicted by Magistrate Lieff, in the County Court, Ottawa, on a number of charges of theft of goods valued at over $5,000.00 from summer homes and residences in the Ottawa Valley District.

Reeves, with Alderic Beauvais, Hull, Quebec, and Thomas Forde, Ottawa, were arrested by members of the Ottawa Detachment after an intensive investigation covering a period of four months.

Reeves was given an exemplary sentence of ten years in Kingston Penitentiary on each of eleven charges on which he was convicted, the sentences to run concurrently.

Beauvais and Forde were each convicted and given minor sentences in the Ontario Reformatory, it being proven that Reeves, who had a jail record extending over thirty years, was the leader and instigator in all cases in which the three were concerned.

Breaking, Entering and Theft, Stormont and Leeds Counties

Ronald Precoor, with a number of aliases, appeared before Magistrate Bergeron, Cornwall, Ontario, and was sentenced to two years and six months in Kingston Penitentiary on charges of breaking, entering and theft, also of being in possession of burglar's tools.

Precoor also appeared before the Magistrate at Tweed, Ontario, and was convicted on seven charges of shop-breaking, false pretenses, theft of automobile, etc., and was sentenced to terms in the Kingston Penitentiary concurrent with the sentence imposed by the Magistrate at Cornwall.

Safe-Breaking and Theft, Norfolk and Wentworth Counties

On July 8th, 1943, Wilfred Swick, Joseph Shearer and George Cunningham appeared before the Magistrate at Simcoe on five counts of breaking and entering, including safe-breaking. All were convicted, Cunningham being sentenced to four years and Shearer to five years in the Kingston Penitentiary, Swick being sentenced to one year in the Ontario Reformatory.

Shearer and Swick were later taken to Hamilton where some twenty additional charges were heard, Shearer being sentenced to six years and Swick to three and one-half years in Kingston Penitentiary.

These men have long police records and are vindictive criminals.

OFFENCES AGAINST THE PERSON

I regret to report an increase of sex crimes, and refer briefly to two particularly brutal cases which were investigated by members of this Force in conjunction with the police of the municipality concerned.

In March, 1943, a twenty-year-old woman was proceeding to her home through a little frequented portion of the Town of Orillia. She was accosted and dragged into a vacant lot where she was brutally and criminally assaulted, her injuries consisting of a broken jaw, both eyes closed, lips cut and swollen, teeth broken and badly bruised stomach.

With the meagre description supplied, an investigation was commenced, and suspicion rested upon one, Gilbert Dube, an ex-convict, and eventually from blood stains, footprints and an injured hand, sufficient evidence was procured to warrant his arrest. On his appearance before Mr. Justice Plaxton at the Sittings of the Supreme Court at Barrie, he pleaded guilty and was sentenced to three years in Kingston Penitentiary with lashes.

This sentence was appealed by the Honourable the Attorney-General as being inadequate, the Court of Appeal adding an additional two years to the prison sentence.

A second and more serious case was reported to our Sault Ste. Marie Detachment on August 9th, 1943.

In this case a nineteen-year-old woman was brutally and criminally assaulted by four men, who left her on the doorstep of her home in an unconscious condition.

From the medical examination, it was learned that, in addition to evidence of rape, the girl's body and face were one mass of contusions and forty-four separate bruises were discernible. She was admitted to hospital and, when able to give a coherent statement, it was learned that four men had raped her, some of the offences taking place in the city, others in the country.

As the result of combined investigation on the part of our Officers and the Sault Ste. Marie Police, the following four men were located and apprehended: Sam Pettolia, Sam Trepasso, Frank Cerenzia and Vergi Valenti.

They appeared for trial before Mr. Justice Roach and jury at the Assizes Court at Sault Ste. Marie, October 6th to 11th, 1943, and were found guilty of rape, with the exception of Valenti, and sentenced as follows: Sam Pettolia, five years, Frank Cerenzia, ten years, and Sam Trepasso, twelve years, sentences to be served in the Kingston Penitentiary. Vergi Valenti was sentenced to six months in the Ontario Reformatory for Common Assault.

Mr. Justice Roach commented very favourably upon the splendid co-operation between this Force and the Sault Ste. Marie Police Department, also on the able manner in which the investigation, preparation and submitting of evidence was accomplished by all officers concerned.

ANTI-GAMBLING BRANCH

The Anti-Gambling Branch, established in May, 1942, has continued its good work and has more than justified its formation.

The places formerly known to have operated as common gaming or betting houses have been kept under observation and I am pleased to report that none have resumed their former illegal activities. The Combine Club has been converted into a factory, the Brookwood Country Club is now operating as a restaurant, the National Sporting Club is unoccupied and none of the other well known places in Etobicoke Township, Scarboro Township or Leaside have resumed operations.

During the year under review, three hundred and seventy-three (373) gambling devices were seized, a conservative estimate of their value being $100,000.00. Two hundred and ninety-eight (298) of these machines were confiscated, twenty-nine (29) ordered returned to persons from whom they were seized and the remainder are on hand either awaiting appeal or the expiration of appeal period.

Thirteen hundred and ninety-eight (1,398) investigations were carried out during the year, three hundred and eleven (311) search orders executed, two hundred and forty-one (241) summonses were served and ninety-nine (99) arrests were made without warrants.

Fines totalling $29,810.00 were imposed and collected and $5,024.29 were recovered from confiscated slot machines in gaming and betting houses. The latter amount was turned over to the convicting magistrates to be forwarded to the Receiver-General of Canada at Ottawa.

Of the number of carnivals, etc., visited, seven were found to be violating the provisions of the Criminal Code and were prosecuted.

On January 24th, 1943, the premises of the Mayfair Restaurant, Queen Street West, Etobicoke Township, were raided and a cock fight found to be in operation. One hundred and four (104) men and women were found on the premises, two (2) were prosecuted under Section 543 of the Criminal Code as Keepers and the remainder under Section 542 as Encouraging, Aiding and Assisting, etc. Eighty (80) live fighting cocks and the usual paraphernalia used in connection with cock fighting was seized and confiscated. Convictions were registered against one person as keeper and one for encouraging and assisting, contrary to Section 542 of the Criminal Code. Both were fined $200.00 and costs. The charges against the remainder were disposed of as follows: three (3) were dismissed and the remaining ninety-three (93) were withdrawn.

The Crown Attorney recommended that a stated case be brought before a Supreme Court Judge. This was done and Mr. Justice Kellar MacKay at Osgoode Hall directed the case be remitted to the Magistrate as His Lordship was of the opinion there was no doubt about the defendants encouraging or assisting at the cock fight on the premises of the Mayfair Restaurant, January 24th, 1943.

Two recommendations were made under the Gaming and Betting Act, 1942, to padlock premises convicted under Section 229 of the Criminal Code and the following places were closed:

Ernest Bateman	46 Talbot St. E., Leamington	Three Months
Charles Blackwell	95 Main St. E., Welland	Two Months

A classification of prosecutions, convictions, dismissals, etc., for offences covering the period January 1st to December 31st, 1943, follows herewith.

OFFENCES	Prosecutions	Convictions	Dismissals	Withdrawals	Fines Imposed and Collected
Common Gaming House (Sec. 229 C.C.)	309	270	27	12	
Common Betting House (Sec. 229 C.C.)	10	5	4	1	
Permitting Premises to be used as Gaming House (Sec. 228 (2) C.C.)	1		1		
Found-Ins (Sec. 228 C.C.)	86	75	9	2	
Permitting Premises to be used as Betting House (Sec. 235 (a) C.C.)	1	1

HIGHGRADING

One Sergeant and one Provincial Constable were engaged exclusively during the year on investigations in connection with the prevention of Highgrading.

These investigations not only consisted of matters connected with the theft of highgrade ore, but material assistance was also given to officers of the Foreign Exchange Control Board, the Royal Canadian Mounted Police, the United States Treasury Department and Revenue Officials in the suppression of the theft of gold from Ontario mines and illegal buying and exporting of highgrade gold from Canada.

The approximate value of highgrade gold recovered as a result of prosecutions by members of the Ontario Provincial Police was $3,413.17; of this total $1,454.99 was ordered by the court to be returned to the mines from which it was stolen.

In addition to the above, the members of the Highgrade Branch assisted the Royal Canadian Mounted Police in prosecutions in which highgrade gold to the value of $3,000.00 was recovered while being exported illegally to the United States.

Noteworthy Investigations

Mike Matichuk—Illegal Possession of Gold

In these investigations conducted by members of this Force, assisted by the Royal Canadian Mounted Police, gold to the value of $1,423.34 was seized.

Matichuk was convicted for being in the possession of illegal gold and sentenced to one year's imprisonment.

Marius Madsen and Ronald Wowk, Red Lake, Ontario—Illegal Possession of Gold

This prosecution was the first of its kind to be carried out in the Red Lake Mine area. The investigation was efficiently handled by the Red Lake Detachment assisted by members of the Highgrade Branch.

Madsen and Wowk were tried by Magistrate Wolfe, Kenora, convicted, and sentenced as follows:

Madsen, one year definite and four months indeterminate, Ontario Reformatory.

Wowk, eight months definite and four months indeterminate, Ontario Reformatory.

Attempt to Export Gold to United States Illegally

An important investigation bearing on this subject was brought to a successful conclusion by members of the Royal Canadian Mounted Police, the Foreign Exchange Control Board and the United States Treasury Department, assisted by members of this Force at Windsor.

As a result of prosecutions entered by the Royal Canadian Mounted Police, the following persons were charged and convicted with being in the illegal possession of gold and attempting to export gold illegally from Canada to the United States:

Marko Kekich—Two and a half years, Kingston Penitentiary.
Sam Matijevich—Two and half years, Kingston Penitentiary.
Mike Bijlich—Two and a half years, Kingston Penitentiary.
George Birush—Two years less one day, Ontario Reformatory.
Jack Kovacevich—Eighteen months, Ontario Reformatory.

Summary

It will be noted that the majority of cases prosecuted for highgrading during the year have been tried summarily, indicating that the former highgrade rings are being broken up.

In the past when a highgrader came into the hands of the police, the ring would aid in his defence and the culprit generally elected to be tried by a higher court, believing that by this method there was less chance of a conviction.

As a preventative measure, the mines throughout the Province generally have established their own police departments and when a case of highgrading comes to their attention they submit the particulars of the case to the Highgrade Branch for further investigation and prosecution, if necessary.

The mine managers have assisted materially in detailing their chemists and assayers as experts in highgrade prosecutions.

Officers of this Branch were able to afford special aid and assistance to the Quebec Mines Enforcement Branch regarding the value of highgrade ore. As the border line between Ontario and Quebec is surrounded by gold producing mines, where the theft of ore may be of a joint nature, the closest co-operation is necessary.

HIGHWAY TRAFFIC ACT

Returns submitted in connection with the work of the Highway Patrol show a decided decrease in the number of prosecutions for violations of the Act, also in the number of accidents recorded.

The decrease in both accidents and prosecutions can be accounted for by the reduction in the number of motor vehicles in operation on the highways during the year, by reason of the stringent regulations restricting the use of gasoline and tires.

The reduction in the number of accidents is not, however, comparable with the reduced number of vehicles in operation. After all causes for accidents have been thoroughly investigated, including speed, conditions of the highway and of the vehicle concerned, the final conclusion arrived at is that there must be many persons driving motor vehicles who are neither competent nor capable of being in charge of such vehicle.

The number of patrol cars in operation on January 1st, 1943, was ninety-one, and motorcycles twenty-six.

During the year the motorcycles in use have been reduced to ten and patrol cars increased to one hundred and six.

Transportation of freight over the highways has been particularly heavy and has to a degree made up for the falling off in passenger traffic. The passage of military equipment and troop convoys has been continuous and has necessitated considerable escort duty.

The campaign waged in 1942 regarding overloading and the continuous operation of weigh scales in certain localities evidently had a beneficial effect. Prosecutions for overloading have dropped from 2,202 in 1942 to 801 in 1943.

Special consideration has again been given to vehicles carrying war material and in many cases the regulations governing weight and size of loads have not been strictly adhered to.

The following table give statistical monthly returns of accidents reported by members of the Force for the year, a reduction of 460 from the number reported in 1942.

Accidents investigated during the period January 1st to December 31st, 1943:

Month	Total	Fatal	Number Killed	Number Injured
January	275	9	9	159
February	254	9	10	127
March	300	9	12	171
April	210	6	6	150

THE LIQUOR CONTROL ACT

There were 2,569 prosecutions entered during the year for violations of the provisions of the Liquor Control Act, a decrease of 446 over the corresponding period in 1942.

The decrease can be accounted for by the rationing and curtailment in the supply of beer and liquor.

By rationing and curtailing the supply of intoxicating liquor, problems common to the days of the Ontario Temperance Act have returned. We find that habitual drinkers, unable to get liquor legitimately, are again drinking rubbing alcohol and toilet preparations, such as bay rum and lilac lotions. A number of deaths have already been ascribed to this practise.

The following statistical table gives the disposition of prosecutions and the amount of fines collected for infractions during the year:

Offences	Prosecutions	Convictions	Dismissals	Commitments	With drawals	Fines Imposed
Having in Illegal Place	721	672	25	5	24	$12,930.00
Selling or Keeping for Sale	90	49	21	36	20	1,000.00 (Fine against Corp.)
Unlawful Purchase—In possession without Government Seal	55	49	2	....	4	1,610.00

Totals	2,569	2,313	129	83	127	$52,520.00

CONFISCATED LIQUOR

Spirits, wine and beer seized, confiscated and turned over to the Liquor Control Board:

	1942	1943
Spirits	465 gals.	290 gals.
Wine	745 "	1,300 "
Beer	6,650 "	3,200 "
Approximate Value	$6,792.00	$7,000.00

AUTOMOBILES CONFISCATED

	Approximate Value
Chevrolet Coach	$62.00
Dodge Coupe Sedan	800.00
Ford Coach	150.00
Ford Coach	125.00
Dodge Sedan	1,100.00
Essex Coach	60.00
Chevrolet Sedan	900.00
Plymouth Sedan	200.00
Chevrolet Sedan	85.00
Dodge Coupe	400.00
Dodge Sedan	65.00
Chevrolet Coach	55.00
Ford DeLuxe Coach	400.00
Plymouth Sedan	150.00
Chevrolet Sedan	125.00
Total	$4,577.00

REVENUE DERIVED FROM ENFORCEMENT OF LIQUOR CONTROL ACT

	1942	1943
Fines Collected	$65,551.25	$52,520.00
Approximate Value of Liquor Seized	6,792.00	7,000.00
Approximate Value of Confiscated Autos	2,205.12	4,577.00
Totals	$74,548.37	$64,097.00

During the latter part of 1943, it was reported that soldiers' identification cards were being missed from the Reception Wing, Canadian National Exhibition Camp. Officers of the Provost Corps commenced an investigation. Suspicion centred on one, Private John Beck, who was employed in the building as a cleaner. On Tuesday, November 16th, he was seen driving a Ford car. Military Police stopped him and searched the car. A quantity of liquor, a number of liquor permits and soldiers' identification cards were found. Beck was held and the matter reported to the Liquor Control Investigation Branch.

From information received from Beck, a house on Springhurst Avenue, Toronto, was searched and over three hundred liquor permits and one thousand army identification cards were found. Clifford and Beck were arrested. Beck was charged under the Liquor Control Act, sentenced to three months and the automobile he was driving confiscated. Clifford was charged with Conspiracy and sentenced to six months definite and one month indeterminate.

From investigations made it appears that Beck had been induced to steal the soldiers' identification cards, which he gave to Clifford. Clifford would then supply Beck and other soldiers with an identificatiao card and money to purchase a permit and liquor. The liquor and permit would be handed to Clifford, who then by means of a chemical would erase the name on the permit so that it could be used a second or third time as the case may be. By this means he was obtaining a very considerable supply of liquor by using a fresh identification card and permit for each purchase.

Permits and Prohibitory Orders

There were 1,837 permits received at Headquarters for cancellation. In each case where there were sufficient grounds to support a recommendation for cancellation or a prohibitory order it was recommended to the Liquor Control Board that the permit be cancelled. Cancellation took effect in all cases except where the officer's report did not contain sufficient grounds to justify action by the Board.

Liquor for Analysis

During the year there were 368 samples of liquor received for analysis from Municipal and Ontario Provincial Police Officers and in each case the necessary action was taken.

Amendments to the Liquor Control Act

A revised edition of the Liquor Control Act was published in 1943 and copies were supplied to all Provincial and Municipal Police Forces, also to Magistrates, Crown Attorneys, etc. Certain minor amendments were made to the Regulations regarding the supplying of liquor on permits.

STATISTICAL RETURNS

Property which had been reported lost or stolen to the value of $436,026.00 was recovered by members of the Force and restored to its various owners.

CONCLUSION

In conclusion I desire to express my sincere appreciation for the counsel and advice received at all times from the Deputy Attorney General and Solicitors of your Department.

I also wish to thank the Press and Radio Officials, Municipal, Railway and Royal Canadian Mounted Police Forces for their ever-ready assistance and co-operation throughout the year.

I further desire to assure you on behalf of the Force of which I have the honour to be the head that the same constant vigilance and devotion to duty will be maintained during the critical days that still lie ahead.

Respectfully submitted,

William H. Stringer,
Commissioner of Police for Ontario.

April 5th, 1944.

THE HONOURABLE GEORGE A. DREW, K.C., M.P.P.,
Prime Minister of Ontario,
Parliament Buildings, Toronto.

DEAR SIR:

It is again my privilege to place in your hands a Report covering the work of the Ontario Research Foundation for the year 1943.

The Financial Statement reflects both the sustained activity of the various scientific departments and sound condition of our financial position.

As you will learn from the material contained in the Director's report to me our resources in personnel and equipment have been under pressure due to the combined demands of the war and a marked increase in requests for research facilities from industrial sources.

Constant attention is being given to preparations necessary for the part the Foundation should play in the solution of post-war and rehabilitation problems.

I have the honour to be,

Your obedient servant,

E. G. BAKER,
Vice-Chairman.

REPORT OF THE DIRECTOR OF RESEARCH, 1943

To Edwin G. Baker, Esq.,
Vice-Chairman

Dear Sir:

The year 1943 constitutes another peak in the activity of this Foundation. Whilst the pressure due to war activity diminished to some extent this was more than compensated for by a marked increase in the requests received from industry for the investigation of long-term problems. For the first time since 1928 the problem of laboratory space has become acute, and in the near future it will be necessary to arrive at some conclusion as to whether increased and permanent extensions are not justified. A second limiting factor has been the supply of trained research workers. Military service and the war industries must have priority, and until the demands from these sources diminish it will be impossible to devote adequate and sustained attention to post-war problems. Current discussions regarding the uses to be made of war plants and the possibilities of creating opportunities for gainful employment for demobilized soldiers and workers tend to over-simplify the problems involved. The inevitable transition period might be shortened if research relating to post-war problems could be given a higher rating in the complicated system of controls and restrictions which must operate in wartime. These remarks are not intended as a complaint or criticism. The writer only wishes to call attention to one of the great sacrifices from a national viewpoint involved in Canada's war effort.

When the Foundation was created in 1928 the hope was that it would provide facilities for Ontario manufacturers somewhat similar to those available in the Mellon Institute and other laboratories in the United States and in Great Britain. Perhaps owing to the onset of problems growing out of the depression years it was not until shortly before the present war that any considerable use of our facilities occurred other than for routine services and short-term investigations. Without belittling in any way the importance of such work, it is necessary to point out that progress requires more than this, and it is encouraging to be able to report a decided change. At the present time the Foundation cannot establish enough Fellowships to take care of the demand for research. This change is in large measure due to the gradual development and diffusion of a correct understanding of the relationship between industrial scientific research and economic stability. The testing period lies ahead. Will industry again regard such expenditures as the first to be pared down or eliminated when signs of reduced business activity appear? No one can prophesy. To weather the storm and carry on with a five year research programme, the only one which brings adequate returns on the investment, requires not only fortitude but cash. It would add greatly to the stability and continuity of scientific research if the Governments concerned would encourage and not disallow the establishment of reserves for research. Such allocations are just as legitimate and important as the premiums paid for insurance against fire, perhaps more so.

Within the Foundation it is well that we reexamine ourselves, our equipment and our standards of work in the light of these greater responsibilities. Trouble-shooting is one thing, planning and carrying through a research programme for an industry is a different story. The prospect is made brighter by the hope that young men and women engaged in war, matured by experience and mentally alert will soon return to share this post-war responsibility and opportunity.

May I close this introduction by referring in no formal way to the services rendered by your scientific staff. The pressure, exerted under the conditions I have outlined, has fallen very largely on their shoulders. Frequent changes and the lack of trained technical assistants have not decreased the load. It is only by exemplary team play and individual devotion to duty that we have been able to carry on.

Mr. Ward, Miss Grange and the secretarial staff have carried the administrative load with patience and efficiency. In addition to procuring the variety of supplies and equipment involved in research they are sure guides through the maze of forms and regulations which surround even this peaceful occupation.

ENGINEERING AND METALLURGY

During the past year the services of this Department have been almost wholly engaged on research or production associated with the war. On this account only general remarks concerning the work can be included in this report.

The gauge testing laboratory has continued to operate with approximately the same staff as in recent years. An average of two thousand gauges per month were checked. This figure alone does not convey the steady increase in efficiency on the part of the staff. As the war has progressed the type of product manufactured in Canada has become more costly and complex, and the gauges now being submitted by the Inspection Board and private manufacturers call for steadily increasing skill and accuracy.

This laboratory had, from 1940 to the autumn of 1943, been under the direction of Mr. C. Tasker. At that time he resigned from our staff in order to accept the position of Director of Research of the American Society of Heating and Ventilating Engineers. It is a pleasure to record his contribution to the Foundation and to wish him success in his new position.

The gauge rectification shop continues to work to capacity in correcting expeditiously and economically gauges which fail to meet the standards of the Inspection Laboratory.

The important contribution made by the physical testing laboratory is indicated by a comparison of the figures for 1940 and 1943. In the first of these years 350 test reports were sent out, and in 1943 this number had grown to 3,200. This work is strictly not routine testing but an important branch of inspection work. During the year our facilities have been improved by the addition of a 10,000 lb. tensile testing machine. It will serve not only the metallurgical but the plastics and other laboratories in the Foundation.

The heat-treatment laboratory handled 70 per cent more work than in the previous year, and the machine shop becomes more and more a key branch of our work as its extent and variety in the Foundation as a whole increase.

One hundred and two investigations have been carried out during this year. These vary from short-term investigations to researches occupying several months. It is most gratifying to report a marked increase in research work under our plan of Fellowships supported by industrial corporations. It is our hope that this development will continue during the post-war period. This group of highly skilled personnel which Mr. Ellis has assembled and trained should be maintained and their experience utilized in the transition of the metallurgical industries from war to peace-time production.

TEXTILES

The general testing and short-term studies of this Department have shown a slight falling off during the past year. This is possibly due to the predominant part in the industry of repetitive war contracts. This is not to be regretted because with a limited staff it has been possible to concentrate more on the increased demand for research work.

One question arises in connection with routine tests which sooner or later the industries must face. All textile fabrics retain an amount of moisture which varies with the fibre used and the atmospheric conditions. The true moisture content is a factor in determining value, and there exists in Canada a definite need for standards based on Canadian conditions of climate, and for an independent laboratory equipped to perform this necessary service and to issue certificates which will be generally accepted by the different branches of the industry. A suggestion was made this year that the Foundation should equip such a laboratory at Acton for the testing of wool tops, but owing to the shortage of trained men we have not been able to respond to this idea.

The process developed by the staff in cooperation with Dominion Silk Mills Limited for setting the twist in rayon yarns has been in successful operation throughout the year. We anticipate a wider use and a possible extension to the nylon field after the war. This development is a striking example of the success which attends cooperation and confidence between experienced operators and scientific workers.

During the year contact has been maintained with several firms interested in the production of textile oils developed in this Department and in the

Chemistry Department. Owing to war restrictions of the materials involved commercial production was not possible. The oils have successfully met all the requirements of the industry in plant trials.

The Quality Control of rayon fabrics, etc., continues to function successfully, and in spite of restricted amounts of available merchandise there is evidence that the consumer demand for Quality Controlled goods is increasing. During the year the specifications associated with the woven goods field have been revised and published. Neither these nor the tests associated with them are perfect, and both are being modified and improved in the light of experience. Emphasis is being placed for the time being on the development of colour shades, dye formulae and standards of fastness. In the knit goods field sales showed an increase of 40 per cent compared with the previous year. Quality Control does not imply dull uniformity of product. Freedom in the field of design and shade are left to the manufacturer. The articles carrying the label must, however, attain definite standards of serviceability.

The Fellowship supported by York Knitting Mills Limited functioned successfully throughout the year, and in the later months a Fellowship was inaugurated by Canadian Industries Limited for work in the nylon field.

Although no detailed account can be included in this Report I must place on record a note concerning the contributions of Dr. Goodings in connection with the development of protective clothing for the R.C.A.F., and more recently his work as a member of a committee representing the three Services.

BIOCHEMISTRY

As the war progressed and external supplies of vegetable oil were reduced a shortage of glycerol developed in Canada. The use of this material for civilian purposes was severely curtailed, and the Foundation was asked to investigate on a pilot-plant scale processes for producing glycerol from wheat. This programme was intended to provide a backlog of experience and personnel in the event of commercial production being required for military purposes. During the year the crisis passed and the investigation was terminated.

As a contribution to a national programme of linseed oil research sponsored by the National Research Council we have continued our study of methods for hydrogenating the oil to plastic shortening. Originally this programme developed out of the oil shortage already referred to, and the expanded growth of flax in the west combined with research of this character was the logical approach to the solution of a potential shortage of edible oils. It is important for Canadians to keep in mind that owing to climatic conditions flax is the only oil-seed bearing plant which can be grown successfully in this country. Soya beans and sunflower have been publicised but the official figures show that up to the present time only a negligible quantity of these oils have been produced in Canada from our own crops. All the more reason for exploring to the limit the commercial possibilities of the oil which we can produce. The uses of linseed oil in the industrial field are generally known, although recent work has opened up new possibilities in the fields of rubber substitutes and varnishes. The high degree of unsaturation and chemical reactivity of linseed oil are virtues in the industrial field but serious drawbacks in the edible oil market, causing instability and the development of off-flavour, particularly at high temperatures. Various theories are held as to the precise chemical cause of this off-flavour development, and a solution of this problem is the key which would open up much wider utilization of linseed oil, assuming that no economic barrier is encountered. The importance of this work from the point of view of crop diversification in the west need not be enlarged upon here.

This research has been supported financially by a grant received from the National Research Council. We also wish to thank Professor Jones of Queen's University for allowing us to use his spectrophotometer in this connection. Without this assistance our results would have had little scientific value.

During the year a member of the staff made a lengthy visit to laboratories and plants in the United States with a view to collecting information in connection with the crushing, extraction and refining of vegetable oils.

In the leather laboratory we have continued to supply facilities to the Inspection Board and to the Joint Services Committee on Protective Clothing.

The vitamin laboratory continues to study and evaluate the latest suggestions for estimating quantitatively the various vitamins in foods. During the past 10 years great strides have been made in developing rapid chemical methods to replace the older biological methods involving experimental animals. It is on this basis that national regulations controlling food are steadily increasing, e.g. those relating to bread. For several years this Foundation refused to issue certificates based on these more rapid methods because of uncontrollable variations in our results. That there is still need for caution and freedom from dogmatism can be shown by comparing the results obtained in 12 laboratories with reference to portions of the same material.

A study is in progress to determine the minimum intake of protein required to maintain rats in good health when the diet is adequate in all other respects.

Fellowships have been established in this Department, under the direction of Mr. Henry, by Toronto Elevators Limited and by Canadian Induction Heating.

CHEMISTRY

During the year the emphasis has passed from war research and control to the problems submitted by industry and associated with long-term planning. This is a most encouraging aspect of our work.

The analytical laboratory has continued to serve efficiently the requirements of the Inspection Board officers in the Toronto area. In the organic field there was less testing work done and a greater number of short-term investigations were undertaken.

The necessary personnel and equipment were organized for research in the production of synthetic rubber. This work has been co-ordinated with that of the Canadian and American Rubber Committees, and our contribution has been to explore the possibilities of raising the quality of Buna-S by the addition of small quantities of a long list of chemicals to the standard butadiene-styrene mixture. The influence of various emulsifying agents was also investigated.

Over one hundred short-term investigations have been conducted and reported upon. Fellowships supported by the following companies were in operation in this Department during the past year: Consumers' Gas Company of Toronto, Wm. Wrigley Jr. Company Limited, Sterling Rubber Company Limited, Moore Corporation Limited, and The Ontario Paper Company Limited.

This marked increase in the long-term research programme to which we are committed, and which industry is supporting, is a result of growing recognition of the leadership and capacity of Dr. Westman and his senior colleagues.

AGRICULTURE

During the winter months the task of preparing material for and writing an article on the physiography of southwestern Ontario was completed and this has now been published in Scientific Agriculture. In May, Mr. Chapman and Dr. Putnam gave two short papers at the meetings of the Royal Society of Canada, on the moraines, drumlins and eskers of Southern Ontario, and the material was published in the Transactions of the Society.

For some time it has been our intention to prepare a detailed map of the physiography of all southern Ontario to overcome the limitations of the sketch maps previously published by us. The material for all southern Ontario was collected and a comprehensive map, on the scale of 4 miles to the inch, prepared. However details were lacking for the Grey-Bruce-Dufferin area because contour maps are not available. Fortunately this area is photographed systematically by the R.C.A.F. for mapping purposes, and a visit was made to Ottawa to study them. Our experience in this regard was very stimulating. In brief, these photographs offer a rapid method of obtaining accurate boundaries of physical land features. Using them under the stereoscope the main topographic features can be seen, enabling one to map quite accurately the drumlins, eskers, shorecliffs, stream valleys and most moraines, to mention but a few features. Each of the landforms results in a peculiar pattern of light and dark due to the colour of the surface soil, which in turn is due to drainage. Knowing the ground in a general way from surveys it is possible to correlate the graphic patterns with land forms and draw boundaries between them. While in some cases the boundaries are distinct others cannot be obtained by this method. Different types of boulder loams (tills) or the boundary between silt and sand are examples of this limitation. However, the final result is that we have more detail now about the areas covered by aerial photographs than those covered only by contour maps. The large scale map is close to completion and we are satisfied with it. Small sketch maps, though useful in giving the outlines, fail to give the details which are so important to anyone making local observations.

About a month in all was spent in the aerial photographic library during which time Mr. Dunlop and his staff extended to us every assistance and courtesy at their command, for which we are deeply grateful.

A very thorough search of geological literature relating to this and similar areas has been made in preparation for the writing of a monograph on physiography.

During the year time was devoted to the continuation of a detailed study of regional agriculture in Old Ontario, with particular emphasis on those districts for which the average prices for farm land had been computed. These districts comprise parts of Durham, Victoria, Peterborough, Simcoe, Ontario, York and Peel counties, representing broadly six land types. For each type a small number of representative farms was selected, and their operators asked to fill in a detailed questionnaire. Our aim is to obtain information regarding equipment, cropping system, live stock, produce obtained, monetary income and standard of living. Some excellent contacts have been made by this procedure and it is hoped to have complete returns in the near future.

Research in the pathology laboratory was continued during 1943 on problems associated with *Ascaris lumbricoides* infection (the large round worm of hogs). The experimental work, as in previous years, was carried out with guinea pigs. Further information was obtained relative to an understanding of the resistance produced in these animals by infection with this parasite. Additional work is being carried out to confirm some of these results and the evidence obtained thus far points to the following tentative conclusions: Guinea pigs remain partially resistant to infection for several weeks. The liver in such animals appears to act as a barrier to the migration of the parasites through the body.

There was limited time to continue the investigations begun a year ago on the blood parasites of ruffed grouse. It was possible, with the cooperation of Mr. Taylor, Deputy Minister of Game and Fisheries, and other individuals, to examine 53 birds of which 70 per cent were infected with the Leucocytozoon parasite. Other blood protozoan parasites which have been found in some of the birds include species of *Haemoproteus, Trypanosoma, Microfilaria* and *Plasmodium.* The last record is interesting for, so far as is known, this is the first record of true bird malaria in the ruffed grouse. It was found in two birds from one locality. Further work on one or all of these parasites should be carried out.

Dr. Fallis was granted leave of absence to enable him to take advantage of the opportunity of spending three months studying Tropical Medicine at Tulane University and in the field in Guatemala. It is a pleasure to acknowledge the assistance of the Association of American Medical Colleges and the Markle

Foundation which made this study possible. It proved a rich experience, particularly with regard to a knowledge of parasitic diseases. The experience emphasized the importance of parasitic diseases of man, and other animals, in global economy. No further justification for a study of these is needed than a knowledge of the fact that millions die annually from malaria alone, and several hundred times this number are sick with the disease.

A number of minor queries were answered during the year and diagnostic services provided for parasitological material sent in by the Royal Ontario Museum of Zoology, the Department of Game and Fisheries and a few veterinarians. The volume of this material examined was less than in some previous years. Some assistance was given to other departments in connection with problems under investigation, such as a surgical metals alloy, toxicity of polyvinyl acetate, and bacterial destruction of wool and cotton fibres.

Mr. Tennyson Jarvis retired from active duty at the close of the year. For over ten years he has inspired and organized the field studies of our small group in agricultural research. The contribution they have made to our knowledge of the fundamental factors in land utilization in Ontario is largely due to his leadership and enthusiasm. We shall miss the companionship of a friend and a stimulating colleague.

All of which is respectfully submitted.

Faithfully yours,

H. B. SPEAKMAN,
Director.

ONTARIO RESEARCH FOUNDATION

BALANCE SHEET

As At December 31, 1943

ASSETS

Current Assets		
Cash in Bank and on Hand	$ 43,178.46	
Accounts Receivable less Reserve	25,589.01	
Stores and Containers	11,724.32	
		$ 80,491.79
Investments...		
Securities of The Dominion of Canada and Bonds at book value which is less than market value	$3,534,354.67	
Accrued Interest thereon to December 31, 1943	39,740.90	
Preferred, Bank and Other Stocks valued at the market of December 31, 1943	263,314.00	
		3,837,409.57
Fixed Assets		
(Portion owned by Ontario Research Foundation):		
Equipment, Furniture and Library		148,487.31
Sundry Assets		
Prepayments and Sundry Assets		897.94
		$4,067,286.61

Signed on behalf of Ontario Research Foundation:

Alfred B. Ward,
Secretary-Treasurer.

Balance Sheet as at December 31st, 1943—Continued

LIABILITIES, RESERVES AND CAPITAL

Current Liabilities		
Accounts Payable		$ 6,119.68
Replacement Reserves		
For Equipment, Furniture and Library:		
Owned and used by Ontario Research Foundation	$ 122,952.51	
Used by Ontario Research Foundation	53,247.22	
		176,199.73
Investment Reserve Account		108,959.85
Capital Funds		3,761,558.35
Surplus Account		14,449.00
		$4,067,286.61

I have audited the books and accounts of Ontario Research Foundation for the year ended December 31, 1943, and have verified the Bonds, Stocks and Cash Balances and have found them to be in accord with the figures contained in the above Balance Sheet. I have received all the information and explanations I have required and I certify that, in my opinion, the above Balance Sheet gives a true and correct view of the affairs of Ontario Research Foundation at December 31, 1943.

All my requirements as Auditor have been complied with.

Elliott Allen, F.C.A.
of Allen, Miles & Fox,
Chartered Accountants.

Toronto, Canada, January 25, 1944.

SESSIONAL PAPER No. 40, 1945

ONTARIO

TORONTO:
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1944

The Honourable Leslie E. Blackwell,
Attorney-General.

Sir:

I have the honour to submit to you the Returns of the General Election as held in the year 1943, and of the subsequent By-Election held in the Electoral District of Haldimand-Norfolk on the 13th and 20th of March, 1944.

Respectfully submitted,

C. F. BULMER,
The Clerk of the Crown in Chancery.

Toronto, April 1st, 1944.

To The Honourable
The Lieutenant-Governor of the Province of Ontario.

May It Please Your Honour:

The undersigned has the honour to present to Your Honour the Returns of the General Election as held in the year 1943, and of the subsequent By-Election held in the Electoral District of Haldimand-Norfolk on the 13th and 20th of March, 1944.

Respectifully submitted,

LESLIE E. BLACKWELL
Attorney-General.

Department of the Attorney-General,
April 1st, 1944.

LIST OF RETURNING OFFICERS AT GENERAL ELECTION, 1943

Constituency	Returning Officer	Post Office
Addington	Wilson P. Franklin	Kingston, R.R. 6
Algoma-Manitoulin	F. A. Clement	Thessalon
Brant	James L McCormack	Brantford
Brantford	Richard O. H. Frost	Brantford
Bruce	Robert Sloan	Chesley, R.R.2
Carleton	J. M. Hoey	Westboro
Cochrane North	John D. Mackay	Cochrane
Cochrane South	D. M. Johnson	Matheson
Dufferin-Simcoe	James P. Dunlop	Stayner, R.R.
Durham	M. H. Staples	Newcastle
Elgin	F. R. Palmer	St. Thomas
Essex North	Alfred Quenneville	Windsor, Sub. 11
Essex South	Charles W. Huffman	Arner
Fort William	Egbert P. Kelly	Fort William
Glengarry	Donald J. MacDonnell	Dalhousie Stn., P.Q.
Grenville-Dundas	Miles Marcellus	Chesterville, R.R. 2
Grey North	Herman S. Weaver	Owen Sound, R.R. 3
Grey South	D. J. McDonald	Elmwood
Haldimand-Norfolk	John Pratt	Simcoe
Halton	Peter W. Cooke	Milton
Hamilton East	Jack Beemer	Hamilton
Hamilton Centre	Frank Dillon	Hamilton
Hamilton-Wentworth	Harry C. Clarke	Dundas
Hastings East	Robert Wood	Madoc
Hastings West	Morley B. Sine	Frankford, R.R. 3
Huron	J. M. Southcott	Exeter
Huron-Bruce	J. A. Johnston	Mildmay
Kenora	John Robinson	Kenora
Kent East	Stanley Fraser	Blenheim, R.R. 4
Kent West	James W. Harrington	Chatham
Kingston	Harry F. Mooers	Kingston
Lambton East	Wm. J. Davis	Florence, R.R. 2
Lambton West	Homer Lockhart	Sarnia
Lanark	George W. Buchanan	Carleton Place
Leeds	Joseph F. Keyes	Gananoque
Lincoln	A. E. Coombs	St. Catharines
London	C. J. F. Ross	London

THE NIAGARA PARKS COMMISSION

HON. T. B. McQUESTEN, K.C., Chairman, Hamilton.
DR. GEORGE B. SNYDER, Vice-Chairman, Niagara Falls.
HON. WM. L. HOUCK, B.S., Niagara Falls.
ARCHIE J. HAINES, Jordan.
JUDGE J. C. M. GERMAN, Cobourg.
ROSS HARSTONE, Hamilton.
A. T. WHITAKER, Brantford.
DONALD McGILLIVRAY, Port Colborne.

General Manager and Secretary
MAXIM T. GRAY, O.L.S.

Administration Building, Queen Victoria Park

FIFTY-SEVENTH ANNUAL REPORT
OF THE
NIAGARA PARKS COMMISSION

To The Honourable Albert Matthews, LL.D.,
Lieutenant-Governor of the Province of Ontario.

May It Please Your Honour:

The Niagara Parks Commission begs to submit for the information of the Ontario Legislature, the Fifty-Seventh Annual Report, covering the fiscal year from April 1, 1942 to March 31, 1943.

The membership of the Commission remained unchanged during the year, consisting of Hon. T. B. McQuesten, K.C., Minister of Highways and Municipal Affairs, as Chairman; Dr. George B. Snyder, Niagara Falls, Vice-Chairman; Hon. W. L. Houck, B.S., Niagara Falls; Archie J. Haines, Jordan; Judge J. C. M. German, Cobourg; Ross Harstone, Hamilton; A. T. Whitaker, Brantford; and Donald McGillivray, Port Colborne. Maxim T. Gray, O.L.S., is General Manager and Secretary.

The heavy hand of war and its consequences lay upon the activities of the Commission during the period under review. Tire and gasoline restrictions became more severe as time went on, causing a great decline in the amount of tourist traffic. Coincident with this was the placing of additional restrictions upon bus and rail traffic, the ending of special traffic, because of the cancellation, for a time, just across the international border, of all "pleasure travelling". This specific restriction was lifted toward the end of the fiscal year, but as it was accompanied by a halving of the then none-too-generous allowance for motorists, there was no change in the general effect—a diminution of traffic which of course cut down the number of visitors to Canada and specifically to the 36 miles of vistas, historical monuments and memorials, and the natural beauties of Niagara Falls and the adjacent territory. Owing to the exigencies of war, Table Rock House, once the most important among the concessions operated by the Niagara Parks Commission (including the famous tunnel trip beneath the Canadian Horseshoe Falls) remained closed; public access to the Dufferin Islands, long a favoured bathing and picnic spot was cut off; access to the famous Park Restaurant continued to be awkward, lessening the possibilities of doing business on the scale of previous years; the traffic to the Whirlpool Rapids tower and to the Spanish Aero car which carried passengers over the Whirlpool dropped off so greatly that the former was considering closing down for the duration at the time this report was under preparation and the latter was in the position of having asked for cancellation of rentals.

In every way your Commission has cooperated with the military authorities, which are charged with the defense of this vital area, and relations have been most harmonious. At all times, active service troops have been in service, guarding the vital Chippawa-Queenston Canal, and the equally vital power plants above and below the Falls.

The closing down of the concessions coincided, strangely enough, with the opening of facilities to make international access to the properties of the Commission the easiest possible. The opening of the Rainbow Bridge, with its adequate traffic facilities which contrasted so greatly with the traffic jams which for so many years characterized entry into Canada over the "Honeymoon Bridge" gave Canada a magnificent entry point, one in keeping with the fact that in peace times the Niagara-Fort Erie bridges carried the greatest amount of vehicular traffic between border points. The Rainbow Bridge itself is one of the finest to be found, with provision for quick handling of a large flow of traffic. Because of war conditions, these facilities are not in full use. The two-way dual traffic lanes have been cut down to a single dual way. The capacious offices meant to handle a much larger flow of traffic have in part been closed, and customs and immigration office staff reduced so that overhead expenses were greatly lessened.

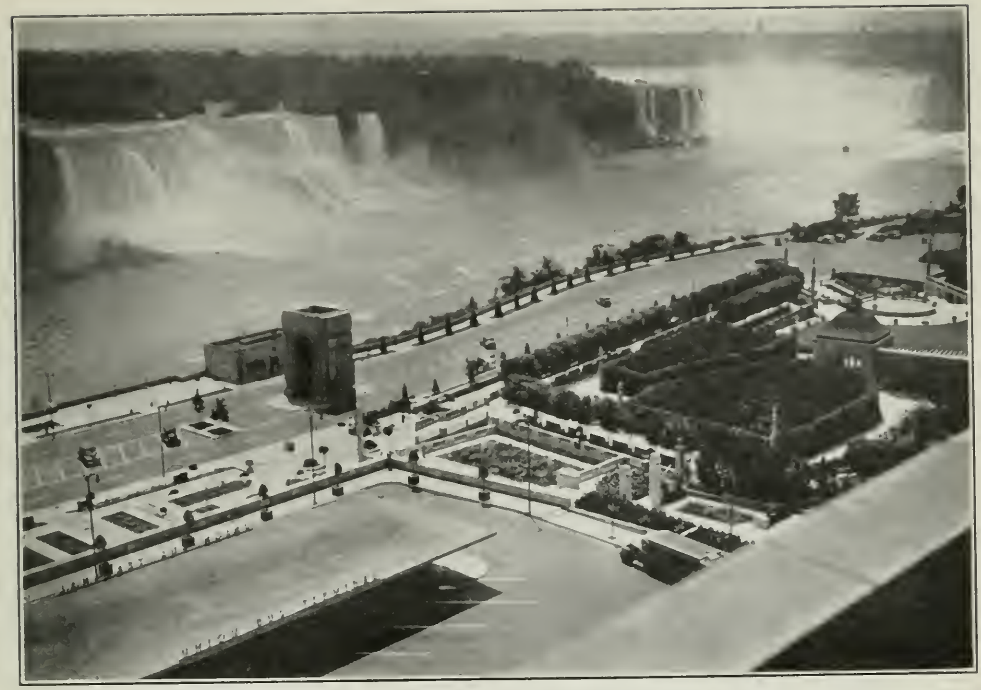
A feature of the year's work under the Niagara Parks Commission, which will be told of in detail later in this report, was the planting of Rainbow Gardens, the area lying between Oakes Garden Theatre and the bridge bus terminal including also an area between River Road and the bus terminal. Because of the cooperation between the Bridge authorities, and the Niagara Parks Commission, both of which are headed by Hon. T. B. McQuesten, Minister of Highways and Municipal Affairs for Ontario, the original plans of the bridge levels on the Canadian side were integrated with those of the Oakes Garden Theatre, and the completed work shows with what artistry and care the plans were dovetailed, so that the one is actually in design and work a part of the other, the two uniting to form one of the most striking designs of architecture and landscaping to be found in North America.

The coming of victory, which seems closer at the time of writing than previously since the Nazis invaded Poland, will undoubtedly bring about a revival of motor traffic. The improvements which have been carried out in the terrain of which the Niagara Parks Commission is trustee for the people of Ontario will undoubtedly be a lure for an increased flow of traffic from the United States.

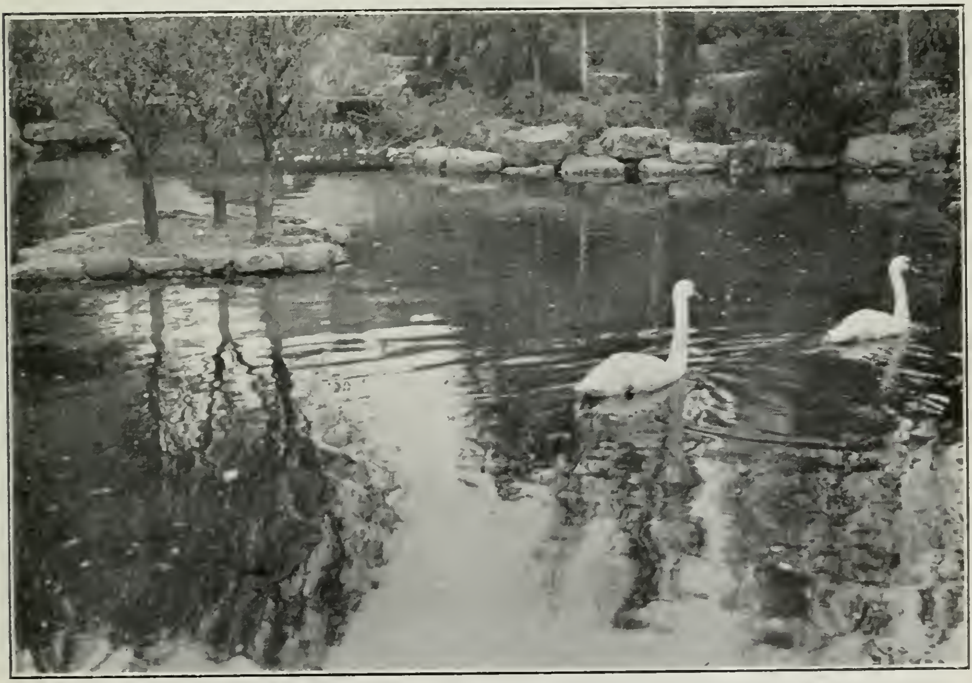
REALTY PURCHASES

Most important realty transaction during the year was the formal taking over by the Niagara Parks Commission of the non-utilitarian portions of the Rainbow Bridge plaza and grounds, which had been laid out to form a direct link with the Oakes Garden Theatre. These cover what, when the "Honeymoon Bridge" was in existence, was the open area north of the bridge entrance connecting with highways other than the River Road, and the open space below the newly constructed bus terminal building. The area also includes the traffic circles which protect the entrance to the new bridge from the Queen Elizabeth Way. The lands covered by these garden developments will be transferred to the Niagara Parks Commission. Since the gardens developed on these areas were in full keeping with the Oakes Garden Theatre, the transfer placed in the hands of the Niagara Parks Commission the whole area developed with a single theme and forming a most attractive entrance to the Dominion from the United States.

The Stockdale property was another important realty purchase. Mrs. Frances Stockdale had died on June 4, aged 80 years, she was born in the Township of Willoughby, a daughter of the Baker family, United Empire Loyalists.



General View of Both Falls From Oakes Garden Theatre



Swans in Oakes Garden Theatre

Her husband, the late Wallace John Stockdale, a former member of the Bertie Council, had predeceased her several years. The Stockdale home, of which she was the hostess for so many years, was long an historic spot, located four miles north of Fort Erie on the Niagara Parkway at Pleasant Point. It was at this location that William Lyon Mackenzie, grandfather of Canada's present Prime Minister William Lyon Mackenzie King embarked in a rowboat to cross Niagara River when escaping from Canada at the time of the 1837 Rebellion. The Stockdale family acquired the property in 1846, the old original log house was torn away about 1900 and replaced with the present one. The old farm also had historic links with the war of 1812 and with the Fenian Raid.

The Taggert property on the River Road, Lot 22, Niagara Township was also purchased.

Steps were taken for the expropriation of the property owned by C. W. Dean, of approximately 188 feet frontage on the boulevard adjoining the Taggert property on the south.

Other properties purchased for protection of river rights and the Commission's other properties included the Freel property, one acre adjoining the Taggert property on the north, and the Brodrick property, adjacent to the Freel property, consisting of five acres on the east side of the River Road and approximately 43 acres on the west side.

The Blew property north of Hiram Avenue in Niagara Falls was also purchased. This has a frontage of 75 feet and is next to Lots 6 and 7 already owned by the Commission.

Another property purchase was the Longhurst property on the east side of the Niagara Boulevard adjacent to Paradise Grove, Niagara-on-the-Lake.

Mather Properties Taken Over

The will of the late Alonzo Mather received probate in the United States during the year, and the Circuit Court of Cook County, at Chicago, Ill., gave approval to an agreement between the Buffalo and Fort Erie Public Bridge Authority and the Niagara Parks Commission, by which $250,000 from the Alonzo Mather estate was turned over to those two bodies, to be spent for the addition of a modern lighting system at the Peace Bridge, linking Fort Erie and Buffalo, the erection of memorial plaques on the bridge, and the landscaping and improving of the Mather Park lands, (situated at the Canadian terminal of the Peace Bridge) as well as the construction of a memorial building at the Canadian exit of the bridge. Originally Mr. Mather had visualized the construction of a gallery of busts and tablets as a memorial to the great men of the Dominion and of the United States, with the idea of bringing closer together the peoples of the two great English-speaking races. However, it had been found impractical to carry out this scheme, and the executors of the estate approved of the above.

Following the acceptance by the U.S. Court of the agreement mentioned above, the Niagara Parks Commission took over all the Mather holdings in Fort Erie, including the Mather Arms Hotel, a number of dwellings built several years before to assist in solving a keen housing shortage, and vacant property, as the Commission's share of the Mather will bequest plus a cash settlement. Mather Park had already been established at the Canadian end of the bridge,

Rainbow Gardens and Canadian end of Bridge

Submerged Weir Construction—General View Showing Towers and Cableway and considerable construction had been achieved, and resumption of this work will be made financially possible by the Mather bequest as a post-war reconstruction project, with the moneys available at that time.

The Commission realized as promptly as possible on the realty holdings of the estate on the Canadian side, where such did not fit into the park pattern.

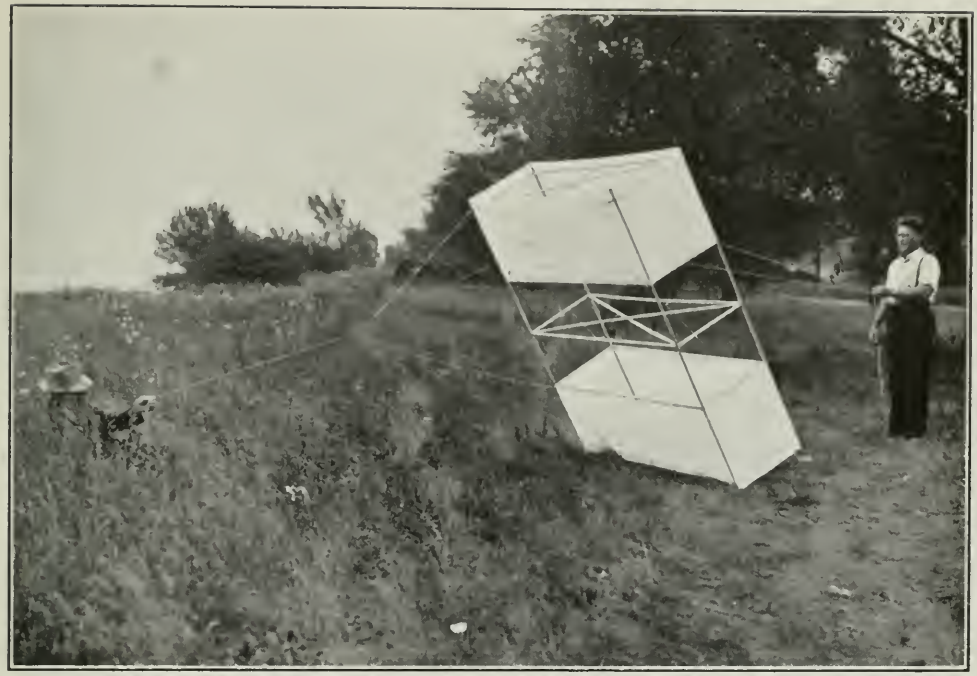
Alonzo C. Mather was a wealthy inventor and manufacturer in Chicago. Over 40 years before his death, he prepared plans and was ready to finance the cost of a bridge between Buffalo and Fort Erie almost on the location where the Peace Bridge now stands. After endless negotiations he reached an impasse—he could not get a terminus on the American side because the U.S. War Department would not sell any part of the Fort Porter area. In the meantime, however, he acquired considerable acreage on the Canadian side for a terminus, envisaging Fort Erie as a large industrial centre opposite Buffalo. Several years before his death, he had conveyed considerable acreage in the Peace Bridge area, fronting on Lake Erie and the Niagara River, and contributed $35,000 to the Niagara Parks Commission for erection of what is known as the Mather Arch in Mather Park and the laying out of Mather Park, at the confluence of Lake Erie and the Niagara River. The arch, the gardens, the traffic circles, the seawall and the park extend from the confluence to the grounds of the Old Fort, Fort Erie, and mark with Old Fort Erie itself the beginning of the parkways and parks system under the Niagara Parks Commission, a fitting start for the extensive chain which ends at Fort Mississauga on Lake Ontario, and includes the Falls, Queen Victoria Park, the Oakes Garden Theatre, the Rainbow Gardens, the Niagara Glen, the School for Apprentice Gardeners, the Queenston Heights area, the old Navy Hall and Customs House, and reconstructed Fort George.

At this point it might be appropriately mentioned that the pedestrian lane of the Rainbow Bridge at Niagara Falls may possibly become known as "The Promenade of International Fraternity". General Manager C. Ellison Kaumeyer, formerly general manager for the Niagara Parks Commission gives as reason for the assumption that dozens of fraternal organizations are inquiring about placing plaques to represent their groups on the panels along the pedestrian lane. Already the International Kiwanis and the International Association of Advertising and Sales Clubs have placed plaques on the bridge. Because of the war the actual placement is delayed but there is no doubt that when metal shortages are no longer felt there will be a widening of interest in the plan to mark international friendship by such means as outlined.

"Go Fly a Kite"

One of the interesting developments on the Niagara Parks system during the current year was the construction of a barrier in the upper reaches of the Niagara River above the rapids, by the Ontario Hydro Electric Power Commission, to divert a greater share of the water so that plants on the U.S. side would obtain the water to which the United States was entitled, to improve the appearance of the Horseshoe Falls, where the river bed was retreating each year to a great degree compared with the almost unnoticeable erosion at the edges of the great cataract. Permission was granted by your Commission for this work to proceed.

But let the O.H.E.P.C. "Hydro News" tell the story as it did under the heading of "Go Fly a Kite".



The Kite used to carry the first thin wire from Canadian shore to artificial island at U.S. end of submerged weir

Portion of Niagara Boulevard

In unvarnished vernacular, the phrase "Go fly a kite" frequently implies sentiments not in keeping with literal interpretation. These four words, however, crystallized an idea which facilitated the erection of a steel cableway, spanning a half-mile gap on the Niagara River at the brink of the rapids leading to the great Falls where a submerged rock weir is now under construction.

Confronted with the problem of getting the first line across the river at this point, construction men on both the Canadian and United States sides of the International boundary gave much thought to the method which might be adopted. Direct crossing by a vessel was out of the question because of the swift current and the close proximity of the rapids. Towing a line across would have involved taking it nearly a mile upstream from the cableway tower on the American side and then bringing the end of the line down the Canadian shore and past numerous land obstacles. There was also the possibility of the line being fouled by boulders in the river. Power lines and other obstacles precluded the possibility of using a plane, auto gyro or dirigible, while balloons were unobtainable. At the same time, the distance between the Canadian and United States cable towers was too great to come within range of a rocket gun.

Valuable Information Unfolded

To surmount the various difficulties the possibility of using a kite was suggested as the most simple and economical method of getting the first line across the gap. An investigation was immediately started and after a good deal of hunting much valuable information was unfolded on the history, eccentricities and functions of the kite. This research work revealed data on experiments which had been made with large kites and, from this knowledge, it appeared that the "Go fly a kite" idea might succeed.

The first job was the designing and building of a kite which would serve the purpose. And so, overnight, Hydro construction men at DeCew Falls Development became first-class kite makers and produced a box-type, wind-power exhibit which would have brought joy to the heart of the most critical schoolboy enthusiast.

Measuring 7 feet 6 inches in height by 6 feet in width and 2 feet 6 inches in depth, it comprised a basswood frame and all the nainsook obtainable in St. Catharines for the lifting surfaces. The controlling line was 1/32 inch piano wire—6,000 feet of it—while there were approximately 2,000 feet of trailing line terminating in a float and marked by coloured streamers.

As part of the cableway, two 155-foot steel towers had been erected—one on the Canadian bank between Chippawa and Niagara Falls, and the other on an artificial island built on the United States side of the International boundary half a mile away.

Waited for Favourable Wind

Everything was in readiness for the experiment. Then came several days of waiting for a favourable wind. When the day finally arrived, the men quickly took up their appointed positions. Because of the direction of the wind, the kite was sent aloft from a truck 2,000 feet downstream from the tower on the Canadian side.

Many pairs of eyes watched expectantly as it soared and swayed in the breeze, the fine wire, almost invisible from the ground, hanging in a deep curve

Queenston Restaurant and Brock's Monument

Navy Hall, Niagara-on-the-Lake

with its lowest point only a matter of a few feet above the swift waters of the river.

Unexpected success was attained in the very first venture, the wire being carried from the shore across the gap without mishap. The water splashes from the tossing float and the coloured streamers enabled the waiting men on the island to follow the course of the fine wire and catch the kite which was guided behind the tower and hauled down.

Next followed a sequence of tedious operations. First the fine piano wire was used to pull over another wire of greater diameter. The latter, in turn, was spliced to a light cable one-eighth of an inch thick which was used to bring over a quarter-inch cable. Eventually, a strong steel cable, two and a half inches in diameter, was pulled across to form the 2,605-foot cableway which is now linked to the two steel towers. Each of these towers, it is pointed out, runs on two standard gauge tracks seventy-five feet apart, and the carriages are powered by electric motors.

Located on the Canadian side, the head tower along with its hoisting equipment weighs approximately 210 tons and, in addition, carried 250 tons of counterweight, to balance the pull of the cables and their loads. The tall tower on the American side is the same size and weight, except for the hoist, and carries as much counterweight.

And so, the completion of this cableway was facilitated because Hydro construction men accepted the literal interpretation of "Go fly a kite."

The cableway between the towers is now constructed to provide the necessary transportation to permit the construction of the weir upon the bed of the river.

Rock Weir Submerged

The functions of the weir are manifold. It will restore to their former state the water levels lowered by the increased diversions permitted by International agreement. As a result of these larger diversions the Commission is able to generate an additional 135,000 horsepower in its plants, and the American plants are also able to generate a large amount of new wartime power. The weir will increase the level at the intake of the Queenston plant, augmenting the output of that plant further by approximately 15,000 horsepower. It will also effect a redistribution of the flow from side to side of the river, thus restoring the scenic beauty of the Falls.

By making the channel shallower than it is at present, the weir will cause the water level to rise upstream and redistribute the flow so that a greater quantity of water will pass down the river between the two ends of the weir and the Canadian and American shores. Preliminary construction operations indicate that, already, there has been an increase in levels.

Construction work commenced in April and, it is expected, that it will be substantially completed by the end of the present year. The first job undertaken was that of building a causeway in the river extending 2,200 feet upstream and the construction, at this point, (practically on the International boundary) of an artificial island where one of the towers of the cableway, which now spans the river, was erected, the other tower having been built on the Canadian shore. This cableway will remain in place for two or three years following completion of the weir for observation purposes, and in order that any necessary changes may be made. After the removal of the cableway towers, the causeway will be removed and the park lands, where the Canadian tower is located, restored to their original condition.

During the present construction operations, the cableway serves as a trackway to carry rock from the shore to points in the river where it is being deposited. The equipment is capable of carrying loads as great as 20 tons, but its normal working capacity is approximately 10 tons per load. Comparatively few men are required for the operation of the cableway itself, but a considerable staff is engaged in the preparation of the rock at the quarries and in transporting of that rock by trucks.

When completed, the weir will comprise a rock-fill on the bed of the river, approximately 2,000 feet in length, commencing at a point some 500 feet from the Canadian shore. The fill will have a top width of about 40 feet, and its height will range from 2 to possibly 10 feet, according to the depth of the river channel. The weir will consist of what is generally known as a rock-fill. This means that there will be no bonding material except as individual pieces of rock interlock with each other to form a stable structure. The pieces of rock deposited in the river range in weight up to 8 tons.

Illumination of the Falls

The illumination of the two great cataracts had been suspended for the duration, owing to the need for use of the power for war industrial purposes.

Early in 1942 Mayor George R. Inglis of Niagara Falls, Ont., Maxim T. Gray, General Manager of the Niagara Parks Commission, Mayor Ernest R. Mirrington, of Niagara Falls, N.Y., and Clarence Greenwald, Corporation Counsel of the latter city, were appointed a committee by the Niagara Falls Illumination Board, to wait on the Ontario Hydro Electric Power Commission, to submit a request that the illumination of the Falls be resumed during the summer months, commencing with May 24, the first Canadian summer holiday.

It was pointed out that the amount of power necessary to illuminate the battery of searchlights which formerly flooded the cataracts with white and coloured lights, was very small, and would not hinder the war effort. Mayor Inglis noted that large electric display signs, non-essential and in no way connected with the war effort, were still permitted to blaze nightly across the Province, but the lighting for the Falls, which created international goodwill and attracted American tourists whose funds helped Canadian war efforts, had been blacked out.

Following the hearing with the Commission, Hon. W. L. Houck, a member of the O.H.E.P.C. and of the Niagara Parks Commission, announced that it would be possible to allow the power to be used for illumination, and for the three summer months the Falls were again illuminated.

Report of the Horticultural Department

Superintendent of Horticulture John Oakes reported for his department as follows:

> The maintenance of grounds and the overhauling of grass-cutting equipment, etc., along with the propagation of bedding, flowering and decorative plants, were the chief activities of the Horticultural Department of Queen Victoria Park during the winter months.

Work commenced on the planting areas of the Oakes Garden Extension. Large lindens and maples with frozen balls were planted, in the early stages this work being done by the regular staff and later by temporary help. Difficulty was experienced in obtaining good labour, this, along with the apparent slow progress of the contractors, who likewise were having their difficulties, made the work very disheartening at times. As the season advanced rapidly and was of short duration, temporary planting had to be resorted to and some planting areas left until fall or the spring of 1943. One of the difficulties was the procuring of good loam for the planting areas, fourteen thousand bedding plants were used on this area. Further planting was done in the fall and the parterre was planted with violas and some of the beds with spring flowering bulbs.

Approximately ten thousand bedding plants were used in planting the parterre and flower beds in Oakes Garden Theatre, and approximately six thousand violas planted in the fall, along with spring flowering bulbs. No new bulbs were purchased this year, the flower beds being furnished with old bulbs from which we expect to have a good show in the spring of 1943.

Fifteen thousand bedding plants were planted in the flower beds of Queen Victoria Park and in the fall five thousand violas along with old stock spring flowering bulbs were planted in the beds.

Twenty-three hundred bedding plants were planted at Queenston Heights Park along with violas and flowering bulbs in the Fall.

Decorative plants, bedding plants and cut flowers were propagated and grown at the greenhouse and gardens. These were used to furnish the flower beds and to provide a continuous supply of decorative material for the Restaurants and Commissioners' Quarters. Chrysanthemums were grown and displayed at the Park Restaurant early in November and many people availed themselves of the opportunity to see this exhibit.

Approximately nine acres of lawn in Queen Victoria Park was sprayed with arsenate of lead as a means to check the infestation of the Japanese beetle.

Maintenance of the grounds will present many difficulties as the war continues and it is the hope and endeavour of the horticultural staff to keep the Park in such a shape that it will provide helpful rest and recreation during these trying times."

It is worthy of record that at the annual convention of the Ontario Parks Association held at Stratford, John Oakes was elected president of the organization, which will hold its 1943 convention at Niagara Falls.

Training School for Apprentice Gardeners

K. M. Broman, Superintendent of Arboriculture presented the following:

I beg to submit a report on the Training School for Apprentice Gardeners for the period January 1, 1942 to December 31, 1942.

The Christmas vacation ended on January 19, 1942 and the Apprentice Gardeners returned to the School. The second and third year apprentices attended lectures three and one-half days a week and had two evening lectures. The other two days of each week during January, February and part of March, they were at the Park greenhouses.

During January and part of February, when the weather was unfavourable for ouside work the students cleaned and sorted the brown bean seed. One thousand pounds of these brown beans were shipped over to Kew Gardens, England, 700 lbs. being sent February and the remaining 300 lbs. sent April 13, these were distributed to all the junior schools in England. Many very descriptive and interesting letters addressed to the Superintendent of Arboriculture throughout the summer were received from the headmasters and the students of these English Schools. The letters detailed the planting of the beans and reported the progress and growth and told how glad they were to receive such a gift from Canada.

Early in April grading operations were completed in the New Rose Garden and the first rose-bushes to be planted therein were set out on April 17. All the available roses, save the climbing ones, which require cedar posts, were planted before the season was over.

The Easter vacation from April 2 to April 7 was very much enjoyed by the apprentices at the Training School and they returned with renewed interest.

The incubator and brooder were used to advantage again this year. The incubator was set three times this season and in the approximity of 200 chicks were hatched. Many of this number were cockerels, and they proved to be quite indispensable during the dire meat shortage periods last fall. Crocks and water-glass were purchased this year for the purpose of preserving eggs which were quite plentiful during the summer.

The growing season was quite favourable at the School and we had excellent crops of raspberries, and such vegetables as carrots, onions, tomatoes, beets, soybeans, melons, squash and turnips. A good proportion of these vegetables such as the carrots, beets, turnips and onions were stored in the early fall to be used in the winter months. The young fruit trees in the vicinity of the herb garden were very prolific, considering their size and age, and the greater percentage of the peaches, plums and apricots were preserved and stored in the chef's cellar.

Wading Pool in Queenston Park

The Lower River from Balcony of Queenston Restaurant

The 1942 crops of brown beans and soybeans were harvested in October and during inclement weather were cleaned and sorted in the cellar and then stored in bags in the cold-storage room adjacent to the kitchen.

The sunflower crop harvested in November was partly cleaned and the seed sorted before the students left on their Christmas vacation.

During late August and September the task of digging and dividing the six hundred varieties of iris in the long borders adjacent to the Parkway in front of the School was commenced. New borders, of the same width on either side of the Parkway, were ploughed and prepared to receive the plants. This work was carried on until heavy rains saturated the grounds and the continuity of planting was impossible owing to the general freezing-up of the soil. This work will be completed next season.

Work in the Herb Garden was intensified this year with Roland Barnsley in charge. Barnsley graduated from the Training School in June, 1940, and was awarded a scholarship by the Commission enabling him to attend Queen's University, Kingston. He completed his second year in April, and started to work digging the beds in the Herb Garden on May 1. Planting of new herb seeds and their care and cultivation all summer long was accomplished by this 1940 graduate, and he was given an opportunity of applying his gardening knowledge to this project. Such oddities as the yard-long bean, the asparagus-bean, the vine peach, ground almonds, and vegetable spaghetti were also grown in the Herb Garden. Barnsley enjoyed this work and it proved quite educational to him as well as being a very worthwhile and profitable way in which to spend his summer vacation. During the summer the Herb Garden attracted many visitors and next year many new herbs will be introduced into it.

A greenhouse was purchased by the Niagara Parks Commission in September and next spring this will be reconstructed at the School and will enable the propagation of many different plants in the winter-time. It will prove of definite benefit at the School.

Student Activities

The students held a skating-party and dance on February 5 at the Training School and they had a very enjoyable time. During the summer they planned and executed two weiner-roasts, in honour of one or two of their number who were joining the armed forces.

Last February and early March, the apprentices played several games of hockey on their rink to the north-west of the school residence. They had some excellent work-outs and greatly enjoyed the fellowship of the sport.

During an afternoon in August, Mr. Albert Wilson, botanist from California, gave the students a very enlightening and interesting talk on the economic and ornamental plants of the state of California. He illustrated his address with coloured slides he had brought along for this purpose.

On September 2, Mr. Thatcher from Ottawa, accompanied by Mr. Gardner of the local Canadian Customs staff, came to the Training School and took some moving pictures of the students filing out of the Lecture Hall, standing in the new Rose Garden, and taking a lecture in the Herb Garden.

In addition to the seven students and graduates mentioned in last year's report, many more have enlisted in the fighting forces again this year.

Leonard G. Riley, our exchange student from Kew, who arrived at the School in July, 1939, taking a year's course at the School, enlisted in the R.C.A.F. on January 22, 1942, and went overseas in December.

James Waters, who graduated July 14, 1939, and spent a year at Kew from August, 1939 to August, 1940, as an exchange student, left the School to join the Air Force on April 9, 1942. After his return from England, he was re-employed by the Niagara Parks Commission as foreman at the Training School.

William Holmes, a graduate of 1939, left the employ of the Commission and enlisted in the Canadian Army in June, 1942.

Hugh McCracken, also a graduate of 1939, left the employ of the Niagara Parks Commission and enlisted in the R.C.A.F., August 1942.

Ray Halward, a graduate of 1939, was in the employ of the Niagara Parks Commission until February, 1943, when he enlisted in the R.C.A.F.

George Stansberry, who enrolled at the School on October 2, 1939 and graduated in September, 1942, joined the Canadian Army in February 1943.

Apprentice James Marlow, who enrolled at the School on October 2, 1939, joined the R.C.A.F. in May, 1942. He was granted his diploma.

Apprentice Jack Kimmel, enrolling October 2, 1939, left the School to join the Canadian Army, June, 1942. He was also granted his diploma.

Apprentice Larry Boyce, who enrolled at the School October 1, 1941, left the School July 15, 1942 and enlisted in the Canadian Army.

Apprentice James Whitehead, who enrolled at the School October 1, 1941, enlisted in the Canadian Army in September, 1942.

Apprentice John Cockerill, who enrolled at the School on October 1, 1940, enlisted in the Canadian Army in September, 1942.

Apprentice Conrad Eidt, who enrolled at the School on October 1, 1941, enlisted in the R.C.A.F. in February, 1943.

The following graduates of June, 1940 are now in the Armed Forces: Stewart Lawlor, John McHardy and Dean Robertson in the Canadian Army; William Love and John Ness in the R.C.A.F.

Conclusion

During the summer and fall of 1942, raspberries, cherries, raspberry jam, tomatoes, beets tomato juice, peach and grape jam were preserved. Altogether there were approximately 1,420 quarts of preserved material stored in the chef's cellar, at the end of the canning season. As mentioned in a previous report the preservation of these fruits and conserves is of great necessity especially during our present trying times, and helps to decrease the cost of boarding the apprentices at the School.

Publicity for School

As an addenda to Mr. Broman's report, it might be noted that a graduation dinner was held at the School on December 14, 1942, at which George Stansberry who graduated and left the school on September 12, was present, having travelled 3,000 miles from the Pacific Coast for the event.

The School, only one of its kind in North America, continued to draw much favourable publicity. As an example, the following partial reprint from the Hamilton Spectator of September 19, 1942, will prove of interest:

> "It is doubtful if very many Hamiltonians, or very many residents of Ontario, are aware of the work in which Mr. Broman is engaged at Niagara Falls, but it occupies a very important place and will likely become more widely known in the years to come. The Niagara Parks Commission, which has set an example for all Ontario in beautification by its magnificent gardens at Niagara Falls, established the school for gardeners at Niagara Falls, of which Mr. Broman is superintendent, and the site, which is located near Niagara Glen, a few miles down the Niagara Boulevard, is well worthy of a visit. Here young men are being trained to be gardeners. When their three-year course of practical demonstrations and lectures is completed, they will be equipped to go out into the world and not only make a living for themselves, but enhance the beauty of the surroundings by so doing. Many young men have enrolled, but the demands of war has thinned the ranks at present, but officials are looking forward to the day of peace and believe there will be a greater demand for such services."

Report of the Engineering Department

L. L. Gisborne, works superintendent, reported on the activities of the engineering department for the fiscal year as follows:

Queenston

During the 1942 season the Queenston gate and stone work was moved to its new foundation, and stone steps leading to the flagstone path at the restaurant were installed. Stone benches were also purchased and placed around the fountain in front of the restaurant, completing the structural landscaping at this point. A new stone wall was built opposite the gate on the hill side, and the caretaker's house on Queenston Hill was redecorated and repairs made to plumbing, making the house habitable for the new tenant.

Queen Victoria Park

The heating boiler at the Administration Building was converted from oil burning to coal at the request of the Oil Controller.

A new main electric switch was installed at the Park Restaurant, replacing the old one now inadequate for the increased load. New stairs were built leading from the kitchen to the ice machine room. Two new refrigerator machines were installed to take care of extra refrigeration in the kitchen, soft drink bar and drinking water coolers. The Commissioners' rooms were completely repapered and painted and covers installed on the radiators. The main ice machine was converted to a short multiple belt drive and a new brine tank installed; this increased by 25% the available space in the room for other purposes. Male help bedrooms and hall were repainted and alterations made in the cafeteria for increased convenience of operation. The cafeteria was completely redecorated and the storage space back of the main dining room steps was converted into an auxiliary kitchen and bar for the selling of hot dogs.

Shelving and cabinets were made and installed in the new basement room of the Clifton Gate Store.

Extensive repairs were made to the parapet wall railing, more than one hundred panels being replaced.

During April due to a disturbance in the hydro system the main feeder cable to the park was destroyed. A new cable was installed and part of the feeder to Table Rock House had to be renewed.

The interior of the pavilion at Old Fort Erie was decorated and all rooms tinted.

An ornamental iron grill was erected at the extension of Oakes Garden Theatre on Falls Avenue.

Extensive repairs were made to the Incline Railway electric motor and cars.

On January 21, a start was made on the Mather Park sea wall and to date 650 feet of the wall have been completed.

At the completion of the permanent customs house on the Rainbow Bridge the old temporary building was given to the Park Commission, this was cut in three and taken into Queen Victoria Park. Part will be used as an addition to the carpenters' shop, part for a new potting shed at the green-houses and part as an addition to the stores.

Maintenance repairs on 35 miles of boulevard pavement, guard rails, etc., from Fort George to Fort Erie, and general maintenance of greenhouses, heating systems, water lines, drainage and lighting were continuous.

Entertainment

Owing to the conditions created by the war, entertainment during the season was greatly limited. Each weekend while the Park Restaurant was open, a group of airmen from Manning Pool, Toronto, was entertained to evening dinner at the restaurant. Many of the Canadians in airforce blue had never before visited the Falls, coming from widely scattered sections of the Dominion, while others included men from Australia and New Zealand and other far-flung parts of the British Commonwealth of Nations, and the hospitality of the Niagara Parks Commission was acclaimed by all who were members of the parties. The groupings were selected by the Air Force Manning Pool command. The Air Force records show that in all, 440 English, Scottish, Welsh and Irish members of the R.A.F., 87 Australians, 9 South Africans, 120 New Zealanders (13 being Maoris), 25 South Americans, 39 U.S. Americans, 102 Colonials, and 927 Canadians visited Niagara Falls, not all being Commission guests.

President Batista of Cuba was among the distinguished visitors to the Niagara Parks area during the year. His visit was without advance notification and he spent but an hour or so on the Canadian side.

President Manual Prado of Peru paid a brief visit to the Niagara Parks area on May 13, 1942, remaining but thirty minutes on the Canadian side of the boundary. In company of officials from Buffalo and Niagara Falls, N.Y., he crossed the international boundary via the Rainbow Bridge, inspected Queen Victoria Park and Oakes Garden Theatre, then ablaze with spring flowers, and the construction of the Rainbow Bridge plaza, before returning to the United States. Owing to the shortness of the stay, which was without advance notification, the Niagara Parks Commission did not officially participate in extending Canadian hospitality.

Just half as long was the time spent by King Peter of Yugoslavia, one of the United Nations fighting against the Axis, on July 2, on which date the youthful ruler spent fifteen minutes on the Canadian side to obtain a view of the majesty of the Falls of Niagara. The youthful ruler was welcomed by Mayor George R. Inglis of the City of Niagara Falls, who extended an invitation to the King to return to the Falls for his honeymoon. He had been accompanied by Mayor Joseph Kelly of Buffalo and prominent Yugoslavs of the United

States. Their cars proceeded through Queen Victoria Park to the Military barricades, where the King and his entourage alighted and walked to the top of the bank to view the panorama of the falling waters.

The Sea Cadets Band from Winnipeg was entertained for meals for two days at the Park Restaurant, and presented two concerts while in Niagara Falls.

Arrangements were made for the entertainment by the Commission of Air Marshal Bowhill of the British Atlantic Ferry Command, and Lady Bowhill, and party. Unfortunately, at the last moment, Marshal Bowhill was detained in Toronto, but the balance of the party arrived as the Commission's guests.

Members of the executive of the Ontario Parks Association were given the use of the Commissioners' Quarters for two meetings. The 1943 convention of the Association is to be held in Niagara Falls.

Dr. Gustavo Cuervo Rubio, Vice-President of Cuba, with Mrs. Rubio and their son, visited the Falls on July 24 and were entertained by the Commission at the Park Restaurant. They were accompanied by Dr. Rubio's secretary Mr. Carlos A. Mendiola and Mrs. Mendiola.

Gifts, Loans and Purchases

A loan of many relics of historical significance from the estate of the late Mary Elizabeth Olivia Josephine Servoss-Snider of Palatine Hill was arranged through the kindness of her executor and nephew, Mr. Herbert Aikins of Toronto. Of exceptional interest are an 18th century pianoforte, an ammunition chest captured from the Americans at the Battle of Stoney Creek, spinning wheels, candle sticks, snuffers and holders, a military writing chest, old deeds and coins, swords, muskets, bayonets and officers' commissions of the War of 1812, old maps and flags, military uniforms and other articles too numerous to mention. The Commission has agreed to exhibit the said collection as the "Servoss Collection" and to display the same "in its museum, or museums, which it at present maintains or may establish."

In addition to the above loan a number of historical items were purchased outright from the Servoss-Snider estate. Acquired in this manner were four antique Windsor chairs believed to have been used at the opening session of the First Parliament of Upper Canada, held at Niagara in 1792; an early 19th century grandfather clock, with wooden works; fifteen pieces of antique pewter and copper ware; a tea-caddy dated 1773; several interesting pieces of Colonial furniture and the complete machinery from the old grist mill located on the Servoss farm. Preparations are at present under way for the exhibition of the Servoss collection in the Commission's buildings at Old Fort George.

The following were given to the Commission by Mrs. R. R. Wallace of Hamilton; one great horn spoon, formerly the property of Sitting Bull; one percussion cap rifle with bayonet, used in the Crimean War; one sabre used at the Battle of Waterloo. A flintlock pistol, carried by his grandfather in the Peninsula Campaign, was the gift of Mr. James Leslie of Hamilton.

The Town of Niagara-on-the-Lake loaned to the Commission some old fire equipment; namely, one hand pump, dated 1763; one hand gang pump, dated 1834; one ladder wagon and one hose wagon. A hose reel was also loaned by the Town of Niagara-on-the-Lake.

James H. Beale, Hamilton, presented four pictures, "The Life of a Fireman", now of historic value, which were hung at Fort George.

WIFE OF COMMISSIONER PASSES

Mrs. Snyder, wife of Dr. George B. Snyder, Vice-Chairman of the Commission, passed on November 11, 1942, and the Commission passed the following resolution:

"That the Niagara Parks Commission has heard with great regret of the death of Mrs. George B. Snyder, wife of Dr. George B. Snyder, Vice-Chairman of the Commission, and desires to record its respect and admiration for the patience and fortitude with which she bore a long and painful illness and for her courage and cheerfulness to the end. The Commission extends its heartfelt sympathy to the Vice-Chairman, in his great bereavement, and the earnest expectation and hope that the memory of a lifetime's affectionate loyalty and his unremitting care and devotion to his wife, in her last illness, may assuage his sorrows and sweeten the memory of their married years. The Commission also desires to extend its sympathy to the Vice-Chairman's son, George Snyder, Junior, and to his grandchildren, and that a copy of this resolution be sent to Dr. Snyder and his son."

Members of the Commission acted as honorary pallbearers at the funeral services held at the home on Victoria Avenue, Niagara Falls.

COMMISSIONER'S FATHER PASSES

The death took place on December 6, 1942, of Mr. Webster George Haines, father of Commissioner Archie Haines, and at its next meeting, the Commission approved the following resolution:

"Resolved, that the Niagara Parks Commission conveys to Mr. Archie Haines, Jordan, the sincere sympathy of its members in the bereavement sustained by him in the death of his father, Webster George Haines, after 87 years of activities which had a vital effect in the district in which he so long resided, and in which he won general and well-deserved esteem. To our colleague we extend our sincere sympathy in the loss of one who had for so many years been an inspiration. To his mother, also, we extend our sympathy in the loss of her helpmate, but assured that she will look confidently for a reunion in the Great Beyond. And that copies of this resolution be sent to Mrs. W. G. Haines and to Mr. Archie Haines."

POLICY ON ACCESS ROADS

The question of access roads is one which has been repeatedly before the Commission. During the year a special committee was named to review the situation and report thereon to the Commission.

The Committee, consisting of Hon. W. L. Houck, Dr. Snyder and A. T. Whitaker, met and drove over the boulevard to inspect the general situation and with particular regard to five applications on file, for access to the boulevard.

The first application was from Wm. Anthor. Mr. Anthor has purchased a property fronting on the old road which goes around the Shipyards and having, also, a frontage on the boulevard. He was asking for permission to construct a driveway across the grass strip from the old travelled road to his lot. The Commission was in favour of granting permission for this.

The second application was from Mr. A. R. McGlashan, of the Fort Erie Dock Company, Fort Erie, Ont. Mr. McGlashan owns 22 acres on the boulevard, between the Shipyards and Fort Erie. He has a frontage of approximately 300 feet. The Committee recommended that Mr. McGlashan make his own arrangements regarding getting access to an existing driveway, which is approximately 160′ south of his property, or to the existing service road, which is approximately 320′ north of his property, and, in the event of the applicant being able to get a grant to the Commission of a 30-foot strip across either one of these intervening properties, the Commission would build a service road thereon.

The third application was from L. Burns and S. Dell, who own property fronting on the boulevard and also fronting on a township road allowance. The two dwellings, for which they were asking access, are located approximately 200′ back from the boulevard line and, in this particular case, it would not be practical to construct a service road paralleling and immediately adjacent to the boulevard, out to the township road allowance, as these people suggest. The reason for this is that the location happens to be in the middle of a natural water course. The Committee recommended that a road be constructed for these people, out to the township road allowance, but located back about 150′ from the boulevard on high ground.

The last two applications were from Mr. Bradley and Mr. Crick. These applications had been considered before. Mr. Bradley and Mr. Crick have each a dwelling, side by side, and the Committee, as a whole, could come to no decision as to what to do about providing access to the boulevard for these people. The question of the appearance of these places arose as they are not at all presentable, although it was also pointed out that some other places located on the boulevard are not in any better shape. It was thought if Messrs. Bradley and Crick could present plans for permanent homes, here, of a style of architecture satisfactory to the Commission, that something could be done and it was also pointed out that they could, "on their own hook," purchase a right-of-way from the owner to the south and reach the boulevard in that way. The other means of access would be to construct a service road from these properties, northerly, approximately 700′ to the Miller driveway. Arrangements for transfer of the necessary 30′ right-of-way to the Commission would have to be made by the applicants. The Committee recommended that nothing be done until such action is taken.

The matter of future policy in connection with providing access for homes on the boulevard was discussed. As regards this, the Commission has been building service roads to serve homes on the boulevard for several years. The owner deeds to the Commission a 30-foot strip and on this the Commission constructs and maintains a roadway. The Committee recommended that access to the boulevard should be made at intervals not less than 1500′ between each access, except, of course, where there is already an existing driveway, and the Committee also recommended that one of the conditions should be that new homes should not be constructed fronting the boulevard so that the front of the dwelling is at a closer distance than 75′ from the inside line of the 30′ service road, and that the minimum value for residences be set at $3,000 and a plan showing type of residence and placement of buildings be presented to the Commission for approval.

Permission granted in any case is to be by agreement with the parties, terminable at notice from this Commission.

The report was approved by the Commission, with the added suggestion that the General Manager have an agreement drawn up specifying that "it was the Commission's decision that in the future there will be no granting of access roads or driveways from the Commission except in conformity with a bylaw to be prepared and form part of the Commission's Regulations and Bylaws."

THE NIAGARA PARKS COMMISSION AREA

Past reports of the Niagara Parks Commission have given in detail the story of the gradual extension of the area under its care, the historic spots of which it is the custodian, the monuments and markers which are its care, the reconstruction work which it has carried out. There may be some persons, however, who have not perused these reports, issued year by year, to whom a comprehensive and not too lengthy resumé of the Niagara Parks system may be enlightening. Let the story therefore be retold as printed by the Times-Review, Fort Erie, in its edition of May 21, though without the illustrations which made more enlightening the story of the points mentioned:

> "The Niagara Parks combine romance and history with the handiwork of Nature and man at its best. Consisting of 35 miles of magnificent parklands bordering the Niagara River and including internationally famed gardens, rare floral displays, ancient fortifications, old battle fields and historic sites of interest and significance to the people of North America, the parkway is visited annually by thousands.
>
> Commencing at the southern limit of the parkway, Old Fort Erie, where the heroes of two nations strove during the War of 1812, a splendid highway, widely known as the Niagara Boulevard, follows the entire length of the turbulent Niagara River to quaint Niagara-on-the-Lake, once a cockpit for much Northern American warfare and a settlement with a history reaching back to the days of La Salle.
>
> As the visitor follows the progress of the river current almost due north from Lake Erie to Lake Ontario, Nature's panorama is unfolded along the boulevard in a manner that thrills and inspires thousands of people annually from every quarter of the earth. Although the natural surroundings of the Niagara Parks are in themselves superb, man, promoted by his environment, has used his utmost skill and wiles in building according to the magnificent plan and in coaxing from Nature newer miracles of harmony and color.
>
> Where once the Redmen portaged from lake to lake; where once the white men fought one another over their idea of a cause, man's best art has combined with Nature to erase long-forgotten scars, yet to preserve for the present and the future the heroic lessons of the past.
>
> The Niagara Parks, Canada, form not only one of the outstanding pleasure-places of the world but are also a widespread and lasting symbol of faith and friendship mutually held by two great nations and good neighbours.
>
> #### Beautiful Flowers
>
> Rivalling the majesty of the Falls is the floral beauty of the Niagara Parks, where the many exquisite displays, especially in Queen Victoria Park, alongside the Falls, make a veritable paradise of bloom. Each successive display during the floral season invites a repetition of your visit. Those who live within convenient motoring distance come again and again to carry away a lasting memory of all that is beautiful.
>
> The tulips are at their best with a display of thousands about May 15 to May 28. Lilacs, 500 varieties of them, are in bloom from May 15 until June 5, at Victoria Park and the Niagara Glen. From the 24th of May until June 5 a beautiful garden of 500 varieties of iris may be seen at the Training School for Apprentice Gardeners.
>
> Peonies are at their glorious best between June 10 and June 20, and roses follow them until July 5. Late in May and early in June rhododendrons are seen in Victoria Park, and at the Oakes Garden Theatre, where many varieties of annuals, perennials and bulbs bloom from spring until fall.
>
> The dahlias, hundreds of varieties, bloom in September in the rear of the rose garden at Victoria Park. The rock garden near the Administration Building and the Japanese Rock Garden in Oakes Garden Theatre are worth seeing any time.
>
> #### Historic Spots
>
> Starting at the Peace Bridge, opened by the Prince of Wales in 1927, and symbolizing in a practical manner the friendship existing between two great nations, the Niagara Parkway leads through Mather Park, with its beautiful gateway, to Old Fort Erie.

Along the Niagara Boulevard the visitor will see Navy Island, once a British navy-yard, and for a period the headquarters of William Lyon Mackenzie, and the scenic river country until he reaches Chippawa Village, once a busy shipping and lumbering centre, now the site of the Ontario Hydro-Electric Power development plant, closely guarded by armed soldiers.

Nestled in an elbow of the Niagara River at the crest of the Upper Rapids are the beautiful Dufferin Islands. Then the river drops 51 feet, with a mile of surging rapids. Countless visitors ask the meaning of the black object that lies in the midst of the boiling water. It is a huge steel scow, sunk there in 1918, when a tow line connecting it to a tug snapped, and two men aboard the scow escaped death in a breeches buoy rescue.

At Niagara Falls itself, parks and restaurants, gardens and souvenir spots, the Rainbow Bridge, Oakes Garden Theatre, the Whirlpool Rapids Bridge and Niagara Glen all attract the visitor. The Training School for Apprentice Gardeners, the only institution of its kind in Canada, is located a few miles north just off the Niagara Parkway.

Farther down the river at Queenston Heights are found the towering Brock Monument, the Restaurant, Mackenzie House, Laura Secord's Monument. Here a steamer may be boarded for a trip to Niagara-on-the-Lake or across to Toronto."

The Story of Old Fort at Fort Erie

The Times-Review then gave this synopsis of the story of the Old Fort at Fort Erie, as prepared by Ronald Way, historian for the Commission:

On the brow of a slight promontory overlooking the point where the Niagara River disgorges from Lake Erie is the Old Fort from which the town of Fort Erie, Ontario, derives its name. Few sites throughout the province have had a longer or more eventful history. This was the first land in what is now Ontario to be acquired by treaty from the Indians. Here in the wilderness, almost two centuries ago, were established the first British military post and a wharf for the navigation of the upper lakes under sail. The present Fort Erie, the third fort to occupy the site, was erected just prior to and during the troubled days of 1812 to 1814 when the United States and Canada were at war. Captured by the Americans, in turn besieged by the British, the Old Fort was the scene of one of the most desperate struggles along the Niagara frontier. The war ended a hundred and twenty-seven years ago. Today Americans share with Canadians equal veneration for this place, consecrated with the best blood of their respective nations.

The summer of 1764 saw the British, under General Bradstreet, organizing a retaliatory expedition against the western Indians in revenge for the conspiracy of Pontiac. Bradstreet arrived at Fort Niagara in July, 1764, and on the 7th of that month he ordered his chief engineer officer, Captain Montresor, to proceed to the outlet of Lake Erie and select a proper place for fortifications. Montresor reached Lake Erie the next evening and after a day spent in exploration finally located the site of the first Fort Erie on the west bank of the Niagara just above the present town. He described its location as "on the northwest side just at the discharge." On July 10 he reported to Bradstreet, who approved of the site, and a week later Montresor set out with 500 men to build the new post. This first Fort Erie was a rectangular enclosure composed of four bastions with connecting walls or curtains, as they were called. Adjacent to the lake the two demi-bastions with their curtains were of rubble masonry of moderate height. The remaining bastions and curtains consisted merely of upright timbers in the form of a loopholed stockade. There was no ditch of any kind. Log barracks, officers' quarters and a large storehouse were built within the enclosure, and ground was levelled for a parade.

The story of Fort Erie for the next 50 years is closely linked with the navigation of the lake. This was carried on for the most part by vessels belonging to the government, known as "king's ships," which transported merchandise, troops and passengers up the lake to Detroit and Michilimackinac and brought back furs. The fort afforded a place to lay up these vessels for the winter as well as a trading post. Its early history was prosaic and has left few traces in the writings of travellers.

First Fort

The first Fort Erie stood for nearly 15 years when, in March, 1799, a furious storm drove great masses of ice ashore, flooding most of the fort and making breaches in the curtain facing the river. What remained of walls and palisades was so shaken that it was considered necessary to rebuild the fort in a different manner, with stone and mortar. The second Fort Erie was located somewhat farther south, being built by detachments of British regiments. The Duke of Liancourt in 1795 described the place as consisting of "some houses roughly formed of wood, and surrounded with tottering palisades. It has neither a rampart, a covert-way, nor any other works. The buildings, which are all of them block-houses, are inhabited by the officers, soldiers, and a commissary of provision. Without the precincts of the fort stand four similar houses destined for the habitation of the workmen, and a large magazine or storehouse belonging to the king. The upper story juts out beyond the ground floor, so that all who should attempt to approach the storehouse might be easily kept off with firelocks by means of openings made in the upper story. This fort is to be considered merely as a point of defence against the Indians for the British trade on the lake, at the extremity of which it stands."

The second Fort Erie withstood the assaults of wind and weather for almost a quarter of a century until on February 5, 1803, another notable storm breached its walls and filled the interior with masses of ice and water. In July of that year, Colonel Gother Mann, who commanded the Royal Engineers of Canada, inspected the post. He reported to Lieutenant-Colonel Hunter that the existing Fort was extremely defective in position and recommended that a new Fort of permanent nature should be constructed upon rising ground immediately in rear of the old position.

Old Fort Erie

The new fort proposed by Colonel Mann was to consist of four bastions connected with curtains in the form of a simple square, with all works and buildings constructed of solid masonry. Colonel Mann's recommendations were forwarded to the Master-General of the Ordnance, and on January 9, 1804, Lord Hobart authorized Colonel Hunter to direct that the proposed works be commenced and carried on gradually as circumstances might render expedient.

The work was proceeded with intermittently, and when the war broke out in 1812 the fort was not nearly completed. On July 3, 1814, Fort Erie was attacked by 4,500 Americans under General Brown. In the British garrison were only 170 men and after a few shots Major Buck, the British commander, surrendered.

The Americans strengthened the fort and under the direction of their engineers prepared an extensive enclosed camp. On August 14, 1814, the British under Lieutenant-Colonel Drummond made a valiant but futile assault on the fort. At one time during the battle the British actually entered and occupied the northeast bastion but the accidental explosion of a store of powder destroyed the British almost to a man. In November the Americans recrossed the river and abandoned the fort. Before leaving, however, the buildings were extensively mined and the fort was almost completely blown up. In 1825 a commission sent out by Lord Wellington reported "the remains of an old fort, and a range of barracks perfectly in ruins and abandoned."

Fort Restored

The work of restoration was begun in the spring of 1937 under a joint scheme sponsored by the Ontario and Dominion governments, and was completed July 1, 1939, when the fort was officially opened. Although Fort Erie today has the appearance of an impressive fortress bristling with mounted cannon and defended by glacis, ditch, drawbridge, sallyport, ravelin, bastions and all the paraphernalia of early 19th cetnury fortification, it is no more than a national monument and a museum. It is not in any way a renewed citadel nor intended to be one, and its guns, strictly appropriate to their period, are as useless as Roman catapults for or against modern attack. The barrack buildings which once sheltered British and American regiments now serve only to house instructive collections of antique weapons, and to show how soldiers of more than a century ago lived and toiled.

The museum proper displays separate and specialized collections, including some three thousand buttons, regimental badges, buckles, even the leather of the shoes the soldiers wore, all excavated from the ruins of the fort during the restoration. Some of the most grim mementos of the siege are bayonets bent in fantastic shapes where they came in contact with the stone of the northeast bastion in the great explosion. In addition, there is much complete military equipment of the period, and a superlative collection of coloured military prints, once the property of Sir Henry Pellatt. The officers' quarters, some of the soldiers' barrack rooms, the guard-room and the kitchen are refurnished as they were lived in by the troops of 1812-14.

Thayendanegea House

A function that both direct and indirectly links with the Niagara Parks Commission's program of reconstruction and commemoration, which has been stressed in past annual reports of the Commission, was that at the opening of Thayendanegea House, at Burlington. But let a dispatch in the Toronto Star tell the story:

> Burlington, May 23—Thayendanegea House, commemorating the Indian chief of that name who was also known as Capt. Joseph Brant, was officially opened here yesterday in a downpour of rain. The handsome frame building is a reproduction of the original home in which the chief died 135 years ago.
>
> The provincial government erected the present building at the intersection of the Burlington cut off and the Lake Shore Rd. Thayendanegea chapter of the I.O.D.E., Burlington, arranged yesterday's ceremony.
>
> "This beautiful building should be more than an historical museum for relics," said Hon. T. B. McQuesten, Ontario minister of highways and Chairman of the Niagara Parks Commission, who was largely responsible for making the building an historical site.
>
> ### A National Shrine
>
> "It should be a national shrine to inspire us with the spirit of those who built this nation and it should help us to realize in these difficult days that we have a great tradition behind us," said Mr. McQuesten. He recalled days when he used to gather arrow heads in the district during summer visits, and told the gathering that the Ontario Government is particularly interested in retaining the lands along the shore of Lake Ontario and in Niagara, and developing them for historic value.
>
> T. A. Blakelock, M.P.P. for Halton, officially cut the ribbon and declared the building open. He delivered the key to Mrs. W. A. Weaver, regent of the Burlington chapter.
>
> "We should realize just how blessed we are in this district when we can meet for such a purpose in security without fear of bombs or attack," said Mr. Blakelock. "The work of restoration has been well worth while. The building will be an asset to this district and an inspiration to future generations of Canadians."
>
> A large assortment of arrow heads and other Indian relics, some of them formerly owned by the chief himself, are arranged in cases in the ground floor of the building. Spinning wheels, a model ship, and other exhibits form the beginning of a collection of historical objects in the other room.
>
> ### Historian Directed Job
>
> Ronald Way, historian for the Niagara Parks Commission and the provincial government, was largely responsible for the work of restoration. He had previously directed restoration work at Fort Henry, Kingston.
>
> Among those who spoke in praise of the work were: Mrs. Ryland New, provincial president of the I.O.D.E.; Hughes Cleaver, M.P. for Halton; Mayor J. Gordon Blair of Burlington, and Reeve Leslie Kerns of Nelson. Rev. G. W. Tebbs pronounced the invocation, and W. J. McCulloch, chairman of the gathering, outlined the history of Chief Brant.
>
> For his services throughout the American Revolution, the Mohawk chief was given the grant of 3,000 acres of land now comprising the west end of Burlington. He spent

the last few years of his life there and was buried in St. Luke's churchyard. In later years the body was removed to His Majesty's Chapel of the Mohawks, Brantford.

INDIRECT BUT VALUABLE PUBLICITY

Via the press and the radio, Niagara Falls receives great amounts of publicity, in direct and indirect form. Some examples of newpaper stories, all of which pointed interest to the Niagara Falls area, are given below, as of historic value which should be preserved for future historians seeking a background to the story of nature's greatest North American scenic wonder and to the historical spots in the Niagara Peninsula, most of them within the Niagara Parks Commission purview:

The Battle of Queenston Heights

Under the heading of "Old Favorites", The Family Herald and Weekly Star, Montreal, presented the following story of the song, "The Battle of Queenston Heights", a one time popular and familiar ballad, not known to many Canadians of the present day:

> This song was, of course, inspired by the death of the early Canadian hero, General Sir Isaac Brock, who was killed during the battle on Queenston Heights, October 13, 1812. In 1824, Upper Canada erected a monument to his memory, but it was destroyed by an explosion set by the Fenian, Lett, on Good Friday, April 17, 1840. The monument was rebuilt on a more impressive scale the same year. From the phrasing in the last stanza, the unknown writer was obviously unaware of the destruction of the monument, so it is fairly safe to assume that the song is more than a century old.

Upon the Heights of Queenston
    One dark October day,
Invading foes were marshalled
    In battle dread array:
Brave Brock looked up the rugged steep
    And planned a bold attack;
"No foreign flag shall float," said he,
    "Above the Union Jack."

His loyal-hearted soldiers
    Were ready every one.
Their foes were thrice their number,
    But duty must be done:
They started up the fire-swept hill
    With loud resounding cheers,
While Brock's inspiring voice rang out:
    "Push on, York Volunteers!"

But soon a fatal bullet
    Pierced through his manly breast,
And loving friends to help him
    Around the hero pressed;
"Push on," he said; "Do not mind me!"—
    And, ere the set of sun,
Canadians held the rugged steep,
    The victory was won.

Each true Canadian soldier
    Laments the death of Brock;
His country told its sorrow
    In monumental rock;
And if a foe should ere invade
    Our land in future years,
His dying words will guide us still:
    "Push on, brave Volunteers!"

Sheaffe's Path Found on Queenston Heights

Toronto Globe and Mail—"We have just passed the 129th anniversary of the battle on Queenston Heights on October 12, 1812. And I return to the query: Why have we no memorial to General Roger H. Sheaffe, who won the battle in the evening, having taken over command after the death of General Sir Isaac Brock at daybreak as he was leading his troops to battle, with the command "Follow on, York Volunteers," his last words.

There is a great monument on Queenston Heights to Brock and Macdonnell, who did not win the battle, because they were dead before it was won. There is a tablet in the Ontario Legislative Building in Queen's Park to Sir Gordon Drummond, who cleared the Americans out of Upper Canada in 1814. But Sheaffe, the man who won the first victory of the war, and undoubtedly saved the Province, has been ignored. Why?

There is, however, one small reminder of Sheaffe on Queenston Heights, and its discovery by Toronto militia officers makes an interesting story. Some years ago the Governor-General's Body Guards (now the Governor-General's Horse Guards, without any horses) were in camp at Niagara. The then commanding officer, Colonel G. Dudley Thomas, much interested in military history, decided to find, if possible, how Sheaffe had rallied his forces after Brock's death and led them on to victory as the sun set. He and his officers went over the whole battlefield, eager to find the route taken by Sheaffe. Their search was successful. They found, covered by long grass, a weather-beaten stone upon which were the words: "Sheaffe's Path to Victory, Oct. 12, 1812."

Who put that stone there? Probably that great military historian, Brigadier-General E. A. Cruickshank. Can any one tell the story of that Sheaffe Stone?"

It might be added here that the Niagara Parks Commission is now engaged in improving this location so that it may be properly seen by the public. Subsequent investigation disclosed that the stone was placed by the Women's Literary Club of St. Catharines, Ontario.

In the New York Times

The New York Times Book Review section carried a response to a query as to a poem about Van Rensselaer's defeat at Queenston, and a reader, Miss Louella D. Evertt, Boston, Mass., passed on the information that the poem inquired about, was titled "The Battle of Queenston", October 13, 1812, was by William Banker, Jr., and had 18 four-line stanzas commencing:

When brave Van Rensselaer cross'd the stream,
Just at the break of day,
Distressing thoughts, a restless dream,
Disturb'd me where I lay.

It is found on page 292 of Burton Stevenson's "Poems of American History," published by Houghton Mifflin Company, Boston.

Burton Stevenson's note prefacing the poem says that the capture of the "Guerriere" had greatly encouraged the Americans, and General Stephen van Rensselaer, in command of the northern army, determined to try another stroke at Canada. On October 13, 1812, he started to cross the Niagara River with 600 men, but the crossing was mismanaged, the militia refused to obey orders, and after a gallant fight, lasting all day, the Americans were forced to surrender to an overwhelming force of British and Indians.

First Royal Assent Given Canadian Laws

Toronto Globe and Mail—"One hundred and fifty years ago (on October 15, 1792) the first Royal assent was given by Governor Simcoe to legislation passed by the first Parliament of Upper Canada. The session, which had begun on September 15, was closed with as much British formality as could be had in the circumstances.

The first acts then assented to were the very framework of our liberties as citizens of Ontario (and, by transmission later, of the western Provinces), Janet Carnochan, the historian of Niagara, summed up the work of that first session in brief space:

The first act placed on the statute book by the new Parliament was one that established English law as the rule to govern all decisions relating to property and civil rights.

The second act established trial by jury in all cases of fact and added to the legislation already existing under the Quebec Act of 1763.

The third act established the Winchester measure as a standard for weights and measures in the Province.

The fourth and fifth acts provided for the recovery of debts and the erection of jails and courthouses by the Provinces.

The second session is historically important because then the Legislation of Upper Canada passed the first anti-slavery legislation in the world, years before the British abolished the traffic in human beings.

> Five sessions of the Parliament were held in Newark and the free British constitution and common law were firmly established by which Upper Canada was made the mistress of her own destinies and a member of the chain of Provinces that later was welded into the Dominion of Canada."

The above is reprinted in this report because that first Legislature session in Newark was held in Navy Hall, Niagara-on-the-Lake, which has been restored by the Niagara Parks Commission as one of the most historic buildings in the Niagara frontier region.

SIX-POINT BUCK PLUNGED OVER FALLS

Losses of swans which ride the cataract waters above the falls, in the Upper Rapids, until the pressure is so great that they are unable to rise, are not unusual. In October of 1942 a more unusual accident occurred. A rare six-point buck, almost entirely white from head to tail, plunged to its death over the Horseshoe Falls. The carcass, weighing 175 pounds, was retrieved from the river below the falls, by Roy Muma, Welland County game warden. It was believed that the animal came from Navy Island, entering the water on the American side of the river. The buck had a freak set of horns and unusually short legs.

Nearly a dozen crippled swans were sighted in the Niagara river immediately below the Horseshoe and American Falls on March 31, 1943 by William "Red" Hill, Jr., riverman. With Roy Muma, game warden, he tried to retrieve the injured birds which plunged over the cataracts during the night. Thousands of large beautiful white swans settled on the upper Niagara river on their migratory flight northward. Muma said that not in many years could he remember so many swans in this area.

BRIEF ITEMS OF GENERAL INTEREST

During the year an agreement was reached with the Town of Fort Erie allowing access to the waters of Lake Erie for a 16-inch water main.

The Commission decided to continue workmen's compensation under the Workmen's Compensation Board, operating under Schedule 2. This means that the Commission will have the Board act in all accident cases, but will not be on a premium paying basis.

The Commission gave each employee who enlisted a month's pay and an assurance of his post back on his return. Each member of the School for Apprentice Gardeners who enlisted received $50 and a congratulatory letter.

The Commission heard through Commissioner Hon. W. L. Houck that the services of Mrs. Charlotte Barton, R.N., hostess at the Commissioners' Quarters, who had been instructing Red Cross Home Nursing classes, were greatly appreciated.

Mrs. Ida Gripton, Niagara-on-the-Lake, was notified that her contemplated plans to reconstruct a verandah, leaving a small portion encroaching on property of the Commission, would not receive approval.

To control the erection of signs on the Horner property, Niagara-on-the-Lake, a lease at $35.00 per year was taken.

Grants during the year included: Niagara Falls General Hospital $200; Niagara Falls Chamber of Commerce $300; Wentworth Women's Historical Society (for upkeep of Stoney Creek Monument) $800; Niagara Falls Collegiate Institute $25.

Congratulations were sent by the Commission to His Honour Judge J. C. M. German, County Judge for Durham and Northumberland, on his appointment to that post. He is a valued member of the Niagara Parks Commission.

At the request of Commissioner Hon. W. L. Houck, "cats eyes" were placed at the turns in the Mather Park driveway to give better warning of the sharp curves for night drivers.

At the pleasure of the Commission and for war purposes, the Canadian Niagara Power Company was given authority to take additional water from the Niagara river to the extent of 5,000 additional horsepower. Their limit was 100,000 103,000 h.p.

Members of the staff of the Commission who serve in the Reserve Army were given one week's time with pay and one week without pay unless the second week was a part of that employee's vacation period.

The Commission gave endorsation to the employees' plan for hospital care. The endorsation was necessary since the plan is based upon payroll deductions.

Miss Helen Noble and Miss Eileen White of the special commercial class of the Niagara Falls Collegiate Institute and Vocational School were announced as winners respectively of the $15 and $10 scholarships awarded by the Commission.

G. E. F. Smith was named auditor for the Commission at payment of $750 annually.

The Commission gave formal approval to a plan to train stone mason, carpentry and iron workers' trades apprentices.

Ronald Way is continuing his work of bringing the history of the Commission up-to-date.

The congratulations of the Commission were extended to Commissioner Donald McGillivray, Port Colborne, on reaching his ninety-first birthday on January 14, 1943. A basket of roses was ordered sent to him later when it was learned that his health was not so good. Since appointment to the Niagara Parks Commission, he had been assiduous in his attention to the duties of his post, and his experience was much valued by his colleagues.

In closing this review of the 1942-43 fiscal year, the Niagara Parks Commission desires to pay tribute to the loyalty and efficiency of its staff, laboring with material and workmen shortage, but maintaining at a high standard the Queen Victoria Park grounds and buildings, and other portions of the Commission properties. Maxim T. Gray, O.L.S., General Manager and Secretary of the Commission, has been backed by the various departments under John Oakes, Head Gardener; K. M. Broman, Superintendent of Arboriculture; J. W. Archer, Accountant and Supervisor of Service; L. L. Gisborne, Works Superintendent; N. McCartney, Field and Office Engineer; and Ronald Way, Historian for the Commission.

Members of the Commission have been attentive to their duties, answering all calls upon their time and abilities.

Complete financial statements, prepared by the accounting staff and properly audited, follow this report, which is respectfully submitted to Your Honour by

THE NIAGARA PARKS COMMISSION
Hon. T. B. McQuesten, Chairman,
Dr. George B. Snyder, Vice-Chairman,
Hon. W L. Houck, B.S.,
Archie J. Haines,
Judge J. C. M. German,
Ross Harstone,
A. T. Whitaker,
Donald McGillivray.

Niagara Falls, Ontario,
August 19th, 1943.
